Part III went on to emphasize that the Royal Governor would be responsible, during the interim period, "for the maintenance of law and order and the protection of human rights." The Governor would exercise these powers as "Commander-in-Chief of the Defense Forces." Moreover, before any testing of opinion was carried out, censorship would have to be removed and a Royal Commission would have to review the cases of persons kept under restriction or detention. If the constitutional changes were found to be acceptable to the people of Rhodesia as a whole, "the British government will at the earliest possible date introduce the necessary legislation to grant independence to Rhodesia on this basis, and will commend this legislation to Parliament." But if the changes were found to be unacceptable, "the two governments will immediately confer together to consider what steps should be taken to devise alternative proposals for an independent constitution." Finally, Part III provided that not until legal government was restored would the British government "take all action in their power to bring about an immediate discontinuance of the economic and other sanctions at present in force."

The Rhodesian cabinet found Part III utterly unacceptable. In the view of Mr. Smith and his ministers, these provisions amounted to nothing less than absolute surrender. They would have abandoned their legislature; they would have yielded ultimate control of their own police and armed forces to the Royal Governor in any matter involving "the maintenance of law and order and the protection of human rights." The duration of an interim period was not fixed at four months precisely; it was four months indefinitely, or contingently, and subject to certain assumptions that were left to the Royal Governor and to Royal Commissions. For the first time in its history, Rhodesia would be subject to active British rule. There was no guarantee that independence could ever be achieved; there was no more than a promise that it would be talked about.

On Monday, December 5, Rhodesia informed Britain of its rejection of the *Tiger* proposals. The British government thereupon withdrew the proposals it previously had advanced and accepted, and announced that no solution hereafter would be acceptable which would grant independence prior to majority rule.

On December 7–8, the House of Commons debated and adopted the Labor Government's motion to seek mandatory sanctions through the United Nations. Speaking in opposition, Reginald Maudling sadly remarked that he feared Rhodesia was a problem "which could become for us what Algeria was for France." If it is a fact, he added, that from now on there is no prospect of a settlement with independence before majority rule, "it is for people in Rhodesia a fight to the finish. Let us face that." Debate on the Rhodesian question got under way before the UN's Security Council at 5 PM on December 8. It concluded on December 16, with the Council's adoption of Resolution 232. Rhodesia's request to be heard in her own defense was "mislaid" and strangely was not discussed until three weeks later.

Speaking in support of Britain's draft resolution on sanctions, Foreign Minister George Brown said that by reason of her illegal declaration of independence, Rhodesia had created acute dangers to peace and stability in the whole region of Central and Southern Africa. A small group of reckless men had provoked a situation fraught with great and growing danger of interracial strife and bloodshed. The matter could not be left to deteriorate. Not only the stability and progress of Rhodesia's immediate neighbors were at stake, but also the maintenance of international peace and security.

Some critics of British policy, Mr. Brown continued, took the position that sanctions would not suffice, and that force should be employed. He had made his government's position clear in the past, and would add but one word: We all know from experience that it is easy to start to use force, but often very difficult to see just where it will lead or how it will be possible to control or stop it. The proposed economic sanctions would have an immediate and telling effect. He urged their prompt adoption and full support.

Mr. Kapwepwe, speaking for Zambia on December 9, charged Britain with duplicity. He was more than ever convinced that the solution of the Rhodesian question had been purposefully delayed by the United Kingdom government. The talks between Mr. Wilson and Mr. Smith were a wicked scheme to sell out the African majority. Publication of the *Tiger* proposals had openly exposed Britain's collusion with a racist minority regime. World opinion would now hold the Wilson government criminally responsible for the denial of freedom, independence and self-determination to the people of Rhodesia. He asked if this new Wilson stratagem was merely a face-saving device. Or was it the final act in a plot to sell out the African majority of Southern Rhodesia and to destroy Zambia's economy? In Zambia's view, force was still "the only sure solution."

The delegate from Mali, Mr. Keita, took the same position. Britain was acting "with clever hypocrisy and in accordance with a cynical and premeditated plan." It was engaged in diabolical calculations of self-interest. No one should be deluded by the monstrous farce of the British. As for Mali, "we shall always insist that the use of force is the only means to overcome the rebellion in Southern Rhodesia; to try to claim the opposite is truly nonsensical."

The delegate from India, Mr. Parthasarathi, concurred: "My delegation has always held, and continues to hold, that the only really effective method is the use of force."

The delegate from Bulgaria, Mr. Tarabanov, observed that "if we wish truly to solve the problem in Southern Rhodesia effective measures must be taken, including the use of force by the United Kingdom under the auspices, if necessary, of the United Nations."

The delegate from Nigeria, Mr. Adebo, said that "we believe and have always believed quite firmly that force would be essential to bring about the downfall of the racist regime."

The delegate from Jordan, Mr. El-Farra, noted that if the mandatory sanctions fail in this purpose, "the only alternative is resort to force, and that we have been advocating all along."

The delegate from Senegal, Mr. Thiam, felt that Britain was engaged merely in trickery in asking for sanctions: "It should put down the rebellion by its own means, as France did in Algeria. The use of force appears to us to be the only means of solving the Rhodesian problem."

Other peaceloving members of the United Nations, including the delegate from the Soviet Union, denounced the Rhodesian regime for its denial of democratic rights. Ambassador Goldberg spoke at some length for the United States.

In the view of the U.S., he said, the sanctions are necessary in order to drive home to the illegal regime that the international community will not tolerate the existence of a discriminatory system based on minority rule in defiance of the United Nations and its principles. A century ago the United States had rid itself of the political principle of racial superiority. It should not be necessary for him to emphasize that what could not be accepted by the United States in the mid-nineteenth century surely cannot be accepted by the international community in the late twentieth century.

Mr. Goldberg acknowledged that some persons would ask why it is proper to impose mandatory sanctions in the case of Rhodesia, but not in other cases. The Rhodesian situation, he thought, contains a number of unique elements: It involves the seizure of power by a minority bent upon subjugating a vast majority on racial grounds. It presents a dangerous and inflammatory threat to peace. In any event, it is an unhappy fact, which we must recognize, that some situations exist in the world in which the Council has been unable to act effectively. "Here is a situation in which we can act . . ."

The British draft resolution was amended to add a prohibition against the shipment of oil or oil products to Rhodesia. The Council then adopted the resolution by a vote of 11–0, with four abstentions. The favorable votes were cast by Argentina, China, Japan, Jordan, Netherlands, New Zealand, Nigeria, Uganda, the United Kingdom, the United States, and Uruguay. Those abstaining were Bulgaria, France, Mali, and the Soviet Union.

During the course of the Security Council's debate, a considerable volume of press comment in the United States was directed toward the legality and toward the wisdom of the UN resolution.

Article 33 of the UN Charter establishes the procedures that must be followed by "the parties to any dispute, the continuance of which is likely to endanger the maintenance of peace and security." These procedures include negotiation, enquiry, mediation and conciliation. The Security Council, when it deems necessary, is required to call upon the parties to settle their disputes by such means. None of these procedures, however, was invoked in the dispute between Britain and Rhodesia, apparently upon the reasoning that Rhodesia was not a state, and hence could not be a "party to any dispute."

The other side of that proposition is that Rhodesia must therefore be a colony subject to the jurisdiction of Great Britain. Yet if this were so, Article 2, Section (7) would apply. This says that "nothing contained in the present charter shall authorize the United Nations to intervene in matters which are essentially within the domestic jurisdiction of any state . . ." (France adopted the view in abstaining that the Anglo-Rhodesian dispute was an essentially domestic issue, and thus beyond the authority of the Security Council.)

Russia also abstained in the final vote, though for other reasons. (The delegate of the USSR explained his abstention by his disappointment at defeat of certain severe amendments sought by the African bloc.) Thus two of the Council's permanent members did not register affirmative votes on the resolution. Chapter V, Article 27, Section (3) of the Charter, provides that decisions of the Security Council on all matters, other than procedural, shall be made by an affirmative vote of nine members, *including the concurring votes of the permanent members.*

The resolution nevertheless was declared adopted pursuant to the provisions of Article 39, empowering the Security Council to determine when a threat exists to international peace and security, and to take appropriate action against such a threat. Yet it would be supposed that any such determination would involve at the very least, a meticulous investigation into the facts. Such a solemn finding presupposes convincing evidence of hostile and aggressive acts. No such investigation ever was undertaken, and no such evidence was gathered. No such evidence exists.

Walter Lippmann, dean of American commentators on foreign affairs, objected strongly to the action of the UN in adopting Britain's resolution.

"This is surely a most extraordinary way to suppress a rebellion against the sovereignty of an imperial power," Mr. Lippmann remarked. "At any other time a rebellion like that in the Rhodesian capital of Salisbury would have been put down by British troops, or if the troops were unable to put it down, the independence of the Rhodesian government would have been recognized by a treaty of peace. But what has actually happened is that the Wilson government did not feel strong enough to suppress the rebellion, or was afraid the British voters would object if it tried. In any event, the Prime Minister of Great Britain assured the rebel government that it would not be suppressed. Having given up the game at the outset, Mr. Wilson has been trying ever since to win the game by harassment and threats and bluff and other devices. . . . Mr. Wilson has, of course, failed . . .

"The plea to the United Nations to use force against Rhodesia is a disservice to the United Nations. Mr. Wilson is asking the UN to do what it was never meant to do, what it is not organized to do, and what it cannot do."

A number of members of the Congress joined the press in these objections to the imposition of sanctions, but their voices were unavailing. On January 5, President Johnson issued Executive Order 11322, extending the prohibitions of the UN resolution to all persons subject to the jurisdiction of the United States. Mr. Johnson cited as his authority "the authority vested in me by the Constitution and laws of the United States, including Section 5 of the United Nations Participation Act of 1945." On February 28, the Treasury Department issued a supplementary regulation through the Office of Foreign Assets Control, further inhibiting U.S. commerce with Rhodesia and directing attention to Section 5(b) of the UN Participation Act; this section provides for a fine of up to $10,000 and imprisonment for not more than ten years for willful violation or evasion of the President's order.

We are not here raising the question of the President's authority to issue the order referred to. Nor do we intend any criticism of the UN Participation Act which gave him this authority. We are concerned with the position which the United States took at the UN itself when the resolution on sanctions was presented.

V

In all the multiple ironies of the Rhodesian affair, perhaps nothing is more ironical than the active help and encouragement given to Great Britain in this venture by the United States of America. The Declaration of Independence proclaimed in Salisbury on November 11, 1965 was unusual but it was not unprecedented within the British Empire. The last preceding such resolution was proclaimed in Philadelphia in July of 1776. The English colonies that then declared themselves free and independent states were to adopt a Constitution in 1788 specifically permitting Negro slavery. Thereafter, the States were to establish an appalling record of treachery, genocide, and discrimination in their treatment of the Indian. A right of franchise, regardless of race, was not to be assured in the United States until 1869. The right of women to vote was not to be assured until 1920. The principle of "one-man one-vote" was not to be judicially recognized until *Baker* v. *Carr* in 1962. In some areas of the American South, discrimination against the Negro voter exists so significantly, to this day, that federal examiners have had to be assigned in certain counties and parishes. How remarkable it is that the United States of America, in the light of this history of two centuries of revolution and evolution, should align itself with Great Britain in a punitive course of action predicated upon Rhodesia's failure in seventy years to attain a democratic society!

There is more. In pursuit of its policy to oppose Communist expansion throughout the world, the United States in 1961 sought the help of its friends in enforcing an embargo upon the sale and shipment of strategic goods to Communist Cuba. Great Britain coolly refused to assist the United States in this regard. The United States has committed itself to full-scale war in Vietnam. Great Britain has declined to assist this effort in any way. Meanwhile, tiny Rhodesia sturdily and persistently has pursued a policy of stout anti-Communism. She has been a small but good friend to the United States. One is inclined to ask, What price friendship?

The basic charge against an independent Rhodesia, as we have remarked, arises from her purported oppression of the black majority, and especially from the absence in Rhodesia of a system of majority rule. On the basis of our own observations, the charge is groundless. The African Rhodesian, far from being oppressed or exploited, is benefiting immensely from schools, medical services, employment opportunities and internal security. The franchise laws of Rhodesia are nonracial; they are based upon considerations of literacy and property which have an ancient and respectable history within the United States. Under the constitutional changes accepted by Mr. Smith in the *Tiger* negotiations, majority control of the Rhodesian Parliament would be vested in the African people within a generation.

Upon the unproved and bizarre theory that a peaceful Rhodesia is a threat to international peace, the United Nations imposed mandatory sanctions for the first time in its 21 years of existence. In taking this action, the Security Council trampled upon the UN Charter and made a travesty of its own supreme law. By general agreement of most observers (including the envious and hostile African observers), the sanctions will not succeed in their announced purpose; they will not bring the Smith government to its knees. If this prophecy should prove correct, the impotence of the United Nations will stand vividly revealed. The melancholy chronicle of the old League of Nations offers a benchmark in history by which the fate of impotent international organizations may be charted.

Assuming the failure of the mandatory sanctions, what then? Force? By Great Britain alone? The Labor government would invite its own dissolution. Well, then, by a police force bearing the flag of the United Nations? It cannot be seriously supposed that public opinion within the United States, let alone within many European nations, would support an aggressive war by the UN against Rhodesia—especially if such a war promised to involve Portuguese Angola and Mozambique, and South Africa, upon Rhodesia's side. As Mr. Lippmann has remarked, "The United Nations has no more force than the force which its strongest members will provide themselves or will approve of."

The unjust and foredoomed policies of Britain and the United Nations cannot be permitted to continue indefinitely. What is needed, in our view, is a fresh effort toward reconciliation along the lines of the *Tiger* proposals. Here a foundation was laid in December of 1966. It ought not to be abandoned in the spring of 1967. Britain's flat pledge that she would not hereafter consent to any plan of independence before majority rule was a mistake. Common sense tells us that mistakes ought to be corrected; they ought not to be entrenched. It may be that Rhodesia's distrust of certain proposals as to an interim period was excessive. Means must be found for relieving this distrust, and for devising substitute machinery for achieving a peaceful settlement. It is our hope that our own government will take the lead by offering its good offices in an attempt to make sound and practical sense out of a situation which has been permitted to deteriorate into an apparent stalemate.

Rhodesia's wise and thoughtful adherence to policies of evolutionary development can be of immense value to a world that is wrongly obsessed with the motion of instant achievement. It simply is not true that a largely primitive society can be transformed into a politically mature society in the fashion of instant coffee or instant rice. So complex and difficult an effort takes time above all else—time, and patience, and good will. This is what Rhodesia asks. And it is wrong, shamefully wrong, that the most enlightened nations of the world, having achieved their own status through evolutionary means, should have imposed upon Rhodesia anathema instead.

COMMODITY EXCHANGE BILL NEEDS ENACTMENT

Mr. MONTGOMERY. Mr. Speaker, I ask unanimous consent that the gentleman from Tennessee [Mr. Anderson] may extend his remarks at this point in the Record and include extraneous matter.

The SPEAKER pro tempore. Is there objection to the request of the gentleman from Mississippi?

There was no objection.

Mr. ANDERSON of Tennessee. Mr. Speaker, the Department of Agriculture has just released its annual bulletin of futures trading data entitled, "Commodity Futures Statistics." This bulletin graphically illustrates the growth of futures markets in this country in recent years. The volume of trading in the 15 commodities regulated under the commodity Exchange Act was 16.9 million transactions for the fiscal year ending June 30, 1967. The previous record was 14.5 million transactions a year earlier, and new records had been established in each of the previous 3 years.

Even more impressive is the value of futures contracts traded on regulated markets. According to the bulletin, the estimated value of futures contracts traded in all regulated commodities in fiscal 1967 was just under $75 billion. This compares with the value of approximately $26 billion only 7 years ago.

I think it is apparent from these figures that futures trading is big business. It is also a business that vitally affects producers, merchandisers, processors, and consumers of agricultural commodities.

Futures trading in a number of agricultural commodities has been under Federal regulation for a long time. However, hearings held by the Agriculture Committee recently showed quite clearly that the regulation of these markets is badly in need of updating and strengthening, and that additional commodities should be brought under regulation. H.R. 13094, which was approved by the Agriculture Committee by a vote of 28 to 1, would accomplish these purposes. It has been approved by the Rules Committee and is now awaiting consideration by the House. I think it is imperative that the House act promptly on this bill to give the Secretary of Agriculture the authority that he obviously needs to regulate these important markets.

FRANCE AND THE UNITED STATES

Mr. MONTGOMERY. Mr. Speaker, I ask unanimous consent that the gentleman from Texas [Mr. Gonzalez] may extend his remarks at this point in the Record and include extraneous matter.

The SPEAKER pro tempore. Is there objection to the request of the gentleman from Mississippi?

There was no objection.

Mr. GONZALEZ. Mr. Speaker, the French are a great people, a people with which we have an inextricable bond. I am very perturbed by the callous disregard of the facts, and the credence given to commentators who disregard the facts, in an apparent effort to harden and exaggerate the current differences between the American and the French people.

France is the homeland of equality, liberty, and fraternity. The French are not our enemy. They have supported us when the chips were down. De Gaulle was the first to support us during the Cuban crisis in 1962. Which was one of the first countries to support our position in the Cuban missile crisis? How can the French, whose contribution to the international gold bank in London was only 9.3 percent possibly break Fort Knox?

I am disturbed about some of the remarks on the floor of this body concerning the recent press conference of President de Gaulle. I am confounded by the hostility and the demand for retaliation. I am particularly amazed at the distortion of some newspaper reports that De Gaulle made a number of anti-Semitic remarks. I wish my colleagues would compare these distortions with the actual statements De Gaulle made on Israel and the Gulf of Aqaba.

I may not agree with President de Gaulle's views on gold and the gold standard, but I respect his integrity and have always admired his heroism and struggle for freedom.

To that end, I include at this point in my remarks the transcript of General de Gaulle's press conference of November 27, and also a news story of the Washington Post of November 30 containing remarks by another great Frenchman, Jean Monnet, which I believe more accurately reflects the true state of feeling:

> Gentlemen, I am pleased to see you. I am ready to answer the questions that you would like to ask me on the subjects that are present in all our minds.
>
> Here is a whole group of subjects. There is naturally our economic and social policy. It is connected, and I will be led to say so, to the functioning of the international monetary system.
>
> There is the question of the Middle East conflict, of course. There is the great Quebec affair. There is everything related to Great Britain and, in particular, from the standpoint of her candidacy for the Common Market. There is the subject of the institutions, our regime, the manner in which it functions and what it can be in the future. I think that I have not forgotten anything, except to add what I have been asked re-

garding the trip to Poland, what was said and what it means.

Well, we are going to reply on these subjects by beginning, if you wish, with what concerns our economic and social policy.

Question. General, the lowering of customs barriers within the Community of the Six and the gradual disappearance of customs barriers between the countries of the Europe of the Six and the other countries of the world, raise the problem of France's preparation for it. Do you think our country is capable of facing it?

Some Anglo-Saxon press organs are accusing the French authorities of having contributed to the devaluation of the pound and to the upheavals recorded on the gold market. What really happened?

Answer. France is in the process of accomplishing a vast mutation. A vast economic and social mutation. This has already been said. This mutation, naturally, places in question all the interests, all the structures, all the habits and, inevitably, all kinds of reactions, demands and anxieties that are of course stirred up by all the demagogies and made all the more political because it is the State that guides this evolution. The State alone must do so, because it is responsible for the general interest and the country's destiny, which are the stakes of change, and it alone can do so because it holds the necessary means, legal, financial, administrative, tariff, diplomatic and so on. Moreover, it must apply its action to the essential factors of development without allowing itself to dissipate at the mercy of fractional or episodic claims.

Well, if we want to have an overall idea of France's economic and social policy, we need only note on what points and in what way public action has chosen to exercise itself. Here is where things stand:

In the industrial area, the goal to be reached being that it be competitive without any reservation within the Common Market and broadly so on the world scale; to promote investments that modernize its equipment; to encourage, to assist in its concentration and its best management methods, which gives its business firms dimension and strength; to foster its exports and its investments abroad, which extend its field of action. The fact is that for the past eight years, French industrial production has grown 5½% per year and that industrial exports have tripled, so to speak.

In the agricultural area, which must become one of the modern foundations of our economy, to induce its farms to live and work, not like in the past, for the simple subsistence of the families that cultivate them, but rather to provide, sell and purchase the products that can make them profitable; to encourage groupings whose goal is to organize production, selection and markets toward this end; to improve the structures by acting to enlarge the overly small plots in order to facilitate retirement, conversions, reconversions and mergers and reparceling.

The fact is that for eight years, budgetary aid to agriculture has multiplied tenfold. It is likely that, at the rate we are following, in ten years there will remain in France one million five hundred thousand farms that will be at least profitable as regards the great majority, which will employ 10% of our active population, instead of 55% at the end of the last century, and which, all the same, will produce a total of three times more than at that time.

In the domain of the advanced activities that involve and that accelerate production and productivity—that is, research, the atom, electronics, aeronautics, space, television and so on—it is a fact that for eight years the State has been making a massive contribution, which this year is eight times larger than it was in 1958 and which it firmly intends to increase in the future by priority.

Naturally, there is no invention, no computer, no machine that can mean that, at the basis of the human task, there is no human effort. For the progress of men, men are needed. And they must be numerous because, for France, all the possibilities of her territory have not yet been and still must be exploited. That is why the increase of our population must be the first of our investments, and that is why we are constantly led to take new measures in order to aid better and more the flowering of our young French families. Also, our active population must, as much as possible, be divided rationally between the tasks on the basis of the needs of the national activity and each must be suited to his employment. This implies the extension and improvement of occupational training, that of the young and that of adults, including cadres and management.

It is known that the public action exerted to that end is using ten times as many resources as were used eight years ago. That also implies that student guidance be definitely organized in the framework of the national educational system, which is soon going to be done. It is also necessary that, in the very considerable and inevitable major evolution of all our activities, labor and workers find their security, despite changes in jobs and locations that are necessary, for which public aid is now being used in all sorts of forms, either on the national scale or on the regional scale. And, lastly, in business firms, the direct participation of employees in results, capital and responsibilities must become one of the basic factors of the French economy. A very vast social transformation in which profit-sharing, henceforth prescribed by law, represents an important stage.

Progress, like happiness, exists only by comparison. In our industrial era, our country got off to a late start compared to some others from the standpoint of its development. For one hundred years, it underwent the direct national trials and, in addition, it is relatively rather poorly endowed in natural resources—energy and raw materials. However, the fact is that in the free world—Europe, America, Asia, Africa—we are in third place in terms of the value of our gross national product. Before us come, in this respect, the United States and Germany. Among the major industrial countries, we come in second place, after the United States but before Germany, Britain, Italy, Japan, in terms of the value of the per capita national product—which is also a gauge of our standard of living and which has risen by an average of 50% over the past eight years. The fact is that the growth rate of our productivity is annually on the average of 4½% which is less than in Japan and Italy, which is as much as in Germany, but which is more than in the United States and Great Britain.

The fact is that, excluding America whose population is four times larger than ours and a single other Western European country, we have more researchers—40,000—than any other State and our achievements in our advanced activities—the atom, the most sophisticated reactors (for example, rapid-neutron reactors), the Caravelle, tomorrow the Concorde, the Diamant rocket, color television, etc.—are known the world over, and that is why we envisage without alarm the disappearance of all duties within the Common Market. It is true that we find ourselves faced with an American hold on certain of our businesses, but we know that this is due, to a great extent, not so much to the organic superiority of the United States as to the dollar inflation that it is exporting to others under the cover of the gold exchange standard. It is rather remarkable that the total of annual deficits in the American balance of payments over the past eight years is exactly the total of American investments in the countries of Western Europe. There is in this, obviously, a unilateral and artificial external element that is weighing on our national patrimony, and it is known that France wishes that an end be put to this abuse to the interest of the entire world, and even to the interest of the United States, for whom the payments deficit and inflation are as lamentable as they are for everybody.

It is possible that the squalls currently being unleashed—without France having anything to do with it—and which have swept away the rate of the pound and which threaten that of the dollar, in the final analysis lead to reestablishing the international monetary system on the basis of immutability, impartiality and universality, which are the privileges of gold.

Those, taken as a whole, are our goals and our results in terms of our economic policy, and our social advancement. People will say that this is self-satisfaction. No, we are not completely satisfied, and moreover for a good reason: it is because the very character of our times is that, whatever one may do, one can do more and one can do better. But given what we are achieving in the midst of nations, we believe that the levers we are making use of are those best suited to us, and these levers are: free enterprise, which must not be a bulwark for immobilism but which must be, on the contrary, a foundation for impetus, for risk, for development; and international competition, which requires constant improvement; the leadership, not to say the dirigisme, that selects the goals and the paths, arranges the means and harmonizes the efforts. That is why the Plan, in which the conditions for our progress are regularly set and coordinated, has become a vital institution in our country.

MIDDLE EAST

Question. General, war broke out in the Middle East six months ago. It ended soon afterwards, as we know. What do you think of the evolution of the situation in that sector since last June?

Answer. The establishment between the two world wars—for it is necessary to go back that far—the establishment of a Zionist home in Palestine and then, after World War II, the establishment of a State of Israel raised at the time a certain number of apprehensions. One could wonder, indeed, and people did wonder, even among many Jews, if the implantation of this community on lands that had been acquired in more or less justifiable conditions, and in the middle of Arab peoples who were thoroughly hostile to it, was not going to produce constant and interminable friction and conflicts. Some even feared that the Jews—up to then scattered, but who had remained what they had been down through the ages, that is, an elite people, sure of itself and dominating—once they gathered on the site of their former grandeur, might come to change into a fervent and conquering ambition the very touching hopes that they had for nineteen centuries.

However, despite the tide, sometimes mounting, sometimes receding, of ill will that they provoked, that they caused more exactly in certain countries and at certain times, a considerable capital of interest and even of sympathy had formed in their favor especially, it must be said, in Christendom; a capital that resulted from the vast memory of the Bible, nourished at all the springs of a magnificent liturgy, maintained by the commiseration inspired by their ancient misfortune and poeticized in our country by the legend of the Wandering Jew, heightened by the abominable persecutions that they experienced during World War II and swelled, since they had again found a homeland, by their constructive work and the courage of their soldiers.

That is why, independent of the vast assistance in money, influence and propaganda that the Israelis received from Jewish circles in America and Europe, many countries, among them France, saw with satisfaction the establishment of their State on the territory that had been recognized them by the powers, while hoping that they succeed, by using a little modesty, in finding a peaceful *modus vivendi* with their neighbors.

It must be said that these psychological factors have changed somewhat since 1956; as a result of the French-British Suez expedition, we saw in fact appear a State of Israel, warrior and determined to enlarge itself. Then, the campaign it conducted to double its population through the immigration of new elements led one to think that the territory it had acquired would not be sufficient for long and that, to enlarge it, it would be led to use any occasion that would present itself. That is why, moreover, the Fifth Republic freed itself, vis-à-vis Israel, of the special and very close ties that the preceding regime had established with that State, and the Fifth Republic applied itself, on the contrary, to favoring détente in the Middle East.

To be sure, we maintained cordial relations with the Israeli Government and we even provided it, for its eventual defense, with the weapons it asked to purchase, but at the same time, we were unsparing in our advice for moderation, notably on disputes involving the waters of the Jordan or skirmishes which periodically opposed the forces of both sides. Finally, we refused to give our official endorsement to its installation in a sector of Jerusalem which it had seized and we kept our Embassy in Tel Aviv.

On the other hand, once the Algerian affair was concluded, we resumed with the Arab peoples of the Middle East the same policy of friendship and cooperation that had been France's for centuries in that part of the world and that reason and sentiment dictate must today be one of the fundamental bases of our foreign action.

Of course, we did not let the Arabs ignore that, for us, the State of Israel was a *fait accompli* and that we would not allow it to be destroyed. Thus, we could imagine that the day would come when our country could directly help to see to it that a real peace be concluded and guaranteed in the Middle East, provided that no new drama came to rend it.

Unfortunately, the drama did come. It was heralded by a very great and constant tension that resulted from the scandalous lot of the refugees in Jordan and also from the threats of destruction hurled at Israel. On May 22nd the Aqaba affair, unfortunately created by Egypt, was to offer a pretext to those who dreamed of fighting. In order to avoid hostilities, France had, as early as May 24th, proposed to the three other great powers to forbid, jointly, each of the two parties from starting to fight.

On June 2nd, the French Government had officially declared that eventually it would lay the blame on whoever would first enter into combat and that is what it repeated very clearly to all the States involved; that is what I had personally said on May 24th to Mr. Eban, Israel's Foreign Affairs Minister, whom I saw in Paris.

"If Israel is attacked, I told him, then, in substance, we will not allow it to be destroyed. But if you attack we will condemn your initiative. To be sure, despite the numerical inferiority of your population, considering that you are much better organized, much more united and much better armed than the Arabs, I do not doubt that, in that event, you would win military successes, but later you will find yourselves engaged locally and on the international level in growing difficulties, all the more that war in the Middle East cannot fail to increase a deplorable tension in the world and to have very unfortunate consequences for many countries, so much so that it is on you, having become conquerors, that the disadvantages would be blamed."

We know that France's voice was not heard. After attacking, in six days of combat, Israel took possession of the objectives it wanted to acquire. Now, it is setting up, on the territories it has taken, the occupation that cannot take place without oppression, repression, deportation and there is springing up against it a resistance which in its turn it qualifies as terrorism. It is true that the two belligerents are observing, for the time being, in a more or less precarious and irregular manner, the cease-fire prescribed by the United Nations, but it is quite evident that the conflict is only suspended and that there can be no solution, except through international channels. But such a settlement, unless the United Nations tears up its own Charter, such a settlement must have as a basis the evacuation of the territories that have been taken by force, the end of all belligerency and the mutual recognition of each State involved by all the others. Then, through the decisions of the United Nations, in the presence and under the guarantee of its forces, it would probably be possible to set the specific outline of the frontiers, the conditions of life and security on both sides, the lot of the refugees and minority groups and the conditions of free navigation for all, notably in the Gulf of Aqaba and the Suez Canal.

In France's view, if this were to happen, Jerusalem should be given an international status.

For a settlement to be implemented, it would be necessary that there be the agreement of the great powers which would *ipso facto* entail that of the United Nations, if such an agreement came into being, France is in advance prepared to lend on the spot her political, economic and military assistance, so that this agreement be effectively applied. But one cannot see how any agreement could come into being—not fictitiously on the basis of some hollow formula, but effectively for a common action—so long as one of the greatest of the four will not have disengaged itself from the hateful war it is conducting elsewhere. For everything is related in today's world. Without the Vietnam drama, the conflict between Israel and the Arabs would not have become what it is and, if tomorrow, Southeast Asia were to see peace re-established, the Middle East would soon regain it, to the benefit of the general détente that would follow such an event.

CANADA

Question. Mr. President, last July from the balcony of the City Hall at Montreal you said four words which have gone around the world. Four months after this event, would you have any reflections to add to those you made on your return from Quebec? On the other hand, could you tell us what, in your view, are the main goals of cooperation between France and Quebec—a cooperation which has been developing rapidly for some time?

Answer. It is the French who, over two and a half centuries ago, up until 1763, had discovered, populated and administered Canada. When, 204 years ago, the royal government which had suffered serious setbacks on the continent and which, because of this, could not maintain the war in America against England, felt it must leave, 60,000 Frenchmen had settled in the St. Lawrence basin. Subsequently, their community received only minimal new elements from Metropolitan France, and that at a time when millions and millions of British immigrants, recently supplemented by new arrivals—Slavs, Mediterraneans, Scandinavians, Jews and Asians, who were led by the Canadian Government of Ottawa to become Anglicized—were settling down throughout the territory.

On the other hand, the British, who from that time had been in control of the government, administration, the army, money, industry, trade and higher education in Canada, had for long and naturally exerted great efforts of constraint or seduction to bring the French Canadians to renounce being themselves. Thereupon, the huge expansion of the United States had been triggered, an expansion that threatened to engulf the economy, character and language of the country in the American mold. Finally France, absorbed as she was by many continental wars and also by numerous political crises, dissociated herself from her abandoned children and maintained only insignificant relations with them. Everything, therefore, seemed to conspire to their being in the end submerged.

Well, by what one can only call a miracle of vitality, energy and loyalty, the fact is that a French nation, a piece of our people, is appearing today in Canada and wishing to be recognized and treated as such. The 60,000 Frenchmen who were left there formerly are now over six million, and they are more French than ever. In Quebec itself there are four and a half million of them, that is, they constitute the huge majority of the population of that vast province. For generations these people of peasant origin, little people who cultivate the land, have multiplied magnificently in order to stand up against the rising tide of invaders. At the price of unparalleled efforts around their poor priests, with as their motto "I remember," they strove to and succeeded in keeping their French language, traditions, religion and solidarity. But suddenly they no longer stop at this passive defensive and, like all other nations, they aspire to become masters of their destiny. They do so all the more ardently, now that they feel themselves subordinated to the others, no longer politically alone but also economically.

In effect, given the rural, isolated and inferior position to which the French community had been relegated, industrialization proceeded, so to speak, above it: the industrialization which, there as everywhere, dominates modern life. One could therefore see, even in Quebec, that it was the Anglo-Saxons who supplied the capital, owners, management and engineers, who trained, in their way and for their enterprises, a large part of the active population, in short, who disposed of the country's resources. This preponderance, together with the so-called "federal" but necessarily partial action of the Canadian Government in Ottawa, placed the French in an increasingly inferior position and exposed their language, their substance and their character to increasing dangers. They did not resign themselves at all to this state of affairs; they resigned themselves all the less that, belatedly but vigorously, they were putting themselves in a position to take over their own development. For example, the young people now graduating from their modern universities and their new technical schools feel perfectly capable of developing the great resources of their country and even, without ceasing to be French, of participating in the discovery and exploitation of all that the rest of Canada contains. All this makes the movement of emancipation that has seized the French people from across the Atlantic perfectly understandable and also shows that nothing is more natural than the impetus that at the same time makes it turn toward France. In recent years, a powerful political current has been formed in Quebec, no doubt diverse in its expression but unanimous as regards the determination of the French to take their affairs into their own hands. The fact is there and, of course, they consider the mother country no longer only as a very dear memory, but as the nation whose blood, heart and spirit are the same as their own and whose new strength is particularly suited to contribute to their progress, whereas, conversely, their success could provide for France, as far as her progress, cultural expansion and influence are concerned, a considerable support. Thus, in particular, the fact that the French language will win or lose the battle in Canada will weigh heavily in the struggle which is waged for it from one end of the world to the other.

Thus, it is with great joy and great interest that the Government of the Republic welcomed in Paris the Government of Quebec, in the person of its successive heads, Mr. Lesage and Mr. Daniel Johnson, and concluded with them the first agreements for common action. But it was obvious that this rediscovery of one another by France and French Canada had to be solemnly recognized and celebrated on the spot. That is why Mr. Daniel Johnson asked me to go and visit Quebec, and that is why I went last July.

Nothing can give any idea of the immense wave of French faith and hope that swept through the entire people of Quebec when the President of the Republic passed by. From Quebec to Montreal, all along the route, 250 kilometers long, bordering the St. Lawrence and which the French Canadians call the King's Road because in the past, for generations, their fathers had hoped that one day a French head of state would come and drive along it, millions, millions of men, women and children had gathered to shout fervently, "Long live France!" And these millions were waving hundreds and hundreds of thousands of tricolor flags and of Quebec flags, and there was practically no other emblem.

Everywhere I stopped, having at my side the Prime Minister of Quebec and one of his colleagues and welcomed by the local elected officials, it was with unanimous enthusiasm that the crowd welcomed the words that I spoke in expressing three self-evident facts. First you are French. Then, in that capacity, you must be masters of yourselves. And lastly, you want Quebec's modern development to be yourselves. After which, everyone sang the *Marseillaise* with an indescribable fervor.

In Montreal, the second French city in the world, and which was the last stop on my trip, the wave of liberating passion was such that France had, through me, the sacred duty to respond to it unequivocally and solemnly. That is what I did, by stating to the crowd assembled around the City Hall that the motherland does not forget her children in Canada, that she loves them, that she intends to support them in their effort of emancipation and of progress and that, in return, she expects them to help her in the world today and tomorrow. And then I summed up everything by exclaiming "Long live free Quebec!" which brought the flame of resolution to its height.

That Quebec be free is indeed what is at issue. At the point where things stand, in the irreversible situation that was demonstrated and accelerated by the public spirit during my passage, it is evident that the national movement of the French Canadians, and also the equilibrium and peace of all of Canada, and moreover the relations of our country with the other communities of that vast territory, and even the world's conscience which has now been enlightened—all this requires that the question be solved.

Two conditions are necessary: the first entails a complete change regarding the Canadian structure such as it currently stands as a result of the act granted 100 years ago by the Queen of England and which created the federation. In my opinion, this will necessarily result in the advent of Quebec to the rank of a sovereign State and master of its national existence as are, throughout the world, so many other people, so many other States that are not as valid or even as populated as Quebec. To be sure, this State of Quebec will have to settle with the rest of Canada, freely and on an equal footing, the conditions of their cooperation in order to control and exploit a very difficult nature over great expanses and also to cope with the encroachment of the United States.

But we do not see how things could result otherwise and, moreover, if that is their outcome, it goes without saying also that France is quite ready, with a Canadian entity that would take this new character, to entertain the best possible relations. The second condition, on which depends the solution to these great problems, is that the solidarity of the French community on both sides of the Atlantic become organized. In this respect, things are progressing well. The forthcoming meeting in Paris, we hope, of the Government of Quebec and the Government of the Republic should give an even greater impetus to this great French task, essential in our century. In this task, moreover, all the French of Canada that do not live in Quebec and that number one and a half million will have to participate, in conditions that will have to be set. I am thinking in particular of those 250,000 Acadians who settled in New Brunswick and who have also maintained a very touching loyalty to France, to her language and to her soul.

Basically, all we French, whether we come from Canada or from France, we can say, like Paul Valéry wrote a few days before dying: "What has been done during so many centuries of searching, misfortune and grandeur, and which runs such great risks in an era when the law of the greatest number rules, must not perish. The fact that a French Canada exists is a comfort for us, an element of inestimable hope . . . this French Canada asserts our presence on the American continent. It shows what our vitality, our endurance, our value of work can be. It is to French Canada that we must transmit what we hold most precious—our spiritual wealth. Unfortunately, too many French people have very vague and hasty ideas about Canada." And Paul Valéry concluded: "Here, we could all too easily criticize our educational system. What would he have said of our press had he lived long enough to read all that so very many of our newspapers published—is it not so?—on the occasion of the visit General de Gaulle made to the French people of Canada?

Believe me, for them also, for them above all, it is necessary that France be France.

POLAND

Question. General, during your trip to Poland, you raised on several occasions the problem of the frontiers and you sketched the broad lines of a settlement within the framework of a Central Europe. Could you give us more specific indications on this policy?

Answer. Let me tell you that the trip I made to Poland in September brought to light, brought to blinding light, two obvious facts. The first is the extraordinary vitality of the Polish people, today greater than it ever was, I think, despite all the trials it has experienced; and the second is its friendship for France, which, too, has never been greater. Finding myself on Polish territory, in a region which, in my view, can no longer be contested, must not be contested, I noted what was striking—that is, the Polish character of the city where I was.

I did this without wishing, the least in the world, to offend our German friends. In order to build the Europe that must be built and that includes a West, a Center and an East, it is necessary that everyone be respected, including the great German people. I do not believe I should say more today.

GREAT BRITAIN AND THE COMMON MARKET

Question. I wanted to ask you if, after the recent devaluation of the pound sterling, you think that Britain is now more in a position to enter into the Common Market than six months ago, when you held your last press conference?

Answer. Ever since there have been men and ever since there have been states, any great international project has been imbued with seductive myths. That is quite natural, because at the origin of the action there is always inspiration, and that was true for the unity of Europe. Ah, how fine and how good it would be should Europe be able to become a fraternal and organized entity in which each people would find its prosperity and its security. This also holds true for the world. How marvelous it would be to see disappear all the differences of race, language, ideology and wealth, all the rivalries, all the frontiers that have always divided the world.

But, however sweet dreams may be, the realities are there and, on the basis of whether or not one takes them into account, policy can be a rather fruitful art or a vain utopia.

It is thus that the idea of joining the British Isles to the economic Community formed by the six continental States arouses wishes everywhere that are quite justified ideally, but it is a matter of knowing if that could be done today without rending, without breaking what exists. Now, it happens that Great Britain, with truly extraordinary insistence and haste—certain reasons for which the recent monetary events perhaps cast some light on—had proposed the opening, without delay, of negotiations in view of her entry into the Common Market. At the same time, Britain stated that she accepted without restriction all the provisions that rule the Community of the Six, which seemed somewhat to contradict the request for negotiations, for why would one negotiate on clauses that one would have entirely accepted in advance? Actually, we are viewing here the fifth act of a play during which Britain's very diverse behaviors with regard to the Common Market have succeeded one another without seeming to be alike.

The first act had been London's refusal to participate in drafting the Rome Treaty, which it was thought, across the Channel, would never come to anything. The second act brought out Britain's deep-seated hostility toward European construction, once that construction started to take shape. And I still hear the summons which in Paris, as early as June 1958, my friend MacMillan—then Prime Minister—addressed to me, who compared the Common Market to the continental blockade and who threatened to declare it at least a tariff war.

The third act was the negotiations conducted in Brussels by Mr. Maudling for a year and a half, negotiations designed to make the Community bow to Britain's conditions and halted when France made her partners note that the issue was not that, but precisely the opposite. The fourth act, at the start of Mr. Wilson's Government, was marked by London's lack of interest in the Common Market, the maintenance around Great Britain of the six other European States forming the free-trade area, and a great effort exerted to strengthen the Commonwealth's internal ties. And now the fifth act is being played, for which Great Britain, this time, has declared her candidacy, and, in order for it to be adopted, has set out on the path of all the promises and all the pressures imaginable.

To tell the truth, this attitude is rather easy to explain. The British people doubtless discern more and more clearly that in the great movement that is sweeping the world, in the face of the enormous power of the United States, the growing power of the Soviet Union, the reborn power of the continental States, the new power of China, and taking into account the increasingly centrifugal orientations that are dawning in the Commonwealth, the structure and customs of its activity, and even its national personality, are henceforth at stake. And, moreover, the great economic, financial, monetary and social difficulties with which Britain is at grips make her aware of it day after day. Hence, to her very depths, a tendency to seek a framework, be it European, that would help her to save, to safeguard her own substance, that would permit her still to play a leading role and that would lighten a part of her burden.

And this could, in principle, only be beneficial to her, and could over the short term only be satisfactory to Europe. But, on condition that the British people, like those with whom it wishes to join, wishes and knows how to compel itself to make the fundamental changes that would be necessary in order for it to be established in its own equilibrium; for it is a modification, a radical transformation of Great Britain that is necessary in order for her to be able to join the continental States.

This is obvious from the political viewpoint. But today, to speak only of the economic domain, the report that was addressed on September 29 by the Commission in Brussels to the six Governments shows with the greatest clarity that the present Common Market is incompatible with the economy, as it now stands, of Britain, whose chronic balance-of-payments deficit is proof of permanent disequilibrium, and which involves—as to production, to food supply sources, to credit practices, to working conditions—factors which that country could not change without modifying its own nature.

A Common Market also incompatible with the way in which the British obtain their food, as much by the products of their agriculture, subsidized to the highest level, as by the goods purchased cheaply everywhere in the world, particularly in the Commonwealth, which makes it impossible for London ever really to accept the levies laid down by the financial regulation, which would be crushing to it. A Common Market also incompatible with the restrictions Britain imposes on the exporting of capital, which, to the contrary, circulates freely among the Six. A Common Market incompatible, lastly, with the state of the pound sterling as it has once again been brought to light by the devaluation, as well as by the loans that preceded and accompany it; the state of the pound sterling, also, that, combined with the character of an international currency which is that of the pound, and the enormous external liabilities weighing on it, would not permit Britain to belong, at this time, to the solid and solidary and guaranteed society in which are joined the franc, the mark, the lira, the Belgian franc and the florin.

In these conditions, what could be the outcome of what is called Britain's entry into the Common Market? And if one wanted despite everything, to impose it, it would obviously be the breaking up of a community that has been built and that functions according to rules that do not tolerate such a monumental exception. Nor would it tolerate the introduction among its main members of a State who, precisely owing to its currency, its economy and its policy, does not at present belong to Europe as we have started to build it.

To have Britain enter and, consequently, to be committed now to negotiations to that end, that would be for the Six—everybody knows what this turns on—that would be for the Six to give their consent in advance to all the expedients, delays and facades that would be aimed at masking the destruction of an edifice that has been built at the cost of so much hardship and in the midst of so much hope.

It is true that while recognizing the impossibility of having Britain enter today into the Common Market as it exists, one can wish all the same to sacrifice the latter to an agreement with the former. For theoretically, the economic system currently practiced by the Six is not necessarily the only one that Europe could practice. One can imagine, for example, a free-trade area extending all over the West of our continent. One can also imagine a type of multilateral treaty like that which will emerge from the Kennedy Round and regulating, among 10, 12 or 15 European States, their reciprocal tariffs and their respective quotas. But in one case as in the other, it would first be necessary to abolish the Community and to disperse its institutions. And I say that France will certainly not ask that. However, if one or another of her partners, as is after all their right, were to propose this, she would examine it with the other signatories of the Rome Treaty. But what France cannot do is to enter now, with the British and their associates, into negotiations that would lead to destroying the European construction to which she belongs. And then, that would in no way be the path that could lead to allowing Europe to construct itself by itself and for itself, in such a way as not to be under the dependence of an economic, monetary and political system that is foreign to it.

For Europe to be able to counterbalance the immense power of the United States, it is necessary not at all to weaken, but to the contrary to strengthen the Community's ties and rules.

Certainly, those who, like me, have proved by their acts the exceptional esteem, attachment and respect that they hold for Britain, firmly desire to see her one day decide on and accomplish the immense effort that would transform her. Indeed, in order to facilitate things for her, France is quite ready to enter into some arrangement that, under the name of association, or under another name, would foster, starting right away, trade between the continental States on the one hand and the British, Scandinavians and Irish on the other. Indeed, it is not in Paris that one fails to recognize the psychological evolution that seems to be taking shape among our friends across the Channel, or that one does not fully appreciate the merit of certain steps that they had already taken, and others that they plan to take, toward re-establishing their balance within and their independence without. But for the British Isles really to be able to moor fast to the continent, a very vast and very far-reaching mutation is still involved. Everything depends, therefore, not at all on negotiations—which would be for the Six a march toward abandon sounding the knell of their Community—but rather on the determination and action of the great British people, which would make it one of the pillars of the European Europe.

Question. Mr. President, do the relations that have been established since the last legislative elections, between the Government and Parliament, in your opinion show a profound change in the functioning, and even in the spirit of the institutions?

For some time there has been much talk about post-Gaullism. General, have you ever thought about this?

Answer. I have been asked what post-Gaullism would be. Well, we will finish with this.

There is always an end to everything. Everyone comes to an end. For the time being, this is not the case.

In any event, "after de Gaulle," that may be this evening, in six months time or in one year. That may be in five years, since that, according to the Constitution, is when the mandate entrusted to me expires.

But if I wanted to make some people laugh, or others groan, I would say that this could equally well last another 10 or 15 years.

Frankly, I do not think so.

After the constitutional instability in which France was immersed for so long—we had 17 regimes in the space of 177 years—after the permanent Government crisis under the Parliamentary regime—under the Third Republic, from 1920 to 1940, 47 Governments in 20 years, and under the Fourth, from 1946 to 1958, 24 Governments in 12 years. After the disastrous reign of the parties displaying over the years—whatever the worth of the men—its powerlessness to settle the very great and moreover very difficult problems imposed on us by our times, making of our country what was called "the sick man of Europe," collapsing in 1940 in the tragedy of the foreign war, then, in 1959, on the brink of civil war and bankruptcy, it happened that the French nation, acting on the proposal that I presented to it, by a massive vote, by a tremendous majority, endowed the Republic with solid institutions that are suited to our times.

Indeed, for nearly 10 years now the French Republic, instead of as in former times offering the permanent spectacle of its Government's impotence, gives, on the contrary, an example that is recognized everywhere of solidity, continuity and efficiency, thanks to which it obtains, in the essential fields that are called progress, independence and peace, results that the world considers conclusive.

Apart from the partisans, nobody doubts that if no world tragedy comes to call everything into question in the coming decades, the Fifth Republic will ensure France the best possible chances of prosperity, strength and influence, and that, if the storm breaks out once more on earth, it alone would be in a position to assume the country's destiny.

Now, everyone knows that the capital element of its institutions is the attribution to the head of state, elected by the nation, of the means of and responsibility for representing, putting forward and, if necessary, imposing, above all individual passing tendencies, the nation's higher and permanent interest. And everyone knows that in order for policy to be consistent with what is essential, it falls to the head of state to choose the government, to determine its composition and to preside over its meetings.

Naturally, it is this keystone of the building that either partisans of all origins who, although they claim the contrary, ceaselessly seek to make power the stake in their ambitions and machinations, or the conspirators of the totalitarian undertaking who aim at establishing their crushing and dreary dictatorship, would like to smash.

Lastly, everyone knows that if ever the President's faltering in his duties were to open the breach to these assailants, the political and social chaos, the economic, financial and monetary deterioration and the international decline which would result, would inevitably place France in the hands of one or the other of the two main foreign powers.

However, one may think that the present situation—which in specialized circles still arouses so much prejudice against the institutions—will not last. The longer the Fifth Republic lasts, the longer it will last, we will probably see the vast majority of French citizens definitely loose interest in the useless quarrel picked with a regime which they have moreover formally adopted, to which they are adjusting very well and whose dignity, solidity and effectiveness they esteem. whatever the current disputes.

One may even think that, correlatively, any parliamentary combination would decidedly accommodate itself to the effective separation of the powers, which the laws and usage do not allow one to contravene.

In short, the day will no doubt come when our Constitution, with all that it entails, will have become as second nature to us. In any event, and whatever happens, it is the President of the Republic, the head of state, who is responsible for upholding the spirit and letter of the institutions, and for orienting France's policy throughout the time that he alone is the mandatory of the entire French people.

That, moreover, I do believe, is what those who gathered in Lille wished to demonstrate fervently and solemnly, whereas their assizes were working to adapt our conceptions and inspirations to changing conditions.

Ladies and gentlemen, I thank you.

[From the Washington (D.C.) Post, Nov. 30 1967]

Common Institutions Emphasized by Monnet as Only Peace Safeguard

World peace can be safeguarded only by forming "larger entities in the world" to talk out political, defense and monetary problems, Jean Monnet said last night.

Monnet, an architect of Western European unity who has been dubbed "Mr. Europe," was honored last night at the annual Family of Man award dinner in New York at the Hilton Hotel. Until now, the citation has been limited to citizens of the United States and Canada.

At 79 this month, Monnet, who initiated the European Coal and Steel Community, which burgeoned into the European Common Market, expressed new confidence that an expanding European concept will prevail. On Monday, French President Charles de Gaulle delivered his newest and harshest rebuff to Britain in its efforts to enter the Market.

Without mentioning de Gaulle directly, Monnet once again last night said: "I believe that the unification of Europe including Great Britain will continue ineluctably whatever the present apparent difficulties."

Sounding the goal set out by the Action Committee for a United States of Europe, which he heads, Monnet said: "I think it essential also that the United States and Europe organize common institutions in which they can discuss their problems as equals, while a start is made on organized economic cooperation between the Common Market and the U.S.S.R."

In contrast to de Gaulle's new indictment of U.S. policy in Vietnam as a "hateful war," Monnet said, "Knowing your country as I do, I am convinced that the United States does not seek domination or national advantage but the organization of peace in the world."

RENEGOTIATION BOARD BILL

Mr. MONTGOMERY. Mr. Speaker, I ask unanimous consent that the gentleman from Texas [Mr. Gonzalez] may extend his remarks at this point in the Record and include extraneous matter.

The SPEAKER pro tempore. Is there objection to the request of the gentleman from Mississippi?

There was no objection.

Mr. GONZALEZ. Mr. Speaker, with one important exception, my bill to curtail excessive profits on defense and space contracts through the agency of the Renegotiation Board continues to wallow in a Sargasso Sea of indifference.

It is becalmed. That I am just about the only force pushing the strengthening of the Renegotiation Board becomes more and more curious to me. There is a rather general concern about the procurement practices of the Department of Defense. A special commitee of the House Armed Services Committee charged Colt with excessive profits on the development of the M–16 rifle, and Chairman Hardy's subcommittee recently investigated other examples of very questionable practices by firms contracting with DOD.

Tightening DOD procurement practices is well and good. But there is another agency, another complementary way to prevent war profiteering, a way that also merits congressional concern. This is the renegotiation process, established in World War II, and now practiced by the Renegotiation Board. The Board reviews the profit figures of contractors and subcontractors who have done over $1 million of business per fiscal year with defense or space related agencies. It is the only independent agency whose sole statutory responsibility is to protect the American taxpayer from excessive profits on Government contracts. It is the only agency which reviews a contractor's record on a fiscal year basis, after the contract work has been completed or at least after there are measurable results of a contractor's performance. It is the only agency which can issue legally enforceable determinations of excessive profits not only for negotiated contracts, whether cost-plus, fixed-price, redeterminable or incentive, but for competitive contracts as well, in most instances.

I wish to make a suggestive comparison. During fiscal year 1966, the Renegotiation Board saved the American taxpayer, through both directed and voluntary refunds from contractors, $47.8 million in excessive profits. The Board employed 178 persons in that year, whereas the Department of Defense employed about 20,000 procurement officers. This is not a perfectly just comparison, for the Board reviews more than DOD contracts, because these refund figures represent contracts awarded years earlier, and because a procurement officer is not a renegotiator. However, I do feel this comparison reinforces the need for a strong independent renegotiation process.

I stumbled upon the existence of the Renegotiation Board last year, when I questioned a witness as a member of the Banking and Currency Committee concerning the level of prime contract awards resulting from the Vietnam war. So I realized by my own experience that the Board is generally unknown. But I have made numerous attempts since then to call the Board to the attention of this Congress. Recently, I completed seven statements detailing the accomplishments and the need for strengthening the Board. I accompanied each insertion with an article or an editorial from the Nation's press concerning my efforts against excessive war profits. With one important exception, as I stated earlier, my bill still received no attention. But I do wish to here and now thank the one Member who stated his knowledge and support for the Renegotiation Board, and who was generously appreciative of my efforts to strengthen it. This was the distinguished colleague from Massachusetts, Mr. James A. Burke.

Mr. Speaker, I have permission to include at this point in my remarks the additional articles and editorials relative to my bill to amend the Renegotiation Act, H.R. 6792:

[From the Boston Globe, Oct. 21, 1967]

Scandalous War Profits

All that can be said for the Defense Department's breast-beating announcement that it is going to tighten its procurement policies to guard against overcharges on small war items is, "So far, so good."

Its sudden resolution stems from an investigation showing that it has been paying $67.50 to $230 and more for small military items such as spur gears and electric couplings which the manufacturers' own catalogs list at $3.43, $2.75 and less.

A belated purpose of amendment is of course better than none at all. But the departments announced resolve is limited to an area in which the estimated savings will total no more than $10 million to $25 million per year. Wonder inescapably arises as to when Washington will move into those larger areas where sloppy procurement policies (or worse) could be costing the nation not just a few million a year but possibly tens of billions in illegal profits on major war items.

One remedy immediately at hand is Public Law 87–653, better known as the Truth in Contract Negotiating Act. But both the Defense Department and war contractors have been violating this one right along not only in spirit but in letter, according to Rep. Henry B. Gonzalez (D–Tex).

Another is the War Contracts Renegotiation Act which Rep. Gonzalez vainly has been seeking to strengthen and extend beyond its June, 1968, expiration date. The Act is almost totally ignored although (or possibly because) it was the instrument through which more than $11 billion in excess profits was recovered after World War II.

Mr. Gonzalez' proposal has been bottled up in the House Ways and Means Committee for eight months, during every day of which he has "been struggling in a sea of general indifference" to get action on the floor.

With billions at stake, scandal already breaking (as in the case of the M–16 rifle) and the Defense Department blandly acknowledging that its procurement policies are sometimes irrational, the Ways and Means Committee's determination to let the whole thing slide is itself a continuing scandal in which both Speaker McCormack and Rep. James A. Burke, the Massachusetts member of the committee, ought immediately to interest themselves.

The Defense Department has blamed clerical deficiency for the mistakes to date. That is not an acceptable excuse for the larger items now being uncovered. Nor is it an excuse for the flagrant violations of law which Mr. Gonzalez has cited on the House floor while nobody bothered to listen.

[From the Dayton Daily News, Oct. 11, 1967]

Defense Waste

If Dayton's Rep. Charles Whalen can succeed in pushing through his amendment to the Truth in Negotiations act, it will save the Defense department—and the public—a lot of money.

Rep. Whalen cites cases, uncovered by the General Accounting Office, of the government being overcharged on defense contracts largely because of incorrect pricing data. The congressman shouldn't have much trouble passing an amendment to require defense contractors to make records available for postcontract award reviews by Defense department auditors. The Defense department already has agreed to this suggestion; the job is to write it into law.

The public and Defense department can get further protection if Congress supports Rep. Henry Gonzalez' (D-Tex.) bid to strengthen the Renegotiation board. This board has the power to demand that a defense contractor make a refund on profits at the end of the fiscal year if they are deemed excessive.

However, Congress has been chopping away the authority of the board since 1954. Today it has only one-fourth of the manpower it had during the Korean war and has little jurisdiction. In view of the heavy defense work during the Vietnam war, these checks on defense spending are especially important.

[From the New Bedford (Mass.) Standard-Times, Oct. 5, 1967]

Legislator Hits Lack of War Profiteering Curbs

(By Donald R. Larrabee)

Washington.—With defense spending at a record level and military procurement already exceeding the peak year of the Korean war, Congress is doing little or nothing to guard against war profiteering.

There is no "Truman Committee," such as helped to recover more than $1 billion in excess profits from World War II. And the Renegotiation Board, established in 1951 to review most prime (negotiated) contracts, has been virtually legislated out of effective authority.

Rep. Henry Gonzalez, D-Tex., told the New Bedford Standard-Times today that both Congress and the Johnson administration seem to be either "unaware or indifferent" to war profiteering. He declared that the nation has already suffered from loose procurement policies.

WANTS COMMITTEE

Gonzalez called for creation of a Joint Senate-House Committee to keep an eye on military purchasing. He recalled that a special Senate Committee, headed by Harry S. Truman during World War II, investigated waste, extravagance and inefficiency in the military and—on its own—saved an estimated $1 billion by watchguarding war production and procurement.

The senator went on to the presidency, partly on the strength of his reputation as an investigator. And, out of the Truman Committee grew the War Contracts Price Adjustment Board, a forerunner of the Renegotiation Board which was born at the height of the Korean war in 1951.

Over a period of a dozen years, the Renegotiation Board made 3,664 determinations of excess profits totaling $896 million. In addition, contractors made voluntary refunds and price reductions during that time totaling $1.2 billion, making for more than $2.1 billion in recoveries before allowance for taxes paid.

But, through the years, according to Gonzalez, Congress has enacted so many amendments and exemptions that the Renegotiation Board is operating with badly weakened authority and a skeleton crew. In fact there was pressure last year to let the basic law expire.

BASE RAISED

As it now stands, the floor for contract awards subject to renegotiation has been raised to $1 million. Many standard items are exempted.

Gonzalez has filed a bill, H.R. 6792, to restore the $250,000 floor written into the original 1951 act and, hopefully, to replace some of the teeth that have gradually been knocked out by an apparently unconcerned Congress.

Yet, no hearings are scheduled on the Gonzalez bill and there is little indication that anything will be done, despite the daily outcry for economy and the demands for cutbacks in federal spending.

The Texas congressman has been talking about the problem for the past 18 months but he can't seem to attract the serious attention of his colleagues or the Johnson administration. Prime contract awards this year will probably total around $45 billion, exceeding by $1 billion or more the peak year of the Korean war.

Vietnam expenditures alone are now estimated at around $22 billion a year, although Congress has been hard pressed to obtain an exact breakdown of costs that could directly be attributed to the war.

PROCUREMENT CLIMBS

Procurement spending climbed far more sharply between fiscal 1965 and fiscal 1967—by 61 per cent—than spending on the other major categories in the defense budget.

Revelations by individual congressmen, particularly Rep. Otis G. Pike, D-N.Y., have lately highlighted instances of alleged overpricing on specific procurement contracts. A House Armed Services subcommittee under the chairmanship of Rep. Porter Hardy, D-Va., has begun a broad review of military procurement policies, procedures and practices.

Pike, for instance, has accused Litton Industries, Inc., of making a "huge profit" from a sale of navigation equipment for the F104 Starfighter Jet used in Vietnam. The New York congressman is a member of the Hardy subcommittee but admits himself that the panel is not geared to making a "Truman-type" continuing inquiry into the major field of negotiated contracts and subcontracts.

Likewise, Gonzalez does not feel that the armed services subcommittee is going to do the job that needs to be done.

Supposedly, the Defense Department is closely supervising the level of profits by its major contractors. Defense Secretary Robert S. McNamara—for unexplained reasons—has been reluctant to discuss publicly a study that he ordered some six years ago into the whole question of defense profits.

But some members of Congress are applying pressure on the Secretary to explain what progress has been made on the study and when, if ever, the results are to be published.

[From the Standard-Times, Oct. 10, 1967]

WATCHDOG FOR DEFENSE CONTRACTS

Congress is showing an inexplicable penny wise, pound foolish attitude toward the proposal by a Texas member of the House to establish a watchdog agency on possible war profiteering.

It is not demeaning defense contractors generally to observe that with more than $70 billion being spent annually for national security, some $22 billion for a gigantic military buildup in Vietnam alone, there is generous opportunity for cheating, and, on legitimate contracts, for unconscionable profits.

The so-called Truman Committee found this to be true in World War II, saving an estimated $1 billion during its review of war-time contracts. And, Donald Larrabee of The Standard-Times Washington Bureau reports, the postwar successor to the committee, the U.S. Renegotiation Board, recovered more than $2 billion in a dozen years.

But that renegotiation agency's authority and stature has been so cut back that it is now virtually insignificant and the task of reviewing war spending has fallen to various committees, subcommittees and individuals, in uncoordinated and spasmodic effort.

Why not, then, as Rep. Henry Gonzalez, D-Texas, urges, appropriate a modest $250,000 to get the Renegotiation Board fully functioning again, with restored powers?

Maybe Mr. Gonzalez should provide House and Senate leaders with a review of the famed Harry Lev of Chicago case, and his fantastic manipulations with so mundane a task as making white hats for Navy enlisted personnel.

Outwardly the only unroutine aspect of the contract awarded Lev was the number of hats involved, more than 6,000,000. But in 1955, a Senate subcommittee headed by Sen. McClellan, D-Ark., took a further look and found:

Lev had no factory when he got the contract, as was required. He rustled one up, in Puerto Rico. Then he got the specifications changed to 1) increase the number of hats per box, 2) reduce the size of the hat, 3) require installation of certain items on which Lev held a patent.

In two years, out of the hat contract, $1,400,000 in cash passed through Lev's hands, $214,000 of which he could not give any destination for. But a number of persons in federal service had been bribed. And Lev became a millionaire.

Maybe the profiteers of this type are few. But a guardian agency such as Rep. Gonzalez recommends is needed just to make sure. The Renegotiation Board more than paid its way. Its presence today would save money and be a warning that the administration is not as "unaware or indifferent" as Rep. Gonzalez' experience up to now suggests.

[From the Northampton (Mass.) Hampshire Gazette, Oct. 16, 1967]

NEW ENGLAND WEEK IN WASHINGTON

WASHINGTON.—With defense spending at a record level and military procurement already exceeding the peak year of the Korean war, Congress is doing little or nothing to guard against war profiteering.

There is no "Truman Committee," such as helped to recover more than $1 billion in excess profits from World War II. And the Renegotiation Board, established in 1951 to review most prime (negotiated) contracts, has been virtually legislated out of effective authority.

Defense Secretary Robert McNamara apparently ordered a study of defense contract profiteering some six years ago but Congress did not learn of its existence until recently when Rep. Silvio Conte (R-Mass.) happened to stumble on the information while McNamara was testifying before the foreign operations appropriations subcommittee.

McNamara said the purpose of his secret study was to examine profits by contractor, by contract and by type of contract in hopes of setting some guidelines for military purchasing agents who have a shopping list of about $45 billion a year, under the impetus of Vietnam. But neither Congress nor the general public has been given any details of the Pentagon findings to date. McNamara says only that his data is still incomplete.

Congressman Conte, for one, is pressing the Defense Secretary to determine how closely Pentagon auditors are supervising contract awards to protect the Government's interests. Conte has asked for a full report.

"I think the Congress is entitled to know what this study of defense contractors shows," he said. "After I hear from Mr. McNamara, I will be in a better position to evaluate what Congress should be doing in this field. It may be that we need to establish an oversight committee to make certain that excessive profits are not being made in relation to the investment and the risk involved in the Vietnam procurement program."

Rep. Henry Gonzalez (D-Tex.), who has called for a Joint Senate-House Committee to keep an eye on military purchasing, says that both Congress and the Johnson Administration seem to be either "unaware or indifferent" to war profiteering. He believes the Nation has already suffered from loose procurement policies.

Gonzalez has a bill that would strengthen the authority of the Renegotiation Board to review negotiated contracts. Over the past 15 years, he says, Congress has enacted so many amendments and exemptions that the Board cannot do an effective job. The floor for contract awards subject to review has been raised to $1 million. The Congressman wants to restore the $250,000 floor written into the original law.

It seems unlikely that Gonzalez, Conte or anyone else is likely to be given the opportunity enjoyed by former President Harry S. Truman when, as a Missouri Senator, he headed a special Senate committee investigating World War II waste, extravagance and inefficiency in the military. The Truman Committee saved an estimated $1 billion on its own by watchdogging war production and procurement.

The Renegotiation Board, which grew out of these inquiries, was active during the Korean war. It made 3,664 determinations of excess profits totaling $896 million, over a period of a dozen years. In addition, contractors made voluntary refunds and price reductions during that time totaling $1.2 billion, making for more than $2.1 billion in recoveries before allowance for taxes paid.

Prime contract awards this year will probably total about $45 billion, exceeding by $1 billion or more the peak year of the Korean war. Vietnam expenditures alone are now estimated at around $22 billion a year, although Congress has been hard pressed to obtain an exact breakdown of costs that could be directly attributed to the war.

Procurement spending climbed far more sharply between fiscal 1965 and fiscal 1967—by 61 per cent—than spending on the other major categories in the defense budget.

Now and then, individual congressmen have uncovered instances of alleged overpricing on specific procurement contracts. But the charges have never been thoroughly explored by Congress. Rep. Porter Hardy (D-Va.), heads a special investigations subcommittee of the House Armed Services Committee which comes as close as any group in Congress to being a procurement watchdog.

But the Hardy unit has largely confined itself to monitoring the effectiveness of a 1962 law which requires contractors to certify that cost data submitted to Pentagon is complete, accurate and current. And, strangely, the question of profiteering is rarely mentioned in the growing daily outcry for economy and the demands for cutbacks in federal spending.

[From the San Antonio Express/News, Oct. 29, 1967]

OFF THE WAGON

The House of Representatives has reportedly gone berserk in its crusade to trim unnecessary (some say necessary) government expenditures, but there is one economy band wagon that the boys don't seem inclined to mount.

This is the proposal of Bexar Rep. Henry Gonzalez that the Renegotiation Board be strengthened and its area broadened so that it can mount a major drive to prevent war profiteering. The value of prime defense contracts, he keeps telling his colleagues, has risen to $44.6 billion—more than the highest year of the Korean War—but the board's ability to deal with profiteering has plummeted. It is down from 724 employes in 1953 to 179 last year.

Getting no encouragement from other members of Congress, Henry B. is undaunted. He has just completed a series of seven floor appearances in which he called attention to support of his proposal from newspapers throughout the U.S. And he never tires of noting that a similar board recovered $11 billion in excess profits during World War II.

EDUCATION, POLITICS, AND THE FUTURE OF GREECE

Mr. MONTGOMERY. Mr. Speaker, I ask unanimous consent that the gentleman from Indiana [Mr. BRADEMAS] may extend his remarks at this point in the RECORD and include extraneous matter.

The SPEAKER pro tempore. Is there objection to the request of the gentleman from Mississippi?

There was no objection.

Mr. BRADEMAS. Mr. Speaker, recently I had the honor to deliver an address on education in Athens, Greece, at a symposium sponsored by the Greek Heritage Foundation, an American organization headed by Christopher Janus, of Chicago.

I insert the text of my address, "Education, Politics, and the Future of Greece," which was delivered on September 28, 1967, at this point in the RECORD:

EDUCATION, POLITICS, AND THE FUTURE OF GREECE

(An address by Congressman JOHN BRADEMAS at a symposium sponsored by the Greek Heritage Foundation, Athens, Greece, September 28, 1967)

I am glad to be back in Greece.

My first visit here was 16 years ago as a student at Oxford University and I remember still the emotion I felt when I was greeted at the train station in my father's home town, Kalamata, by my uncle and a dozen other relatives armed with bouquets of flowers, many tears and a horse-drawn carriage in which they whisked me off to the house where my father was born.

Ten years later I came back with Christopher Janus and the Greek Heritage Foundation—and I know from that journey what pleasures are in store for you first travelers to Greece.

In 1963, President Johnson sent me on Air Force One with President Truman, Mrs. Johnson and others in a delegation to attend the funeral of King Paul. And only last month I had the privilege of returning to Athens with the distinguished and beloved Archbishop of the Greek Orthodox Church of North and South America, Archbishop Iakovos, to attend meetings of the American Archdiocesan Council here.

Yet I am glad to be back in Greece so soon after my last visit because it affords me the opportunity to talk about a subject which is both central to my own responsibility as an American legislator and crucial to the future of Greece—education.

For nearly nine years I have served as a member of the committee of the House of Representatives which has primary responsibility for legislation in the field of education. Indeed, I am proud to sit in the same subcommittee seat on the Committee on Education and Labor which John F. Kennedy held when he was a Congressman 20 years ago.

As a member of this committee, I have had the opportunity to talk with students and teachers not only in the United States but also in Buenos Aires and Berlin, London and Leningrad, Warsaw and Djakarta, Caracas and Kyoto; I have, therefore, little hesitation in saying that the future of all these nations, including our own, will very largely depend on the kind of education they afford their young people.

This is surely true of the future of Greece as well.

Indeed, I believe that the quality of Greek life, the prosperity of the Greek people and the future of democracy in Greece will in large measure be determined by the responses to five major challenges to Greece's educational system—and I shall shortly discuss them.

GREEKS THE FIRST EDUCATORS

It is, I think most appropriate that we discuss education here in Athens . . . for the theme of this symposium is "The Cultural Contributions of the Greeks—Ancient and Modern" . . . and it was the Greeks, after all, who were the first genuine educators of the Western world, the first to raise profound questions about how to educate both children and men.

But even as the ancient Greeks criticized their educational system, we, too—modern Americans and modern Greeks—must answer serious questions about our own systems of learning and teaching.

I think this is especially important in Greece at a time when a new regime is reviewing some of the educational reforms begun a few years ago.

Before I discuss the five decisions confronting those who shape Greece's educational system, I want to make some observations about education generally based on my own experience as a member of the Congressional committee that helps shape educational policy, at least at the Federal level, in our own country.

EDUCATION: THE KEY TO DEVELOPMENT IN LATIN AMERICA

In the spring of 1961, shortly after President Kennedy outlined the Alliance for Progress, I went to Argentina to gather information on the potential role of higher education in achieving the objectives of the Alliance.

That visit persuaded me that the universities of Latin America are an indispensable key to the economic development and social reform these nations must have if they are to create democratic societies and free political institutions that will endure.

The universities of Latin America must produce the engineers, the agricultural specialists, the economists, the scientists, the public administrators and the teachers needed to fight hunger, poverty and disease and to move the economies of their countries into the twentieth century.

I think it fair to say that there is increasing agreement on the thesis set forth by a number of economists in recent years, notably Theodore Schultz of the University of Chicago, that a critical factor in the economic growth of the emerging nations—such as Latin America—is human capital, trained and educated men and women, as distinguished from physical resources.

The need of Latin America to invest more in education, with highest priority in the strategic fields—those that contribute most directly to the economic development of a country—is just as urgent in the emerging countries of Asia and Africa.

THE SOVIET UNION: COMMITMENT TO SCIENTIFIC AND TECHNICAL EDUCATION

Let me turn to a second example within my own experience—the Soviet Union.

A few years ago a Congressional subcommittee of which I am a member visited schools and technical institutes, colleges and universities in Moscow, Kiev and Leningrad.

Our subcommittee left Russia with several vivid impressions.

We were struck first by the great emphasis the Soviet Union places on science and technology. Through their centrally planned economy, the Soviets have been able to allocate an immense share of their educational resources for the production of highly skilled scientists and technicians.

Soviet accomplishments, from the first Sputnik to the huge Bratsk hydro-electric station to the Serpuhkov electron accelerator are concrete evidence of the great success of this policy.

A second striking characteristic of Soviet education is the insistence on providing access to successive levels of education according to ability.

There is room at the top in the Soviet Union, and, next to Communist party activity, the best way up the ladder for the Soviet man or woman is education—especially scientific or technical education.

This combination of: 1) a totalitarian system, in which the flow in national investment in education can be controlled from the center; with 2) a strong emphasis on producing scientists and engineers; and 3) a determination to overtake the West economically and technically should help us all understand why the Soviet Union is so intensely committed to education.

JAPAN: WIDESPREAD EDUCATION THE SECRET TO ECONOMIC GROWTH

I have spoken of the role of education in an underdeveloped area—Latin America—and a highly industrialized, Communist state—the Soviet Union—and now I shall say a word about education in another industrialized nation but one allied with the United States and in Asia—Japan.

I returned from Japan to Washington only last week after several days of meetings in Shimoda—where Admiral Perry opened Japan to the West a little over a century ago—and where government officials, scholars and businessmen from both the United States and Japan, meeting as the Japanese American Assembly, reviewed the spectrum of our relationships with each other.

What immediately strikes the traveler on his first visit to Japan—at least this one—is the extraordinary activity of the place. There are people everywhere—one takes a train through an almost endless chain of thickly populated urban conglomerations—and they are all working as if tomorrow were to bring their last paychecks. But the phenomenal growth of Japan in the post-war period—averaging about ten percent in real terms over the decade 1955–1964—is only partially to be explained by the Japanese propensity for work.

There are of course several other factors but a key one, as a survey in the *Economist* of London reported last May, "is always a shock for a visiting Briton to realize. It is that Japan is now a more educated society than Britain."

Popular schooling in Japan has expanded beyond the nine year compulsory level to train masses of workers in the skills now needed for offices, laboratories and the burgeoning new industry, while at the same time Japan is spawning a huge university population.

Seventy percent of Japanese children, compared to under forty percent of British, stay in school to the age of 18 or past; some sixteen percent, versus less than ten percent in Britain, go to college; and within five years, some thirty percent of Japan's new entrants into the labor market will have college or university degrees.

And the training of all of these people continues once inside the industrial firms they join.

Is it surprising, therefore, that, in terms of per capita income, Japan is three generations ahead of most of Asia and that it ranks only behind the United States, the Soviet Union and perhaps West Germany as an industrial power?

Knowledge has been an essential ingredient of the economic miracle of Japan.

UNITED STATES: THE EXPANDING COMMITMENT TO EDUCATION

Let me now turn to the United States, for I believe that the successes and problems of American education, like those of Latin America, the Soviet Union, and Japan, contain lessons which are relevant to education in Greece.

Commitment to education has characterized American history since the days of the Pilgrims. Americans have placed unusual faith in their schools and colleges, and this faith has served them well.

Yet despite this commitment by the world's wealthiest nation, we have become increasingly aware that we have not by any means been fully meeting our own responsibilities to our schools and universities. Only in the last few years have we seen a tremendous outpouring of Federal legislation channeling billions of dollars to support and improve American education at all levels. To supplement the efforts of state and local governments, and private resources, the Federal government is now investing huge sums in the construction of classrooms, libraries and laboratories; in library books and materials; in loans and scholarships for college students; and in programs designed to stimulate quality in education.

Only recently we have assigned our schools perhaps the most difficult task of all—helping to overcome the debilitating effects of long-term deprivation among the nation's poor and disadvantaged children—especially Negro children.

We have not had enough time fully to assess the impact of all these programs. Even so we know that much remains to be done. Far too many qualified young Americans still cannot afford to attend college. Our system of vocational education has not kept pace with technological change. The rising campus population is placing great strains on existing educational facilities.

Above all, as I have just suggested, there are still certain segments of our population which, because of inferior education and racial injustice, continue to be locked out of the mainstream of American life. Although there is not complete agreement on the answer to this overriding issue in American domestic life, there is near unanimous agreement that an indispensable part of the solution lies in far greater efforts to provide education and training for all our citizens, and especially for the children of the urban ghetto.

The new and expanding American commitment to education—one of the most exciting phenomena of the last few years in the United States—was perhaps best explained in the words of John F. Kennedy when he said:

"Education is both the foundation and the unifying force of our democratic way of life—it is the mainstream of our economic and social progress—it is the highest expression of achievement in our society, ennobling and enriching human life. In short, it is at the same time the most profitable investment society can make and the richest reward it can offer.

EDUCATION AND THE FUTURE OF GREECE

With these considerations about the role of education in other countries in mind, let us now turn to Greece and reflect on what education means to the future of this nation.

We all know that few people have held learning and knowledge in such high regard as the Greeks of the Golden Age and Hellenistic periods. In later times as well, including the Byzantine and Ottoman periods, the classical dedication to learning—to *paideia*—sometimes flourished and always endured. Even in the darkest periods of Ottoman domination, the ancient Greek notion of *eleftheria*—freedom of mind, body, and spirit—was somehow kept alive, and indeed, in many ways helped lay the groundwork for the creation of an independent Greek state.

In the middle of the 19th century, thirty years after Greek independence, Matthew Arnold was able to say that the Greek people among all Europeans, were "ardently desirous of knowledge". As Greece entered the 20th century, Greek education compared quite favorably with most European countries, at least as measured by literacy rates and school attendance.

Professor Andreas Kazamias of the University of Wisconsin has noted that by this time the Greeks "possessed a reasonably well-graded system of education from elementary to higher, including teacher training institutions and some technical and vocational establishments."

As the present century unfolded, however, Greek education suffered from conditions which afflicted much of Europe. Persistent wars, political instability, powerful institutionalized interests, and conflicting social and educational ideologies impeded educational progress.

World War II and the civil war created havoc. By 1950, according to Professor Kazamias, over 70 percent of the school buildings were either destroyed or heavily damaged, ninety percent of school equipment was lost, and the teacher corps itself was decimated. Administrative chaos abounded.

The post-war years saw a growing dissatisfaction with the state of education. Critics contended that the *gymnasia* (the six-year, post-elementary schools) had become too preoccupied with a classical curriculum at the expense of such subjects as contemporary literature and the sciences. Critics further contended that technical and vocational education, while making some progress, was woefully inadequate to the needs of a modern society. The universities were thought to be overcrowded, understaffed and, like the *gymnasia*, wedded to an anachronistic curriculum.

In 1957, against this background of discontent, the government appointed a special committee to scrutinize the educational system and to propose guidelines for change. As one scholar has said, "The report of this committee ushered in a ferment for reform unparalleled in the history of modern Greek education." Following this report, major legislative reforms were enacted in 1959 and again in 1964.

I shall not here describe in detail the reform effort begun in these years, but I must note that the thrust of the reforms was to place more emphasis on the *modern* Greek heritage and to expand and update the content of the curriculum. Considerable progress was made, for example, in adapting education and training to contemporary economic needs. And the need for greater equality in educational opportunities was underscored. The 1964 legislation declared: "The basis and the guarantee of a true democracy rest on equality—without discrimination—of all citizens to acquire the benefits of education."

Although the beginnings of reform spoke well for the future of Greek education, serious problems remained to be faced. Compared to other Western European countries—or say, Japan—the shortcomings were still very serious, in large part because not enough resources were being allocated to education.

Nonetheless and in spite of these problems, the dominant theme of the reform movement was *proodos*—progress. The ideals, at least, had been defined, the goals established, and there was advance. Crucial decisions, however, were yet to be made as of April 1967.

As a practicing politician and as a member of a Congressional committee that handles some of the most controversial legislation in American politics, I am fully aware of the interaction between education and politics. We all recognize that the development of an educational system does not take place within a vacuum—in the United States, in Greece or in any other country.

And so I realize that the political framework within which decisions on education are made in Greece in the months ahead will have an important bearing on the Greek educational system.

FIVE MAJOR CHALLENGES TO THE GREEK EDUCATIONAL SYSTEM

Keeping this factor in mind, I want to conclude my discussion by reiterating that the quality of Greek life, the prosperity of the Greek people and the future of democracy in Greece will in large measure be determined by the response to five major challenges to Greece's educational system.

These five issues are important in every country today, but especially so in Greece. They are:

1. *The need to invest more resources in education.*

Every nation must decide what proportion of its national wealth it will invest in education. I have already said that even in the world's most affluent nation, the United States, we still allocate far too little for education.

Yet in Greece, education has been kept on a starvation diet.

Experts report that Greece ranks second lowest among European countries in public expenditures on education as a percentage of Gross National Product—ahead of Spain but below Turkey.

The economic development and industrial growth of Greece, as of other modern societies, is largely dependent on an adequate supply of trained men and women.

Without sufficient investment in human resources development in Greece, social and economic progress will be severely limited.

And let me here add that watering down the quality of education, by, for example, providing too few teachers, too few books and inadequate equipment, is no lasting answer to increased numbers of students. The success of an educational system depends on meeting qualitative as well as quantitative standards.

2. *The need to place more stress on technical and vocational education.*

I have said that modern economists have effectively shown that investment in human capital as well as physical plant and equipment is essential to economic growth. And I have noted that both the Soviet Union and Japan have given high priority to this area of education.

Even an advanced industrial society like the United States has serious weaknesses in its vocational and technical education programs, and we in America are now seeking to make radical improvements in our job training programs.

Less highly developed nations like Greece need to make intensified efforts to train more young people as technicians, agronomists, economists, scientists, public administrators and for other careers crucial to the building of a modern economy.

3. *The need to assure widespread access to education, basing opportunity for schooling on merit rather than means.*

Nations that restrict the chance for an education to a few waste the most precious resource they have—brainpower.

It has only been within recent years that the United States has begun to provide Federally financed loans and scholarships to talented but needy young people seeking to go to college. As President Johnson said, "This nation is determined to give all our young the education they deserve."

In a poorer country like Greece, the extension of opportunities for education—both high school and university—to talented young people, poor as well as rich, is critical to the future of the nation.

A philosophy that restricts education to an elite is self-defeating.

It remains to be seen whether reforms in Greece that enable more students to complete high school and the university will be maintained and expanded.

4. *The need to develop effective programs of citizenship education.*

An important legacy of Periclean Greece to Western civilization was the concept of the responsible citizen, one who participates fully in the life of his community.

The effort to teach Greek school children the principles of democracy today should be intensified.

For it is surely clear that a widespread appreciation by the citizenry of both their rights and responsibilities as citizens is indispensable in a society that claims to be free.

Greece taught this great lesson to the world many centuries ago and every democratic nation still aspires to practice this ideal.

I might here note that citizenship education in the United States is expanding to include the notion of public service. More and more young Americans are seeking to serve their fellow man through enrolling in the Peace Corps abroad and enlisting in the War on Poverty at home.

Perhaps Greek educators will want to consider devising programs designed to instill this concept of public service.

5. *The need to assure freedom of inquiry and discussion to teachers and students.*

It was the glory of 5th Century Athens that her gates were always open to new people and new ideas. The conviction that the freedom of the human spirit depends on the freedom of the human mind has become a fundamental part of the legacy which America and the entire Western world inherited from Greece.

This legacy has become the basis of academic freedom—freedom of teachers and students to think, to question, to criticize without being threatened or coerced.

I must confess that academic freedom has come under frequent attack in the United States. Few Americans are proud, for example, of the era of McCarthyism and the assault on academic and other forms of freedom that it represented. In this connection, I think you may be interested to know that one of the continuing concerns of President Kennedy was to press for the elimination of a loyalty oath that had been required of university students who applied for government loans.

For President Kennedy recognized the importance in a democratic society of assuring the right of free inquiry to students and teachers and he successfully fought to have this loyalty oath, a symbol of hostility to free inquiry, removed from the law.

Yet even in our own day academic freedom from time to time comes under attack in the United States. We know academic freedom was destroyed in Nazi Germany, and we know that it is not respected in Communist states. It is now an important issue in Greek life, and we all hope, I am sure, that it will be resolved in such fashion as to strengthen the institutions of freedom in Greece.

When constitutional government is restored to Greece—as the present government has promised it will be—this question of freedom for students and teachers will undoubtedly come more sharply into focus.

How Greece responds to these five challenges to education will, I repeat, tell much about the future of the Greek people in the 20th century.

SUMMARY

Let me summarize what I have tried to say.

Education in Greece, like the Greek nation itself, is in a period of flux.

As an American of Greek ancestry and as a legislator principally interested in education, I have ventured, first, to draw some lessons about education from my observations in my own country and in other lands.

I have suggested, second, that every nation that seeks to lift the quality of life of its individual citizens and to advance economically and socially must make an adequate investment in education. For I believe with President Kennedy that "education is the keystone in the arch of freedom and progress."

Finally, I have touched briefly on some of the critical issues—as I view them—confronting education in Greece. Each of them is an issue which is also important in the United States and I dare say to every other nation as well.

I hope I have made clear that it has not been my purpose to tell the Greek people how they should operate their educational system. Rather, I have sought, as one who loves Greece and wants to see the land of his father's birth and the land which is the home of our common intellectual heritage, flower and flourish. In Pericles' magnificent funeral oration Thucydides tells us that Pericles says of Athens, "In a word I claim that our city as a whole is an education to Greece and that her members yield to none, man to man, for independence of spirit, many-sidedness of attainment, and complete self-reliance in limbs and brain."

It is in that same noble spirit that Pericles also said, in praising the citizens of Athens that ". . . instead of looking on discussion as a stumbling-block in the way of action, we (Athenians) think it an indispensable preliminary to any wise action at all."

I believe that Pericles' advice then is still worth following today in Greece and, indeed, in every land. In particular, I hope that Athenians and all Greeks will still be able to discuss the vital issues affecting education and, for that matter, issues touching the whole of Greek life. I am confident that free men everywhere share that hope.

UNIVERSITY RESEARCH AND THE FEDERAL GOVERNMENT: TIME FOR REASSESSMENT

Mr. MONTGOMERY. Mr. Speaker, I ask unanimous consent that the gentleman from Indiana [Mr. BRADEMAS] may extend his remarks at this point in the RECORD and include extraneous matter.

The SPEAKER pro tempore. Is there objection to the request of the gentleman from Mississippi?

There was no objection.

Mr. BRADEMAS. Mr. Speaker, yesterday, November 29, 1967, I had the honor of addressing the annual conference of the National Council of University Research Administrators here in Washington, D.C.

The subject of my address was the relationship between the universities and research supported by the Federal Government.

I insert this address at this point in the RECORD:

UNIVERSITY RESEARCH AND THE FEDERAL GOVERNMENT: TIME FOR REASSESSMENT

(An address by Congressman JOHN BRADEMAS, at the annual conference of the National Council of University Research Administrators, Washington, D.C., November 29, 1967)

I am pleased to have the opportunity today to talk to you about the significance of your work as directors of university research programs, for I believe that the research for which you bear some responsibility is of great significance not only to your respective institutions but to the entire nation.

Yet the wider implications of the structure of research in the United States have received far too little attention from the university community, the Federal executive agencies or from us in Congress.

I recognize that no two universities are organized identically and that your own responsibilities vary from one institution to another. Some of you may function chiefly as brokers between the talent pool of principal investigators on campus and the Federal agencies here in Washington that dispense research and development grants. Others of you may have some major responsibility for molding the policies of your institution with regard to research.

Yet I am sure that nearly all of you, in carrying out your duties, exercise considerable influence in counselling your respective institutions in an area of policy critical importance not only to your university but also, because of the effects of research activities, to the nation.

It is for these reasons and in this context that I should like to share with you some observations on the relationship between the university and government-sponsored research.

TIME NOW TO REASSESS RESEARCH PROGRAMS

Now is an especially appropriate time to reassess this relationship. Why?

In the first place, Federally supported academic research has reached a magnitude such that its impact is pervasive in terms both of shaping the process of education on campus and of yielding insights and advances for the wider society.

After all, in the short span of nearly 8 years that your National Council of University Research Administrators has been in existence, Federal support for research and development has more than trebled, from $410 million expended by universities and colleges in calendar 1960, exclusive of Federal contract research centers, to an estimated $1.47 billion for the current calendar year. During the same time, the proportion of total university and college research and development funds received from the Federal government rose from slightly less than 50% in 1960 to about 62% in 1967.

On the other hand, mounting pressures to economize, especially in view of the Vietnam War, are leading both Congress and the Executive Branch to hold the line or even to cut back the level of Federal support for academic research. Consider, if you will, several indices of this economy drive. As you know, the growth of Federally-sponsored research for academic science—including research facilities and aid to students as well as research funds per se—has accelerated sharply in recent years.

Here are some National Science Foundation figures that indicate how fast Federal support of academic science has been growing:

Fiscal Year 1964 saw a 15% growth over Fiscal 1963, Fiscal 1965 a 19% expansion over 1964, and Fiscal 1966 bore a 20.8 increase, carrying Federal obligations past the $2 billion level.

DECLINE IN FEDERAL SUPPORT OF ACADEMIC RESEARCH

But in Fiscal 1967 the rate of increase dropped to 8.3%, and, more significantly, the figure for the present Fiscal Year 1968 will show no more than a 2% increase. If we take into account rising costs and inflation, this figure actually represents a slight decline of Federal support for academic sciences.

Moreover, graduate school programs will be subjected to further pressure as the number of Federally sponsored fellowships is reduced. Although precise figures have not been released, some estimates have been made by Dr. Philip H. Abelson, Director of the Geophysical Laboratory of the Carnegie Institution of Washington and editor of Science Magazine. After careful checking Dr. Abelson recently came up with a previously unpublished Federal agency estimate projecting a precipitous drop off in newly awarded Federally supported fellowships and traineeships from 15,000 in fiscal year 1966 to 10,500 in fiscal 1968.

These circumstances should compel the universities and those who direct their research to consider with even more than normal care important national policy decisions affecting the structure of research.

I hope, then, to stimulate your thinking about values and responsibilities that go far beyond the boundaries of your own individual universities. For, as a member of the committee of the House of Representatives—Education and Labor—having primary responsibility for higher education, I believe it is not only desirable but essential for the welfare of higher education and the nation to encourage a more sharply focused dialogue about a number of critically important issues raised by the relationship between university-based research and the Federal Government.

THE FEDERAL AND THE UNIVERSITY PERSPECTIVES

Two ways of looking at the issues associated with the advent of major Federal support for research and related activities come immediately to mind.

One might, for example, view matters from a Federal government perspective.

Is there, we might ask, an overall Federal policy regarding the support of research? Or, have governmental outlays for research simply mushroomed without benefit of guiding logic?

What kinds of policies and procedures have been or might be adopted to administer the current estimated 17 billions of public dollars which flow from the Federal government for these purposes?

How do governmental bodies see research funds affecting the functions and objectives which these bodies were created to serve? How do governmental agencies view the institutions that become the operating users of these funds?

To put the point another way, what kinds of research policies, procedures and programs in the Federal government need re-examination and adjustment?

A second way to view the issue would be to start from the vantage point of the user institutions including universities, Federal contract research centers, independent research organizations and private industry.

What, we might ask, are the effects of Federal policy on those institutions? What kinds of costs and benefits are associated with the participation of different kinds of institutions in Federal research activities?

How are the purposes and functional responsibilities of different kinds of institutions affected for good or ill by the tremendous Federal role in the support of research and development?

Each of these approaches has certain advantages, and certainly Congress should consider both. For that reason, in these remarks I shall, without limiting myself either to the perspective of the Federal government or of the participating agencies and institutions, examine briefly nine issues which I believe have become acute with the rise of major Federal support for research. I propose to sketch out the dimensions of each of these issues and then, at the conclusion, to offer certain suggestions.

ONLY 3.1 PERCENT OF FEDERAL R. & D. FUNDS GOES FOR SOCIAL SCIENCES

1. Let me begin with an issue that is especially timely this year owing to the initiation of legislation in both the House and the Senate authorizing the establishment of a national social science foundation—the adequacy of Federal support for the social sciences.

In the past twenty years we have witnessed a phenomenal growth of Federal support for research and development. The overwhelming proportion, we know, has gone to the support of the natural sciences, including the physical, chemical, biological, and medical sciences. Only a very small proportion of the total funds allocated by the Federal agencies to the support of basic and applied research has gone to support the social sciences. Updated and, I believe, thus far unpublished National Science Foundation figures indicate that in fiscal year 1966 Federal funds for research in social sciences, exclusive of psychological sciences, expressed as a part of all Federal funds for basic and applied research, was 3.1 per cent.

This small percentage of dollars directed to the social sciences is to me a matter of serious concern. Of course, neither the number of dollars nor the percentage of dollars is relevant by itself. A great deal of the debate about inadequate support for the social sciences has been conducted almost entirely in terms of the disparity of the support. Neither the actual dollars arguments nor the percentage arguments make much difference until those figures are weighed alongside the long range benefits to society likely to result from greater support for the social sciences.

But the provision of adequate support for the social sciences and the humanities is based not only on the potential outcomes of either mission-oriented or "free" research in these areas. The social sciences and the humanities are vitally important parts of university, college and lower schooling, and the social studies in the long run stand to suffer if not provided with sufficient means to develop and advance the frontiers of knowledge in their own particular discipline.

FACTS NEEDED TO STRESS IMPACT OF RESEARCH ON TEACHING

2. I pass now to a second issue, one with two dimensions. Its first aspect is the argument that research support is necessary in all fields in order to improve the quality of instruction; its second is the counter argument, voiced in recent years by an increasingly articulate and aroused student body and ably supported by other standard bearers as well, that the presence of large scale research on college and university campuses across the country actually creates a severe drain on teaching.

Both of these questions have been a subject of considerable debate, and the testimony available on all sides of the issues is voluminous. To illustrate my point I need only cite the 1965 hearings published by the House Government Operations Subcommittee on Research and Training Programs following Congressman Henry Reuss' valuable investigation of the potential conflicts between the purposes and operations of the Federal research programs and the nation's goals for higher education.

Intuitively it is easy to see how the presence of research in the university environment contributes to the timeliness, the relevance and the currency of instruction in higher education. I am also aware of the sense of rigor which teaching can impart to research.

In short, there are strong logical arguments for supporting full-fledged research and teaching programs in colleges and universities.

On the other hand, logic and intuition must themselves be subject to the test of reality, and one of those realities is the persistent complaint from various quarters that the rhetoric does not jibe with the facts. Increasingly researchers simply are not teachers, and teachers are not researchers. The functions become separated in the university. The students bewail their lack of access to their professors and complain of the degree to which they are made to feel that they are a relatively minor and annoying impediment to the real business of the university—which is servicing the research needs of Federal agencies and foundations.

The need for hard data here, for relevant evidence, is clear. While logic is neat and intuition compelling, they cannot continue to be the sole basis of national research policy.

COST SHARING: PRO AND CON

3. Let us proceed to a third issue—and one of the hottest at the moment—cost sharing.

The idea that research performed on campus is of some benefit to the institution at which it is performed as well as to the agency which supports it has constituted one of the foundation stones for a government policy about which there has been substantial controversy. Accordingly, the principle of cost sharing, or institutional contribution, has been applied almost universally throughout the government by agencies granting or contracting for research with colleges and universities.

Again the issue is a murky one. The problem seems to revolve around several presumptions not all of which are mutually consistent.

On the one hand, the argument for cost sharing is advanced by those who hold that research is mutually beneficial to both institution and governmental agency and therefore should in some degree be supported by both. Others support cost sharing on the grounds that so long as the institution has some of its own funds in each venture, it maintains a degree of academic control over those projects essential to keep institutional priorities in sight. This control, it is said, would be lost if research projects were wholly funded by the granting or contracting agency.

Those who argue against cost sharing do so on the grounds that colleges and universities, under cost sharing arrangements, are forced to sacrifice other aspects of their activities in order to subsidize research which is beneficial to the nation as a whole and which, therefore, ought to be supported wholly by the agency or agencies involved. This approach holds that if the funding agency believes the research is important enough to support, it should be willing to stand the full costs of the project effort.

Some have suggested an interesting compromise. They propose that the granting agency should adopt somewhat more flexible policies, seeking institutional cost sharing where the research activities are proposed and initiated by the academic community, but adopting a policy of full reimbursement where the projects are proposed by a particular government agency to support its mission.

The issue is clearly most important to higher education, for something like two billion Federal dollars are expended each year on research and development in the nation's colleges and universities.

If one adopts as a minimum a five percent figure for cost sharing, simple arithmetic reveals that as a community, the American college and university must put up $100 million annually from their own funds. And, as the magnitude of Federally-sponsored university research continues to expand, our universities, already severely pressed for adequate operating funds, will find themselves subjected to increasing financial pressures.

INADEQUATE UNIVERSITY MANAGEMENT OF RESEARCH

4. Cost sharing leads us into the fourth issue, the question of university responsibility for the management of research. This problem arises as much from the system of project grants so fully ingrained in the administrative philosophy of research programs at the Federal level as from the peculiar independence of the academic disciplines and the bargaining power that their independence gives them with university administrations across the country.

My conversations with agency officials in the government reveal the degree to which college and university administrations are often nothing more than transmitting and contracting agents for project directors with most of the administration and negotiation being handled directly by the principal investigators. To be sure, this pattern is now changing, particularly at the larger institutions. Yet the amount of control, or lack of it, that universities have over their research faculties often creates administrative problems.

I shall simply suggest a series of questions which seem relevant here. How much control should universities have in this matter? What responsibilities do principal investigators owe to institutions which have housed their research? How can the obligations on all sides be satisfactorily fulfilled?

In what sense, for example, can a university be said to be fully in control of itself if its highest officials do not know, and in some instances are not allowed to know, what kind of research is being conducted on campus?

How can both university and faculty members protect themselves against the extreme mobility of the market place to insure that research obligations are fully satisfied before personnel shifts take place? Is the more important question perhaps one of devising management procedures which insure the development of realistic timetables for research efforts which take place in college and university environments?

THE MERITS OF INSTITUTIONAL RESEARCH SPECIALIZATION

5. A fifth issue relates to the question of inter-institutional cooperation.

This question is now not so much one of research management as university management. To what extent can a university attempt to be universally excellent? Or, to reverse the question, to what extent can a university afford *not* to be excellent in a balanced spread of fields? Excellence, of course, is critical to the performance of research and to the training of graduate students; the two go hand in hand.

The prospects of inter-institutional cooperation are attractive here. But the implications of university decisions to cooperate with one another in order to limit the fields in which they will strive for excellence are obviously far-reaching for the planning and development of research efforts.

Of some interest here may be a relatively new effort in the U.S. Office of Education which may well illustrate the two-fold benefits of specialization. In the Research and Development Center Program of the Office of Education, a mechanism has been evolved whereby an institution with a high degree of competence of a particular sort chooses to identify a specific problem area in education as its own research specialization. If everything is satisfactory the institution commits itself to administering an evolving program of research focused on that problem area, continually regenerating its work on the basis of its findings.

This arrangement requires a strong degree of institutional commitment and the creation of planning and administrative mechanisms equal to the task, but it also tends to free the university, for this portion of its research at least, from the difficulties and dislocations inherent in the project research approach.

Perhaps this Office of Education concept should have broader applicability.

SPREADING THE WEALTH

6. Let me now raise the important question of geographical distribution.

The problem runs deeper than the political pork barrel syndrome.

All research agencies in the Federal government operate at present under an executive order signed by the President two years ago requiring agency officials to pay particular attention to the research needs and capabilities of small colleges and to concern themselves with the more equitable distribution of research funds across the nation.

A whole series of tantalizing issues comes to mind. Do the purposes for which government agencies support research demand that it be done solely on the basis of the most competent personnel? Does not this policy then create a situation where the rich get richer and the poor get poorer?

Or turn the question around. Is it in the national interest that research and development funds should be concentrated in the 40 or 50 strongest research institutions or, in the long run, do not the nation and higher education generally stand to benefit more if the funds are more widely distributed?

If my earlier observation that research tends to improve teaching has any merit, then is it not essential that some research funds be provided to *all* institutions?

To put the point another way, cannot our society afford to support research as a process critically important to the instructional function of higher education as contrasted with research conceived as an activity designed to yield, ultimately, answers to pressing social and technological questions?

THE PERPLEXING PROBLEM OF CLASSIFIED RESEARCH

7. A seventh issue of considerable currency is the perplexing question of classified or secret research. All across the country universities are reassessing their policies concerning classified research projects for the Federal government.

There are at least two elements to this concern. Faculty members are afraid that secret contracts may force scholars to default on their professional obligation to make known the results of their research activities. In addition, it is no secret that opposition by some scholars to the war in Vietnam and to any war-connected research has also contributed to this reassessment.

There are very difficult moral, professional and practical problems involved in this issue. They range from the desire to locate such contracts in universities—because that is where basic research is being done—to the moral and professional concerns I have already cited, the responsibility of American citizens qua citizens who happen to be academicians with a capability of contributing to national security.

8. An eighth major issue centers on the kinds of research functions that universities ought to perform. More than one university operates large, if not huge, contract laboratories for the Federal government. In these laboratories activities all the way from basic research through development and initial testing take place. While the advantages to a university of operating such activities are clear both in financial and public relations terms, it is still relevant to ask whether, in terms of the peculiar missions of colleges and universities in the United States, many of the latter stages of the research and development continuum are best performed in universities. Perhaps other types of organizations are more suitable.

When I raise this issue, I am certainly not questioning the importance of involving the academic community in the application or development stage; I am asking rather whether the university is always or even often the best place to carry out such activities.

NATIONAL RESEARCH POLICY IS OVERDUE

9. I have reserved for last the largest of the issues, namely, the question of the development of a national research policy which would help us allocate wisely funds among and across the disciplines by which we have traditionally advanced our knowledge in all fields—the natural sciences, the social sciences and the arts and humanities.

Many, many agencies of the Federal government engage in the support of research and development programs. An Office of Science and Technology exists, one of the purposes of which is to coordinate these efforts. However, certain circumstances conspire to work against the development of a national research policy. I might cite again, for example, the enormous gaps in existing research support for the humanities and social sciences, the traditional independence of the university community and the relative freedom of some individual Federal agencies to pursue their own courses of action.

But the growth of science in the past 20 years makes an effort to develop a national policy essential. Of course, in one sense we already have by default a national research policy, but it is *ad hoc* and insufficiently considered.

Many types of people, many competencies, many different agencies will need to be involved in the kind of discussions of which I speak, for it is far from clear what should be the administrative arrangements for formulating and implementing such a national policy. Certainly the dialogue will have to move from an exclusively academic base. In particular, the discussion will have to build much better bridges to the political decisionmakers than has so far been the case, for they are the ones who must defend to their constituencies their votes for billions of dollars for research.

The shaping of a national research policy will involve the discussion and analysis of all of the issues I have raised here and more. It will necessarily involve the academic community, industry, the lay public and political figures. It is clear to me, however, that the size and significance of the research effort in the United States—a size and significance, incidently, which extends far beyond our borders—constitutes probably the best argument for the establishment of some mechanism for the continuing development of such a national policy.

I have raised a number of issues with you today. In discussing some of them I have indicated my own leanings; for others I have sought only to raise crucial questions. In concluding, however, I want to take a specific stand on two of the issues I have discussed.

First, I am convinced of the need for a substantial expansion in support of research and related activities in the social sciences and the humanities, as well as, I might add, continuing appropriate support for the natural sciences. During recent years we have devised a number of programs aimed at solving the social problems of our country. All of these programs—for examples, health, poverty, education and housing—depend upon the strength and depth of our understanding about men as individuals and as social phenomena. The legislation and the appropriations accompanying them have underscored the national commitment to come to grips with these problems. But we are dependent upon science and upon the scientific tool of research to lend us the competence to solve them.

TOO LITTLE RESEARCH FOR EDUCATION

Second, I believe we should increase substantially our investment in research on education. For we now spend on our educational system, including higher education, nearly $50 billion a year. Yet in support of this vast enterprise, of such overriding importance for shaping our society, we spend not more than $150 million a year for research and development aimed at improving the efficiency, effectiveness and relevance of our educational system. This figure constitutes about two-fifths of one percent of the total effort. Yet fully 3 percent of the nation's Gross National Product goes to research and development for all activities.

As a nation, we have not yet learned enough about how to teach and to learn. It is clear that we must invest more in research on education if we are to reap the maximum dividends from our substantial expenditures on education.

For our children—and the educated men and women they become—constitute the most important natural resource we have. Yet, as Dr. Hendrik G. Gideonse of the U.S. Office of Education has pointed out, it is ironic that we have not found their education sufficiently pressing to devote to it adequate research resources.

With so many critical issues before us—and I am sure you could add others to my list—I want to make one final plea to you as university research administrators. My plea is that you intensify the dialogue on these issues among yourselves, with other university officials, with researchers and teachers, with Federal executives and Members of Congress concerned with the relationship between university-based, Federally-supported research activities.

Not only the colleges and universities you serve but the entire nation has a stake in the fruits of this dialogue.

PROGRESS WITH PATIENCE—TITLE I OF THE ELEMENTARY AND SECONDARY EDUCATION ACT

Mr. MONTGOMERY. Mr. Speaker, I ask unanimous consent that the gentleman from Indiana [Mr. Brademas] may extend his remarks at this point in the Record and include extraneous matter.

The SPEAKER pro tempore. Is there objection to the request of the gentleman from Mississippi?

There was no objection.

Mr. BRADEMAS. Mr. Speaker, yesterday, November 29, 1967, I had the privilege of addressing a conference of State officials in charge of coordinating programs under title I of the Elementary and Secondary Education Act.

The conference, held here in Washington, was scheduled by the U.S. Office of Education to give the State title I coordinators the opportunity to share with each other ideas from their experience in helping local schools operate programs for disadvantaged children under title I of this historic legislation.

I insert the text of my remarks at this point in the Record:

Progress With Patience—Title I of the Elementary and Secondary Education Act

(Address by Congressman John Brademas, conference of State title I (ESEA) coordinators, November 29, 1967, Washington, D.C.)

I am glad to have the opportunity to speak at this significant conference.

As coordinators of Title I programs under the Elementary and Secondary Education Act, you have my greatest respect and admiration. During the past two years, you have taken on the responsibility to help carry out America's first major commitment to erasing inequality of opportunity in our schools. President Johnson and we in Congress provided the mandate in 1965, but it has fallen to dedicated and determined people like you to face the tough problem of transforming that mandate into concrete programs.

As the National Advisory Council on the Education of Disadvantaged Children said over a year ago, you are a group "standing in the eye of a national hurricane, weathering conflicting demands and expectations, yet upon (whom) the Nation depends to pilot it over an uncharted sea."

Indeed, I consider few tasks to be more critical than yours to the future of our nation. For ESEA, particularly Title I, holds the promise of quality education for all Americans, and we must make good on that promise.

This is not to say that through Title I alone we can overcome generations of deprivation among the poor. The magnitude of the task obviously far exceeds the investment of 1 billion dollars a year that we have made to improve the education of disadvantaged children. But Title I stands as the prime *symbol* of a new national commitment to equal educational opportunity, a commitment on which we must not default.

This morning I would like to share with you some thoughts on Title I from my perspective as a Congressman and member of the House Education and Labor Committee. As we enter the third year of Title I implementation, we are still moving on that largely uncharted sea—with many gaps in our knowledge and many issues unresolved concerning the direction of our Title I efforts. Nevertheless, I shall venture some ideas as to future needs and priorities.

Let me first, however, comment on a major issue of public policy which bears on Title I and which has caused increasing debate in recent months. I refer to the highly charged issue of whether school integration or compensatory education programs constitute the most effective approach to achieving equal opportunity in education—whether we should concentrate our resources and energies on building quality in racially isolated ghetto schools, or instead push for immediate integration.

As you know, there are educators and civil rights leaders on both sides of this issue and the end of the controversy is not in sight. At the U.S. Civil Rights Commission conference of November 16–18, 1967 in "Equal Educational Opportunity in America's Cities", integration versus compensation became the major topic of debate and both points of view were effectively presented.

I certainly do not have time here to dig deep into this crucial debate, both sides of which are backed by impressive statistics and expertise. I would suggest, however, that spokesmen for the two sides may be boxing themselves into hardened positions and closing out middle alternatives. Bayard Rustin, in his address at the Civil Rights Commission conference here in Washington, made a plea for reason when he said, "We have got to stop the debate over whether you're for integration or quality. You're for quality first, and for that degree of integration which is consistent with it. We want children who can read, write, and do arithmetic."

I don't think it is yet proved with any certainty what degree of integration is, in fact, required to achieve quality education, nor do we know, in the absence of integration, how much quality can be achieved by means of compensatory programs such as Title I ESEA. We simply do not yet have the hard data to show one way or another whether substantial compensatory programs can make real differences on a nation-wide scale in the quality of schooling for disadvantaged children.

TOO SOON TO JUDGE RESULTS OF TITLE I

We are all aware of the widely discussed reports on race and schools published by the Civil Rights Commission and the Coleman Report published by the Department of Health, Education, and Welfare. In view of these reports, sharp questioning of the effectiveness of compensatory education in segregated schools is certainly in order. But at the same time we must recognize that any final judgment on the compensatory approach would be premature at this point. Title I has been in operation for too short a period to gauge its results precisely, and, moreover, carefully designed evaluation studies have so far been too scattered to suggest any emerging pattern.

If anything, the data that do exist indicate highly varied results, both positive and negative. In a program like Title I, which depends heavily on local community initiative and followthrough, we should expect both local successes and local failures—and such a record is what the scarce evidence so far available seems to tell us.

In any case, no one involved in this great policy debate should be prepared at this early date to write off the efforts being made under Title I and other compensatory programs. Title I has established a vast number of new programs for disadvantaged children. While we cannot be sure that these efforts are achieving long-term effects, there is no question that they are in many cases making a tangible impact in the short run on the children and on the schools.

In its report early this year, the National Advisory Council on the Education of Disadvantaged Children noted evidence of visible effects of Title I programs—for example, removal of extreme hunger and sickness as barriers to education for hundreds of thousands of children through the provision of lunches and breakfasts and basic medical care, addition of badly needed teaching staff and other personnel in schools serving poor children, expansion and improvement of school libraries, increased use of subprofessional aides to relieve teachers of routine tasks and provide individualized attention, improved morale of teachers and administrators in poor schools. These are just a sampling of the kind of tangible impact that I am sure all of you have observed in the Title I projects in your states.

I submit, then, that we must allow sufficient time for the effects of Title I to take hold. Our ultimate verdict on the effectiveness of compensatory programs must await systematic evaluation over a period of years.

MUST PUSH FOR BOTH INTEGRATION AND QUALITY SCHOOLING IN SLUMS

In the meantime, I would agree with commissioner of education, Harold Howe, who said at the Civil Rights Commission conference recently that unquestionably we must press forward on both fronts—continuing our efforts to upgrade schools serving disadvantaged children, but also seeking new progress in desegregation, which must remain our goal.

In some cities, deeply rooted segregation patterns may leave compensatory education as the only viable alternative for the near future, and in such cases compensatory programs may show early and positive results.

In other communities, desegregation of schools may be a feasible and effective alternative; witness, for example, the case of White Plains, New York, where racial balance has been achieved over the past three years by a school board decision to limit the percentage enrollment of Negroes in any one school. In a study reported earlier this fall, the school board reported that both Negro and white students have benefited academically from the program.

Furthermore, as Commissioner Howe has also pointed out, a number of local school boards are choosing to link compensatory programs with plans to reduce racial isolation of the schools. School systems in Berkeley, California, Evanston, Illinois, and Pittsburgh are making significant progress under policies aimed at merging the two approaches.

My remarks so far are not intended to mean that we can be at all complacent about our programs under Title I, or that we should just sit tight for a few years until we can measure the results. While it is not yet possible to draw scientifically valid conclusions about the results of Title I programs, we can and must make judgments about problems that have appeared in the operation of Title I and we must reshape our efforts accordingly.

Certainly there have been problems, as you well know from working with local programs. The National Advisory Council, while commending the visible achievements that I have cited, has nevertheless pointed out that many Title I projects are piecemeal and fragmented. It is "extremely rare," the Council has said, "to find strategically planned, comprehensive programs for change."

PROBLEM OF LATE FUNDING BY CONGRESS

Let me say, to begin with, that I fully acknowledge Congress' share of responsibility for inadequate planning under Title I. As you at the state level have indicated in answer to questions from the Office of Education, a major source of difficulty has been the conflict between Congressional authorization and appropriation procedures and the traditional funding schedule of the schools. Schools simply do not have the opportunity to do careful project planning when they do not know the exact amount of Federal aid they will receive until well into the school year. And when programs are forced to begin late in the year, their effect is, of course, likely to be reduced.

Many of us in Congress have been aware of this late funding problem and have supported proposals aimed at assuring earlier appropriations. In a major report on the Office of Education soon to be released by the House Special Subcommittee on Education, one of the primary recommendations concerns measures to guarantee advance funding for education programs in order to afford schools the time to plan effectively.

I might note also that the Senate Labor and Public Welfare Committee recently reported amendments to the ESEA which contain provisions to remedy the late funding problem. By these provisions, programs under the Act would be automatically extended for one year should Congress fail to take action on the authorizing legislation by the year in which the authorization is scheduled to expire. Also, if Congress does not approve appropriations by May 15 before the beginning of the new fiscal year, the Office of Education could continue to make grants to schools at the current fiscal year level. These measures would clearly remove much of the uncertainty under which schools now must plan and operate Title I and other ESEA programs.

Stiff opposition to the proposals can be expected from the House Appropriations Committee, but it is my hope that the House will accept the main thrust of the Senate provisions so that we can finally resolve this pressing issue and give both state and local education agencies more lead time in formulating Title I programs.

But the difficulties in Title I administration cannot be attributed entirely to Congressional patterns of late funding. I think it is clear that local school districts must do a more effective and innovative job in carrying out Title I programs and I suggest that as state coordinators, you are in a position to guide and encourage enhanced efforts on the part of local schools.

EMERGING NEEDS UNDER TITLE I

Let me here identify several needs and priorities to which I believe we must give more attention in Title I programs at the local level:

(1) First, I think that we need to seek ways of opening our schools to the entire community and utilizing them full time, not just one-third of the time, the conventional practice in most schools. We cannot continue to lock the resources and facilities of our schools behind chain fences and bolted doors each evening, weekend and summer.

President Johnson has said that "the school of tomorrow will not close its doors at 3 o'clock. It will employ its buildings around the clock and its teachers around the year. We cannot afford to have an $85 billion plant in this country open less than 30 percent of the time."

In my view, Title I offers the opportunity to extend the school into the community through the development of more after-school and summer programs that involve both students and parents.

(2) Another important priority that we must stress in Title I is early childhood education. It is clear that the child of two or three is usually ready to be exposed to formal education, and the importance of this exposure is perhaps greatest for disadvantaged children.

Evidence from a National Institute of Health study strongly implies "that intervention into the life of the socially disadvantaged child should begin during the age span of one to three years since the child's I.Q. reaches a high point at age three . . . he will following this age be unable to achieve the norm on any test of ability or achievement regardless of massive efforts mounted by the school at remediation of his deficits."

In view of such findings, we should give careful consideration to incorporating preschool projects similar to Head Start as integral parts of Title I programs.

(3) A third need in Title I programs is parent involvement—a need which has been clear from the beginning of Title I but which has been difficult to fulfill. The National Advisory Council has found a widespread lack of meaningful parent participation in planning and executing public school programs for the disadvantaged. The Council adds that there appears to be little understanding of how mutual involvement between parents and school teachers and administrators can be brought about. Progress seems to be blocked by the frequent inhibitions of the parent and the traditional reluctance of teachers to allow "parent meddling" in school affairs.

This is likely to be a continuing problem in Title I and I certainly can offer no simple answers. I would only suggest that we may be able to achieve greater parent involvement in light of the recently increasing demands by parents in the city ghettoes that they be given the right to govern the ghetto schools. Negro parents in particular are showing more active concern with school policy that affects their children. We should at least be attuned to this development, for it may provide the chance in some instances to bring the parents into the Title I planning process.

(4) I should also like to suggest encouraging the involvement of universities and colleges in Title I. Local school districts should seek to exploit the resources of local institutions of higher education in both the planning and execution of programs for the disadvantaged. The local board might, for example, contract with a university for managing a section of the city schools or one particular aspect of the Title I program.

Private corporations in some cases might similarly be considered as possible resources to be tapped by the local district in the administration of its Title I activities.

(5) Perhaps the most important over-all need in Title I is to increase the focus of programs on the improvement of teacher quality and teacher attitude toward the child.

The National Advisory Council has highlighted this need in its reports on Title I and has recommended a number of specific actions such as expanding summer programs that encourage teacher experimentation, emphasis on identifying teachers who are successful with the disadvantaged, teacher exchanges among disadvantaged schools in order to share ideas, a greater Federal advisory role in disseminating information on the local experiences of teachers and administrators in Title I programs.

One of the most encouraging aspects of the Teacher Corps, of course, is that it is focusing attention on the widespread shortage of qualified teachers of disadvantaged children and on the pressing need to develop more programs specially designed to train teachers of the disadvantaged.

FOCUS ON BASIC CHANGES IN EDUCATION OF THE DISADVANTAGED

The important point, I think, is that Title I can achieve results only if it serves to alter existing patterns of education in disadvantaged schools and to stimulate new approaches to teaching the disadvantaged child. If Title I simply serves to invest more money in the same educational methods that have failed for years in slum schools, then the impact is likely to be negligible. It accomplishes little to reduce class size from 40 to 25 if the teacher continues to employ ineffective teaching techniques and is still hampered by patronizing attitudes toward the disadvantaged school child.

As one writer on the education of disadvantaged children, Mario Fantini of the Ford Foundation, has put it, Title I must be much more than an "additive" program, one that simply supports more of the same adding new layers on to the old. The challenge of Title I, instead, is to effect broad change in the education process itself. Local schools and school teachers must be stimulated to experiment, to seek new ways of reaching and teaching children raised in poverty.

In this connection, let me here note another recommendation of the National Advisory Council on the Education of Disadvantaged Children:

"Greater vigilance by school boards and superintendents to insure that principals of schools of the disadvantaged are selected for their inclination to encourage teachers in experimenting, sharing experiences, and perhaps upsetting old applecarts. Time and again, our consultant-observers report coming upon principals whose understanding of the needs of the disadvantaged is less than that of the teachers. Lacking understanding, some create atmospheres that stifle initiative and creative thinking. Accomplishment of widespread self-change by teachers is difficult enough. Without cooperation and leadership by principals, it appears virtually impossible. In every district the most imaginative and effective principals should be identified and given high visibility. Their leadership is a critical element in their own schools and in the communty."

TITLE I NOT A GENERAL AID PROGRAM

One of the most disturbing reports on the operation of Title I that I have heard is that many school districts have tended to conceive Title I simply as a general aid program for underwriting the every day costs of education. The ESEA of 1965 and its legislative history are clear in establishing the intent of Congress in Title I: to target limited Federal funds on the special needs of children in school districts with high concentrations of poor families. The aim was not to provide money that would merely relieve the financial pressures on local school districts.

As you know, this year amendments were proposed in the House that would have converted Title I and other parts of ESEA into a modified general or block grant program. After long debate, the proposal was defeated by the House, reaffirming the original intent to focus the titles of ESEA on particular national goals in education.

* * * * *

I have suggested this morning a number of needs and challenges to which I believe you, in your crucial role as state Title I coordinators, must respond. I recognize, of course, that many of you work under severe problems of understaffing and that your capacity for stimulating broad change and movement at the local level is therefore limited. Nevertheless, we must look to you for guiding local efforts under Title I, for you have an opportunity to act as a catalyst in directing local attention to some of the critical priorities and needs in the education of disadvantaged children.

And let me here note that several states have already moved ahead to supplement ESEA Title I by enacting similar state-financed programs aimed at bolstering poorer school districts. I was encouraged, for example, to see the recommendation last week by the New York Board of Regents of a $112 million program to meet the urban school crisis in the state. The Regents proposal even includes an Urban Teacher Corps designed to recruit high quality teachers with talent for reaching deprived school children. I urge you as education leaders in your states to take the initiative in stimulating similar new efforts in your own states.

In conclusion, let me reiterate that you have my deepest respect and admiration, for you are charged with a great responsibility—and opportunity: to help throw open the gates of opportunity to a first-class education to hundreds of thousands of the children of America who desperately need it—the poor and disadvantaged.

I shall conclude by repeating to you the words of James L. Farmer, director of the Center for Community Action Education. Said Mr. Farmer:

"A teacher can be effective in teaching the disadvantaged only when he believes they can be taught, and believes in *them*—not in a romantic way, ascribing to *all* of them *all* of the virtues and *none* of the vices of man, but in the realistic sense that there is among them a reservoir of submerged intelligence, talent, and ability, the discovery of which is an exciting adventure, worthy of the best in any teacher."

It is to help the schools and teachers of our country tap that reservoir that is your high calling.

PLACING A PREMIUM ON MEDIOCRITY

Mr. MONTGOMERY. Mr. Speaker, I ask unanimous consent that the gentleman from South Carolina [Mr. ASHMORE] may extend his remarks at this point in the RECORD and include extraneous matter.

The SPEAKER pro tempore. Is there objection to the request of the gentleman from Mississippi?

There was no objection.

Mr. ASHMORE. Mr. Speaker, I would like to call to the attention of my colleagues an editorial which appeared in the Greenville News, November 24, 1967, for I believe that it points out a basic flaw in the reasoning of our Government. The flaw is demonstrated in the Government's attitude on equality. The theme of equality permeates virtually every Government agency. I am not speaking about equality of opportunity which I believe is one of the principles upon which our Nation was founded and has prospered. I am speaking of the Government's attitude which promotes the idea of making everyone equal.

The Federal Trade Commission's regulations place restraints on larger, more efficient companies in order that smaller, less efficient ones may compete on an equal basis. I would be among the first to regulate a company which used unfair practices to drive its competitors from the marketplace, but on the other hand, I see no basis for regulations which would reward a less efficient company solely to insure that it could compete on even terms. In my opinion, the goal of Federal regulations should be the production of the best product.

The most frightening results of this attitude of equality is found in the field of education. Under recent court decisions, and the policy of the Department of Health, Education, and Welfare, the inept, or slow-to-learn student is sent to the same classroom with students who learn more quickly. The result is that the good student upgrades the slow, while the slow student coordinately holds back the fast learner. I can see that the slow student must be helped, but I do not believe that he should be assisted at the expense of the more gifted child. As the editor of the Greenville News points out:

> Not even the Russian Communists any longer hold back their gifted people despite all their claims of absolute equality under socialism.

None of us wish to see this Nation become one of mediocrity, but I believe we are in danger of this if the idea of equality is carried to its extreme. It is time that the Government of the United States realizes that people are not equal in ambition and talent, nor should they be, and in striving so diligently to insure equality for all, the Government is at the same time committing this Nation to the path of the mediocre and the average.

The editorial follows:

PLACING A PREMIUM ON MEDIOCRITY

Writing in a nationally circulated magazine of some of the actions taken by the federal courts and other agencies to discourage mergers and to limit the size of more efficient and prosperous corporations to promote "competition," a law professor wrote these memorable words:

"The Court's reasoning teaches that competition in the quarterback market would be improved, and the public thereby benefited, if Joe Namath's knee were twisted before every game and Fran Tarkenton required to wear snowshoes."

To carry that analogy further, we suppose it would improve football competition if Johnny Unitas were forced to wrap his throwing hand in red tape and college backs like Jimmy Addison of Clemson were required to take on weight until they were partially musclebound.

Or, suppose a quarterback were allowed to either run or pass, but not to do both?

The point is that, quite aside from the anti-trust laws and FTC regulations, the government wishes to place restraints on efficient companies so that less efficient ones can compete on "even terms."

This, we are afraid, is symptomatic of what is happening in some other areas, those affecting individuals, as well. To meet certain sociological notions, changes are being forced in the public school systems which penalize the exceptional students for the benefit of the less capable ones.

It almost seems that the ultimate aim is to reduce all to the common denominator of mediocrity.

This perverse principle is evident, also, in programs which tax heavily the earnings of the more highly skilled workers, professional people and businessmen to subsidize the less able and less willing.

There is nothing inherently wrong in keeping the large companies from engaging in unfair or unlawful, undercover practices with the deliberate aim of forcing smaller and weaker competitors out of the market and out of business.

On the contrary, within reason, it is right. But it is not right to penalize success to offset incompetence.

The end result is that the stockholders and employes of the more successful firms will lose much while those of the floundering ones will gain little; and the public will pay more for inferior products.

Nor is there anything wrong in doing all that can be done in the public schools to improve the educational opportunities of those who come from limited backgrounds or who possess less aptitude and desire.

It is right and necessary to do this, and it must be done for the benefit of the public as a whole.

But the public as a whole loses when whole classroom groups are held back to the pace of the slowest and least apt individuals. Why not concentrate on lifting the level of the highest, as well as the lowest?

Not even the Russian Communists any longer hold back their gifted people, despite all their claims of absolute equality under socialism. Why should we start it now?

PAYING FOR OUR POLITICS

Mr. MONTGOMERY. Mr. Speaker, I ask unanimous consent that the gentleman from New York [Mr. OTTINGER] may extend his remarks at this point in the RECORD and include extraneous matter.

The SPEAKER pro tempore. Is there objection to the request of the gentleman from Mississippi?

There was no objection.

Mr. OTTINGER. Mr. Speaker, the Chase Manhattan Bank for some time has conducted an exemplary public affairs program to educate and interest its employees in our democratic processes at all levels of government. It is an unusual and, I think, excellent recognition by one of our major business establishments of the importance of public life to business and to the individual. I think it is an act of statesmanship.

As a part of this program, Chase publishes a periodic public affairs bulletin which it distributes to all 14,000 members of the bank's staff. Its latest bulletin, dated September 29, 1967, deals well with the bills lately being considered by the U.S. Senate concerning, as the title of the bulletin phrases it, "Paying for Our Politics."

The Chase bulletin discusses the pros and cons of any Federal financing of campaigns at all and the pros and cons of the specific proposals that have been offered by the administration.

Mr. Speaker, I think there is no subject of greater importance to our democratic system today. I know from personal experience the financial demands of a hard campaign in a tough district and the embarrassment of unfair charges of excessive campaign spending, fostered largely by our unrealistic campaign spending laws that are so highly misleading to the public. As campaign costs continue to mount, it becomes essential to the preservation of the integrity of our democratic processes that a way be devised to relieve financial pressures on candidates and office holders, to permit qualified people without individual wealth to run for office, and to assure that large campaign financiers do not wield unhealthy excesses of influence over our representative bodies.

With the above considerations in mind, I have introduced legislation in both the 89th and the present Congresses to provide for full disclosure of campaign expenses, prohibit real contribution and expenditure abuses involving conflicts of interests, and eliminate unrealistic ceilings.

I have also introduced legislation to supply registered voters with script through which they can make contributions to the candidates of party organizations or committees of their choice and which in turn can be turned in to the Treasury to pay from appropriated funds designated campaign expenses against receipted bills. I think this system is superior to either system proposed by the administration because, first, it gives the citizen the power to allocate funds among parties and candidates of his choice rather than having allocation performed according to an arbitrary formula; second, it thus eliminates all problems of allocations to minority parties; third, it avoids the pitfalls, highly dangerous in my view, of centralizing fund distribution—and thus power—through the national committees; and fourth, it avoids the pitfalls of tax deduction and tax credit schemes which, while they share the advantages listed above, favor the wealthy contributors over those with less affluence.

Mr. Speaker, I highly commend the Chase bulletin to my colleagues as an excellent discussion of the issues involved in paying for our politics.

Paying for Our Politics

In recent weeks, Congress has been looking more intensively than ever at election reform and campaign financing. Both problems are as old as political campaigns themselves, but they now take on a fresh urgency for two reasons:

(1) Both major parties are drawing up their tentative budgets for the 1968 Presidential campaign, with all signs pointing to the costliest campaign in history.

(2) Initial estimates indicate that once again the parties and candidates will be faced with a traditional campaign dilemma: insufficient funds to tell their stories to the voters as widely and fully as a Presidential campaign deserves.

Campaign costs, in short, are an immediate issue involving the heart of the democratic process, and directly affecting every citizen. So it is timely to look at the problem and some of the proposed remedies.

THE HIGH PRICE

President Kennedy, in a playful comment on charges that lavish expenditures explained his victories in the 1960 primaries, once read to a press gathering an alleged telegram from his father: "Don't buy one more vote than absolutely necessary. I'm damned if I'll pay for a landslide!"

There was no such telegram, of course, but the joke is not without point. Political campaigns have become so expensive that the problem of financing them—and the potential abuses therein— has been called "democracy's greatest unsolved problem."

In the 1964 campaign, Lyndon Johnson and Barry Goldwater between them covered nearly 100,000 miles, made some 400 speeches, and spent upwards of $20,000,000. An official of the Presidential Commission on Campaign Costs has estimated that a total of $200,000,000 was spent in the 1964 elections for all offices.

Where does it all go? Well, the $150,000 total spent in the 1860 Presidential campaign is about the price today of one hour of prime time on a TV network. A telethon, a favorite device in the wind-up period of a campaign, can run about $250,000. The fact is that because of television, politics—and the nature of campaign costs—have changed more in the past 15 years than in the last 150.

But TV doesn't gobble up all the money by a long shot. There are salaries for campaign staff, for newspaper and billboard advertisements, for travel expenses, for brochures, pamphlets, buttons, and direct mail solicitations, for hiring that hall—for the innumerable things required to keep a candidate's name, face and program before the electorate.

Will Rogers was right. "Politics has got so expensive," he said, "that it takes a lot of money even to get beat with."

WHO CONTRIBUTES?

The size of the campaign bill is only part of the story. The pattern of the contributions—with large gifts far outweighing small ones—is also disturbing.

Surveys indicate that only about 11 per cent of all Americans of voting age make any financial contribution whatsoever, with about 90 per cent of the total collected coming from about 1 per cent of the population. This, said President Johnson, in a recent message to Congress, creates "a potential danger—the possibility that men of great wealth could achieve undue political influence through large contributions."

In theory there are restrictions against large individual contributions, as well as disclosure requirements which presumably guard against violations. Thus laws now on the books put a $5,000 limit on individual contributions to a candidate or political committee, prohibit contributions by corporations or labor unions, and limit total expenditures by a national committee in a Presidential campaign to $3,000,000.

But many authorities feel the restrictions are virtually meaningless since there is nothing to prevent a person from contributing $5,000 to each of a dozen committees set up on behalf of a candidate. Through a proliferation of committees on the state and local level, the national committees are also able to circumvent the $3,000,000 restriction on their expenditures. Indeed, they couldn't function in a Presidential election year unless they did circumvent the letter of the law.

WHO RUNS?

A second equally serious problem produced by the high cost of campaigning is that lack of personal resources can discourage a prospective candidate from even making a bid for office. Substantial expenditures are often necessary to generate the momentum that eventually attracts contributions from outside sources. The party itself tends to favor the man who can take up the slack if contributions lag and, if necessary, support his own campaign staff.

To be sure, jokes and lurid tales notwithstanding, it is not really possible in most constituencies to "buy" an election. Many millionaires have tried and got only a high-priced political education and a depleted bank balance for their pains. For example, when the opposition resorted to heavy spending in the Idaho Senatorial campaign, Frank Church successfully counterattacked by the simple expedient of a statewide handshaking tour, leading one wag to comment that "Frank Church is the only lawyer in Idaho with a callus on his hand."

PROPOSED REMEDIES

Congress last year enacted a bill for financing political campaigns. The measure, sponsored by Senator Russell Long of Louisiana, with Administration support, called for each taxpayer to check a box on his Federal income tax return if he wanted $1 of his tax set aside for a political contribution. The total amount thereby raised was to be divided equally between the two major political parties.

The measure was hastily drawn and enacted, and Congress—in a kind of double-take—had second thoughts. The Long bill was attacked—belatedly, because, among other things, it did not permit the taxpayer to choose whether he wanted his $1 contributed to the Republicans or to the Democrats, and because it made no provision for financial aid to minor parties.

The upshot was that last spring, Congress voted to delay putting the Long bill into effect. The Johnson Administration thereupon came up with a new proposal: the Presidential Election Campaign Fund Act. This act called for Congressional appropriations to provide funds to meet the radio, television, advertising, printing and travel expenses of Presidential candidates. The funds would have been equally divided between the two major parties and provision was made for reimbursement of election expenses to minor parties as well.

On September 14, after months of negotiation, the Senate Finance Committee ordered reported an alternative bill, the so-called Honest Election Act, which significantly changes and adds to the Administration's original recommendations. This bill calls for:

(1) Congressional appropriations to provide equal amounts for the campaign expenses of the Presidential candidates of the two major parties, according to a formula based on the number of votes cast in the previous Presidential election.

(2) Reimbursement for election expenses of minor parties, based on the number of votes received in the current election. A minor party would be defined as one that got between 5 per cent and 25 per cent of the popular vote.

(3) Congressional appropriations for the campaign expenses of Senatorial candidates in an amount based on the number of votes cast in the preceding election in each state. Candidates of the two major parties would be entitled to equal amounts and third party candidates would be reimbursed for campaign expenses on the basis of the number of votes they received.

(4) Use of Federal funds by Presidential and Senatorial candidates to pay actual campaign expenses as audited and approved by the Comptroller General.

(5) Option by each candidate to finance his campaign through privately collected contributions or to use Federal funds. However, no one who elects the subsidy could receive or spend money during the election campaign from any other source.

Candidates for the House were not included in the Senate bill but, in order to encourage greater voter participation in all elections, the Finance Committee also provided for the first income tax credit for individual campaign contributions. The maximum credit allowed would be $25 or half of a $50 contribution.

PROS AND CONS

This measure will come up for debate on the Senate floor in the very near future. The debate is certain to bring out wide differences of opinion on the basic idea of Federal financing of election campaigns. Here are some of the pros and cons:

For Federal financing

(1) A Government subsidy could eliminate a Presidential candidate's dependence on individual wealthy contributors, and thus reduce the chances for improper influence.

(2) Federal subsidies would tend to equalize the financial strength of the two parties. This would not only prevent severe financial handicap—as has sometimes happened—from blunting the effectiveness of a party's Presidential campaign; it would also reduce the lobbying influence of certain organizations and groups that now traditionally contribute heavily to the campaign chest of a particular party.

(3) Federal subsidies would eliminate a tremendous amount of time and effort now expended before, during and after a campaign for no other purpose than to foot political bills. Much of this activity has a baneful effect on democratic politics. It involves a great deal of hoopla, rubber chicken dinners, even rubbier speeches and questionable "testimonials."

Against Federal financing

(1) Reducing the need for direct solicitation of funds might make the parties less responsive to the views and wishes of their supporters (this is the other side of the coin of the argument about "undue influence"). By the same token, voters might become apathetic about political issues if they are no longer under pressure "to put their money where their mouth is."

(2) Federal subsidies might tend to strengthen the national party organization at the expense of the state and local party units. The leverage local units now possess rests to a great extent on the national organization's reliance on them for fund raising in Presidential years.

(3) The Government would have greater power over the political parties once it was directly involved in the financing process, with the inevitable possibility of abuse. Democracy is threatened to the extent that political parties become appendages of government.

THE JOB FOR EACH OF US

The ultimate fate of the "Honest Election Act," or some variant of it, is impossible to predict. But there is one prediction that can be made with confidence: If some such measure does become law, the surest way to guarantee that its virtues outweigh its drawbacks is for each and every one of us to make direct contributions, small though they may be, to the candidates and parties of our choice. That will ensure that the Federal treasury does not become the only, or even the chief, source of funds for the democratic process.

But there is an even more pressing consideration. Regardless of what Congress does about the proposals now before it, there will be no Government financial aid to the parties in the months immediately ahead. They are crucial months politically, both on the national and local level.

Prospective candidates are now weighing the feasibility of a bid for office. Committees are being formed on behalf of actual or potential candidates, or for marshaling support on crucial issues. The parties themselves are beginng to expand the machinery and personnel required to carry their stories to the voters.

In sum, the parties and candidates need money *now*, and they will need increasing amounts as 1968 progresses. The $5 or $10 or more that we give as individuals can make all the difference. For it has been well said that "no people can be free unless it insists on paying its own bills."

MERITS OF JOB CORPS

Mr. MONTGOMERY. Mr. Speaker, I ask unanimous consent that the gentleman from Montana [Mr. OLSEN] may extend his remarks at this point in the RECORD and include extraneous matter.

The SPEAKER pro tempore. Is there objection to the request of the gentleman from Mississippi?

There was no objection.

Mr. OLSEN. Mr. Speaker, I have addressed this body before on the merits and contributions of the Job Corps conservation centers, and I have drawn special attention to the work recently done by young Jobs Corpsmen in fighting forest fires in my home State of Montana. Today, I wish to have inserted in the CONCGRESSIONAL RECORD examples of the many news reports covering this important Jobs Corps contribution.

Many laudatory articles on this subject have appeared in the Montana, Nebraska, Nevada, South Dakota, Utah, and Idaho daily papers, and I think my colleagues will enjoy looking through those that I have before me today.

By unanimous consent I include these articles and press releases in the RECORD at this point:

[From the Helper (Utah) Journal, Sept. 7, 1967]

JOB CORPS MEN UNDER BLM TRAINING TO FIGHT FOREST FIRES

In order to meet the emergency forest fire situation in the Western States, Castle Valley Job Corpsmen over 18 have received 16 hours of firefighting training so they will be available for these emergencies. The Price District BLM staff has instructed over 50 corpsmen in fundamental firefighting techniques. As part of their training, a small fire was set in a chained area northeast of Price and the corpsmen in organized crews were called upon to extinguish the blaze.

One trained 35-man crew was sent to fight a fire in northern Idaho last week and another 25-men were dispatched early this week. The Job Corps program again proving to be of substantial benefit in protecting and developing the natural resources of the United States by assisting in fire control work during the most hazardous fire season the West has seen since the year 1910.

[From the Price (Utah) Sun-Advocate, Aug. 31, 1967]

CORPSMEN JOIN FIREFIGHTERS

Three staff leaders and 24 corpsmen from Castle Valley Job Corps Conservation Center left Price by plane Sunday night for fire fighting duty in Idaho forests. They may be gone for two weeks or more.

Recently, Castle Valley Job Corps Conservation Center was requested to train a fire fighting crew. Corpsmen selected were volunteers over age 18. They received 16 hours of intensive training last week under the direction of experienced fire fighter Robert Dalla, with assistance from the Price District Office of the Bureau of Land Management.

The Boise Interagency Fire Control Office sent a plane to pick up the fire fighting crew. Mr. Dalla, George Drossos and Orlando Miera are leading the Castle Valley crew.

[From the Price (Utah) Sun-Advocate, Sept. 7, 1967]

JOB CORPS FIREFIGHTERS RETURN

Twenty-four weary men of Castle Valley Job Corps Conservation Center returned yesterday at 8:30 a.m. from two weeks of rugged fire fighting duty in Idaho. They had distinguished themselves in the successful containment of the China Creek fire near Lewiston, Idaho.

The men were led by veteran fire fighter Robert Dalla, assisted by George Drossos and Orlando Miera.

A replacement crew of 25 corpsmen has completed training and was alerted Tuesday, but with the containment of the China Creek blaze, this second crew was demobilized. Robert Turri was in charge of this second contingent.

The original crew was organized and trained the middle of August, and left the Carbon airport aboard a special Forest Service plane at 7:00 p.m., Aug. 20. They flew to Boise, then to Lewiston, and the fire line.

The Castle Valley crew was assigned to the evening shift, six p.m. to six a.m., and concentrated on mopping up hot spots after experienced crews had contained a sector. This was hot, hard and dangerous work.

"When we got there, the experienced fire fighters didn't think we could do the job," commented Corpsmen Rafael George, who lives in St. Thomas, Virgin Islands. "But when we came back in after our first shift on the fire lines, the boss fire man told us we were one of the best crews there."

"We worked hard on the fire lines. We were determined to make good. They said we were well trained. They wanted us to stay up there an extra week. You have to work together as a team. You have to follow instructions and obey the rules. There is no place for foolishness in fire fighting," said Corpsman Clem Arnold, who hails from Gulfport, Miss.

Both Corpsmen George and Arnold were injured while on duty. Mr. Arnold received second degree burns Thursday night when he stepped into a hole by a burning root. "The Army medic sprayed something on his leg to stop the pain. In five minutes the helicopter he called in had arrived and picked me up. Twenty minutes later I was in the hospital in Lewiston." I and George was cutting through a tree which had a soft center. His saw penetrated the log, his shoe, and into his foot. Both corpsmen were flown from Lewiston to Price last Friday afternoon. They were met at the airport by Medic Joe Koran.

Corpsman Arnold said, "I would go back again. It's a challenge between man and fire. Everybody wants to go back." Corpsman George agrees.

[From the Washington (D.C.) Corpsman, Sept. 15, 1967]

FOREST FIRES: CORPSMAN CREWS JOIN BATTLE

Nearly 1,000 volunteer Corpsmen from 20 Job Corps centers have joined thousands of professional firefighters at battling a series of devastating forest fires in the Pacific Northwest. As we go to press, more than 100,000 acres of valuable timber have gone up in smoke, and fires are still raging. Officials say that only a heavy rain will end the threat.

Over 2,000 separate blazes have been reported in California, Oregon, Idaho, Washington, Montana and in parts of Canada. Corpsmen from centers as far away as New Mexico are performing some of the dirtiest and most difficult jobs in firefighting—digging fire lines, doing K.P. and providing meals for other fire crews.

Jack Usher, a Fire Boss in Oregon's Mt. Hood National Forest, said of Timber Lake (Oregon) firefighters: "The Job Corps crews worked on a critical section of the fire at Dead Mountain Ridge. They lost no lives, had no injuries, made no complaints and did their jobs in a commendable fashion. I would be pleased to have them helping at anytime."

Many field reports describe the morale and spirit of the Corpsmen. One Curlew (Washington) crew that had been on the line for four gruelling days was taken back to the center for showers and a hot meal. Staff members feared that weariness had driven all the fight out of the Corpsmen and that they would not return to the line. But when busses arrived to take them back to the fire, not one man failed to climb aboard.

Centers that have sent fire crews are Mountain Home, Cedar Flats, Cottonwood and Marsing from Idaho; Cispus, Columbia Basin, Fort Simcoe and Curlew from Washington; Fort Vannoy, Tillamook and Timber Lake from Oregon; Weber Basin and Castle Valley from Utah; Fenner Canyon, Lewiston and Toyon from California; Anaconda and Trapper Creek from Montana.

[From the Salt Lake City Deseret News, Sept. 7, 1967]

JOB CORPSMEN AID IN FIREFIGHT

PRICE.—Several members of the Bureau of Land Management's Castle Valley Job Corps Conservation Center have been trained in fire fighting techniques and already have put their training to good use.

One crew spent several days fighting fires in Montana. The 24 corpsmen and their leader, Robert Turri, assistant director for work projects, may be dispatched anywhere in the west to fight fires.

BLM leaders instructed center personnel to give fire fighting training for every able bodied corpsmen over 18 years old.

The corpsmen received two days of intensive training. Part of the day was spent in classroom instruction and the remainder in the field under actual fire conditions.

Two years ago the BLM uprooted pinon and juniper trees in the Coal Creek area, five miles northeast of Price in a conservation project. The trees were pushed into rows, set on fire and the corpsmen doused them.

Robert D. Nielson, BLM state director, said BLM crews have battled 45 fires in Utah this summer and have been sent on 937 fires in other western states. The fires have burned 143,000 acres.

He urged everyone to use common sense when using the public lands: douse cigarettes, build fires only in established fire places or circles and report any fires immediately.

[From the Ogden (Utah) Standard Examiner, Sept. 7, 1967]

JOB CORPS YOUTH PUT ON PROBATION

A 19-year-old Job Corps Youth entered a plea of guilty in Second District Court here to a charge of carnal knowledge.

Forrest Smith of the Weber Basin Job Corps was charged with carnal knowledge stemming from an incident May 29.

He was placed on probation, subject to terms set down by the court.

[From the Kansas City (Mo.) Star, Oct. 1, 1967]

JOB CORPS GRADUATES WILL HEAR HARVARD LAW VALEDICTORIAN

Joseph Sorrentino, a Los Angeles lawyer who flunked out of four high schools and received a general discharge from the U.S. Marine Corps, but later was valedictorian of the 1967 class of the Harvard School of Law, will be the commencement speaker at the Tuesday graduation at the Job Corps Center for Women, Excelsior Springs, Mo. Ten enrollees will be graduated.

[From the Price (Utah) Sun-Advocate, Sept. 28, 1967]

ON THE JOB WITH THE CORPS

(By Robert D. Goff)

Recognition of our fire fighters continues to pour in, even though the men have been back for a week. Center Director George Gurr read three communications to the assembled corpsmen and staff recently at our awards dinner.

Senator Frank E. Moss wrote, "I am proud of the Castle Valley Job Corps boys who fought long and hard to control the great forest fire at Eagle Creek in Idaho. I understand their work was superbly performed, that they demonstrated great ability and courage, and that they were cited by Idaho officials for their outstanding efforts in the struggle to control the raging Idaho forest fires. Please extend my congratulations to each of the boys for their fine efforts."

Joe T. Fallini, state director, Idaho Bureau of Land Management, sent a telegram saying, "Your Castle Valley Job Corps crew under the supervision of Bob Dalla did an outstanding job on the Eagle Creek fire. They were well organized, had pride in their outfit, wanted to do a good job and worked hard on every assignment they were given. Even more remarkable to us was the high morale they exhibited even though they were not receiving comparable wage to some of the other crews. I would like to commend each and every member of the crew for a job well done. It was evident they had received some good training."

Idaho's head forest fire fighter R. R. Robinson said, "On behalf of the Boise Interagency Fire Center, I want to join State Director Joe Fallini in expressing sincere appreciation for the excellent work done by your fire crew on the China Creek fire. The crew worked hard under very difficult situations but maintained high morale under able leadership. A high standard for the Job Corps has been set by your crew."

The China Creek and Eagle Creek watersheds were devastated by the same fire.

* * * * *

Several additional awards were presented to corpsmen. Promotion to the rank of Corpsman was achieved by 27 men. The rank of specialist, which represents substantial achievement in education and works, was earned by 23 corpsmen. The coveted promotion to senior specialist was won by Philip Mayfield. Several corpsmen have graduated from the school program in recent weeks. Philip Mayfield and Willard Collins received their graduation certificates. Corpsmen Wilton Byrd, Larry Simmons, Willie Jordan, Joseph Moss, David Oyler, Bishop Carter and Robert Laneer had already left for urban centers or jobs.

David Berry, Corpsmen president; Nathanial Choate and Brady Peacock received ratings as corpsmen leaders.

We welcome aboard Eldon Hayes, center director of Kingman Job Corps Conservation Center, who is acting center director at Castle Valley for this week.

We have a visitor from Israel, Yossie Chalabi. He is a veteran of the June war against the Arabs. He is a youth counselor by training, and is in the United States to gain knowledge and experience in American youth programs. We hope he can stay with us at least until Christmas.

Several Price area residents have offered plants and shrubs for our landscaping. We appreciate these offers, and expect to start planting these contributions in the next few weeks.

We are looking forward to the visit on Oct. 3 of famous professional football player R. C. Owens, all-pro end of the San Francisco 49ers. Mr. Owens will talk to the Corpsmen and guests and show a film of the highlights of his professional football career.

Mr. Owens played his college football at the College of Idaho, Nampa, before joining the 49ers.

Mitch Makris, recreational director at Castle Valley, announces that football players from Carbon, Notre Dame, East Carbon and Emery high schools are being sent special invitations to join us for Mr. Owens' presentation. The public is invited.

Since his retirement from professional football, Mr. Owens has joined the J. C. Penney Co. as a special representative. Mr. Owens currently is visiting all Job Corps Centers in the west.

JOB CORPS FIGHTS FIRE

Men from two Montana Job Corps camps Friday volunteered their services in the continuing battle against forest fires in western Montana and northern Idaho.

Meanwhile, the little town of Olney, northeast of Whitefish, was not completely out of danger, but the immediate threat from the Miller Creek fire nearby was lessened, Don Drummond, deputy state forester said. Drummond said the fire should be brought under control by Saturday noon, barring increased winds Friday night.

Glacier National Park fires were almost completely encircled by fire lines Friday. Information officer Dan Nelson said, "we did fine" in fire control operations despite higher winds and a changeover in manpower. Nelson said a fire line was built around the east side of Dutch Creek in the Flathead fire, and another successful operation was completed on the northwest corner of the Glacier Wall fire.

Job Corpsmen from Anaconda and Darby were enlisted in the forest fire battles Friday. Eighteen corpsmen from Anaconda were dispatched to the Monture Creek fire northeast of Missoula in the Lolo National Forest and six corpsmen from Darby Creek went to work in the area fire depot in Missoula.

State and federal forest officials continued closing forests to public use Friday.

Deputy Montana Forester Don Drummond of Missoula said countless inquiries from the public generally have been understanding.

"The people who can't use the forests now during the emergency are not annoyed," Drummond said. "Some of them even seem to appreciate the fact that they can't get to their cabins," he added.

J. C. Robertson, U.S. Forest Service regional fire coordinator in Missoula said portions of the Helena and the Lewis and Clark forests were closed. Campfires and smoking were made illegal except at designated areas in the Deer Lodge and Beaverhead forests.

[From the Deer Lodge (Mont.) Post, Sept. 8, 1967]

FOREST FIRE IN MOUNT POWELL AREA TAKES WEEK'S WORK TO CONTROL, CLEAN UP WITH HELP FROM ANACONDA JOB CORPS

The Elbow Lake fire which erupted west of Deer Lodge last week has been under control since Sunday and about 12 men are engaged in mopping up operations and in hauling out gear, said Charles Mosier for the Forest Service on Thursday. He expected the operations would be completed by Friday night.

Located in an almost inaccessible spot west of Mt. Powell, the fire was in the Hidden

Lakes area at the head of Rock Creek. It was spotted by a Forest Service air patrol Thursday of last week at 3:30 p.m. and was estimated at that time to have been started from 12 to 20 hours previously by a lightning strike.

The first move was the dropping of four smoke jumpers from Missoula and two retardant drops that evening. The retardant was immediately effective in holding one side of the fire. The jumpers went in fully equipped, said Mr. Mosier, with tools, "grub", and all their needs.

Two more retardant drops were made the next morning and supplies for camp were provided. The rest of a crew of 175 men went in that morning. A contracted helicopter took them in from the airport and from the dam at Rock Creek lake.

Mr. Mosier and three district men from the Forest Service went in Thursday evening. Forest Ranger Paul Hoskins relieved Mr. Mosier Friday morning and was in charge of the crew.

MULE TRAINS REQUIRED

It was too windy on Saturday to drop supplies so they were taken in by mule string of 10 packers and a mule string of 10 animals were hired.

The terrain is "real rough", said Mr. Mosier, with lots of snags and it is steep and rocky. At one time it was fully forested, but bug-killed timber has left a lot of dead timber and this has made it more susceptible to fire.

The procedure used to bring it under control required the building of a fire line around the fire using chain saws, axes and shovels. The men built 135 chains of fire line, Mr. Mosier said, explaining that this is equal to about 1¾ miles. Five Pacific marine pumps with 5,000 feet of hose were used to pump water from the lake to fight the fire.

The men worked at first in 16-hour shifts, dropping later to 12 hours as work progressed. Only a small crew worked at night, mostly on patrol duty, as the quantity of snags and rolling stones made it too hazardous for night operations.

JOB CORPS HELPS

Fifty Job Corps members from the Anaconda center constituted part of the work crew. Eight of these were the kitchen crew who did the cooking and handled camp. They did a "real good job for us," said Mr. Mosier.

Meals for the first day were necessarily emergency rations of a non-perishable nature. Afterward they were served hot meals.

The fire was contained Saturday night and considered "under control" Sunday at 10 a.m. "Under control," Mr. Mosier explained, means that a good line has been established which will hold the fire barring unusual weather conditions.

The fire burned 60 acres.

CLOSURE STILL IN EFFECT

The closure on the forests is still in effect, said Mr. Mosier. A small amount of moisture on Wednesday had little effect. The Prison ranch measured .04 inches of rain, and Blizzard Hill lookout reported more, .20 inches. It was too spotty to do much good, he said.

A check of precipitation for the summer revealed there were similarly small amounts on Aug. 5 and 28, and July 18, 19, 20, 29, the smallest amount recorded for the season in many years, Mr. Mosier commented.

[From the Great Falls (Mont.) Tribune, Aug. 26, 1967]

Job Corpsmen Fight Fires

Men from two Montana Job Corps camps Friday volunteered their services in the continuing battle against forest fires in western Montana and northern Idaho.

Meanwhile, the little town of Olney, northeast of Whitefish, was not completely out of danger, but the immediate threat from the Miller Creek fire nearby was lessened, Don Drummond, deputy state forester, said. Drummond said the first should be brought under control by Saturday noon, barring increased winds Friday night.

Glacier National Park fires were almost completely encircled by fire lines Friday. Information officer Dan Nelson said, "we did fine" in fire control operations despite higher winds and a changeover in manpower. Nelson said a fire line was built around the east side of Dutch Creek in the Flathead fire, and another successful operation was completed on the northwest corner of the Glacier Wall fire.

Job Corpsmen from Anaconda and Darby were enlisted in the forest fire battles Friday. Eighteen corpsmen from Anaconda were dispatched to the Monture Creek fire (396 acres) northeast of Missoula in the Lolo National Forest and six corpsmen from Darby Creek went to work in the area fire depot in Missoula.

State and federal forest officials continued closing forests to public use Friday.

More than 4,600 men comprising 201 crews were fighting fires Friday in Region One, according to Del Radtke, fire control staff officer in Great Falls.

Deputy Montana Forester Don Drummond of Missoula said countless inquiries from the public generally have been understanding.

"The people who can't use the forests now during the emergency are not annoyed," Drummond said. "Some of them even seem to appreciate the fact that they can't get to their cabins," he added.

J. C. Robertson, U.S. Forest Service regional fire coordinator in Missoula, said portions of the Helena and the Lewis and Clark forests were closed. Campfires and smoking were made illegal except at designated areas in the Deer Lodge and Beaverhead forests.

Nine other forests were closed to public use Thursday. The public was advised to check with local forest ranger stations when in doubt about closure regulations.

Robertson said about 255 Idaho and Montana National Guard members were dispatched to fire duty in the two states. National Guard equipment, including trucks, tractors, first aid and kitchen units, also have been made available to the forest service.

Sixteen Missoula-based smoke-jumpers were sent to a new fire in the Kootenai Lakes district of the Lolo forest.

Eight southwestern U.S. Indian fire fighting crews arrived Friday at the Ft. Missoula staging area. They are from the Cocouino, Zuni, Questas, El Ritos, Totugas, and Moto tribes.

Robertson said members of the Army Reserve are on a standby basis during the forest fire emergency.

Seven Malmstrom Air Force Base helicopters, and five private fire fighting contractors' helicopters were still in use in the park fires.

Manpower on the park fires remained at 1,285, although some crews were dropped, and others were added.

Other fire developments in the national forests Friday included:

Eight new fires were reported.

Two fire fighters were injured.

Lander's Fork fire in the Helena forest was burning out of control.

State foresters issued a plea for caution but didn't close state and private forests as authorized.

A forest fire crew chief, Leo Lahaye from Custer Pine Ridge, S.D., was hospitalized in Bonner's Ferry, Idaho, Friday after he was hit by a falling, burning snag. Lahaye reportedly suffered foot and hip injuries.

Also injured was Robert Lakota, a member of the same crew and also from Pine Ridge. Lakola suffered a broken shoulder bone when hit by a small tree.

Corpsmen Battle Deerlodge Blaze

Forty six Corpsmen and ten staff members from the Anaconda Job Center hiked miles up steep rugged mountain trails to battle the Elbow Lake Fire on the Deerlodge National Forest.

Fireboss, Paul Hoskins, commended the Corpsmen for their willingness and ability to perform well under the extremely hazardous and tiring conditions.

Six seven-man sqauds battled the fire along the steepest and most rugged sectors of the fire while another ten-man crew set up a complete kitchen and prepared meals for over 200 weary firefighters.

Although most of the lads had never before climbed a mountain or seen a forest they were eager to pitch in and do whatever was needed.

During the early hours of the fire, while the blaze was still raging out of control, Corpsmen rushed in close to the flames to retrieve the precious tools and supplies that had been parachuted.

Without Job Corps help, Hoskins said, we may have lost a much larger portion of this valuable watershed and recreation land.

Staff members from the Job Corps Center provided overhead functions on the fire fighter squad bosses, crew bosses, division bosses, safety officer, timekeeper, camp bosses and cook.

Many of the Corpsmen were so impressed with the excitement and importance of fire fighting that they are eager to return to fire duty as soon as possible.

To provide a ready manpower reserve for other fire emergencies on the Deerlodge and adjacent forests, the Anaconda Center has trained fire crews ready to go as a result of a training session conducted by the Deerlodge Forest and weekly refresher training conducted by the Center's Work Department.

[A Randle (Wash.) Cispus Job Corps Conservation Center, Sept. 5, 1967]

Cispus Fights Conflagration

Building fire line, holding line, dropping back and rebuilding line has been the story for 42 Corpsmen fire fighters from Cispus Job Corps, now on the 4,000-acre Evergreen Fire on the Snoqualmie National Forest, Washington.

Alerted to proceed on Sunday, August 27, 1967, to the fire, the Cispus crew, headed by Albert Shroy, Deputy Director for Work, left only 24 hours after returning from the 10,000-acre Mt. Hood Fire. While on the Mt. Hood, the crew had spent 35 hours on the fire line.

Now in their sixth day on the Evergreen Fire, word from the line comes that the crew is still building line in efforts to stem the advancing inferno.

Three days after the 42-man crew had departed for the Evergreen Fire, a lightning storm broke within 30 miles of the Cispus Center. The Forest Service on the Gifford Pinchot National Forest rushed another 1,000 men to the 350-acre Packwood Fire. The Center was assigned the duty to man and operate a 500-man fire camp. Camp helpers, cooks, drivers all were needed. Corpsman volunteers were transported to the new fire to assist in operations.

With an eye toward even more serious fire danger close to the Center, a qualified 18-man Suppression Crew is standing by on Center, ready for immediate dispatch, as lightning storms still threaten the parched and tinder-dry countryside.

For the Cispus Crew, which numbers 60 men, fire is a familiar term for this season. Within the last five weeks the crews have been on six project fires, all well over 300 acres in size.

[From the Burns (Oreg.) Times-Herald, Aug. 17, 1967]

Seven-Hundred Acre Range Blaze Is Halted by BLM Fire Crews

A 700 acre range fire on Sheep Mountain southwest of Riley last Thursday required efforts of all local Bureau of Land Management crews to halt. The blaze left barren a large area of former juniper trees and sagebrush as well as grassland.

A lightning bolt touched off the blaze about 2:30 p.m. and the fire spread rapidly thru a canyon from the mountainside where the bolt struck.

BLM's fire crews reached the scene about 4:30 p.m. and additional men, pumpers, tank trucks and equipment were rushed into the area. A fire camp was established 12 miles south of the Gap Ranch. From there the men and supplies were taken into the rough country to fire lines by four-wheeled vehicles.

Friday morning the fire had been halted and the initial attack crews began moving out about 9 a.m. Their places were being taken by crews from the Matheur Job Corps Center which handled the mop-up work.

No cattle were caught in the area. There were times when the fast moving flames threatened to envelope some of the fire crews, but all escaped without injury. The firefighters reported the country was extremely rugged and it made the task of control both complicated and hazardous, the BLM fire office reported.

When the soot and smoke-blackened crews returned to their office at Burns, Friday forenoon they immediately went onto standby status that afternoon and evening.

In addition to the big range fire, the Bureau reported four other fires set on the district Thursday by lightning, all of them small.

A pumper and crew had been dispatched to Dog Mountain but found local ranchers and Job Corps personnel had extinguished the fire after it covered one-tenth acre.

Another strike in the Princeton area was quickly controlled by ranchers.

Ranchers at Delaney Mountain put out another fire there and the final fire was reported on Moffitt Table. A pumper and crew was winding up operations there Friday morning. Only a small area burned.

[From the Boise (Idaho) Morning Statesman, Aug. 31, 1967]

Job Corpmen Train for Firefighting Jobs

Marsing.—Marvin Berghorst, of the Toyon, Calif., Job Corps Center, is currently conducting a 16-hour training session for 37 corpsmen at the Marsing Job Corps Conservation Center who have volunteered to help on the fire fighting crews.

Corpsmen who are over 18 will be able to work on the actual fire lines. Those under 18 will help with cooking, food services, tool sharpening and preparation of cold line trenches.

[From the Ogden (Utah) Standard-Examiner, Sept. 3, 1967]

Fires, Construction—Job Corps Students Spend Busy Summer

A summer schedule of construction, firefighting and education has kept 209 enrollees busy in the Weber Basin Job Corps Center.

And the old adage, "busy boys are better boys," has proved out, according to Director Richard A. Ulrich.

Last month, only 11 corpsmen dropped out—five following disciplinary action, one for being absent without leave, one discharged when the parents withdrew their authorization for the boy to serve in the corps, and four for personal reasons.

In August, 40 corpsmen completed training projects and 29 were graduated from the education program.

HIGH MORALE

The "negative" withdrawal has been declining over the past year, Mr. Ulrich said. The reasons he gave include the high morale of the corpsmen and effective organization and leadership.

A highlight of the corps' public service this summer is fighting on the fire lines in the Payette National Forest near McCall, Idaho and for the Bureau of Land Management at the China Creek fire near Lewiston, Idaho.

Forty-four boys volunteered for duty on the Payette. After they returned to Weber Basin, 26 of them were sent on Aug. 26 to the BLM blaze where they are expected to remain for another week.

TRAINED IN WORK

The corpsmen at the fires were trained this spring by the U.S. Forest Service.

Mr. Ulrich said the boys were enthusiastic about the firefighting detail and have won plaudits of foresters for their work on Idaho timberlands.

Reaction of the teen-agers varies, Mr. Ulrich said, with corpsmen from the major urban centers in the East completely "unaccustomed to so many trees, wide open spaces and so few people."

Meanwhile, back at the camp, eight adult work leaders are supervising crews of eight to 10 boys assigned to Bureau of Reclamation and civic projects in the Ogden valley.

DO FOREST WORK

The corpsmen have built 300 picnic tables, 100 fabricated cement fireplaces, eight heavy gates for the Wasatch and Cache national forest, guard rails and boat parking facilities at East Canyon Reservoir, a water system at Los Creek Reservoir and painted signs and markers in recreation areas.

A major project is construction of a baseball diamond and fencing of a municipal park for the town of Uintah. The work is 50 per cent complete.

A road and parking area at East Canyon Dam was completed last month.

Current projects include a comfort station and shower facilities at North Willard Dam, a phone line in Mueller Park for the Forest Service and flooring a warehouse at the Job Corps Center.

While half of the enrollees are out in the field, the remainding half are studying in the center's school. Here the basic lessons of reading, writing and arithmetic are offered, along with special courses.

[From the Rapid City (S. Dak.) Journal, Aug. 17, 1967]

Job Corps, Indians Fly Toward Fires

Twenty-six men from Box Elder Job Corps Center at Nemo and 100 Pine Ridge Indians left Thursday for Missoula, Mont., to help fight forest fires in that area.

According to National Forest Service officials in Rapid City, the local Ferguson Catering Service left town Wednesday to battle the same fires.

The Job Corps staff members are Bill Pinkerton, Guy Birkula and Carl Erickson. Accompanying the Pine Ridge fire fighters are Bob Jackson and Bill McBride, forest liaison.

[From the Chadron (Nebr.) Record, Oct. 12, 1967]

Fire Sears 300 Acres

Fort Robinson.—A fire which utilized the fire fighting efforts of firemen from Crawford, Chadron and the Pine Ridge Job Corps Center scarred timber over a 300 acres area near here Saturday afternoon, in the 12,000 acre Wood Reserve segment of the Fort Robinson reservation.

The blaze was discovered by U.S. Fishery Department personnel at about 1:15 p.m., who in turn, notified the U.S. Department of Agriculture Fire Department and the Game Commission's Park Service.

The area, about 10 miles west of the fort, was a mass of fire and clouds of white smoke.

Also assisting in the fire fighting efforts were a truck load of firemen from Alliance.

Water was hauled in to fight the blaze, while other volunteers used shovels to put out grass fires on the ground. The blaze was under control by 5 p.m.

Park Superintendent John Kurtz said the blaze "could have been serious if we hadn't received such good help so quickly after the alarm sounded."

"We are sure grateful to the Crawford, Chadron and Alliance men who helped the Beef Research and Park personnel."

The Forest Service and the Job Corps crews remained in the area to complete mopping up operations.

Kurtz said damage was apparently "slight," limited to dead tree limbs and dry grass.

It is thought the blaze was triggered by lightning Friday night, and fanned into the blaze by a 50-mile per hour wind Saturday.

The "Little America" Boy Scout camp in the Wood Reserve was not damaged.

IOWA FARMERS USE MORE FERTILIZER THAN OTHER FARMERS IN THE UNITED STATES

Mr. MONTGOMERY. Mr. Speaker, I ask unanimous consent that the gentleman from Iowa [Mr. Smith] may extend his remarks at this point in the Record and include extraneous matter.

The SPEAKER pro tempore. Is there objection to the request of the gentleman from Mississippi?

There was no objection.

Mr. SMITH of Iowa. Mr. Speaker, farmers in Iowa have been using more fertilizer faster than the rest of the United States.

According to a study made by Iowa State University in cooperation with the Economic Research Service, they put a record 1,750,000 tons on their fields in 1966. This was a poundage increase of 150 percent over use in 1960, compared with a rise of only 38 percent for the Nation as a whole.

Not surprisingly, corn gets most of the plant nutrients. About 90 percent of Iowa's corn acres are now fertilized, in contrast to 50 percent in 1959.

There is a definite trend, too, to use more single component fertilizers—such as anhydrous ammonia and superphosphates—and less mixed-analysis fertilizers.

How about cost? It is relatively low. Fertilizer is one exception to the general uptrend in prices farmers pay for most inputs.

Prices of two of the three primary fertilizer components—and especially high-nitrogen fertilizers—have actually dropped since 1960.

Anhydrous ammonia, for example, costs about 27 percent less, and the popular 5–20–20 has dropped about 5 percent in price. Advances in fertilizer production technology have been the big factor in this reduction.

So, with the combination of circumstances, a farmer needed less than 5 bushels of corn to pay for 100 pounds of anhydrous ammonia last year. In 1960, it took 7½ bushels.

Meanwhile, Iowa corngrowers have been getting bigger yields. This has helped balance out the increasing costs of some of the fuel and other things they have to buy.

LEAVE OF ABSENCE

By unanimous consent, leave of absence was granted to Mr. Annunzio (at the request of Mr. Albert), through December 15, on account of illness.

SPECIAL ORDERS GRANTED

By unanimous consent, permission to address the House, following the legislative program and any special orders heretofore entered, was granted to:

Mr. Halpern (at the request of Mr. Wyman), for 15 minutes, today; to revise and extend his remarks and include extraneous matter.

Mr. Nedzi, today, for 10 minutes.

EXTENSION OF REMARKS

By unanimous consent, permission to extend remarks in the Congressional Record, or to revise and extend remarks was granted to:

Mr. Horton and to include extraneous material.

(The following Member (at the request of Mr. Wyman) and to include extraneous matter:)

Mr. Miller of Ohio.

(The following Members (at the request of Mr. Montgomery) and to include extraneous matter:)

Mr. Moorhead.

Mr. Rees.

Mr. Downing.

SENATE ENROLLED BILLS SIGNED

The SPEAKER announced his signature to enrolled bills of the Senate of the following titles:

S. 1085. An act to amend the Federal Credit Union Act to modernize the loan and dividend provisions;

S. 2211. An act to amend section 509 of the Merchant Marine Act, 1936, to provide for construction aid for certain passenger vessels operating on the inland rivers and waterways; and

S. 2514. An act to grant the consent of Congress to the Wheeling Creek Watershed Protection and Flood Prevention District compact.

ADJOURNMENT

Mr. MONTGOMERY. Mr. Speaker, I move that the House do now adjourn.

The motion was agreed to; accordingly (at 2 o'clock and 38 minutes p.m.), under its previous order, the House adjourned until Monday, December 4, 1967, at 12 o'clock noon.

EXECUTIVE COMMUNICATIONS, ETC.

Under clause 2 of rule XXIV, executive communications were taken from the Speaker's table and referred as follows:

1247. A letter from the Secretary of the Army, transmitting a letter from the Chief of Engineers, Department of the Army, dated June 5, 1967, submitting a report, together with accompanying papers and illustrations, on an interim hurricane survey of Jones Inlet to Montauk Point (remaining areas), Atlantic coast of Long Island, N.Y., authorized by Public Law 71, 84th Congress, approved June 15, 1955 (H. Doc. No. 191); to the Committee on Public Works and ordered to be printed with illustrations.

1248. A letter from the Secretary of the Army transmitting a letter from the Chief of Engineers, Department of the Army, dated March 6, 1967, submitting a report, together with accompanying papers and illustrations, on an interim hurricane study of a portion of coastal Louisiana in the vicinity of Houma, authorized by Public Law 71, 84th Congress, approved June 15, 1955 (H. Doc. No. 192); to the Committee on Public Works and ordered to be printed with illustrations.

REPORTS OF COMMITTEES ON PUBLIC BILLS AND RESOLUTIONS

Under clause 2 of rule XIII, reports of committees were delivered to the Clerk for printing and reference to the proper calendar, as follows:

Mr. CELLER: Committee of conference. H.R. 10805. An act to extend the life of the Civil Rights Commission (Rept. No. 992). Ordered to be printed.

Mr. HAYS: Committee on Foreign Affairs. H.R. 13798. A bill to improve certain benefits for employees who serve in high-risk situations, and for other purposes; with amendment (Rept. No. 993). Referred to the Committee of the Whole House on the State of the Union.

Mr. GALLAGHER: Canada-United States Interparliamentary Group. Report of the 10th meeting of the Canada-United States Interparliamentary Group (Rept. No. 994). Referred to the Committee of the Whole House on the State of the Union.

Mr. CULVER: Committee on Foreign Affairs. Report of special study mission to the Soviet Union and Scandinavia, 1967 (Rept. No. 995). Referred to the Committee of the Whole House on the State of the Union.

PUBLIC BILLS AND RESOLUTIONS

Under clause 4 of the rule XXII, public bills and resolutions were introduced and severally referred as follows:

By Mr. BYRNE of Pennsylvania:

H.R. 14226. A bill to provide criminal penalties for the introduction, or manufacture for introduction, into interstate commerce of master keys for motor vehicles, and for other purposes; to the Committee on the Judiciary.

By Mr. CRAMER:

H.R. 14227. A bill to amend title 38 of the United States Code to increase rates of disability compensation paid to service-disabled veterans; to the Committee on Veterans' Affairs.

By Mr. DINGELL (for himself, Mr. Cederberg, Mr. William D. Ford, Mrs. Griffiths, Mr. Karth, Mr. McCarthy, Mr. Nedzi, Mr. O'Hara of Michigan, Mr. Reuss, Mr. Ruppe, Mr. Vander Jagt, and Mr. Vigorito):

H.R. 14228. A bill to amend the Anadromous Fish Conservation Act of October 30, 1965, relating to the conservation and enhancement of the Nation's anadromous fishing resources, to encourages certain joint research and development projects, and for other purposes; to the Committee on Merchant Marine and Fisheries.

By Mr. GIBBONS:

H.R. 14229. A bill to amend the Federal Food, Drug, and Cosmetic Act to prescribe penalties for the possession of LSD and other hallucinogenic drugs by unauthorized persons; to the Committee on Interstate and Foreign Commerce.

By Mr. HORTON:

H.R. 14230. A bill to prohibit the introduction, or manufacture for introduction, into interstate commerce of master keys for motor vehicles, and for other purposes; to the Committee on Interstate and Foreign Commerce.

By Mr. RIEGLE:

H.R. 14231. A bill to permit increases in social security benefits to be disregarded in computing income for the purpose of determining eligibility for a veteran's or widow's pension under title 38 of the United States Code; to the Committee on Veterans' Affairs.

By Mr. ST GERMAIN:

H.R. 14232. A bill to amend section 202 of the Housing Act of 1959 to authorize limited-profit sponsors of housing for the elderly and handicapped; to the Committee on Banking and Currency.

By Mr. BOB WILSON:

H.R. 14233. A bill to designate the Veterans' Administration hospital to be constructed in San Diego, Calif., as the Bruno A. Hockmuth Hospital; to the Committee on Veterans' Affairs.

By Mr. DON H. CLAUSEN:

H.J. Res. 943. Joint resolution to designate the Union Station Building in the District of Columbia, a part of the National Visitor Center, as the National Visitor Center Memorial Building; to the Committee on Public Works.

By Mr. FULTON of Pennsylvania:

H.J. Res. 944. Joint resolution proposing an amendment to the Constitution of the United States relative to equal rights for men and women; to the Committee on the Judiciary.

By Mr. NEDZI (for himself, Mr. Colmer, Mr. Cederberg, Mr. Diggs, Mrs. Griffiths, Mr. Dingell, Mr. Chamberlain, Mr. Broomfield, Mr. O'Hara of Michigan, Mr. Harvey, Mr. Hutchinson, Mr. Conyers, Mr. William D. Ford, Mr. Vander Jagt, Mr. Brown of Michigan, Mr. Esch, Mr. McDonald of Michigan, Mr. Riegle, Mr. Ruppe, and Mr. Hechler of West Virginia):

H. Res. 994. Resolution proposing a change in rule XV of the Rules of the House of Representatives; to the Committee on Rules.

By Mr. WAGGONNER:

H. Res. 995. Resolution increasing the compensation of the expert transcribers to official reporters; to the Committee on House Administration.

PRIVATE BILLS AND RESOLUTIONS

Under clause 1 of rule XXII, private bills and resolutions were introduced and severally referred as follows:

By Mr. ADDABBO:

H.R. 14234. A bill for the relief of Sarita Arvaz, also known as Sara Shlomo; to the Committee on the Judiciary.

By Mr. FINO:

H.R. 14235. A bill for the relief of Sebastiano Zara; to the Committee on the Judiciary.

H.R. 14236. A bill for the relief of Maria Garbaz and her daughter Nathalie Garbaz; to the Committee on the Judiciary.

By Mr. GIBBONS:

H.R. 14237. A bill for the relief of the Reverend Jose G. Gonzalez; to the Committee on the Judiciary.

H.R. 14238. A bill for the relief of Dr. Francisco E. Laurrauri-Laurrauri; to the Committee on the Judiciary.

By Mr. NIX:

H.R. 14239. A bill for the relief of Mario Romano; to the Committee on the Judiciary.

EXTENSIONS OF REMARKS

Defense Procurement

EXTENSION OF REMARKS

OF

HON. JACK R. MILLER

OF IOWA

IN THE SENATE OF THE UNITED STATES

Thursday, November 30, 1967

Mr. MILLER. Mr. President, on November 16, the distinguished Senator from South Carolina [Mr. THURMOND] addressed a luncheon of the National Association of Manufacturers in New York City. More specifically, his remarks were directed to the Defense Committee of the NAM. His address on the topic of "Defense Procurement," was most timely and impressive.

I ask unanimous consent that his remarks be printed in the RECORD.

There being no objection, the speech was ordered to be printed in the RECORD, as follows:

DEFENSE PROCUREMENT

(Address by Senator STROM THURMOND, Republican, of South Carolina, at a luncheon of the National Association of Manufacturers, Plaza Hotel, New York City, November 16, 1967)

Mr. Chairman and Distinguished Members of the Defense Committee of the National Association of Manufacturers, it is a pleasure to meet with you today and to share with you some of my views on the affairs of Capitol Hill. The National Association of Manufacturers enjoys a fine reputation with the Congress. The NAM representation of industry's views on national and international problems to government are highly respected.

I note that your membership now exceeds 17,000, and that among organizations of this kind, yours is one of the oldest, having been founded in 1895. Through the years the NAM has performed commendable service in the field of education, and has promoted cooperation with industry through scholarship and apprentice awards, guidance and counseling, preparation of educational aids, and the maintenance of a high school and college speakers' bureau. More closely connected with my field, the NAM reviews legislation, judicial decisions and administration rulings and interpretations, as they affect industry.

While your Vice President, Mr. Ralph Compton, was kind enough to give me considerable latitude in the choice of subject matter for this occasion, I understand that you are most interested in Defense procurement. As a member of the Senate, and particularly in my various committee responsibilities, which include the Armed Services, judiciary, and Appropriations, I can assure you that I, too, am quite interested in the Department of Defense. This interest exceeds the limitations of Defense procurement alone, and while I shall devote the greater part of my talk to that subject, I am sure that you will bear with me for an excursion into a few future Defense problems that are vital to our national security.

It is perhaps an understatement to say that the Legislative Branch of the government is intensifying its interest in the procurement practices of the Department of Defense.

I think that we have seen enough evidence recently in the news media, particularly in the matter of possible favoritism in defense contracts, and excessive costs of some procured items.

Let us examine, for a moment, the basic reasons for Congressional interest in government procurement, in which DOD is the major partner.

The Federal procurement bill for goods, services, equipment, and facilities now runs about $60 billion a year. The Congress is responsible for raising the tax dollars to pay this enormous procurement bill; it also has to make the dollars available on a yearly basis through the appropriations process; and it has the responsibility to see that these dollars are well spent. After all, we members of Congress have to answer to our constituents, and they are the ones who foot the bill.

I should like to point out at the beginning that a Congressman's interest in government procurement is not from the standpoint of personal or private concern. You are all familiar with the "boiler plate" that forms a part of a government contract—this contains stipulations, rules and procedures that your contracting officers have to wade through. In the fine print of that boiler plate there is a measure that prohibits a member of Congress from contracting with the government or deriving any benefits therefrom. I am happy to state that this is the oldest mandatory clause in government contracts, and that it dates back to a law of 1808.

While my colleagues and I do not have any personal interest in government contracts, you can be sure that we each have a very keen public interest—legitimate and proper—over the award of contracts to our respective States. Defense business means better employment, bigger payrolls, and general economic improvement. Although no Congressman should use his influence to aid a particular company or individual, he nevertheless has a responsibility to see that his State or District is not discriminated against in the awards of government contracts.

Of course, a Member of Congress has more to do than to look out for his State and to help his constituents. Each Member has legislative duties through his committee assignments. These duties involve authorizations for new programs, money bills for the government agencies, investigations, and a variety of other legislative tasks. This committee work is important, for this is the means where a few members of the Congress can investigate a subject in depth and make a knowledgeable report to their colleagues.

The Congress has several committees and subcommittees which are responsible for making legislative recommendations on defense expenditures to the entire Congress. Some of these in the Senate and House are the Armed Services, Government Operations, Joint Economic, and the respective Appropriations committees and subcommittees. There are also several more. With this many hands in the act there is bound to be some confusion, gays, and even overlapping interest. For example, let us take a look at the jurisdictional issue.

The Committees on Government Operations of both Bodies have jurisdiction over the Federal property and Administrative Services Act. The respective Armed Services Committees have jurisdiction over the Armed Services Procurement Act, but jurisdiction over the Renegotiation Act, which bears on Defense and other procurement, is under the jurisdiction of the Ways and Means Committee of the House of Representatives and the Finance Committee in the Senate.

Furthermore, the Walsh-Healey Public Contracts Act and the Service Contract Act of 1965, also involving procurement and contracting processes, are under the jurisdiction of the Education and Labor Committee of the House and the Labor and Public Welfare Committee of the Senate. The Banking and Currency Committee handles small business legislation, but there is also a Small Business Committee that investigates procurement problems from the small business—not the government's—side of the street. Patent and claims legislation, which also influence procurement and contracting matters, are within the jurisdiction of the Judiciary Committee. At the same time there are separate and different committees responsible for atomic energy legislation on the one hand, and for space legislation on the other.

With this organization, or lack of it, for such an important function as Government procurement, there is small wonder that the Congress should be considering a bill to establish a special commission to study all phases of government procurement. I will come to this bill a little later.

In my own experience, I remember well acting as Chairman of the Senate Armed Services Committee's Subcommittee on Procurement during 1959 and 1960. Some of you here in this audience may have participated in those hearings. These represented an exhaustive inquiry into the procurement policies and practices of the Department of Defense and the Renegotiation Act of 1951. In this study we concentrated on the procedural aspects of military buying. Our findings were, briefly: (1) Most of the procurement problems of Defense could be solved administratively; (2) All of the major contract types in use could produce undesirable cost, price or profit if they were used inappropriately or not carefully negotiated or administered; (3) Some contracts had to be negotiated, but that negotiation did not necessarily mean absence of competition; (4) Procurement law did not necessarily retard the availability of advanced weapon systems, but programming decisions and administration of laws frequently caused delays; (5) The volume of military procurement made it impracticable to unduly centralize procurement authority; and (6) That military procurement was so complex that it would be impossible to preclude exercise of judgment by procurement officials.

As a result of our findings we made several positive recommendations for changes in the Procurement Regulations, procedures and in the training of procurement personnel in the Department of Defense. Judging from the recent criticisms leveled at Defense procurement by Congressman Pike, Senator Dominick and others, it would seem that the departments did not follow through on all of our recommendations, particularly the one which warned that they should train their personnel to do a better job.

The size of the Defense budget is such that it has tremendous impact on the economy of the country. The total Defense budget accounts for over fifty percent of all appropriated expenditures for the entire federal government. For Fiscal Year 1968 the total administrative budget for national defense is estimated at $75.5 billion which is 8.9 percent of the gross national product. This comes very close to the country's previous maximum which occurred in 1945—then military expenditures ran $80 billion, or 36.7 percent of the GNP. The Defense procurement share of the 1968 budget is estimated at $21.6 billion, and this indicates a slow but steady rise over defense procurement expenditures of the two previous years; in 1966 this was $14.3 billion, and in 1967, it was $18.5 billion.

The accent on defense procurement swings from one manufacturing area to another, according to the times and international situation. Experience shows that in wartime (taken from examples of Korea and Vietnam) there is a decided swing toward ships and conventional ordnance and a corresponding decrease in the more sophisticated products such as aircraft, missiles and electronics. On the basis of past performance, I should think that after the Vietnam War is over, we would see the pendulum swing back. The statistics behind this observation are as follows: In 1962, 70.4 percent of military procurement was in the sophisticated category—in 1968, it is estimated that this will be only 53 percent. Also, in 1962 only 29.6 percent of military procurement went into the more conventional items, but in 1968 this rose to an estimated 46.8 percent. It would appear that with the ABM underway, and with the drawdown of the Vietnam War in our inventory of aircraft, the more sophisticated Defense items will get a strong play as soon as the Vietnam War ends.

During the fifteen years since the Korean War there has also been a decided shift in the geographical pattern of Defense Procurement awards. The South and Far West have increased their share of Defense orders while the Midwest and Middle Atlantic areas suffered a decrease. However the immediate effect of the Vietnam War with its increase in conventional war requirements caused an upswing in the Midwest last year, where most of the conventional armament is produced, and a falling off of defense orders for sophisticated equipment, most of which is produced in the Far West.

Another interesting geographical characteristic of Defense procurement is that the top ten States received over 60 percent of the prime awards and 70 percent of the subcontract awards. In the event that you are interested in the top ten States, they are: California, New York, Texas, Connecticut, Pennsylvania, Ohio, Massachusetts, Missouri, New Jersey and Indiana; . . . with Michigan, Illinois, Maryland, Georgia and Florida following close behind.

I am sure that in this audience it is no secret who are the top ten manufacturing companies. Just for the record I will say that on the basis of military prime contract awards in Fiscal Year 1966, the top ten companies are: Lockheed Aircraft; General Electric; United Aircraft; General Dynamics; Boeing; McDonnell Aircraft; American Tel. and Tel.; Textron; Raymond International; and North American Aviation. Of the 100 top companies listed for 1966, there are 23 new names which did not appear on the 1965 list. The largest increase in category is, understandably, ammunition; there were 13 new ammunition companies among the 23 new names. The largest decreases were in missiles and petroleum products, each losing 5 companies from the top 100.

Small business firms have increased their share of Defense contracts. During the first nine months of fiscal year 1967, small business firms received $5.7 billion in Defense prime contract awards—almost $1 billion more than in a comparable time in 1966.

Now before I proceed into some of the details of the proposed Procurement Commission being considered by the House Committee on Government Operations, and the reasons for its establishment, let me say a few words about the commendable cooperation of industry to meet urgent military requirements. Granted that there have been cases of excessive costs, which were well-publicized, I might add that there have been a number of cases where industry went all-out to help, sometimes at considerable risk of their own assets. At my request, the Department of Defense has furnished me with a few examples.

Very early in the Vietnam crisis the communications industry unselfishly applied its resources to achieve early implementation of the initial communications requirements of the military departments. They promptly moved people into the area—conducted surveys—modified and rehabilitated military telecommunications equipment without formal contractual assurances of reimbursement.

About a year ago the Eureka-Williams Company made an all-out effort to fill an urgent requirement for a very complex fuse. The Army had had difficulty in obtaining a supplier willing to undertake the contract on the basis of producing extremely high production quantities of this complex item. Through the efforts of this company the Army requirement was met.

The Stewart-Warner Corporation began production of metal parts for the 60mm mortar projectile from a standing start and made first deliveries in five months. This included setting up production equipment and fabricating and buying the new tooling.

Another outstanding example of American industrial determination and ingenuity involved the M-39 aircraft machine gun. The Allison Division of General Motors made delivery of a production weapon within 8 months after orders were placed, one month ahead of schedule, including reactivating a plant which was not in production and providing the necessary personnel and facilities. The first gun delivered as a result of this effort met the Army's quality assurance requirements of 100%.

With regard to Vietnam, the accomplishments in transporting supplies to South Vietnam have been without precedent. Two years ago there was only one deep water port there—Saigon. There were no railroads nor roads to move supplies from that port to our forces up-country, yet in the first six months after the major deployments began, 200,000 troops were moved into the country and supplied with the thousands of items needed for combat operations and their health and welfare. Airfields and port complexes now exist where before there were only sand dunes and rice paddies.

Industry, together with military construction groups, has undertaken a gigantic construction effort in South Vietnam. This includes 6 deep draft ports which provide 29 new berths involving a total daily cargo input of 21,800 tons. In the construction of these ports 26 million cubic meters of dredging was required. Increased storage capacity includes 10.2 million square feet of covered storage, 2½ million cubic feet of refrigerated storage, 4 million square yards of open storage, over 100 acres of ammunition storage and 3 million barrels of POL storage. Further, 6 million square feet of maintenance facilities have been constructed, as well as hospital capacity of 8,780 beds. Eight jet-capable air bases have been built, along with 80 auxiliary air fields. Cantonments sufficient for 500,000 men have been established, and electrical power has been increased by 300,000 kilowatts. The above does not include air bases, hospitals and other support activities constructed throughout the Western Pacific.

There are many more such examples of military-industrial cooperation, but I cannot take the time to recite them.

Having described the nature of government procurement in general, with special emphasis on industry's role with the Department of Defense, I shall now move on to the proposed bill (H.R. 12510), introduced by Congressman Chet Holifield, together with a companion bill introduced in the Senate by Senator Jackson of Washington.

The purpose of this bill is to establish a temporary Commission on Government Procurement, to make a broad and searching inquiry into nearly every aspect of government procurement. The Commission would be required to make a report within two years after the date of enactment of the legislation, on its findings and recommendations for changes in present statutes, regulations, policies and procedures necessary to promote economy, efficiency, and effectiveness in the procurement of goods, services and facilities by the Executive Branch of the Government. In short, the Commission will try to improve Government procurement and contracting procedures and practices. It will examine the laws, regulations, organizations, throughout the whole structure of government involved in procurement, and try to bring more order to the present hodge-podge and mixture.

The Commission will have twelve general courses of action prescribed for it. These are:

(1) To establish a method whereby the Government may acquire the goods, services and equipment needed, of proper quality and within the time needed at the lowest reasonable cost, using competitive bidding to the maximum extent possible.

(2) The quality, efficiency, economy and performance of Government procurement organizations and personnel should be improved, and

(3) through (12)—briefly summarized, are: to avoid overlapping and duplication; to cover gaps, iron out inconsistencies, provide for uniformity and simplicity; fair dealing; and to avoid possible disruptive effects in certain areas, industries, and occupations.

The Commission would be composed of fourteen members, including four appointed by the President of the Senate, four appointed by the Speaker of the House, and six appointed by the President of the United States. It appears that industry will undertake its share of the task. For example, in the provisions for membership, there are the following stipulations: Of the four appointments by the President of the Senate, two will be Senators, and two will be from outside the Federal Government; of the four appointed by the Speaker of the House, two will be representatives, and two will be from outside the Federal Government. Of the six appointments by the President of the United States, three will be from the Executive Branch of the government and three will be from outside the Federal government. The members appointed by the House and Senate, respectively, will not be of the same political party. I note that members from outside the Federal Government will receive compensation at the rate of $100 per day for actual service and for other expenses. The Commission will also be empowered to procure the services of experts and consultants, and it may make contracts with private organizations and non-profit institutes to carry out studies and to prepare reports to assist the Commission's work.

I note also a refreshing provision for the demise of the Commission: 120 days after the submission of its report the Commission shall cease to exist.

The official hearings for the establishment of a commission on government procurement are over, and a bill is ready to report out of the House Committee on Government Operations. However, while the bill has bi-partisan support, there are certain considerations that lead me to believe that H.R. 12510 will not be enacted in this session of the Congress. Without going very far out on a limb, I do think that it is safe to predict fairly early passage next year. I should think that your organization would maintain its interest in this legislation, because for the first time, industry will have an established forum in which to make its views, opinions and recommendations known on this issue.

I said earlier in my talk that I wished to spend some time discussing future defense problems. Those of you who know me will understand what I mean when I say that not all of the problems of DOD are in the procurement area. However, for the purposes of this meeting I shall confine my remarks to certain problems of military hardware—as I see them.

It has been said that the Vietnam War is the most non-cost-effective endeavor that the United States has ever undertaken. We see such military elements as the Air Mobile Division and aircraft carriers (both previously criticized as not being cost effective) doing splendid, necessary jobs in Vietnam.

In my opinion, cost effectiveness, as it is now used in the Pentagon, is short-sighted. This is not a new science, anyhow. Both the military and industry have used cost effectiveness techniques for many years—but these techniques were not used as a means of procrastination. Today's Defense analysts are studying problems to death while our sworn enemy, the Soviet Union, goes ahead and produces new weapons systems. In this regard, I have consistently urged that we get on with the business of ensuring the security of this country through adequate foresight and military preparation.

Limited wars do not threaten our very existence nor our freedom, in the same direct way that general nuclear war does. To me, the blue chips of national defense have to be our strategic warfare forces. Next in importance, come the forces for conventional warfare. I cannot understand why we let limited wars drag out, at an unacceptable cost in men's lives and equipment, to the extent that we are forced to give our blue chip forces less than the necessary attention. This is exactly what we have done with a very important element of our own nuclear deterrent—the Anti-Ballistic Missile defense system.

While we were procrastinating, the Soviets deployed an ABM system, worked on the orbital bomb, and probably other space weapons, too. With lead time as important as it is in the development of weapons systems, it appears that we almost missed the boat in our own parallel efforts. We should, without further delay, move promptly into the production and deployment of the full ABM defense recommended by the Joint Chiefs of Staff. At the same time, we should be perfecting a reliable anti-satellite defense system, together with long-range tracking systems to calculate orbits and pinpoint satellites in outer space. In view of the Soviet development of the multiple warhead missile (MIRV), we should proceed on an urgent basis to develop a defense that will destroy multiple warhead missiles soon after they leave the launching pad, and before the warheads separate. Both the Air Force and the Navy have such a system under development.

Moving down the warfare spectrum, I wish to cite a few problems that affect our ability to conduct conventional warfare. We need to replace the equipment taken from our Reserves and National Guard and sent to Vietnam, as well as that borrowed from our forces in Europe. The wartime mission of these forces is to fight, and they cannot do that without equipment.

I am very concerned that the Navy does not have a surface-to-surface missile similar to the Soviet missile that sank the Israeli destroyer Eilath last month. Moreover, the Navy badly needs new antisubmarine aircraft and sensors to combat the growing Soviet submarine threat.

And finally, we should profit from the lessons learned by all of the armed services in the Vietnam War, which showed the important of a mix of different weapons systems and troops. The value of tactical air, gun support, the Air Cavalry, artillery, the helicopter, shallow water patrol craft and reliable communications was well documented. At the same time we should never get so obsessed with hardware that we forget the importance of the combat man and his rifle.

The role of industry in solving the problems that I have mentioned is an important one, and the government will look to men such as you here today for assistance. Judging from industry's past response, I am confident that you will respond nobly.

With regard to industry's role in the future, let me close with a suggestion. From my own point of view, and this is shared by many of my colleagues in Congress, it would appear prudent for Defense contractors to diversify into commercially-oriented products to a much greater extent. I have heard the warnings against the creation of a defense-managed industry, but I think that there is another consideration that is closer to the point. This is the decline of profits in doing business with the government. For example, twelve years ago Defense contractor profits were 6.5 percent; six years ago profits were 4 percent; and last year they were 3 percent. If your marketing Divisions will project that curve a few years ahead, I think that your top management will see compelling reasons for more civilian diversification.

Congressman Horton Praises Heroism of Marine L. Cpl. Roger I. Duffett as Typical of the Spirit and Patriotism of Amercan Youth

EXTENSION OF REMARKS

OF

HON. FRANK HORTON

OF NEW YORK

IN THE HOUSE OF REPRESENTATIVES

Thursday, November 30, 1967

Mr. HORTON. Mr. Speaker, the war in Vietnam is too often presented to us as a kaleidoscope of statistics, hill numbers, statements and counterstatements, which ignore the critical accomplishments of the most important element in the war—the American fighting man.

This was brought home to me clearly again recently when I learned of the award of the Bronze Star Medal to L. Cpl. Roger I. Duffett, 2184897, USMC, now stationed at the U.S. Marine Air Station, Beaufort, S.C. Lance Corporal Duffett is the son of the distinguished immigration inspector of the Immigration and Naturalization Service in Buffalo, N.Y., Inspector Paul Duffett.

I would like to share with you and our colleagues, Mr. Speaker, the citation which accompanied the award of the Bronze Star Medal, and which so graphically describes Lance Corporal Duffett's heroism:

U.S. MARINE CORPS,
San Francisco.

In the name of the President of the United States, the Commanding General, Fleet Marine Force, Pacific takes pleasure in presenting the Bronze Star Medal to Private First Class Roger I. Duffett, United States Marine Corps, for service as set forth in the following citation:

"For heroic achievement in connection with operations against insurgent communist (Viet Cong) forces in the Republic of Vietnam while serving as an Aviation Crash, Fire and Rescue Crew Member with Marine Air Base Squadron Sixteen, Marine Aircraft Group Sixteen, First Marine Aircraft Wing.

During the early morning hours of 28 April 1967, the Dong Ha Airfield came under a heavy enemy rocket attack. Subsequently, a rocket round struck a vehicle which was parked near the Delta Medical Company Hospital, immediately engulfing the vehicle in flames and causing the ambulance jeep alongside to burst into flames. After learning of the burning vehicles and realizing the danger to the hospital which was located nearby, Private First Class Duffett unhesitatingly rushed to the side of the burning vehicles despite the hostile fire bursting around him. As he began extinguishing the blaze, he was seriously wounded by fragments from an exploding rocket. Ignoring the pain of his wounds and disregarding the enemy fire, Private First Class Duffett continued fighting the fires until they were extinguished. By his immediate and courageous action in the face of an extremely hazardous situation, he undoubtedly prevented the fire from spreading to the hospital building and endangering the lives of his comrades. Private First Class Duffett's bold initiative, fearless action, sincere concern for the welfare of his companions and selfless devotion to duty at great personal risk inspired all who observed him and were in keeping with the highest traditions of the Marine Corps and of the United States Naval Service."

Private First Class Duffett is authorized to wear the Combat "V".

Lt. Gen., V. H. KRULAK,
U.S. Marine Corps, Commanding
(For the President).

Mr. Speaker, I would like to add my commendation to L. Cpl. Duffett for his unselfish, courageous act, and to point out that the example set by this fine young American stands in sharp relief to the better publicized activities of a handful of draft card burners and violent protesters.

Although the latter are small in number, we hear a great deal about them, and do not hear enough of men such as Roger Duffett who stand heroically in the front lines of defense of this Nation. I am proud to have the opportunity to tell the story L. Cpl. Roger Duffett, Mr. Speaker, and to publicly thank him for his devotion to duty and his country.

Fifteenth Annual Christmas Greens Exhibition

EXTENSION OF REMARKS

OF

HON. THOMAS N. DOWNING

OF VIRGINIA

IN THE HOUSE OF REPRESENTATIVES

Thursday, November 30, 1967

Mr. DOWNING. Mr. Speaker, the advent of our holiday season is being beautifully portrayed at the Botanic Gardens this week in the 15th annual Christmas greens exhibition which is presented as a gift to the city of Washington from the more than 130 federated garden clubs and plant societies in the metropolitan area. The handsome and striking displays which line the hallways and exhibition rooms represent the efforts of more than 5,000 dedicated citizens of the greater Washington area.

Mrs. Clyde E. Romig, president of the National Capital Area Federation of Garden Clubs and a member of the First Lady's Committee for a More Beautiful Capital, appropriately set the theme for the 1967 exhibition as "Christmas in Our Capital."

This is a rare opportunity for everyone who has the occasion to live, work, or visit on Capitol Hill to enjoy the rare beauty which is shown in a collective array of wreaths and swags along with arrangements for hearths, mantels, altars, and tables.

Of special interest to the very young are replicas of store window displays. There are even special Christmas arrangements which the blind may touch, smell, taste, and hear. The scenes capture the beauty of many traditional Washington locales.

I am especially grateful to the women who continue year after year to bring this spirit of Christmas to us in such a beautiful fashion, and I urge everyone to imbibe of this spirit this week.

The exhibition will be open through December 3, with viewing hours on Friday and Saturday from 9 a.m. to 9 p.m., and on Sunday from 9 a.m. to 3:45 p.m. It is a most pleasant way to start the Christmas season.

Foreign Assistance Act

EXTENSION OF REMARKS

OF

HON. CLARENCE E. MILLER

OF OHIO

IN THE HOUSE OF REPRESENTATIVES

Thursday, November 30, 1967

Mr. MILLER of Ohio. Mr. Speaker, I stand to oppose the Foreign Assistance Act. Although the bill now before the Congress is a great deal less than the amount requested by the President, I do not believe it is small enough.

Many of my distinguished colleagues have spoken that they are in favor of the principle of foreign assistance, and then went on and qualified their statements with "buts" and "howevers."

I am not convinced that foreign aid of military arms and money is automatically a good thing, and I have very serious doubts about the wisdom of such a course when the United States must increase its national debt by borrowing from future generations in order to give to other nations.

We have learned the lesson, or should have learned it, that money, or even overt military liberation will not win a nation's lasting friendship. France, the recipient of an estimated $20 billion since 1945, today threatens to undermine our currency by making arbitrary and unwarranted demands on our gold reserves.

Just a few years ago we witnessed the alarming spectacle of two large recipients of American military and dollar assistance, India and Pakistan, using their new-found strength and stability to go to war with each other over trivialities.

Just a few months ago we saw the peace of the entire world threatened when Israel went to war with the Arabian bloc of nations. All of the combatants had received large amounts of U.S. aid, and even today the United States is planning to ship new jet fighters to Israel and to five Arab States at the same time.

At this very moment, we see two of our allies, Greece and Turkey, the recipients of $4.6 billion in military aid, on the very brink of war over tiny Cyprus. It is the least that President Johnson should do to send Mr. Vance to mediate. After all, if war breaks out between these two nations, the United States will have made it possible, and we must share a part of the blame for giving them the means.

With the bitter lessons of history before us, I think the principle of foreign aid itself is open to question. The greatest of Greek historians, Thucydides, said that those who refuse to learn from history are doomed to repeat its mistakes. It is high time we learned something from our own mistakes. I believe we should restrict our foreign assistance to technical, industrial, agricultural, and person-to-person programs such as the food for peace and Peace Corps programs.

We who must vote for or against foreign assistance must consider the lessons of history. We must also consider the $30 billion budget deficit which appears inevitable unless spending is cut. We must consider that the American taxpayer is already paying a $76 billion defense budget which enables us to patrol and protect the entire free world, so why pay more to give them weapons to fight each other?

We should also consider that large gaps in our own society still exist which should be given first priority. As long as there continues to be underprivileged persons and underdeveloped regions, and as long as we have ghettos and undernourished persons within our own Nation, it is my belief that we cannot afford continued foreign aid of arms and dollars.

Danny Kaye

EXTENSION OF REMARKS

OF

HON. THOMAS M. REES

OF CALIFORNIA

IN THE HOUSE OF REPRESENTATIVES

Thursday, November 30, 1967

Mr. REES. Mr. Speaker, the question is often asked, "What can one man do?" It is one thing for the Government or a giant corporation or an established private organization to make gradiose plans and perhaps even carry them out, but what can one lone individual do?

There lives in my State of California today—or on those rare days when he is actually home—a slim, Brooklyn-born redhead who, with no formal education to speak of, has made his name an internationally known symbol of peace, of children's happiness, of laughter, of music, of dedicated devotion toward solving the ills of the world.

His name is Danny Kaye. He is supposed to be an actor, a clown, an entertainer—and in each of these quite professional roles he has reached the very top in his industry. But Danny Kaye is a great deal more than this. He is a humanitarian in the deepest and most responsible sense of the word. He does not make speeches and pronouncements. He does not hold court.

Danny Kaye does just one thing and he does it simply and well. He works hard at what he believes in.

Presently he is contributing his services to, and is appearing with, the Israel Symphony Youth Orchestra in 12 different countries on a good-will tour which brings as much glory to America through its beloved "clown" as it does to Israel through its talented musicians.

Every October for the past 3 years, Mr. Kaye has made a whirlwind trip, flying his own plane, to dozens of cities throughout the United States and Canada in support of UNICEF's annual "trick or treat" fundraising campaign.

Each year for the past 14 years Mr. Kaye has served willingly, without pay and at his own personal expense, as unofficial but highly effective "ambassador of good will" for UNICEF. UNICEF's high regard for Mr. Kaye is perhaps best exemplified by the fact that when, in 1965, UNICEF was named the recipient of the Nobel Peace Prize, it was Danny Kaye who was asked to travel to Oslo to accept the award in UNICEF's name.

Every year for the past dozen years Danny Kaye has made one or more appearances as the guest conductor of symphony orchestras all over the world, ranging from London and Stockholm to New York and San Francisco and Toronto, for the purpose of raising pension funds for the musicians. Again, he serves without fee.

Somewhere along the line, perhaps in his spare time, I understand that Mr. Kaye also works for his living.

We of California are very proud to count Danny Kaye as a citizen of our State. We are grateful to Brooklyn and the great State of New York for having spawned him and sent him our way. But we are even prouder to have been able to share his great talent and his warm heart not only with all those in the United States, but with all the citizens of the world who speak his two common languages—laughter and compassion.

Pittsburgh Company Wins First Urban Transportation Award

EXTENSION OF REMARKS

OF

HON. WILLIAM S. MOORHEAD

OF PENNSYLVANIA

IN THE HOUSE OF REPRESENTATIVES

Thursday, November 30, 1967

Mr. MOORHEAD. Mr. Speaker, it was my pleasure and privilege on Wednesday of this week to attend the ceremony at which a company headquartered in my district—the Westinghouse Electric Corp.—received the first Urban Transportation Award of the U.S. Department of Housing and Urban Development.

When Secretary Robert C. Weaver presented the award to Westinghouse's very able president, Mr. Donald C. Burnham, he said:

> Westinghouse earned this award for demonstrating the courage and foresight to enter a field that was relatively new to it, and for the imagination and technical skill it demonstrated in delivering solid accomplishments in a relatively brief time.

I am proud, Mr. Speaker, that Pittsburgh can claim this innovative company as its own, and that HUD has appropriately honored its formidable achievement in the vital area of urban transportation.

To illustrate the accomplishments of both HUD and Westinghouse in the serious business of enabling our urban populations to move about comfortably, cheaply and cleanly, I insert at this point in the Record the text of Secretary Weaver's remarks at the first Urban Transportation Award ceremony. The text follows:

> Now, I have a very pleasant duty to perform.
>
> We have been talking about the vast, intricate and complex problems of urban mass transportation.
>
> We have been saying that we perceive transit as one of the major urban problems that must be resolved as we set about revitalizing every facet of the urban environment.
>
> Since the U.S. Department of Housing and Urban Development was created just two years ago this month, it has been clear to us that one primary mission of the department must be to stimulate, encourage and inspire the cooperation and involvement of every resource the Nation has to attack and solve these problems.
>
> We believe that an appropriate part of our effort should be to honor those who contribute outstanding achievements and accomplishments toward the solution of transportation problems.
>
> For this purpose, I am announcing today the creation of the Urban Transportation Award. This award will serve as the symbol of the Nation's gratitude to those who devote themselves to this task with outstanding success.
>
> I am privileged also to be able to announce the first winner—the Westinghouse Electric Corporation of Pittsburgh, Pennsylvania—for outstanding achievements in urban transportation technology.
>
> Westinghouse earned this award for demonstrating the courage and foresight to enter a field that was relatively new to it, and for the imagination and technical skill it demonstrated in delivering solid accomplishments in a relatively brief time.
>
> In short, Westinghouse has earned the gratitude of the Nation for giving the haggard transit passenger a better ride for his money.
>
> The company we honor today—through its able and energetic president, Donald C. Burnham—is making many contributions to transit innovation, but I want to mention three of them:
>
> In San Francisco, the first of a new generation of automatic command and propulsion systems for trains in a high-volume, large transit operation.
>
> In Pittsburgh, the creation of an innovative system for a medium-volume traffic area by the use of automatic, rubber-tired cars traveling on a lightweight, elevated right-of-way.
>
> And thirdly, the development of Marketeer I, the two-passenger, electrically-powered vehicle for the economic, convenient transportation of the urban dweller over moderate distances and at moderate speeds.
>
> It is our conviction in the Department that the active involvement of the private, industrial and corporate genius of this Nation is essential for a national response to urban problems.
>
> So, I am delighted today, in behalf of the national government, to present this award for industrial leadership.

SENATE

Friday, December 1, 1967

The Senate met at 9 a.m., and was called to order by the Acting President pro tempore (Mr. Metcalf).

Rev. Edward B. Lewis, pastor, Capitol Hill Methodist Church, Washington, D.C., offered the following prayer:

Dear Lord, in the morning we pray, seeking direction for the day. We turn a deaf ear to the voices of fear and confusion. We find peace within and some right answers for conditions without, as we stand in Thy presence.

We pray for wisdom to guide, intelligence to direct, and love to temper action. We affirm that God's law of justice is operating in life.

Remind us of the Biblical thought: "The path of the righteous is like the light of the dawn, which shines brighter and brighter until full day."

Strengthen the faith of these our leaders, O God. Renew a right spirit within and lead in paths of peace. In the Master's name. Amen.

THE JOURNAL

Mr. MANSFIELD. Mr. President, I ask unanimous consent that the reading of the Journal of the proceedings of Thursday, November 30, 1967, be dispensed with.

The ACTING PRESIDENT pro tempore. Without objection, it is so ordered.

LIMITATION ON STATEMENTS DURING TRANSACTION OF ROUTINE MORNING BUSINESS

Mr. MANSFIELD. Mr. President, I ask unanimous consent that statements in relation to the transaction of routine morning business be limited to 3 minutes.

The ACTING PRESIDENT pro tempore. Without objection, it is so ordered.

RAILROAD MERGER

Mr. MANSFIELD. I wish to join my distinguished colleague, the junior Senator from Montana [Mr. Metcalf], now presiding as Acting President pro tempore, in what he said on yesterday relative to the decision of the ICC authorizing a merger of the Great Northern Railway, the Northern Pacific Railway, Chicago Burlington & Quincy Railroad Co., Pacific Coast Railroad Co., and the Spokane, Portland & Seattle Railway System.

I believe that this is a misguided move on the part of the Interstate Commerce Commission; and I can say, without fear of contradiction, that so far as the States of Minnesota, North Dakota, Montana, Idaho, and Washington are concerned, it will react against the best interests of that area of the Nation.

I point out that Montana has an area of 148,000 square miles; that there is a need for two transcontinental railroads; that both the Great Northern and the Northern Pacific are not suffering any losses at this time, but that their profits are rather handsome, all things considered.

It would be my hope that the distinguished chairman of the Senate Committee on Commerce, the Senator from Washington [Mr. Magnuson], would look into this matter immediately to determine what the reasons are for this merger at this time. I am hopeful that something along this line will be done by the distinguished Senator from Washington, and I assure him that, so far as Montana is concerned, we will back him 100 percent in any move he makes.

CYRUS R. VANCE—"MAN FOR ALL SEASONS"

Mr. MANSFIELD. Mr. President, I should like at this time to call to the attention of the Senate, the remarkable service performed by Mr. Cyrus R. Vance, a former Under Secretary of Defense, a man in the McNamara mold, and an ambassador who has proved his worth in helping to bring about an adjudication of the recent crisis in the eastern Mediterranean between Greece and Turkey over the island of Cyprus.

I do not think it is letting any secrets out of the bag to state that about this time a week ago there was a grave and immediate danger of war between Greece and Turkey. Because of the magnificent efforts by Mr. Vance—this "man for all seasons"—a settlement has been reached that will bring about a degree of peace in the eastern Mediterranean and will, I believe, add to the luster of this country because of the outstanding efforts made by this distinguished public servant.

I want the record to show that this man is entitled to a great deal of credit for what has been accomplished in averting a war in the eastern Mediterranean and for his singularly outstanding contribution to the conclusion of a peaceful settlement between the two main contending parties, Greece and Turkey.

ORDER OF BUSINESS

Mr. EASTLAND. Mr. President, I ask unanimous consent that I may proceed for 10 minutes.

The ACTING PRESIDENT pro tempore. Without objection, it is so ordered.

THE PRICE OF SOCIALISTIC POLICIES

Mr. EASTLAND. Mr. President, during the past month we have witnessed one of the more remarkable ironies of history. Britain has devalued her currency in a desperate bid for survival while the little country of Rhodesia that she threatened with economic ruin because it dared to break away from the motherland has just celebrated the second anniversary of its independence. For the past 2 years, Britain has involved the rest of the world including the United States in an attempt to strangle Rhodesia and force her submission to Britain's will. Britain's frail economy plunges into devaluation. Rhodesia's economy continues to ride high and her pound remains buoyant at $2.80.

Britain's Prime Minister Wilson who said 2 years ago that sanctions would break Rhodesia in weeks rather than months has had to endure the ignominy of being told by Prime Minister Smith that Rhodesians are pleased to be able to help Britains in their economic distress by maintaining the value of the Rhodesian pound.

The Rhodesian newspapers were not so charitable. The Rhodesia Herald commented that—

> It was a sad day for Britain because it took a combination of allies, friends, and enemy countries to ram home with brutal force what the British people have refused to face for something like 20 years—that the world does not owe them a living at a standard of their own choosing.

I believe this is an entirely appropriate observation. Britain has had to devalue her currency three times within living memory and every time it was done by a Socialist Prime Minister. What we are witnessing is the price of socialistic policies.

Mr. President, I believe that we can benefit by studying the economic tragedy of the great socialistic experiment which the British Government embarked on following World War II.

The British nationalized major industries provided almost unlimited welfare benefits and legislated sweeping changes in employer-employee relations.

Instead of achieving the security of a welfare state, the British people have fallen into economic chaos. British industry and British labor have become so entangled in inefficiency and dispute that British products cannot successfully compete on the world market.

The financial savings of millions of Englishmen have been ruthlessly devalued as the pound lost value. The burden of taxes to support the cumbersome machinery of socialism sapped both the strength and the spirit of the British economy.

Today, the English people, who once enjoyed one of the most prosperous economies in the world, are forced to surrender another measure of prosperity in a desperate effort to keep their nation from bankruptcy.

Mr. President, I can hardly help from observing that we are being greatly tempted to make many of the same mistakes in our economy which the British have made in theirs. I have no doubt that the results would be just as bitter for us if we make these same mistakes.

We have always been proud of our national heritage of free enterprise, capitalism, and local government. But, we are faced with legislation which cannot help but reduce the rewards of free enterprise and the powers of our local and State governments while creating a swollen monster out of the Federal Government. Certainly the founders of our Nation envisioned no such a trend and in fact took great pains to insure that such a shift would not take place.

The temptation to grant the Federal Government greater power, to pass laws which provide vast giveaway programs, which, if we are honest with ourselves, we must label "socialism," must be resisted if we do not wish to create our own economic tragedy.

Mr. President, those who talk of utopian Federal programs to give every American countless "free" benefits, should also recall that the piper must be paid.

Unless the Nation lives within its income, taxes must go up, costs must go up, our dollar on the world market must lose value and in the end, instead of reaching the mythical socialistic security, we will have lost our security and mortgaged our Nation.

The price that the British people pay for socialism is primarily their own affair but we Americans have a right to be concerned about the price that has been handed on to us. The immediate effect of the devaluation of the pound is to bring heavy pressure on the dollar which is something that hopefully can be resisted.

But, there will be other side effects of Britain's economic predicament which are going to operate to this country's disadvantage. We have a balance-of-payments problem which is going to be exacerbated by the increased competition we shall face in selling our goods in countries that have devalued their currencies. It seems more than likely that we shall suffer from the cancellation of British defense contracts. We are obviously going to be called upon to meet overseas defense burdens that the British Government in its economic distress feels compelled to lay down.

If we are to bear these burdens and make these sacrifices on behalf of an ally, I believe we have a right and responsibility to our own people to require that ally to conduct its affairs in such a way as to eliminate all unnecessary demands on us. I personally am not satisfied that our British ally is conducting its affairs in that way.

I notice, for example, a suggestion that one of the contributory causes of devaluation has been the additional burden on the British economy of oil shipments since the closing of the Suez Canal which has been estimated at 100 million pounds. This is directly comparable to the annual cost to the British of pursuing a completely sterile and unproductive vendetta against the stable, pro-Western Government of Rhodesia. I notice that the British Government in an effort to bring its economy into balance has announced the necessity of reducing its defense expenditure by $240 million—again, a sum which is comparable to its annual losses in applying sanctions against Rhodesia.

I have long contended that the application of sanctions against Rhodesia is an act of folly. My argument had hitherto been based on factors relating to the stability and the favorable political orientation of that country. It is now reinforced by considerations directly affecting our financial and economic well-being—considerations which include the very substantial sacrifices which this country is making in support of British policy in this area. I do not know how widely it is appreciated, for example, that American interests are gravely prejudiced in respect to chrome supplies as a result of our involvement in the Rhodesian affair.

I have recently read a report of some remarks by Mr. Kenneth Rush, president of the Union Carbide Corp., who has pointed out that Rhodesia is the largest source of chrome ore in the free world but that sanctions by the United States, the United Kingdom, and other nations against Rhodesia have forced industries to turn elsewhere. Mr. Rush has pointed out that chrome ore is a vital material in metallurgical processes to make steel and other metals stronger and more durable. Mr. Rush points out that another ore supply in Turkey is being depleted rapidly and the U.S. strategic stockpile of more than 1.5 million tons of chrome ore could not be released to industry without action by Congress. Mr. Rush comments that he doubts that they will turn any of it loose. He points out that the Soviet Union in its almost total break with Red China recently cut off that Communist nations' chrome shipments.

China in turn recently bought 60,000 tons of top-quality Rhodesian chrome ore according to trade sources. Major U.S. chrome users principally Union Carbide and Vanadium Chrome, both have big stakes in Rhodesia but now they are forced to go on the open market, Russia, taking advantage of the muddled political situation in the very best capitalistic tradition, has let it be known that the price of Russian chrome next year is going up by $5 a ton.

> This—

Says Mr. Rush—

> is going to affect the balance of payments problem adversely. We have in the past received substantial dividends from our investments in Rhodesia.

In my opinion, we have obliged the British Government altogether too much in this matter of sanctions against Rhodesia. The British Government, of course, is to some degree a prisoner, willing or otherwise, of its own ill-considered commitments, but it is our support which helps to keep it in bondage to them. In the light of recent developments in the British economic situation, I believe that we shall be doing both our countries a service by being more disobliging in this particular area.

ENROLLED BILLS SIGNED

The ACTING PRESIDENT pro tempore announced that on November 30, 1967, the Vice President signed the following enrolled bills, which had previously been signed by the Speaker of the House of Representatives:

S. 1085. An act to amend the Federal Credit Union Act to modernize the loan and dividend provisions;

S. 2211. An act to amend section 509 of the Merchant Marine Act, 1936, to provide for construction aid for certain passenger vessels operating on the inland rivers and waterways; and

S. 2514. An act to grant the consent of Congress to the Wheeling Creek Watershed Protection and Flood Prevention District compact.

MESSAGES FROM THE PRESIDENT—APPROVAL OF BILLS

Messages in writing from the President of the United States were communicated to the Senate by Mr. Jones, one of his secretaries, and he announced that on November 29, 1967, the President had approved and signed the following acts:

S. 1781. An act for the relief of Kyong Hwan Chang; and

S. 2428. An act to authorize the Secretary of the Army to convey to the State of Washington certain lands in the counties of Yakima and Kittitas, Wash., in exchange for certain other lands, and for other purposes.

BILL INTRODUCED

A bill was introduced, read the first time, and, by unanimous consent, the second time, and referred as follows:

By Mr. SPARKMAN (for himself, Mr. Hill, Mr. Fulbright, Mr. Talmadge, Mr. Eastland, Mr. Jordan of North Carolina, and Mr. Hollings):

S. 2714. A bill to amend the Consolidated Farmers Home Administration Act of 1961, as amended, in order to provide additional loan assistance under such act to farmers who have suffered severe production losses as the result of a national disaster; to the Committee on Agriculture and Forestry.

(See the remarks of Mr. Sparkman when he introduced the above bill, which appear under a separate heading.)

AMENDMENT OF CONSOLIDATED FARMERS HOME ADMINISTRATION ACT OF 1961

Mr. SPARKMAN. Mr. President, for myself and Senators Hill, Fulbright, Talmadge, Eastland, Jordan of North Carolina, and Hollings, I introduce, for appropriate reference, a bill to amend the Consolidated Farmers Home Administration Act of 1961.

Mr. President, my bill is intended to deal with the problems faced by a farmer who suffers the loss of substantially all of his income for a year when his crop is destroyed by a natural disaster. This is exactly what has happened to many of the cotton farmers in my State and in other States of the Southeast as a result of the recent hard freeze in the area. I spoke in the Senate about this situation on November 22, and I hope my colleagues will refer to my statement then, which describes in some detail the terrible plight of our cotton farmers.

Mr. President, the greatest need for a farmer caught in such a situation is adequate credit. Most farmers make their crop on borrowed funds. Farm machinery, seed and fertilizer, and feed for livestock, are often bought on credit, with the expectation that they will be paid for out of the proceeds of the sale of the farmer's crop. When that crop is virtually destroyed, the farmer cannot survive without additional credit for the purpose of paying his existing obligations and also for the purpose of making a crop next year.

The Farmers Home Administration has a program under which it makes emergency loans in these disaster areas, and the program has been very helpful to a great many farmers. However, the program has limitations which I feel should be removed. Under the FHA emergency loan program, existing creditors of the farmer must agree to subordinate their debts to the FHA loan. It is not always possible to get the creditors to agree to this, and I am not sure that it is right to require them to do it. This places a heavy burden upon seed, feed, and fertilizer merchants and other suppliers of the farmer.

Another way in which the FHA program is limited is that, as a matter of policy, loans are made only for a term of 1 year. Of course, FHA will renew their loan from year to year as the farmer works his way out of his loss, but nevertheless the loan is due and payable at the end of 1 year. It usually takes several years for a farmer to recover from a total crop loss, and I feel that this emergency credit extended to him should be for a longer term than now provided under the FHA program.

My bill would do two things. First, it would require that, where a farmer has suffered severe crop loss, the emergency loan for which he is otherwise qualified shall be made for a minimum period of 3 years. Second, my bill would require that such a loan include an amount sufficient to pay off any existing debts of the farmer that could reasonably have been expected to be paid out of the proceeds of the sale of the crop that has been lost.

Mr. President, under my bill a farmer who has been the victim of a natural disaster will be able to get a loan for a term and for an amount that will let him get back on his feet. It will also relieve the small business farm suppliers from the burden of having to wait for payment of their accounts.

This legislation is needed by the cotton farmers of the Southeast to help them in their present situation. However, its advantages are not limited to cotton nor to the Southeast. The loans provided for in my bill will help farmers all over the country whose continued operation may be jeopardized because of a natural disaster.

The **ACTING PRESIDENT** pro tempore. The bill will be received and appropriately referred.

The bill (S. 2714) to amend the Consolidated Farmers Home Administration Act of 1961, as amended, in order to provide additional loan assistance under such act to farmers who have suffered severe production losses as the result of a national disaster, introduced by Mr. Sparkman (for himself and other Senators), was received, read twice by its title, and referred to the Committee on Agriculture and Forestry.

Mr. FULBRIGHT. Mr. President, during the last 6 weeks I have visited many of the counties in Arkansas which have experienced disastrous weather conditions in 1967. These conditions were recognized last August, when 24 counties were made eligible for emergency loans by the Farmers Home Administration.

Since then, cotton farmers have had additional losses caused by an early freeze which destroyed cotton still in the fields. This situation is compounded by the fact that many of these same farmers had losses on their 1966 crops. These farmers need help; and local businessmen, who have extended credit in anticipation of a good crop in 1967, also need help.

Consequently, I have urged the Secretary of Agriculture and the Administrator of the Small Business Administration to give every possible assistance to farmers and small businessmen in the affected counties. I am also joining Senator Sparkman in the introduction of special legislation to improve the ability of the Farmers Home Administration to make longer term loans to farmers.

Mr. President, I ask unanimous consent to insert in the Record at this point a telegram from the president of the Arkansas Farmers Union, my letter to the Secretary of Agriculture and the Administrator of the SBA, and other documents related to this agricultural problem.

There being no objection, the telegram, letter, and documents were ordered to be printed in the Record, as follows:

Little Rock, Ark.,
November 28, 1967.

Senator Bill Fulbright,
Senate Office Building,
Washington, D.C.

There exists an emergency with our cotton farmers due to a short crop. This is true in all of the cotton counties of Arkansas. We would like to recommend that the cotton counties be declared disaster areas and a moratorium be declared on all foreclosures. We further recommend that necessary steps be taken now to provide adequate funds for next years operation.

Lewis J. Red Johnson,
President, Arkansas Farmers Union.

November 30, 1967.

Hon. Orville L. Freeman,
Secretary of Agriculture,
Washington, D.C.

Dear Mr. Secretary: I am sure that you are aware of the financial crisis facing many Arkansas cotton farmers. This years crop will be far below normal expectations, and you recognized the problem last August when 24 counties were made eligible for emergency loans.

The farmers suffered heavy losses as a result of adverse weather conditions during the entire planting season, including drought, excessive rainfall and flooding, abnormally cold weather and hailstorms.

The present disaster situation is compounded by losses incurred by many cotton farmers on their 1966 crops. These abnormally low cotton crops are directly affecting ginners, and merchants and financial institutions which supply materials, equipment, and credit to cotton farmers. The total effect upon the economies of the counties involved is very serious, and everything possible must be done to assist these farmers and businessmen.

I am now considering the introduction of special legislation designed to increase the authority of the Department of Agriculture and the Small Business Administration to provide assistance in situations of this kind. In the meantime, I hope that you can assure me that authority available to you under existing law will be used to the maximum extent in satisfying financial needs of Arkansas farmers. It also occurs to me that it would be desirable for an appropriate official of the Department to visit the area and to discuss with local farmers and businessmen the dimensions of their distress.

With best wishes.

Sincerely yours,

J. W. Fulbright.

U.S. Senate,
Washington, D.C., November 30, 1967.

Hon. Robert C. Moot,
Small Business Administration,
Washington, D.C.

Dear Mr. Moot: I am sure that you are aware of the financial crisis facing many Arkansas cotton farmers. This year's crop will be far below normal expectations, and this problem was recognized last August when 24 counties were made eligible for emergency loans.

The farmers suffered heavy losses as a result of adverse weather conditions during the entire planting season, including drought excessive rainfall and flooding, abnormally cold weather and hailstorms.

The present disaster situation is compounded by losses incurred by many cotton farmers on their 1966 crops. These abnormally low cotton crops are directly affecting merchants and financial institutions which supply materials, equipment, and credit to cotton farmers. The total effect upon the economies of the counties involved is very serious, and everything possible must be done to assist these farmers and businessmen.

I am now considering the introduction of special legislation designed to increase the authority of the Department of Agriculture and the Small Business Administration to provide assistance in situations of this kind. In the meantime, I hope that you can assure me that authority available to you under existing law will be used to the maximum extent in satisfying financial needs of Arkansas businessmen. It also occurs to me that it would be desirable for an appropriate official of your Adminstration to visit the area and to discuss with local farmers and businessmen the dimensions of their distress.

With best wishes.

Sincerely yours,

J. W. FULBRIGHT.

U.S. DEPARTMENT OF AGRICULTURE,
FARMERS HOME ADMINISTRATION,
Washington, D.C., August 4, 1967.

Hon. J. W. FULBRIGHT,
U.S. Senate,
Washington, D.C.

DEAR SENATOR FULBRIGHT: This is to inform you that the Department of Agriculture has authorized the making of Emergency loans pursuant to Section 321 of Public Law 87-128, through June 30, 1968, to eligible farmers in the following twenty-four counties in Arkansas:

Chicot
Clay
Craighead
Crittenden
Cross
Desha
Drew
Greene
Independence
Jackson
Lawrence
Little River
Lonoke
Miller
Mississippi
Monroe
Phillips
Poinsett
Prairie
Pulaski
Randolph
St. Francis
White
Yell

This action was taken because of extensive damage to 1967 crops, primarily cotton and soybeans, as the result of various adverse weather conditions during the entire planting season, including drought, excessive rainfall and flooding, abnormally cold weather, and hailstorms.

Any farmer in these counties desiring information about Emergency loans or other types of assistance available through this agency should get in touch with the local office of the Farmers Home Administration serving his county.

Please call on us whenever we can be of service.

Sincerely yours,

J. V. HIGHFILL,
Acting Administrator.

EMERGENCY LOAN ASSISTANCE FOR FARMERS AND RANCHERS

Emergency loans are available through USDA's Farmers Home Administration to eligible farmers and ranchers in areas designated by the Secretary of Agriculture upon his finding that a natural disaster has created a need for agricultural credit which cannot be met by local lenders.

Questions and answers explaining details of Emergency loans follow:

WHO IS ELIGIBLE?

To be eligible an applicant must be (1) a citizen of the United States, (2) an established farmer or rancher, operating as an owner-operator or tenant, (3) of good character and with the industry, ability, and experience required to carry out his proposed farming operations, (4) unable to supply the needed funds from his own resources or with loans from the usual sources of credit available to farmers and ranchers, and (5) the manager of his farming or ranching operations.

Partnerships or corporations must be engaged primarily in farming or ranching and the partners or principal stockholders, individually or collectively, must be unable to supply the needed funds from their own resources or with loans obtained by them from other sources. Also, the farming or ranching operations must be managed by a partner or stockholder.

WHO DETERMINES ELIGIBILITY?

The local County Committee of the Farmers Home Administration composed of three farmers who know local farming and credit conditions.

FOR WHAT PURPOSES ARE LOANS MADE?

Emergency loans supplement private and cooperative sources of credit and the regular lending programs of the Farmers Home Administration. Generally, Emergency loans instead of regular FHA Operating loans are made to eligible applicants if their operating credit needs can be met with funds for the following purposes: (1) operating and living expenses, (2) not more than one year's interest on debts secured by liens of other creditors on livestock, farm equipment, and farm real estate, (3) not more than one year's taxes and insurance premiums, (4) bills incurred in connection with the current year's production of crops or livestock which have not been disposed of, lost, or destroyed, (5) reasonable amounts for payment to other creditors as depreciation on essential farm equipment under prior lien to them, (6) replacement of livestock lost, destroyed, or disposed of as the result of a natural disaster, (7) repair or replacement of farm and home equipment damaged or destroyed as the result of a natural disaster, and (8) purchase of feeder livestock for applicants who normally have feeding enterprises and produce most of the feed required for their feeder livestock.

Emergency loans instead of other types of FHA real estate loans are made to eligible applicants to meet the cost of real estate except for housing purposes, if not more than $2,500 will be required for these purposes and an Emergency loan is being made for operating expenses. Otherwise, Emergency loans are made for these purposes only when the need for such credit cannot be met with other types of FHA loans, including Rural Housing loans. (FHA Rural Housing loans made necessary by a natural disaster bear the same rate of interest as Emergency loans and are repayable over periods up to 33 years.)

Emergency loans are not made to finance commercial feed lot operations or to refinance debts except for the payment of unsecured bills incurred in connection with farming or livestock operations.

Emergency loans are made only to eligible applicants who have reasonable repayment prospects and can provide adequate security.

WHAT ARE THE TERMS OF THESE LOANS?

Emergency loans bear three percent interest.

Amounts loaned for annual operating and living expenses are repayable from the year's income. However, if the year's income will not be adequate to do this because of the natural disaster for which the area was designated, amounts loaned for these purposes may be repayable over longer periods consistent with repayment ability but not beyond the end of three years.

Amounts loaned for the purchase of replacement equipment or livestock are repayable over the shortest period consistent with repayment ability, generally not to exceed five years or the useful life of the purchased items, whichever is the shorter period. Amounts loaned for real estate purposes are repayable over periods not to exceed 20 years. Amounts loaned for these purposes are repayable in annual installments, but the first installment may be scheduled for a period not beyond the end of three years if adequate income will not be available earlier because of the natural disaster for which the area was designated.

WHAT ARE THE SECURITY REQUIREMENTS?

Amounts loaned for annual operating and living expenses are secured by first liens on crops and the best lien obtainable on farm equipment and livestock. Amounts loaned for the purchase of farm equipment and livestock are secured by a first lien on the purchased items and the best lien obtainable on other farm equipment and livestock owned by the applicant. Amounts loaned for real estate purposes are secured by the best lien obtainable on farm real estate in which the applicant has an equity of not less than the amount being loaned for real estate purposes. Amounts loaned for other than real estate purposes, as described in this item will be secured additionally by the best lien obtainable on farm real estate when necessary to provide adequate security for large loans.

WHERE ARE APPLICATIONS FOR LOANS RECEIVED?

At the County Office of the Farmers Home Administration.

ENROLLED BILLS PRESENTED

The Secretary of the Senate reported that on today, December 1, 1967, he presented to the President of the United States the following enrolled bills:

S. 1085. An act to amend the Federal Credit Union Act to modernize the loan and dividend provisions;

S. 2211. An act to amend section 5-9 of the Merchant Marine Act, 1936, to provide for construction aid for certain passenger vessels operating on the inland rivers and waterways; and

S. 2514. An act to grant the consent of Congress to the Wheeling Creek Watershed Protection and Flood Prevention District compact.

THE COPPER STRIKE

Mr. MANSFIELD. Mr. President, in response to our request to the President that a Special Board of Inquiry be appointed to look into the copper strike, now in its fifth month and with no end in sight, the President asked Secretary of Labor Willard Wirtz, Secretary of Commerce Alexander Trowbridge, and Assistant Secretary of Defense Thomas D. Morris, representing the Department of Defense, to meet with us.

As a result of this meeting, it is our suggestion that the Secretaries give consideration to the setting up of a Board consisting of two members of industry and two members from the unions and then, if that is acceptable, for those four members to get together to select three public members. We feel that this is one way of getting off dead center, which is where the situation between the unions and the companies is at the present time and getting down to "bedrock" to find ways and means to bring this most unhappy and critical situation to some sort of a satisfactory conclusion.

This Board, we think, should be a fact-finding board empowered to look into the situation and to make recommendations to the three Secretaries as to how this strike could be settled.

If the parties representing labor and industry agree to serve on this Board but are unable to agree on three public members, their selection should then become the responsibility of the Secretary of Labor, the Secretary of Commerce, and the Secretary of Defense. We hope that the companies and the unions will give the most serious and immediate consideration to this suggestion. If they do, my colleague, the Senator from Montana [Mr. METCALF], and I feel quite certain that they will receive the full cooperation of the three Secretaries in the Cabinet.

OVERSEAS MILITARY CEMETERIES AND MEMORIALS: A FITTING TRIBUTE TO AMERICA'S HONORED DEAD

Mr. BENNETT. Mr. President, a perceptive young correspondent for a Salt Lake City newspaper, Deseret News, has recently returned from a trip to Europe, where among other things he visited our military cemeteries and memorials.

The writer, Mr. Gordon Eliot White, in an article dated November 7, describes what he found at these now-serene sites where once the face of Europe and—ultimately—the world hung in the balance.

I commend Mr. White's article to the reading of Senators, believing that it will not fail to evoke memories of those fateful years. I ask unanimous consent that it be printed in the RECORD.

There being no objection, the article was ordered to be printed in the RECORD, as follows:

(By Gordon Eliot White)

(NOTE.—Mr. White recently has returned from a month in Europe. This article was written overseas, at one of the World War II American Cemeteries in Belgium.)

HENRI-CHAPELLE, BELGIUM.—Despite its troubles at home and abroad, the United States can be unabashedly proud of one of its overseas programs: its military cemeteries and memorials. The Henri-Chapelle Cemetery here is a quiet, peaceful triumph of American architecture, technology and organization, paying continuing, fitting tribute to 7,989 men and women who gave their lives during the 1944–45 advance into Germany.

I visited similar burial sites in Normandy and at Belleau Wood, and spoke to other Americans who had been at the Margraten Cemetery in Holland, at Neuville, in Belgium, and at Luxembourg, Brittany, and Cambridge. All of us agreed that our countrymen who fell in both world wars and lay in foreign soil were being treated with proper respect due the honored dead.

We saw German, French and Italian memorials which did not approach the American cemeteries for peaceful good taste. Only in England, at memorials such as St. George's Chapel at Biggin Hill Royal Air Force Base, and in St. Paul's and Westminster Abbey were the U.S. military monuments matched.

Here, on this low hilltop, 18 miles from Liege, in the heart of the Siegfried Line which once defended Hitler's crumbling Reich, the curving lines of white crosses cover 57 green acres.

The men and women buried here died during the Christmas, 1944 Battle of the Bulge and later during the advance into Germany through the Siegfried fortifications and the first crossings of the Rhine. Among the graves are sixty-seven in which brothers lie side by side. The highest ranking officer here is Brigadier General Frederick W. Castle, USAF, who died when his B–24 was shot down on Christmas Eve, 1944, while leading the greatest formation of bombers in military history.

Unmarked headstones show the graves of 94 unknowns, and the names of 450 missing are inscribed on the marble pylons of the colonnade.

The site of the cemetery coincidentally marks the point of deepest penetration of advance units of von Rundstedt's counter-offensive that became known as the Bulge. The highway which leads to the Memorial is now lined with linden trees, and the colonnade, museum and chapel are surrounded with hawthrone, boxwood and rhododendron. The marble and granite buildings also are set off by larch, yew and weeping willows in cool and pleasant groupings.

The grass of all the cemeteries we saw was an incredible green, closely cropped, and beautifully tended. The headstones sit above a prepared terrace of concrete beams over gravel, arranged to prevent settling and tilting of the markers. Special reservoirs have been built to ensure a constant supply of water for the lawns and plantings through the most severe drought. A small army of local gardners keeps the grounds clean and cared-for, under the direction of at least two American officials from the Battle Monuments Commission.

The Normandy cemetery was the most impressive we saw. It sits atop the sandy cliffs which saw so many Americans die on June 6, 1944, on the beach known as Omaha. The memorial honors 9,386 who died in the landings, the airborne drops, and the first few days of the invasion. Names of 1,557 missing are inscribed on a semicircular wall surrounding the Garden of the Missing.

This cemetery directly overlooks the invasion beaches though most of the debris of the battle 23 years ago is gone now.

In contrast to the newness of Normandy and Henri-Chapelle, the Belleau Wood Cemetery is nearly a half-century old now. It was created after World War I, on the site of the first major American battle of that war. Belleau Wood itself, stormed by U.S. Marines, is a memorial park. The trees still bear the scars of 1917, although the trenches are virtually gone now.

TRANSPORTATION AND ECONOMIC OPPORTUNITY

Mr. JACKSON. Mr. President, the efforts of the Department of Housing and Urban Development to coordinate Federal urban mass transportation programs with the critical social problems of our cities are noteworthy.

In Watts, on Long Island, in St. Louis, and Nashville, Tenn., HUD is using its mass transit demonstration and capital grant programs to effectively bring people to jobs, educational, medical, recreational, and other community facilities.

HUD's mass transit program has been spearheaded by HUD Assistant Secretary Charles Haar. Mr. Haar recently wrote a most timely and interesting article entitled "Transportation and Economic Opportunity" which appeared in the October issue of Traffic Quarterly. I am pleased to call it to the attention of my colleagues, and ask unanimous consent that Mr. Haar's article be printed in the RECORD.

There being no objection, the article was ordered to be printed in the RECORD, as follows:

TRANSPORTATION AND ECONOMIC OPPORTUNITY

(By Charles M. Haar)

(NOTE.—*Mr. Haar, one of the country's eminent authorities on urban growth, has been Assistant Secretary for Metropolitan Development of the new Department of Housing and Urban Development (HUD) since February 1966. Before this appointment, he was a professor of law at Harvard University. He was Chairman of President Johnson's 1964 task force on the preservation of natural beauty and served on the 1965 task force on urban affairs and housing. He was also director of a task force which prepared the 1964 report on the effectiveness of metropolitan planning to the United States Senate Committee on Government Operations, and an adviser on urban problems for President Kennedy. At HUD, in addition to watching over HUD Urban Transportation Administration, Mr. Haar is in charge of the Land and Facilities Development Administration and Programs of Planning Standards and Coordination.*)

"We must open new opportunities to all or people so that everyone, not just a fortunate few, can have access to decent homes and schools, to recreation and culture."

—President LYNDON B. JOHNSON.

For most Americans transportation calls to mind vast distances and evokes images of transcontinental railroads, river steamboats, and wagon trains from our past, and the jet planes and interstate highways of today. Yet anyone who has spent more time in getting to the airport than he has in the air between cities knows that spanning long distances is not the current challenge. And although recently we have begun to come to grips with the unique problems posed by the travel needs within our cities, and have begun to recognize this as *the* transportation problem, our approach more often reflects our technological successes in the past than the social need or the economic reality of the present.

Specifically, transportation in an urban environment cannot be regarded solely in terms of overall capacity of the system to move so many people at some given rate. It is a social institution geared to the needs of an urban society, and not merely an engineering system; hence the effect on the individual components rather than the aggregate scoreboard becomes the critical factor.

In a less developed society, or even in earlier stages of our own history, the problem of "internal improvements," as Henry Clay called it, is important primarily in terms of economic development of a region. In a highly differentiated and diffused urban society, transportation becomes vital to the economic and social welfare of individuals; it determines the nature and variety of opportunities available in jobs, housing, recreation, shopping, and entertainment. The McCone Commission, for example, found that an important factor in the hostility underlying the Watts riot was the sense of isolation due to the inadequate transportation system right spank in the middle of the most motorized city in the United States. The isolation was pervasive, extending even to services intended to benefit the inhabitants of the area: it required a bus ride of two hours to reach the County General Hospital and an hour and forty-five minutes to get to the Youth Employment Training Center.

Paradoxically, therefore, the success of urban transportation itself is one of the sources of the transportation problem confronting us: it creates the very conditions which produce our dependence on transit services. Our cities, never restrained behind walls like their European counterparts, were propelled outwards by the trolley car, the automobile, and the motor truck. The resulting low density and the separation of work, shopping, housing, and entertainment increase our requirements for transportation. Only three percent of our urban population work at home. Less than ten percent walk to work. In signing the 1966 amendment to the Urban Mass Transportation Act, President Johnson wryly noted that he was thankful that he was one of the small part of the population that worked at home—except on Saturdays. Like many machines in the past, the automobile has freed man from one master only to subject him to another, and at times, a more onerous one.

Transportation, therefore, has become a vital lifeline to jobs, education, and public services in American cities. Unfortunately, our present transportation system does not provide adequately for many persons most in need of the services it can perform; it has created a new "minority" in this country of those who cannot drive: the old, the young, the poor, and the handicapped.

Although the system equally fails to serve the retired person whose choice of residence is tightly limited, the working wife whose husband takes the car and thus restricts her range of job opportunities, and the suburban housewife forever taxiing husband and children, the problem is particularly acute for low-income persons in the centers of our cities. In Watts, where little industry is located and only 40 percent of the people drive, a retraining program has to spend most of its time providing transportation to the jobs which its graduates have been able to find in distant parts of the city. One survey showed that 200 women were spending between four and five hours a day traveling between work and home. The present transportation system also works against those industries dependent on unskilled labor, for in the absence of adequate transit services low-income residents of the ghettos cannot reach potential employers: Long Island industrial parks were reporting 5,000 vacancies in unskilled and semiskilled jobs, for example, despite numerous local areas of unemployment, because the plants could be reached only by automobile.

Clearly, other considerations than engineering efficiencies concerned with the mere number of vehicles handled will be necessary in designing and evaluating a transportation system to meet such needs. And these examples are not isolated phenomena. A recent Department of Labor report shows that outside of the South there is a strong trend for business and community organizations to locate in the suburban portion of the metropolitan area. Over half of the valuation of the industrial and mercantile buildings erected from 1954 to 1965 in metropolitan areas was outside the central business districts, and in some cities like Los Angeles, San Francisco, and Boston over 80 percent of the industrial building has been in the suburbs. Professor John Kain has calculated that the suburban share of wholesaling employment in 40 Standard Metropolitan Statistical Areas (SMSAs) grew from 9 percent in 1948 to 31 percent in 1963 and in retailing from 25 percent to 47 percent in the same period.[1]

Most of the poor, on the other hand, are concentrated in the central business district. They cannot afford private transportation to distant places of work. Often public transportation, if it exists, is too expensive (both in time and money), especially for the person out of work and looking for a job. Usually, however, there is no public transportation, because historically it has been designed to funnel people into a core area, not carry them out. Consequently people are forced to use automobiles for cross commuting and reverse commuting, a pattern which is becoming more common and will undoubtedly continue so.

The Department of Housing and Urban Development, through its emphasis on the relation between transportation and land uses, and on the crucial role of transportation as a subcomponent of the urban system, has helped to bring into focus such questions as cross-commuting patterns and the contours of the unmet need for transportation. Several projects are under way to examine the scope of these needs and to explore solutions.

In St. Louis, center city employment declined 73,000 from 1951 to 1964, while employment in surrounding St. Louis County grew by 127,000. Following the typical pattern, median income was lower in the city than the county and unemployment higher. In the section of the city proposed for a model cities project, out of a labor force of 13,000 approximately 2,000 are unemployed and 5,000 seriously underemployed. In one neighborhood over 50 per cent of the families are on public assistance and only 20 percent have automobiles. Recognizing the critical relationship between employment and transportation, HUD has made a grant to improve the mass transit facilities between this area and suburban job opportunities. The first experiment will be a bus line running directly to the McDonnell Aircraft Corporation, the largest employer in the St. Louis area. At the same time Washington University will conduct extensive studies to determine the relationship between transit, employment, and other slum problems.

A similar demonstration bus line, linking Watts to areas of industrial employment, began last July with 600 riders daily and was carrying 2,600 riders daily this June, with the number steadily growing. Significantly, 60 percent of the riders were using it to travel to work, and another eight percent to seek employment.

As in St. Louis, a demonstration program in Nassau and Suffolk counties on Long Island was begun in cooperation with a number of industrial plants concerned with the ability of employees to reach their facilities. A bus line from poverty areas to one industrial park has begun, along with a survey of the transportation needs which will lead to the operational development of specific services. The economic importance of this kind of experiment is demonstrated by the leading role which the Chamber of Commerce played in initiating and developing this project.

These efforts are obviously exploratory. Few would be so rash as to believe that changes and improvements in transportation patterns are the solution to poverty in the United States or to efficient production patterns. But they can help alleviate some unemployment and some hardship—and at a relatively low cost. They are a visible manifestation of public concern and action. Furthermore, the unemployed group is only one of the groups not being served currently by our transit system. The infirm and handicapped is another obvious group which requires special consideration. One experiment in that direction is being tried with a HUD grant in Nashville—with buses connecting seven outlying hospitals and the central business district.

The long-run problem will require something more than ad hoc solutions of individual cases of need for transit services where identified; clearly it will involve developing a system which treats nonautomobile drivers as integral parts of the community to be served. As we develop new technology for urban transportation, we may find ways of making it possible for more people to ride by reducing the demand made on the individual driver. Or we may be able to reduce the cost of public transportation. And as we explore who is not being served, and obtain a better picture of their numbers and locations, other solutions will be suggested. It may be that long-run changes in income levels or in land uses which change transportation requirements will eliminate some of the problems. Or untapped markets may provide that marginal return whereby social interests coincide with economic return. Some solutions, however, will require a change in our cost/benefit frame of reference, so that transportation is regarded as a subelement of the larger system of the development of human beings, with a payoff in enhanced productivity and social status as well as mobility.

About the only thing certain in this situation of flux, therefore, is that efforts will be made to correct the inequalities which now exist. Twenty-five years ago Justice Robert Jackson, recognizing the importance of transportation in creating the opportunities accepted as a part of American life, declared that "A man's mere property status cannot be used to test, qualify or limit his rights to travel freely." It is our job to make that right to travel meaningful by providing transportation facilities available and useful to all our citizens. If transportation becomes responsive to these unmet needs of the community, it will indeed be opening new territories again.

GENERAL MONETARY AND FISCAL POLICIES NOT APPROPRIATE FOR CURRENT INFLATION

Mr. PROXMIRE. Mr. President, recent price statistics indicate that our economy and the American consumer continue to be plagued by rising prices. This is a serious and nagging problem that plagues every free enterprise economy in the non-Communist world. However, it is clear from our experience that general monetary and fiscal policies cannot prevent some inflation without paying the great price of high unemployment or wage and price controls. Dr. Charles L. Schultze, then a professor of economics and presently Director of the Bureau of the Budget, made a classic study, entitled "Recent Inflation in the United States," which was published by the Joint Economic Committee in 1959. Although that was a study of the general rise in prices between 1955 and 1957, I believe that its conclusions contain an important truth in today's context:

> The basic point at issue between the "demand-pull" and "cost-push" theorists relates to the sensitivity of prices and wages to changes in the demand for goods and services. If prices and wages are very sensitive, general monetary and fiscal policy can be designed to achieve full employment and price stability. The elimination of aggregate excess demand will choke off inflation without necessarily involving substantial unemployment. If prices and wages are relatively insensitive to moderate changes in demand, the converse holds true.
>
> In the modern American economy prices and wages are much more sensitive to increases in demand than to decreases. As a consequence, a rapid shift in the composition of demand will lead to a general rise in prices, even without an excessive growth in the overall level of demand or an autonomous upward push of wages. . . .
>
> Since it does not stem primarily from aggregate excess demand, but largely from excess demand in particular sectors of the economy, a slow increase in prices cannot be controlled by general monetary and fiscal policy if full employment is to be maintained. When, as in recent years, prices are rising during a period of growing excess capacity, a further restriction of aggregate demand is more likely to raise costs by reducing productivity than it is to lower costs by reducing wages and profit margins.

When there is creeping inflation but still no general excess demand, our policies need to be selective. On November 17 I made a speech, entitled "Anti-Inflationary Tools: A Constructive Alternative to a Tax Increase," in which I set forth methods that I believe can help in coping with the inflation problem.

---

[1] John Kain, "The Distribution and Movement of Jobs and Industry," in *The Metropolitan Enigma*, James Q. Wilson, ed. 1967.

I ask unanimous consent that a brief summary of recent price developments, in addition to the release by the Department of Labor, be printed at this point in the RECORD.

There being no objection, the news release and summary were ordered to be printed in the RECORD, as follows:

PRICES IN OCTOBER 1967—PRELIMINARY NOVEMBER TRENDS

Prices increased on many products in October, except for farm products and foods, which declined, the United States Labor Department's Bureau of Labor Statistics reported today.

The Consumer Price Index advanced 0.3 percent to 117.5 (1957–59=100), up 2.6 percent from a year ago. The Wholesale Price Index declined 0.1 percent to 106.1 (1957–59=100) because of a continued drop in prices of farm and food products. Industrial commodities averaged 0.3 percent higher, with increases being posted for nearly half of all classes of products.

Preliminary data for November show the Wholesale Price Index unchanged from October. Farm products and foods dropped an additional 0.6 percent, while industrial commodities gained 0.2 percent. Metals and textiles led the advance, although price increases also affected many other commodities. Aside from agricultural products, the only significant price declines were for gasoline, lumber and plywood.

CONSUMER PRODUCTS

Prices rose last month on most consumer products, for an average increase of 0.3 percent.

New car prices went up with introduction of the 1968 models. Retail prices of new cars averaged 2.7 percent higher than a year ago. Manufacturers' prices averaged just 2 percent above a year ago, after allowance for net quality improvements in 1968 models. The balance of the retail price advance was accounted for by smaller dealer discounts and trade-in allowances than offered when 1967 models were introduced, and by higher sales taxes in certain States as well as higher freight charges.

The actual increase in manufacturers' prices averaged $87.54, or 3¾ percent, for the 15 domestic makes of new cars included in the Wholesale Price Index. After careful evaluation of major changes made in the 1968 models, the Bureau of Labor Statistics has concluded that $29.65 of this increase should be attributed to safety improvements, and $11.20 to changes designed to reduce the output of air pollutants. Evaluation of other changes, including those involving former standard equipment made optional at extra cost on some makes this year, resulted in a net negative allowance of $0.70. The net balance of $47.39 represents the quality-adjusted price increase, which averages 2 percent on manufacturers' prices.

Compared with September, when 1967 models were being sold at the usual large discounts at the end of the model year, October retail prices representing a predominance of 1968 models were up by 5.2 percent. The proportion of 1968 models among all new cars sold in October was reduced by the Ford strike, creating market conditions favorable to the sale of all makes of new cars with smaller than usual discounts and trade-in allowances.

Apparel prices continued their strong advance, especially women's and girls' apparel which showed the largest October increase since 1950. Apparel demand this fall has been good, enabling manufacturers to recover higher labor and operating costs and retailers to increase their markups. Retail prices are up by more than 4 percent over the past year, twice the increase at wholesale.

Appliance prices were generally higher on new models introduced in October. Washing machines, dryers, and refrigerators led the list. Color television sets also cost more, and furniture prices continued to climb.

The slide in wholesale prices of farm products and processed foods was accompanied by a less-than-seasonal 0.2 percent reduction in retail food prices. Pork and poultry were cheaper, but beef averaged the same as in September. Apples, grapefruit, and potatoes dropped sharply. While most other fruits and vegetables advanced in price. Milk and cheese increased more than usual for October, and restaurant meal prices continued to climb.

Gasoline prices fell more than 4 percent at wholesale and 1 percent at retail. Both declines were larger than usual for October. Gasoline stocks were reported to be somewhat above normal because of overproduction and shipping bottlenecks. Fuel oil prices increased less than usual in October following their advance earlier this year. Used car prices slipped a little last month, but remained well above a year ago.

CONSUMER SERVICES

Charges for consumer services rose 0.3 percent, about the same as the monthly average increase so far this year. While average charges for medical care and housekeeping services went up 0.5 percent, gas utilities reduced their rates slightly, and public transportation rates remained stable for the first time in several months. The increase for medical care services resulted mostly from higher charges by hospitals, dentists, and general practitioners. A boost in babysitter charges was the major cause of increased housekeeping service expenses.

Rents for houses and apartments rose 0.2 percent, but hotel and motel rates declined seasonally. Mortgage interest rates, residential property taxes and insurance, and home repair costs all rose slightly. Beauty shop charges, bowling fees, and automobile insurance premiums also were raised.

INDUSTRIAL MATERIALS AND EQUIPMENT

Industrial commodities averaged 0.3 percent higher in October as increases were posted for 109 out of 225 product classes, with 82 remaining unchanged and 34 declining. Four-fifths of the advance resulted from the rise in prices of motor vehicles and equipment. Other significant increases, ranging from 1 to 1½ percent, were for industrial chemicals, nonferrous metals, and some types of machinery.

Price advances for industrial chemicals were confined mostly to sulphur products and naphthalene. A 16-percent jump in domestic crude sulphur prices led to a 10-percent rise for sulphuric acid and 4 to 8 percent increases for several other sulphur products. Defense-generated strong demands for naphthalene caused its prices to rise sharply.

Industrial demands for nickel and silver boosted their prices in late September and October. Prices also were raised on a number of copper products, owing to the depletion of inventories and the increased necessity for fabricators to obtain basic copper supplies from secondary and foreign sources because of the continuing domestic copper strike. The upward movement of machinery prices accelerated in October, with especially large hikes for construction and special industry machinery.

Further adjustments in the petroleum supply situation were indicated by a 2½ percent drop in prices of refined products. October wholesale prices of gasoline were down more than 4 percent from a year ago, and residual fuels were off by 10½ percent. Prices of softwood plywood dropped about 9 percent last month, as the supply situation eased. They still were 7 percent above a year ago, however.

Prices of industrial crude materials continue to drift downward from their recent peak in mid-1966, indicating no pressure on supplies, except for a few materials such as nonferrous metals and sulphur. Wholesale prices of crude nonfood materials, except fuel, have dropped nearly 11 percent since July 1966. Crude fuel prices have risen about 5 percent. Over the same 15 months, wholesale prices of all finished products other than consumer foods have increased by an average of 3 percent, while retail prices of nonfood commodities are up by more than 3½ percent.

COST-OF-LIVING ADJUSTMENTS

About 575,000 workers will receive cost-of-living increases as a result of the October Consumer Price Index. For 380,000 electrical workers the increase will be 1 percent, based on the change in the index from a year ago. For 100,000 automobile and automotive parts, aerospace and metalworkers, the rise will be 2 cents an hour and for 75,000 aerospace workers, 3 cents an hour, all based on the change in the index since July. Other workers will receive increases ranging from 1 to 7 cents an hour, based on changes in the index for varying periods from a month to a year.

Crude materials	-------	.2	-------	—2.3	-------	2.8	-------	—3.5	-------	—2.4	-------	—5.5

[1] Based on data unadjusted for seasonal variations.

Note: The price changes shown for consumer products and components are for roughly comparable classes of finished consumer products from the CPI and WPI. A brief description of the classes of items contained in each group is included at the end of this report. Complete listings of inclusions in the CPI and WPI groupings will be furnished on request.

RECENT PRICE DEVELOPMENTS

Mr. PROXMIRE. Mr. President, in October, the consumer price index increased at about the same rate as during the last 6 months. It was up 0.3 percent from September and 2.6 percent from October 1966. From September to October, food prices declined 0.2 percent; but prices in most other categories advanced. Major price increases occurred for new cars, 5.2 percent; and apparel and upkeep, 0.8 percent. Prices of consumer services continued their recent rate of advance. Prices of medical care services increased another half percent and were 8.2 percent above October a year ago. Housekeeping and home maintenance service prices also rose half a percent in 1 month, and were 6.2 percent above their level of October 1966.

The wholesale price index fell 0.1 percent from September to October, and preliminary estimates indicate that it was unchanged from October to November. Preliminary data for November show that prices of farm products continued their steep decline—down 0.6 percent from October and 5.9 percent from November 1966. On the other hand, prices of industrial materials and equipment increased 0.3 percent from September to October. Approximately 80 percent of this advance resulted from increases in prices of motor vehicles and equipment. Prices of rubber and rubber products increased 0.3 percent, and metals and metal products 0.2 percent.

PROBLEMS OF THE ELDERLY

Mr. PELL. Mr. President, the Senate has recently been considering legislation which will have a marked affect upon the elderly in our country. Certainly one cannot think of the poverty program or the Social Security Act without thinking of senior citizens.

The Providence Evening Bulletin recently published two articles dealing with projects which work with our older citizens. I believe that these articles will be of great interest to the Senate. I ask unanimous consent that they be printed in the RECORD.

All too often our senior citizens are viewed as statistics with needs and desires classified as "inputs" and "means" figures. The two articles indicate that there are programs in Rhode Island and I am sure in the rest of the country which address the problems of the elderly with the dignity deserved by human beings.

There being no objection, the articles were ordered to be printed in the RECORD, as follows:

[From the Providence Evening Bulletin, Oct. 20, 1967]

SCHOOLS FOR RETIREMENT STRICTLY SENIOR

(By Harold Kirby)

Dissatisfied but by no means discouraged. That about sums up the attitude of Dr. Mary C. Mulvey toward programs for the aging in this state and elsewhere in the nation. She is supervisor of adult education in Providence but she has a special interest in the elderly, those who have retired or are approaching retirement.

She feels that aging people need training for retirement, that lack of preparation can be disastrous, especially for those who have had their workdays planned for them for many years and are not ready to make decisions for themselves. Unless they can keep themselves busy and useful day after day, they feel lost and unneeded, and this cannot fail to affect their health and shorten their lives.

To help these older people to adjust to retirement, to plan their days, a 10-week course was organized. Classes, financed by the University of Rhode Island Extension Division, meet every Friday from 7 to 9 p.m. at the extension building, Promenade and Gaspee Streets, in downtown Providence. Those over 60 pay nothing but a registration fee of $1, those under 60 pay $15. Books and supplies are free and collateral literature is usually available at public libraries.

At present 30 men and women are enrolled and almost all of them are over 60, many over 65. Instruction is tailored to the needs of individuals and group discussion is encouraged. Thus people of about the same age and with the same general problem—how to use leisure time productively—are brought into close contact. Through group discussion they often find answers and solutions.

Topics are wide-ranging: economic, psychological, the development of social changes and adjustment to them, housing and living arrangements in retirement, finances, especially how to adjust to lowered income, ways to maintain or increase income, budgeting, family relationships, physical and mental health, nutrition, vision, hearing and related health subjects, legal problems, employment, community services and how to get them, leadership roles, to name a few.

There have been to date eight classes. What has actually been accomplished? No definite answer can be given at this time, but results may become apparent after a poll of those enrolled.

Said Dr. Mulvey in a recent bulletin: "We hope . . . to ascertain what positive action they have taken with respect to what we discussed in the course, as well as innovations which they (the enrollees) themselves have devised. Have they taken a part-time job? Have they followed the 'planned day' routine? Have they taken up new interests, new hobbies, or become involved in civic volunteer activities . . . Data should also serve as a valuable tool for measuring the effectiveness of this kind of program, and for a breakthrough toward building a curriculum that works."

To build and administer such a course for more than the relatively few now enrolled will take more than money. It will require the training of professional, technical and lay personnel for administering, planning, organizing and coordinating programs for older people. And such a training program, when approved, will be financed under Title Five of the Older Americans Act.

The United States Office of Education has financed in this region two conferences, one on adult education at the University of Maine last July, conducted by Dr. Mulvey, and one in Exeter, N.H., earlier this year. At the one in Maine the needs of the elderly were discussed in a general way but the one in Exeter was devoted exclusively to the subject of training instructors for older people. At that time, 30 selected adult educators developed plans to initiate, strengthen and expand educational programs for the elderly.

Across the country several instructional programs are now in operation, but none, it appears, has yet been presented for approval by any Rhode Island college or university, although funds to finance it are available.

Concerning the future of such programs, Dr. Mulvey had this to say: "Modern society is so rapidly moving toward the shorter work-week, and workers toward a lower retirement age, that education will have to prepare adults to use their leisure time creatively. . . . The University of Rhode Island Extension Division has met the challenge in some degree. We hope that the continuing effort of the Extension Division in offering the course in preparation for retirement, free-of-charge, will meet the demands."

When Dr. Mulvey went to Maine last July, she was on home grounds, for she was born in Bangor. Interest in education is strong in her family; her husband is Gordon Mulvey, a member of the Providence School Committee. She majored in Latin at the University of Maine and taught that and math at Elmhurst Academy. But it was while she was working for a master's degree at Brown University that she first developed a strong concern for the aging and their problems. She found that little or nothing was being done for those about to retire or in retirement. So she did her master's thesis on "Changes in the Mental Ability and Social Adjustment of People As They Grow Old." She received her doctor's degree in education from Harvard in 1961.

Ultimately she became head of the State Division on Aging, took a leading part in the formation by former Congressman Aime J. Forand of the National Council of Senior Citizens, becoming its first vice president, and is now a member of the board of directors. She is also a fellow in the Gerontological Society, a member of the Technical Review Committee for the Older Americans Act, legislative chairman of the Adult Education Association, and is listed in Who's Who of American Women and Who's Who of American Educators.

Although her educational interests are broad, she has turned her attention more and more toward the elderly and takes particular pride in the work she did for the passage of Medicare and housing for the elderly, and the improvements of Social Security benefits. "After all," she said, "older people, after they retire, must have enough to live on, and the health services they need at a cost they can afford." That is not, she added, the case now.

[From the Providence Evening Bulletin, Nov. 3, 1967]

STRICTLY SENIOR: "IF WASHINGTON REALLY KNEW"

(By Harold Kirby)

"If they close up this place I don't know what I'll do." Speaking was John Fay, 78, of Prospect Hill, Lincoln, who spends many hours each day, five days a week, at the Senior Citizens Center on Commerce Street, Pawtucket.

It is one of the first centers of its kind to be established in this state by the Office of Economic Opportunity and the people who operate it as well as those who drop in daily are worried about the future. Worried because they have been told there is a shortage of money for this and the whole so-called poverty program—a term they dislike.

"If only those people in Washington really knew what this means to me and many more like me, I think they'd give us enough money to keep it up, maybe expand a bit too," said Mr. Fay. He is a bachelor and has lived alone since the death of his brother. An electrician most of his adult life, he had to retire when he was about 60 because of illness. He comes by bus to the center, mingles with his new-found friends, plays cards, reads the newspapers and magazines, keeps busy.

He isn't the only one. Between 30 and 40 men and women—contrary to the general average the men outnumber the women, first three to one, now three to two—visit the center daily. Some remain for hours, seeking companionship, amusement and instruction in arts and crafts; others use the center as a meeting point, drink a cup of coffee and move on to other places.

One indomitable staffer is Mrs. Maude Crabbs. Her maiden name was Stretter, and she comes from a long line of patriots and pioneers, some of whom were companions of Roger Williams. She attended the School of Design, the Pratt Institute in Brooklyn, N.Y. and taught art in schools in New Jersey, Fall River and Providence. She moved on to Toledo, Ohio, where she married Frank Crabbs of that city, and became identified with the Toledo Art Museum. When her husband died, she returned to her family. For the past 11 years Mrs. Crabbs has been demonstrating weaving and spinning at the Old Slater Mill Museum in Pawtucket. She now teaches an arts and crafts class at the center, spending about 10 hours a week there.

Other staff members are Mrs. Marjorie Spellman, Mrs. Rose Tracy, George McCoart and Mrs. Mary Jackson. All are well over 60 and three over 70. They keep the center going under the direction of their executive, Thomas F. Markey, doing the housekeeping, serving coffee, chatting with visitors, making appointments for Mr. Markey when he is absent, handling correspondence and attending to a variety of other duties.

"If we had a few volunteers to help, we could keep the center open Thursday nights, as we used to, and even on Saturdays," said Mr. Markey, who was formerly a civil service social worker with a strong and increasing interest in older people.

Mr. Markey is a native of Taunton, a graduate of Bryant College where he received a degree in business administration, and worked for a number of manufacturers before entering the field of social work. He lives on Maynard Street, Pawtucket, with his wife and 12-year-old daughter.

He is responsible for all activities at the center and spends a good deal of time counselling those who seek his advice, who have domestic or health, or financial problems. When necessary, he refers them to other agencies, public or private, where help is available.

There are other OEO centers in the state, in Riverside and Warwick, for example. Some have "structured" programs, but in Pawtucket, everything is informal, relaxed and low key. There are no fixed rules, either concerning dress or behavior. In spite of this there have been few problems, none of them serious. A few set the standards and soon everybody else conforms.

Although the staff receives compensation for 10 hours each week, all of them work far beyond this limit, some spending twice and even three times the time required. "They are not only good workers; they are dedicated to the older people who, like themselves, need this center," Mr. Markey observed.

The center has been in existence less than a year and occupies rented quarters in Pawtucket's downtown: an office, lavatories, a kitchen and one large gathering room, where all activities are concentrated. This has one disadvantage: it leaves little privacy for such activities as the arts and crafts class. "It isn't easy to conduct such a class when things are going on all around you," and Mrs. Crabbs. She is hopeful that a room adjacent to the center can be rented sometime for activities such as this, but the prospect of getting money enough appears dim this year.

The city provides a share of the expense, usually in services or equipment. For example, a movie projector has been provided by the school department. And occasionally an individual, observing some need, will make a contribution: the television set now used is the unsolicited gift of a business man, who had two in his home and needed only one.

But by and large the center must depend on public funds, federal and local. Everybody there is aware of the precarious position OEO is in at the moment, with some prospect of a substantial cut in federal appropriations, a cut possibly deep enough to curtail services, even put an end to some centers. There will probably be nothing for expansion.

For Mr. Markey and his staff there is one encouraging development: attendance, starting small, has grown steadily. Use of the facilities and counselling at the center continues to expand, and pressure is increasing among older citizens here and elsewhere not only for what they have now but for more space, more programs, more activity. The impact of all this may yet be felt, even as far away as Washington.

RELUCTANCE OF ADMINISTRATION TO AGREE ON A SPENDING CUT PRIOR TO A TAX INCREASE

Mr. WILLIAMS of Delaware. Mr. President, an editorial entitled "Predictions of Catastrophe," published in today's Wall Street Journal, calls attention to the great reluctance of the administration to agree upon any spending cuts prior to a tax increase.

I ask unanimous consent that the editorial be printed in the RECORD.

There being no objection, the editorial was ordered to be printed in the RECORD, as follows:

PREDICTIONS OF CATASTROPHE

Certainly the Administration deserves about a "C" for effort in proposing spending reductions, even though it had to be dragged to the decision by Congressional reluctance to increase taxes. Still, the effort is too small and the tax plan looks no better than it ever did.

Appearing before the House Ways and Means Committee this week, Treasury Secretary Fowler suggested spending cuts equal to a 2% reduction in each Federal agency's payroll plus a 10% reduction in other "controllable" programs. In return, of course, Congress would pass the Administration's proposed 10% tax "surcharge."

The upshot, by Mr. Fowler's reckoning, would be a lowering of spending in the current fiscal year by more than $4 billion. The budget deficit would be "close to the lower end" of the $14 billion to $18 billion range.

Right there is revealed, the feebleness of the Administration's attack. A saving of $4 billion, if achieved, is modest indeed out of administrative-budget expenditures, estimated at over $136 billion. As for the deficit, $14 billion to $18 billion is quite a range, and far too high in any case.

Not that we dispute the urgent need for some kind of fiscal restraint. Without it, the Treasury chief warned of unacceptable risk to the nation's economic and financial structure and the international monetary system—"the higher, crueler and unrepealable tax of inflation, weakened confidence in the dollar, brutally high interest rates and the risk of a return to the old cycle of boom and bust."

Federal Reserve Board Chairman Martin, arguing for the combination of lower spending and higher taxes, was equally grim. He said it was required in order to maintain the value of the dollar. "In the present situation," he added, financial market tensions "can't be tranquilized merely by increasing the supply of money."

All too true. Yet one can't help observe in passing that these gentlemen, now crying doom, represent the same authorities that engineered this degeneration of the nation's financial and economic structure. The Administration by recklessly spiraling spending and deficits. The Federal Reserve by rapidly expanding, as Mr. Martin concedes, the money reserves available to the banking system.

Coming to the substance of their argument, let us consider taxes first. If we were persuaded that a tax boost would have the salutary effects advertised, we would support it—and perhaps more than a 10% surtax.

Unfortunately the grounds for such optimism are scant. Assuming experience is any guide, a tax increase would constitute a disincentive for the Administration to save even $4 billion, or anything at all. It would be more likely to encourage still bigger outlays.

Beyond that possibility, a respectable case can be made for the seemingly paradoxical proposition that raising taxes could intensify rather than curb inflation. Rep. Curtis of Missouri, for one, reasons that the step would simply add to the already considerable cost pressures in the economy and thus aggravate the price inflation. It strikes us as a sensible view.

If a tax increase, then, is less than an ideal antidote for the malady, why can't the Federal Reserve stop inflating the money supply? (One self-entwining rationalization is that it has to go on doing it partly to aid in financing the enormous deficits.)

And why can't the Administration and Congress cut spending by a great deal more than $4 billion? Officials love to talk about "uncontrollable" budget items like interest on the public debt, which they say drastically narrow the options for sizable reductions. The plain fact nonetheless is that the Johnson Administration has initiated a flock of new or expanded programs, many of them wasteful or flops or both, not to mention the carryover of extravagance from previous Administrations. The budget could be cut sharply if anyone had the requisite political courage.

Granted, $4 billion is better than nothing, and the officials' dire predictions are very much to the point. But where were they when all this danger was building up, and why so silent?

DEMAND FROM THE DEFENSE SECTOR CONTINUES TO LEVEL OFF

Mr. PROXMIRE. Mr. President, the latest economic indicators for the defense sector show that in October military prime contract awards were the same as in September. Moreover, the third quarter level was slightly under the second quarter level of 1967 and only about 2.3 percent above the third quarter of 1966. Gross obligations incurred have declined substantially from the second to the third quarter. Prime contracts and gross obligations tend to be leading indicators as far as the impact of the defense sector on the rest of the economy is concerned. These indicators continue to show that the worst of the defense buildup is behind us—at least for the foreseeable future.

Actual net expenditures, which tends to be a lagging indicator of the impact of the defense sector, have continued to rise—although at a much lower rate than in 1966. From the first to the third quarters of 1967, expenditures rose about $850 million. In the previous two quarters the rise was more than $2½ billion.

Mr. President, the crux of the argument for the tax increase is that it is necessary because of the inflationary impact of the war in Vietnam. These statistics show that the Vietnam war is not stimulating the economy.

I ask unanimous consent that the November report of the Department of Defense on selected economic indicators be printed in the RECORD.

There being no objection, the report was ordered to be printed in the RECORD, as follows:

[Department of Defense, Issue No. 6]

SELECTED ECONOMIC INDICATORS

The attached table and chart show selected financial and employment data related to the impact of Defense programs on the economy. The data reflected in the table cover seven major subject areas, beginning with the first quarter of calendar year 1966 and continuing through the latest month for which information is available. The chart covers three areas—obligations, expenditures and contracts—by quarter year. Explanations of the terms used are also attached.

EXPLANATIONS OF THE TERMS USED

I. *Military Prime Contract Award*. A legally binding instrument executed by a military department or Department of Defense Agency (DOD component) to obtain equipment, supplies, research and development, services or construction. Both new instruments and modifications or cancellations of instruments are included; however, modifications of less than $10,000 each are not included.

The series includes awards made by DOD components on behalf of other Federal agencies (e.g., National Aeronautics and Space Administration), and on behalf of foreign governments under both military assistance grant aid and sales arrangements. It also includes orders written by DOD components requesting a non-Defense Federal agency to furnish supplies or services from its stocks (e.g., General Services Administration stores depots), from in-house manufacturing facilities (e.g., Atomic Energy Commission), or from contracts executed by that federal agency.

The series does not include awards paid from post exchange or similar non-appropriated funds, nor does it include contracts for civil functions, such as flood control or river and harbors work performed by the Army Corps of Engineers. Project orders issued to Defense owned-and-operated establishments, such as shipyards and arsenals, are not included, but contracts executed by such establishments are.

The distribution by broad commodity group includes only contracts which are to be performed within the United States or its possessions. Each commodity group includes not only the indicated end item, but also associated components and spare parts, research and development, and maintenance or rebuild work. Electronics and Communications includes only such equipment and supplies as are separately procured by DOD components. Electronics procured by an aircraft prime contractor is reported as Aircraft. Other Hard Goods contains tank-automotive, transportation, production, medical and dental, photographic, materials handling, and miscellaneous equipment and supplies. Soft Goods includes fuels, subsistence, textiles and clothing. All Other contains services (e.g., transportation) and all new contracts or purchase orders of less than $10,000 each. Commodity identification is not available for these small purchases.

Work done outside the United States refers to the location where the work will be physically performed. About 55–60% of this work is awarded to U.S. business firms, but a lesser percentage of the contract dollars in this category directly impacts on the U.S. economy.

II. *Gross Obligations Incurred*. Total amounts recorded in official accounting records of the military departments and Defense Agencies from source documents such as signed contracts or any instrument which legally binds the government to payment of funds. Present coverage extends only to general fund accounts; obligations incurred in revolving funds are excluded. Included, and double-counted, are obligations which are recorded first when an order is placed by one appropriation upon another appropriation, and second when the latter appropriation executes an obligation for material or services with a private supplier. This duplication averages about 8% of gross obligations.

a. *Operations*. The Military Personnel appropriation and Operation and Maintenance appropriation of the Department of Defense.

b. *Procurement*. The Procurement appropriation.

c. *Other*. The RDT&E, Military Construction, Family Housing, Civil Defense, and Military Assistance appropriations.

III. *Gross Unpaid Obligations Outstanding*. Obligations incurred by the Department of Defense for which it has not yet expended funds. Present coverage extends only to general fund accounts; obligations in revolving funds are excluded.

IV. *Net Expenditures*. Gross payments less collections by the military departments and Defense Agencies, including revolving funds and Military Assistance. Payments represent checks issued.

V. *DOD Personal Compensation*. Wages and salaries earned by personnel employed by the Department of Defense. Military compensation represents pay and allowances to active duty personnel; reserve pay and retired pay are excluded. Civilian compensation represents gross pay and includes lump sum payments for final annual leave. Both figures are inclusive of individual contributions to retirement and social insurance funds, but are exclusive of any employer contributions to these funds.

VI. *Outstanding Payments*. Payments to contractors by the military departments and Defense Agencies made before the goods or services contracted for are completed and delivered.

a. *Advance Payments*. Payments to contractors in advance of performance of a contract.

b. *Progress Payments*. Payments to contractors as work progresses on a contract. These payments serve to reimburse the contractor for a major portion of the costs incurred to date.

VII. *Strength*. The number of persons on active duty with the Department of Defense at the end of the period.

a. *Military*. Men and women on continuous or extended active duty. Excludes reserves on temporary active duty for reserve training.

b. *Civilian*. Direct hire personnel.

JUDICIAL REVIEW OF ICC ORDERS

Mr. LAUSCHE. Mr. President, I introduced, on November 22, 1967, by request of the Interstate Commerce Commission, for appropriate reference, S. 2687 to amend section 17 of the Interstate Commerce Act to revise the provisions for judicial review of ICC orders.

The present statutory provisions for judicial review of ICC orders date back over half a century. Since 1913, judicial review of orders of the Commission has been in a district court of three judges, at least one of whom shall be a circuit judge. The decisions of such three-judge courts are reviewable in the Supreme Court by right of appeal.

Judicial review of the orders of all of the other major Federal regulatory agencies—CAB, FPC, FCC, FMC, SEC, NLRB, and FTC—is in the U.S. courts of appeals, with review by the Supreme Court by the discretionary writ of certiorari. Under the provisions of S. 2687, review of ICC orders would be in the same general manner as now provided for orders of these other Federal regulatory agencies.

The Commission has advised that this change in the manner of judicial review of ICC orders is in accordance with the 1962 recommendations of the Administrative Conference of the United States and by the Special Advisory Committee on Interstate Commerce Commission Practices and Procedures—an advisory committee of practitioners established by the Commission.

S. 2687 proposes significant changes in the statutory provisions for judicial review of ICC orders. In order to allow adequate time for the Interstate Commerce Commission bar and other interested persons to evaluate and study these proposed changes, Surface Transportation Subcommittee consideration will be deferred until next year.

I ask unanimous consent that the supporting justification for S. 2687 be printed in the RECORD.

There being no objection, the material was ordered to be printed in the RECORD, as follows:

JUSTIFICATION

(NOTE.—To accompany a draft bill to provide for judicial review of orders of the Interstate Commerce Commission.)

(Revised to reflect stylistic changes in bill as introduced)

Judicial review of orders of the Interstate Commerce Commission is governed presently by 28 U.S. Code 1253, 1336, 1398, 2284, 2321–2325. Briefly, such review is in a district court of three judges, at least one of whom shall be a circuit judge. The decisions of such courts are reviewable in the Supreme Court by appeal, rather than by certiorari.

The draft bill would provide for judicial review in the United States courts of appeals, with review by the Supreme Court by the discretionary writ of certiorari. In so doing, the draft bill would make orders of the Interstate Commerce Commission reviewable in the same general manner as the orders of all other major Federal regulatory agencies, i.e., FPC, CAB, FCC, SEC, FMC, FTC, and NLRB. This change was recommended in 1962 by the Special Advisory Committee on Interstate Commerce Commission Practices and Procedures (an advisory committee on practitioners established by the Commission). It was also recommended in 1962 by the Administrative Conference of the United States.

The present statutory provisions for judicial review of the Commission's orders originated in the Urgent Deficiencies Act of 1913 (38 Stat. 219) which, in abolishing the Commerce Court, transferred its jurisdiction to the district courts. The following year, in the Federal Trade Commission Act of 1914, the Congress designated the Circuit Courts of Appeals to review orders of that agency. Thereafter, as new regulatory agencies were created, Congress usually provided for judicial review of their orders in the Courts of Appeals. At the same time, certain orders of the Federal Communications Commission, Maritime Commission, and the Department of Agriculture were made reviewable under the Urgent Deficiencies Act procedure. The so-called Hobbs Act or Judicial Review Act of 1950, 28 U.S.C. 2341–52 (Supp. II, 1967), transferred review of the orders of these agencies to the courts of appeals, thus leaving only orders of the Interstate Commerce Commission reviewable in the three-judge district courts.

There would be certain advantages in providing for judicial review in the courts of appeals. Those courts are regularly engaged in the review of orders of various Federal agencies, while most district judges rarely do so. The courts of appeals have rules governing judicial review proceedings and, before long, may be applying uniform rules for all of the courts of appeals, promulgated by the Supreme Court under section 2072 of the Judicial Code, 28 U.S.C. 2072 (Supp. II, 1967). In contrast, there are no court rules governing judicial review proceedings in the three-judge courts, with the result that their procedures are on an *ad hoc* basis. Again, the courts of appeals hold their sessions in the larger cities, which simplifies the travel arrangements of out-of-town counsel.

The draft bill is cast as an amendment to section 17 of the Interstate Commerce Act so that the statutory provisions for the review of the Commission's orders will appear in the same statute which gives the Commission authority to make such orders, thus following the general pattern with respect to statutes creating administrative agencies and providing for judicial review of their orders. See, for example, section 1006 of the Federal Aviation Act, 49 U.S.C. 1486; section 5, as amended, of the Federal Trade Commission Act, 15 U.S.C. 45(b)–(j); and section 9, as amended, of the Securities Act of 1933, 15 U.S.C. 77l.

Specifically, the draft bill amends section 17 of the Act by redesignating the present subsections 17(10) through 17(12), 49 U.S.C. 17(10)–(12) as subsections 17(11) through 17(13) respectively and inserting immediately after subsection 17(9) a new subsection 17(10) which sets forth the provisions, more particularly described below, for judicial review of the Commission's orders.

JURISDICTION

Paragraph (a) of the bill generally sets forth the provisions for judicial review of all Commission proceedings arising under subsection 17(9) except reparations and other cases involving the payment of money and orders of the Commission made pursuant to the referral of a question by a district court or the United States Court of Claims. Cases involving the payment of money would still be reviewable in a single-judge district court in accordance with present practices. *United States* v. *Interstate Commerce Commission*, 337 U.S. 426; *Interstate Commerce Commission* v. *Atlantic Coast Line R. Co.*, 383 U.S. 576. Similarly, orders of the Commission made pursuant to a referral of a question or issue by a district court or by the Court of Claims would remain reviewable pursuant to 28 U.S.C. 1336 (b) and (c) and 1398(b), only in the court which referred the question or issue. Cases involving only fines, penalties or civil forfeitures for violations of the Act would also remain in the district courts.

VENUE

The draft bill provides that a petition for review shall be filed in the judicial circuit which is the residence or principal office of any of the parties filing the petition. This is derived from the present venue provision in 28 U.S.C. 1398(a) governing review of orders of the Commission. As pointed out below, if the Commission's orders are made reviewable in the courts of appeals, 28 U.S. Code 2112 will automatically provide a desirable procedure for consolidating into a single court multiple suits in different courts against the same order. It has been held that such a consolidation procedure is not available under existing law in many situations. *New York Central R. Co.* v. *United States*, 200 F. Supp. 944 (S.D. N.Y. 1961).

PETITIONS FOR REVIEW

Paragraph (c) (1) of the draft bill sets out the manner for review of the Commission's orders. First, it provides that a petition for review must be filed within 60 days from the date of service of the order complained of. Under present law, except for the uncertain and rarely applied doctrine of laches, there is no limit upon the time within which judicial review of the Commission's orders must be sought. The 60-day limitation proposed by the draft bill is found in the Hobbs Act and many other modern judicial review provisions. It will be useful in protecting, after a reasonable opportunity for challenge, the security of transactions authorized by the Commission. Second, since this bill does not provide for the proceeding to be brought against the United States as presently required by 28 U.S.C. 2322, any petition for judicial review will be brought automatically against the Commission as the named respondent. The charge brings the Commission into conformity with the present practice of such agencies as SEC, NLRB, FPC, CAB, and FCC in that those agencies are named as the respondents in suits seeking judicial review of their orders. It will reflect the fact that the Commission's attorneys today assume the primary and principal responsibility for the defense of its orders in the courts. The draft bill would also provide that the petition for review must be served upon both the Commission and the Attorney General. Third, this paragraph prescribes the contents of the petition for review in the same way as does the Hobbs Act (28 U.S.C. 2344).

RECORD ON REVIEW

Under existing case, though not statutory, law, a person seeking judicial review of an order of the Commission has the burden of filing with the three-judge court a certified copy of the record of the proceedings before the Commission. *Mississippi Barge Line Co.* v. *United States*, 292 U.S. 282, 286; *Visceglia* v. *United States*, 24 F. Supp. 355, 356. The draft bill provides that the Commission shall file in the office of the clerk of the court of appeals in which the proceeding is pending the record on review, as provided in 28 U.S. Code 2112. Providing for review of the Commission's orders in the courts of appeals would make applicable automatically (i.e., even without specific reference) the provisions of 28 U.S.C. 2112 (and the rules adopted thereunder by the courts of appeals), and would bring about the following changes in procedures for judicial review of the Commission's orders:

(a) It would provide a procedure for the consolidation of multiple suits against a single Commission order. Such suits would be consolidated in the court in which the first suit is filed, although this court, for the sake of convenience, could transfer the proceeding to another court of appeals. This is clearly a desirable procedure.

(b) Upon the commencement of a review proceeding, the Commission would be required to file with the court the original or a certified copy of the record of the proceedings before the Commission, except that the court may permit the filing of a certified list of the contents of the record in lieu of the record itself, a practice now widely followed and expected to be made uniform. Under our present review procedure, the plaintiff bears the burden of filing with the three-judge court a certified copy of the record before the Commission. Although this change may impose some additional burden on the Commission, it will bring its practice into line with present procedures for the review of all other Federal agency orders.

(c) In the first instance, it might be thought that placing upon the Commission the burden of supplying the record will encourage court challenges to Commission orders. However, any such tendency will be offset by the requirements of the courts of appeals for the parties to reproduce, by printing or otherwise, the portions of the Commission record on which they are relying. Under the present three-judge court procedure, reproduction of the record is not required. In the experience of other agencies, most of this reproduction cost falls upon the private appellants.

The record filing and reproduction requirements of the various courts of appeals are about to be standardized in a uniform rule which is well on its way to promulgation by the Supreme Court. This uniform rule will permit reproduction of briefs and records by "any duplicating or copying process capable of producing a clear black image on white paper."

PETITIONS TO REVIEW—PROCEEDINGS

Paragraph (d) provides that the proceedings in the court of appeals shall be based upon the record made in the proceedings before the Commission. It would further provide (as does the Hobbs Act and other judicial review statutes) that the court may require the Commission to receive additional evidence where it is shown that there were reasonable grounds for failure to aduce it earlier.

REPRESENTATION: INTERVENTION

Because the bill does not provide, as does the present 28 U.S.C. 2322, that such proceedings shall be brought against the United States, it follows automatically that petitions to review must name the Commission as respondent. The United States would not be a party, but the bill would provide that "the United States, through the Attorney General, shall be entitled to intervene in any proceeding." The Commission and other parties may be represented by their own counsel. The provision for intervention is taken from 28 U.S.C. 2323.

JURISDICTION OF PROCEEDING

Paragraph (c) (ii) of the draft bill would clarify and define the Commission's power under Section 15(2) in Part I of the Interstate Commerce Act and comparable provisions in Parts II, III, and IV of the Act to modify an order which is attacked by a petition to review. Some doubt was created as to the propriety of such an assertion of power in *Atchison, Topeka & Santa Fe Ry. Co.* v. *United States*, 231 F. Supp. 422, 426 (N.D. Ill. 1964); however, the exercise of such power was approved in *Alamo Express, Inc.* v. *United States*, 239 F. Supp. 694 (W.D. Texas 1965). The bill would provide that the filing of a petition for review shall not cut off the Commission's power to modify its order, but that the filing of the record with the court of appeals will terminate such power (except, of course with leave of the court). In brief, the Commission would have a reasonable but not unlimited opportunity to correct its own errors.

STAYS: INTERLOCUTORY INJUNCTIONS

Paragraph (f) deals with this subject substantially as does existing law in 28 U.S.C. 2284. The only change is that a stay or temporary restraining order could be issued only by the court, and not be a single judge as permitted by 28 U.S.C. 2284.

REVIEW IN THE SUPREME COURT

Under the present law, 28 U.S.C. 1253, a decision of a three-judge district court is subject to a right of direct appeal to the Supreme Court. This is a so-called appeal as of right, in the sense that the Supreme Court does not purport to exercise a discretion as to whether or not to review the case on its merits. Instead, if the Supreme Court does not set the case for briefing and argument (i.e., plenary considerations), it will issue an order summarily affirming (or, more rarely, reversing) the decision of the lower court. In most of the appeals from the three-judge courts, the Supreme Court issues a brief order, reading as follows: "The motions to affirm are granted and the judgment is affirmed." Thus, whether cases come to the Supreme Court by appeal or by the discretionary writ of certiorari, the Court selects the cases which it considers to warrant full briefing and oral argument.

Paragraph (g) of the proposed bill would provide for Supreme Court review by certiorari, rather than by appeal. This conforms to the method of seeking Supreme Court review which is applicable to all other Federal agencies. It can hardly be contended that *all* matters arising under the Interstate Commerce Act are so much more important than power, labor communications, etc., problems as to warrant a preferred status as to review in the Supreme Court. It must be assumed that the Court can and will identify the cases which warrant plenary consideration by that Court.

Paragraph (g) would also preserve the Commission's present right to seek review in the Supreme Court with or without the concurrence of the Department of Justice by stating that, "The United States or the Commission or an aggrieved party may file such petition for a writ of certiorari."

Paragraph (h) of the draft bill preserves the second paragraph of 2321 of the Judicial Code, 28 U.S.C. 2321, the balance of which is repealed by section 2 of the draft bill. The section provides for nationwide service of process for orders and writs issued by the courts of appeals in cases arising under section 1 of the draft bill and proceedings arising in the district courts under sections 20 and 23 of the Act and section 3 of the Elkins Act, 49 U.S.C. 43, all of which deal with the enforcement of various accounting, reporting and tariff requirements of the Act and, the rights of shippers to nondiscriminatory treatment by the carriers.

This provision is an exception to the general rule that a court's process does not run outside the State in which it is located, in the case of the district courts, or the circuit, in the case of the courts of appeals. Its retention is believed desirable because of the widespread operations of the nation's carriers.

Section 2 of this bill repeals sections 2321–2325 of the Judicial Code, 28 U.S.C. 2321–25, which set out the present procedure for review of the Commission's orders in the district courts. With the exception of the second paragraph of section 2321, which is preserved as paragraph (h) of this bill, all of these sections of the Judicial Code would be superseded by the provisions of section 1 of this bill and thus be rendered obsolete unless repealed. No change is required in other sections of the Judicial Code, e.g., sections 1336 and 1398 which also deal with the review and enforcement of the Commission's orders since they will still be applicable to cases involving reparations, fines, penalties, and forfeitures which are not transferred to the courts of appeals by this bill. In order to insure an orderly transition from the present mode of review in the district courts to the courts of appeals, this bill provides for a 60-day transitional period and that cases pending in the district courts on the effective date of this Act will be processed to conclusion in such courts with the right of direct appeal to the Supreme Court as under the present law.

OPERATION HOSPITALITY

Mr. SPARKMAN. Mr. President, as the Chirstmas season approaches, my attention has been called to a program called Operation Hospitality.

The purpose of this program is to urge American families to extend hospitality, especially during seasons such as Christmas, to servicemen and servicewomen who may be quartered in their neighborhoods. I endorse Operation Hospitality.

It seems to me that all of us, regardless of differences of opinion on the conduct of the war, would wish to express our appreciation to these men and women.

HOUSE PASSES TRUTH-IN-LENDING BILL

Mr. PROXMIRE. Mr. President, last Tuesday the House Committee on Banking and Currency reported an effective truth-in-lending bill, which in many ways is an improvement on the Senate bill passed last July. Representative Leonor Sullivan, of Missouri, is to be congratulated for leading the fight for an effective bill. The most controversial issue before the Senate Banking Committee and the House Banking Committee was the issue of revolving credit. The original version of the truth-in-lending bill, which I introduced on January 11, required all forms of credit, including revolving credit, to disclose the annual rate of finance charge to consumers. The application of this provision to the revolving credit plans of department stores was met with considerable opposition. As it turned out, neither the Senate Banking Committee nor the House Banking Committee had the votes to require revolving credit plans to disclose the annual percentage rate. Instead, such plans would disclose the monthly rate of interest. For example, department stores charging a 1½ percent a month service charge would not be required to disclose to the consumer that this amounts to 18 percent a year.

Although revolving credit comprises only 5 percent of all consumer credit, it is a rapidly growing form of credit, and the projections indicate it will constitute a much larger percentage of consumer credit in the years ahead.

I am hopeful that Mrs. Sullivan will be successful in leading a fight on the floor of the House to require revolving credit plans to disclose the annual percentage rate. I see no valid reason why other creditors, including banks, consumers finance companies, smaller appliance dealers, credit unions, and others, are required to disclose an annual rate of interest while the large department stores are permitted to disclose a monthly rate. Should the House be unsuccessful in closing the revolving credit loophole, I intend to introduce legislation to accomplish this at the first opportunity.

Mr. President, I was delighted to see the New York Times support this position in an editorial published yesterday. The Times also concludes that consumers, and particularly low-income, ill-educated consumers, are entitled to know what they are paying on revolving credit plans. Mr. President, I ask unanimous consent that the Times editorial be printed in the Record.

There being no objection, the editorial was ordered to be printed in the Record, as follows:

[From the New York Times, Nov. 30, 1967]

. . . And His Money

The House Banking and Currency Committee has meanwhile taken action upon two bills already approved by the Senate which affect, one directly and the other indirectly, how consumers manage their money.

The truth-in-lending bill would require stores, banks and loan companies to state the true interest which they charge on an annual basis—not a monthly or quarterly rate—and in actual dollars. Many installment plans would be covered, enabling consumers to realize for the first time that "easy payment" often involves an annual interest charge of 30 per cent or higher.

By a close vote, however, the committee sustained the decision of the Senate to exempt retail stores that offer "revolving credit," by which a customer can make new purchases while paying off on old ones. Stores argue that it is misleading to state the monthly charge, usually 1.5 per cent, at the annual rate of 18 per cent, since most customers pay off their obligations in less than a year. But the fact remains that customers, particularly low-income, ill-educated customers, are entitled to know what they are paying. Representative Leonor K. Sullivan, Missouri Democrat, is right to press her fight on the floor for full disclosure.

The full Banking Committee improved the feeble measure to regulate holding companies in the savings and loan field which had been concocted in subcommittee. But even in its improved form the bill is not as good as the Senate bill. There is no good reason to weaken the authority of the Home Loan Bank Board to regulate a holding company's debt, short term as well as long term. The whole purpose of the bill is to prevent financial manipulators from excessive risk-taking.

The Senate bill also conferred authority on the board simply to approve or disapprove the acquisition of a savings and loan association by a holding company. The House bill hobbles this regulatory power by requiring the board to find that the acquisition would damage the association or jeopardize the insurance fund that protects deposits.

Small savers and the legitimate savings and loan industry itself have nothing to fear from a vigorous and alert board endowed with ample power to take preventive action early. The House should strengthen its bill, not heed the lobbyists for the wheeler-dealers.

PEACE FOR CYPRUS—A JOHNSON SUCCESS

Mr. HARRIS. Mr. President, when President Johnson dispatched special envoy Cyrus Vance to mediate the Cyprus dispute between Turkey and Greece a few days ago, talk of war was in the air, and tensions were strong.

A few days later, peace and reason seem to have been preserved through the perseverance of Mr. Vance and the President and other helpful parties.

This is a remarkable demonstration of America's passion for peace in the Near East and in other areas of the world.

Turkey and Greece are our allies. They are old and valued friends. And it was as much in our interest as theirs that the Cyprus situation be resolved in a friendly manner.

The successful mediation efforts of the United States in the Greek-Turkish dispute again illustrate what President Johnson has been saying for months—he will go anywhere at any time and meet in any place in the cause of peace.

He has said that about Vietnam. He has said it about the Middle East. He has said it about Cyprus. And the results of our mediation are a fitting tribute to our President.

The new spirit of cooperation between Greece and Turkey strengthens good relations in the area. It strengthens NATO. And it strengthens the bonds between two nations which have stood with us in war and peace.

I salute Greece and Turkey for having acted reasonably in this crisis. I salute Cyrus Vance for his extraordinary efforts. I salute the President who has shown us that he means business when he talks about free men sitting down to reason together.

BIG THICKET MAKES NEW FRIENDS IN CHICAGO TRIBUNE

Mr. YARBOROUGH. Mr. President, the plight of the disappearing Big Thicket has attracted attention from all over the country. On November 5, 1967, the Chicago Tribune published an article about the Thicket, entitled "Forest Maze: That's Big Thicket in Texas," written by Henry N. Ferguson. Describing the natural attributes of this area, "one of the most unique collections of flora and fauna to be found anywhere in the world," the article gives an excellent rundown of the early history and the current history-making forces of the Big Thicket. Mr. Ferguson points out that the area is facing gradual extinction, and recommends the passage of the Big Thicket National Park bill, S. 4, which I introduced in the first days of this session, for the preservation of the Thicket.

This spreading concern for the Big Thicket has resulted in increasing numbers of letters and expressions of concern from all over the country, as Americans everywhere are becoming concerned over the possible loss of this area of unparalleled natural opportunities for our native flora and fauna, and unique natural growth. It has come home to the people of this Nation that the loss of 10 centuries, occasioned by the cutting down of one thousand-year-old tree, cannot be regained, and that the tree, and the time, cannot be replaced.

Mr. President, I ask unanimous consent that the article be printed in the Record.

There being no objection, the article war ordered to be printed in the Record, as follows:

Forest Maze: That's Big Thicket in Texas

(By Henry N. Ferguson)

Saratoga, Tex.—Early pioneers, pushing into Texas from southern Louisiana, found their way blocked by an impenetrable jungle just north of what would later become the city of Beaumont. As the state became settled, this huge forest maze of more than 2,000 square miles was divided into Liberty, Polk, Tyler, and Hardin counties, and spilled over into five other counties. The area came to be recognized as one of the most unique collections of flora and fauna to be found anywhere in the world.

Within the confines of this wilderness retreat have been found more than two thousand classified trees, plants and shrubs such as oaks, gum, magnolia, beach, maple, cypres and dogwood. Underfoot is a colorful carpet of ferns, rhododendrons, orchids, wintergreen and scented myrtle. Hollies reach a perfection here seldom found elsewhere. Bear and deer are plentiful, along with wolves, bobcats, armadillo, rabbits, and squirrels, as well as a vast natural aviary of exotic birds.

As settlers pushed into the region they quickly learned that it received some 50 inches of rainfall a year, a fact responsible for the creation of great swamps as well as a fantastic growth of large and small vegetation so dense that the sprawling area became known as the Big Thicket.

Today, life in the thicket is patterned after the easy, casual custom of the rural deep south. It is a land of hound dogs and tireless hunters, of blackeyed peas and hog jowl. A visitor invited to dinner will find set before him such native delicacies as grits soaked in fresh butter, hot biscuits daubed with tangy mayhaw jelly, and homemade sausage and slow-cured country ham with a flavor to please the gourmet.

Scattered along dim trails that crisscross the swamps and meander thru heavy stands of timber are rustic dwellings, ancient and graying, blending into the shade of magnolia and chinaberry trees. The yards are likely to be hard-packed from decades of use, and devoid of grass. A dilapidated privy covered with vines sits a short distance from the house and an iron wash kettle rests upside-down on the ground. A pack of lean hound dogs take their ease in the shade of a tree at the edge of the clearing. The trash dump in a gully back of the house is cluttered with rusty tin cans, bits of old furniture, and time-browned bottles of Grove's chill tonic, Baby Percy medicine, and Crisper's hot shot nerve sedative.

To most, the big thicket is a fearsome and mystical region, a spawner of tall tales and awesome legends. A strange breed of people live in these woods. Mostly, their ancestors came from Tennessee, Kentucky and the Carolinas, all driven by the compulsion to escape the crowded conditions of their own primitive land, to outwit the tax collector, and to rid themselves of persistent revenuers. These isolated Americans do not take kindly to outsiders, and strangers may only be trespassers from the adjoining county. For more than a century they have lived off the land, hunting, fishing, trapping—and minding their own business.

The town of Saratoga is the capital of the big thicket. It was a health resort in the last half of the nineteenth century; it was also in the center of one of Texas' earliest oil fields. In fact, what is thought to be the oldest existing oil well in the United States is in the Saratoga field. It was driven down by mule power in 1865. Ingenious natives used to hang kegs of raw whisky at night on the crossbeams of pumping oil wells to bring about a quick aging of the local white lightning.

The last tribe of Texas Indians, the Alabama-Cushatta, live on a reservation at the edge of the big thicket. Once all this vast region was their hunting ground, used by them and other tribes who have long since been dispossessed.

The thicket has always provided a utopian refuge for outlaws. The jungle makes tracking an impossible chore, the close-mouthed natives feel no affinity for the law, and an abundance of game, water, and whisky makes the life of an outcast very pleasant indeed. During the Civil war a group of conscientious objectors to military service made their way here and were burned out by the army. To this day this area is called the Keyser burnout.

In the big thicket only the very foolish venture even a short distance off a highway, for fear of getting lost. Visitors to the area are cautioned against wandering into the woods, and even the natives are hesitant to travel in the thicket without a guide.

This wilderness world of towering subtropical forests and palmetto swamps provides a hiker the opportunity to turn back the clock thousands of years. Night hiking, however, is not recommended. For after dark the region comes alive with a blood-chilling cacophony of sound. As the sun goes down the barred owl begins hooting. Herons squawk, and giant bullfrogs boom out. Far out across the swamp a panther screams.

During the day one may jump a swamp rabbit and watch it bound away thru the water. Poisonous water moccasins thrive in the area and the shy, but deadly, coral snake may be seen trying to burrow out of sight. An alligator hisses as you come too close to her young. It's a common sight to see a mother 'possum making her way along a forest trail with a platoon of youngsters riding piggyback. In the cool of the evening armadillos industriously bulldoze aside leaves and soft earth to uncover insects and worms. A look into the shadows may reveal an entire family of coons feeding along the shore of a lake, their tiny paws darting as they pull in crayfish and minnows from the water's edge. A rare sight is the ivory billed woodpecker, making a last stand in the thicket.

A good guide will be able to show the visitor some wonderful sights in this wilderness island. Among them, the ghost gardens, the "silver-bullet mine," the ancient tar pits, Boykin springs, the mysterious rock-wall. And a traveler may see how nature has undertaken the task of wiping out such man-made eyesores as old-time saw mills which once did so much to spoil the beauty of this natural wonderland.

Travelers motoring west on Interstate 90 may take a quick circle tour of part of the thicket by turning north at Beaumont and driving up to Kountze on U.S. 69, then veering west and south thru Saratoga, Batson, Hull, and Daisetta, to rejoin I–90 to Houston. Information may be obtained at any of these towns concerning the more primitive areas and where suitable guides may be secured.

For some years the big thicket has faced gradual extinction because of commercial activities in the area. As a result, the Big Thicket association, a small but articulate group of dedicated conservationists, has been waging a desperate fight to save this unique region, or at least a part of it, for future generations to enjoy. Their efforts may be on the verge of success. United States Senator Ralph Yarborough recommended recently that this area be made into a national park. This could prove to be an ideal solution to the problem of preserving what is probably the world's greatest link between its primordial past and the space age. Once gone, this great treasure house of nature could never be rejuvenated.

THINGS ARE HAPPENING TO GLASS

Mr. BYRD of West Virginia. Mr. President, an old adage says that people who live in glass houses should not throw stones. But science is making such strides that perhaps one day soon people may actually live in glass houses—and be able to throw anything they want to without damaging the structure. Already school windows smashed by hoodlums are being replaced by a tough new glass that is virtually impervious to anything that can be thrown at it. A great saving to the taxpayers who must pay for such vandalism will thus be brought about.

These remarks, Mr. President, are made to call attention to interesting article entitled "Look What's Happening to Glass," published in the Reader's Digest for December, an article that I found informative and stimulating, especially in view of the importance of the glass industry in my State of West Virginia. The versatile material that we call glass is filling an ever-widening variety of needs and uses.

Glass windshields that balloon outward when struck are saving lives in automobile accidents. Fiber-optic bundles permit doctors to examine organs inside the human body without surgery. Light, cheap throwaway bottles, newly perfected, are making it possible for glassmakers to compete again with metal cans. And glass under water vehicles far stronger than steel may soon provide a new means for exploring the ocean depths.

Glass, once thought of as fragile, Mr. President, can now be made so tough that it is used for the nose cones of missiles. In space, as on earth, the usefulness of glass appears almost limitless.

I ask unanimous consent that the article be printed in the RECORD.

There being no objection, the article was ordered to be printed in the RECORD, as follows:

[From the Reader's Digest, November 1967]

LOOK WHAT'S HAPPENING TO GLASS!

(By Raymond Brady)

One day soon, a vandal in New York City may get the surprise of his life. He is going to throw a rock at a school window. This time, however, the rock will likely bounce off the glass harmlessly. The reason? New York school officials have a "new weapon"—glass that is five times stronger than ordinary window glass.

Now being installed in the city's new schools and to replace broken windows, this glass will cost about three times as much as ordinary glass, but will ultimately save the city a substantial part of the $1 million a year that is now spent to replace broken windows. Manufacturers claim it will reduce breakage by at least 75 percent.

Most of us think of glass only as the transparent, fragile material we've been familiar with in our windows, bottles and tumblers. But it is now appearing in many new forms. There is glass which is six times harder than steel. There is glass cloth as soft as silk. Glass that bends is used in the rear windows of some convertibles. "Thirsty" glass in transistors soaks up the tiniest trace of moisture that would short-circuit delicate mechanisms in our guided missiles. "Man has been making glass for 4500 years," says Amory Houghton, Jr., chairman of the Corning Glass Works. "But we have only begun to recognize its infinite variety and fundamental usefulness."

The new look in glass is part of the industry's do-or-die effort to keep up with competing developments in other fields. In the 1950's, the increasing use of throwaway cans and paper containers for beer, soft drinks and milk began to cut sharply into the market for glass. The trend toward practically windowless office buildings (to lessen maintenance and air-conditioning costs) cut it still further. Worried glass manufacturers began to study their product for possible technological improvement.

Nobody has ever produced anything else quite like glass. Mix lime, soda and sand, heat them, and you have a primitive form of it. The process is so simple, and the elements are so plentiful, that if the earth ever is consumed by fire it will end up as one huge ball of glass.

But under a microscope, this simple material is a maverick. Unlike most substances, glass has no orderly structural pattern: its molecules are arranged at random. This structural peculiarity makes it possible to drop other particles in among the glass molecules to change its whole nature.

At the turn of the century, American families used to collect "dessert glass"—old bottles and pieces of glass that had turned a rich purple from long exposure to the sun. Remembering the maverick glass molecules, scientists attempted to duplicate the action of the sun, with chemicals. They came up with photosensitive glass that will take on a picture of even the most intricate image or pattern. This glass can be utilized in a printing process.

A close relative is photochromic glass, which in sunlight turns dark, but in darkness returns to its normal clearness. Up to now the only consumer items made from photochromic glass have been sunglasses, because scientists have been unable to make thicker, darker glass clear up in less than a matter of hours. But once they find a way to speed up the process, the glass will start doing all sorts of new jobs. Windows, for example, can be made to act like automatic shades, darkening or lightening with the changes in the day. And automobiles that have bubble tops will comfortably shade passengers on even the brightest days.

One of the strangest of the new glasses was developed by accident. A scientist left a piece of photosensitive glass in an overheated oven. As he gingerly lifted it out, the glass slipped from his tongs and fell to the floor. Instead of breaking, it bounced! The intense heat had turned it into a tough glass ceramic, which today flies as the nose cones of missiles because it is able to stand the intense heat of re-entry into the atmosphere. Inside the missile, glass circuit boards hold the components for the intricate guidance system. They can be made as small as a thumbtack; yet they can also stand tremendous amounts of shock and heat.

Research into other uses for tough glass suggests that in the future we may live in glass houses. Contractors already have started to use it as a siding for small buildings. It never has to be painted; the color is baked right in, and a driving rain washes it bright as new.

Another variety of glass is making cars safer. Accident studies showed that the most serious injuries from windshields came not when the victim's head hit, but when the head snapped back through the jagged edges of broken glass. This was true even with laminated safety glass. Making the windshield of hard, unbreakable glass would be no improvement. After extensive cooperative work, the glass companies provided an answer: laminated glass and plastic, thicker and more adhesive than ordinary safety glass, yet just as clear.

Recently, I watched as engineers dropped a five-pound ball onto one of these new laminated windshields from 20 feet. When the ball hit, the glass smashed, but instead of flying apart it ballooned out like bubble gum, with most of the broken glass sticking to the plastic. Windshields of this glass are now standard on all new U.S. cars, and in a study of 200 accidents only one person was found to have gone through it.

In medicine, thousands of lives may be saved by a glass that looks like a long, flexible strand of spaghetti. This is the fiber-optic bundle. It consists of hundreds of thousands of hair-thin glass fibers, each of which transmits light *along its length*. Look into one end and you see out the other, even if this magical glass cord is tied in a loose knot and the other end is around a corner!

In the past, doctors have been able to examine a heart valve only through delicate, open-heart surgery. Now, in experiments on animals, they're inserting a fiber-optic catheter through a vein or artery, right into the heart. Magnifying lenses can be used with the optic, or a photograph can be taken through it. Doctors are already using the optic to diagnose gastric disorders, easing it down patients' throats to examine the stomach walls.

In an effort to recapture markets it had lost, the glass industry tried desperately to make a bottle that was as strong as ever, yet light and cheap enough to be thrown away after use. Research showed that, although glass is inherently strong, the smallest nick or weakness anywhere substantially reduces the strength of the whole. Experiments indicated that the part of a bottle most susceptible to damage is its sidewall. So now glass companies are making one-way bottles that are a marvel of engineering. They are lighter and cheaper than ever, but their bulging shoulders and heels reduce the chance of impact on the sidewall. Meanwhile, the industry has developed a chemical coating which helps prevent those tiny nicks and surface cracks that weaken glass.

To counteract the trend toward windowless buildings, manufacturers have added metallic oxides to window glass. The glass then reflects sun and heat, thus cuts down on air-conditioning bills. Coloring agents have also been added, causing the windows to glow with a beautiful, metallic sheen.

Glass is expected to play one of its most dramatic roles in the coming search for mineral wealth on the ocean floor. For glass has a quality known as "depth hardening." Whereas metal plate must be made thicker to bear the pressure of 4500 pounds per square inch that exists at a depth of 10,000 feet, the same force pushing on glass *adds* to its strength. This is because glass breaks only under tension—when its molecules are torn apart.

Under water, subject to equal compression from all sides, the molecules of a glass sphere are pushed tighter together, actually strengthening the sphere. In testing this, the Navy set off an explosive charge near a ten-inch hollow ball of half-inch-thick glass 20,000 feet beneath the sea. The charge rocked the waiting ship above, but when the ball was brought to the surface there was not a mark on it.

Now at China Lake, Calif., the Navy is building a globe-shaped glass vehicle for underwater use. It will open up like a clamshell, to let two passengers in and out. Researchers hope to travel to a depth of three miles in these vessels. They will have far greater visibility than travelers in metal submarines; yet they can feel safe, knowing that their transparent walls are not "fragile as glass" but harder than steel.

ADOPTION OF CONVENTION ON POLITICAL RIGHTS OF WOMEN WILL CONTRIBUTE TO EFFECTIVENESS OF UNITED NATIONS

Mr. PROXMIRE. Mr. President, our country has a tradition of concern for the dignity of mankind.

If we refer back to the day of independence and its pronouncement of those "certain inalienable rights," it is obvious that this Nation has been in the forefront of the battle for the protection of human rights under the rule of law.

The question, then, is: Why do we stall and ignore these same human rights on the international scale? It was on July 22, 1963, that President John Fitzgerald Kennedy transmitted to the Senate the Convention on the Political Rights of Women for its advice and consent.

The provisions of article I, the right of women to vote on equal terms with men, reflects the principle established by the 19th amendment to our Constitution which provides:

> The right of citizens of the United States to vote shall not be denied or abridged by the United States or by any State on account of sex.

Furthermore, articles II and III set up the eligibility of women to be elected and to be appointed to public office established by "national law." All these articles concur with the principles of our Constitution.

The ratification of the Convention on the Political Rights of Women will be consistent with our Federal Constitution and will not alter the existing balance between the Federal and State governments and most certainly will contribute to the effectiveness of the United Nations.

Some detractors might state that the ratification of this treaty is therefore unnecessary. The fact remains, however, that in many sections of our world women do not share similar rights.

Through the U.N. we have a responsibility for the rights of citizens in other nations of the world.

The United States has been the world leader in the battle for political rights for approximately two centuries. There is no conflict between the Federal and State governments, yet the ratification of this agreement is not approved by the Senate.

If we fail to ratify this convention, we shall be moving further along a sad road of abdication of leadership in the area of international human rights.

PRESIDENT DE GAULLE DESERVES OUR CONTEMPT: FRANCE SHOULD HONOR ITS WAR DEBTS BY PAYMENT TO US

Mr. YOUNG of Ohio. Mr. President, evidently Charles de Gaulle envisions himself as Napoleon IV. He has delusions of grandeur. His fulminations during his latest so-called press conference were incredible and virtually unbelievable for the Chief of State of a great nation. The only thing he accomplished was a further devaluation of his prestige and credibility and the display of the near bankruptcy of French foreign policy. As President of France he is a disgrace to France, a nation with a great history and noble tradition.

De Gaulle's efforts to undermine the dollar are futile. The dollar will remain strong with or without gold convertibility. Many of his own countrymen and leading newspapers in France have protested the outrageous conduct of President de Gaulle and his distortions of reality. It is unfortunate that the French Chief of State has created an artificial rift between France and the United States which for centuries have been allies and friends.

We Americans throughout our history have not forgotten our debt to France for her assistance during our War for Independence. Millions of young Americans in two World Wars fought and many, many thousands were killed in combat fighting to preserve the independence of France and the liberties of its people. More than 60,000 of our countrymen never returned and will remain in French soil forever. That sacred soil will be forever American because of our heroic dead buried there.

Mr. President, France still owes the United States nearly $7 billion in unpaid World War I debts. The interest mounts each year. In addition, we have given France almost $10 billion of taxpayers' money in foreign aid since the end of World War II. Instead of concerning himself about the soundness of the U.S. dollar and futilely trying to bring about a devaluation of U.S. currency, De Gaulle would do well to think of repaying to us this enormous debt which should have been repaid years ago. Of course, he can never replace the priceless lives of the hundreds of thousands of young Americans who were killed in combat or died of wounds received in rescuing France from defeat and disaster.

De Gaulle's statements on French responsibility for the "liberation" of Quebec and his assertion that Israel must bear the entire responsibility for the Mideast crisis were not only shocking but wildly irresponsible. The French President's ranting on these subjects suggests either a particularly bizarre sense of humor or a total isolation from current realities. They contributed nothing to world peace. They added to world turmoil and tension.

Mr. President, it has been suggested that consideration be given to banning French imports, American travel to France, and American investments in French industry during such time as the French leader continues to evidence his personal hostility toward the United States and all American citizens. Perhaps this is unrealistic. However, there is no reason why our Government officials should continue to treat De Gaulle with kid gloves, with generosity or with respect.

Mr. President, the world is constantly changing, but Charles de Gaulle's ideas remain fixed. He has succeeded in doing nothing more than further demonstrating the devaluation of the French nation as a constructive force in the world.

ROBERT S. McNAMARA—A NATION'S DEBT TO A REMARKABLE CITIZEN

Mr. HART. Mr. President, it will be many years before we can appreciate fully the extraordinary contribution of Robert Strange McNamara to our country and to the world. Yet I would like to put on the RECORD my own judgment of what we—and the world—owe to this remarkable American.

All of us know that Robert McNamara turned his back on a sizable personal fortune in order to serve his country. He had been president of the Ford Motor Corp. for only a few short months when President John F. Kennedy asked him to come to Washington. So it was precisely at the moment in his career when he could have begun to reap great material rewards from his business success that he entered public life.

How many, confronted with the same alternatives, would have responded so decisively and so generously to the call of duty.

He has been our Secretary of Defense for nearly 7 years. In that time, he has revolutionized our Defense Establishment. He has done more, in my opinion, to assure the soundness of our national defense than any other single man in American history.

Any brilliant, strong-minded manager invokes criticism—and McNamara has had his share.

But the recent spate of speculative stories on a rift between the Secretary and President Johnson is wholly gratuitous.

There is no rift; there are no differences. After seven hard and worthwhile years at the Pentagon, Secretary McNamara is going to direct his ability to the area of economic and social development.

To appreciate the magnitude of his achievement in 7 years at the Pentagon, one must look back to the condition of our Defense Establishment before McNamara took office.

I am sure many of us can still vividly recall the endless series of newspaper columns, magazine articles, and scholarly analyses which alleged that the principle of civilian control of the military was in dire jeopardy; that the Department of Defense was too big for one man to run; that no future Secretary of Defense could ever hope to master the situation.

If Robert Strange McNamara had done no more than disprove this alarming thesis, the country would be eternally indebted to him. But he did far more: He not only managed our Defense Establishment; he turned it into the mightiest, most flexible, and most carefully controlled instrument of national policy ever possessed by any nation. Let me recite just a few of his contributions.

The Defense Establishment which Secretary McNamara took in hand in 1961 was based on a strategy of massive nuclear retaliation as the answer to all military and political aggression. McNamara believed in a strategy of controlled, flexible response—a Defense Establishment versatile enough to meet force with appropriate force across the whole spectrum, from guerrilla subversion to all-out nuclear war. We did not have this in 1961.

There are many more things we have in the Defense Establishment which we did not have in 1961. And they are the result of this man's intelligence and genius and his close warm relationship with Presidents Kennedy and Johnson.

We bid him not goodbye, but good luck and warm wishes from a Nation eternally in his debt.

FEDERAL AID TO EDUCATION

Mr. MOSS. Mr. President, one of the first bills I cosponsored when I came to the U.S. Senate 9 years ago was a Federal aid to education bill. I have cosponsored or supported every major education bill which has been before this body since that time, including the Elementary and Secondary Education Act of 1965, which this bill before us today amends and extends.

But never before have I supported a measure with more enthusiasm than this one, because it recognizes a principle for which I have long fought, and which is important to my State of Utah. This is the principle which holds that States which make the greatest effort to educate their children with their own resources should be rewarded for this effort—and not penalized.

For years Utah has been at the top of the roster of States in the portion of its per capita income which it spent for education. Last year also we put a larger percentage of our State and local expenditures into education than any other State. But since these herculean efforts to give our children a good education have resulted in a high expenditure for each school child, we have received far less in Federal aid than States which have far larger per capita incomes than we have, but who are unwilling to devote as much of them to education.

In a recent editorial entitled "Who Pays the Piper," the Deseret News pointed out, somewhat truculently:

> Utah ranks far down the list—37th among the 50 states—in the percentage of its total school revenues received from Federal sources. States in much more favorable positions to pay for their own public education are receiving a great deal more help in percentage of their total state budgets than does Utah. The Beehive state has for years ranked among the first three states in the nation in efforts to pay its own way—a fact in which Utahans may take just pride.
>
> All of which points up still another cause for concern over Federal aid: that the states which get the most help are all too often those which make the least local effort.

Well, the Deseret News may temper any concern it has in this respect about Federal aid if the Senate bill on Elementary and Secondary Act amendments prevails because the committee has wisely and rightfully provided a bonus for the effort which a State makes to educate its children, and under this provision Utah would receive $1,224,693, in fiscal 1968 over and above the funds now granted to it under title I.

This new provision will be very satisfying to a State which, although below the national average in per capita income, has put such emphasis on education that it leads the Nation in the number of years its citizens attend schools, that it has one of the lowest percentages in illiteracy in the Nation, that it is fourth from the top of the States in the number of its Selective Service draftees who qualify mentally, and that for many years has had a larger percentage of its students go on to college than any other State.

There are many other provisions in the bill which the Senate Labor and Public Welfare Committee reported which will be pleasing to Utah. Because of the elimination of certain deductions in the impacted area program, Utah school districts which are eligible for Public Law 874 assistance will receive some $204,000 more in fiscal 1968 than they have now.

The amendments to the present program relating to the education of the handicapped, migratory and other disadvantaged children will also be welcome in Utah. Some $441,997 in additional funds will be available to the State under these amendments in the fiscal year 1968.

Since under the present law Utah receives $2,967,000 for grants to the counties under the poverty formula and $75,000 for State administrative expenses, I estimate that under the bill as reported by the Senate Labor and Public Welfare Committee, the State will receive a total of almost $5 million in title I funds alone.

Other programs in the bill, including grants for school library material, supplementary educational centers and services and for strengthening State educational departments will provide an additional $2 million for the State, making a total of over $7 million in fiscal 1968 which can be used to strengthen various facets of the Utah elementary and secondary school system and its administration.

I commend the committee also for its efforts to meet what is undoubtedly one of the most frustrating aspects of Federal aid allocations to the schools—that of reconciling school budget and congressional appropriation cycles. It is most difficult for school officials to do sound planning when they are constantly faced with late funding for their programs, and when they therefore have no idea how much money they will have to work with. I feel that the proposals in title IV to iron out these problems make good sense.

I well recognize that there is considerable controversy over the changes the committee has recommended in the administration of title III grants to improve educational ideas, practices and techniques in our elementary and secondary schools. I have long believed that greater authority to select and approve innovative programs should be vested in the State educational agencies and have so testified before the Senate Education Subcommittee on two different occasions.

But I do realize that a change in the administration of these programs will have to be made gradually—that it cannot come about abruptly as the House recommends, simply because there are too many programs already funded and underway or ready for funding. It seems to me that the Senate proposal, which would, over a 3-year period, turn over to the State educational agency the authority for two-thirds of the projects is a fair compromise. It recognizes the primacy of the State claim—that the State agency is in a better position to make a judgment on whether a project would be consistent with the overall State educational plans and programs—but it also takes cognizance of the fact that we are dealing with an ongoing program which cannot be turned about in 6 months or a year without disrupting a lot of planning which has been done and work which has been started.

The Federal aid to education program is generally popular and well accepted in the State of Utah. Our schools—already of a very high caliber—are better for it. We have been able to undertake projects for their improvement we would not have been able to afford otherwise.

There is still some fear that Federal aid will bring Federal control—although this concern has lessened as the programs have continued in operation. In this respect, I was most interested in results of the study made by the House Subcommittee on Special Education under the able guidance of its chairman, Representative EDITH GREEN, of Oregon.

Mrs. GREEN announced the results of a question put to State commissioners of higher education, chief State school officers, local public and private school administrators, and student financial aid officers as to whether the Federal prohibition against "direction, supervision, or control" was being adequately or reasonably observed. The returns revealed:

One hundred percent of the States commissioners of higher education said, "Yes."

Seventy-eight percent of the chief State school officers said "Yes."

Ninety-six percent of the student financial aid officers said "Yes."

Seventy-eight percent of the local school administrators said "Yes."

And 95 percent of the independent school administrators said "Yes."

I think this is rather conclusive evidence that the fear of many during the debate on Federal aid to education bills that they would result in control of our public schools was not valid.

It is undoubtedly true, as Mrs. GREEN has been at great pains to point out, that Federal involvement does influence State, local, and institutional policy decisions, since there must be guidelines and reporting provisions and matching requirements placed on a Federal program, so that the Congress may know that its intentions are being carried out. We must work continuously to see that these influences do not affect the freedom of the State and local school officials to educate the children in a State or district in accordance with the wishes of the local people.

Mr. President, I commend the committee for the excellent bill which has been reported, and hope that the Senate will pass it promptly.

CYRUS VANCE: PRESIDENT JOHNSON'S EMISSARY OF PEACE

Mr. YARBOROUGH. Mr. President, President Johnson's special emissary during the Cyprus confrontation, Cyrus Vance, has announced that peace between our two allies, Greece and Turkey, has been safeguarded, and tensions have been reduced.

In a grueling week of constant shuttling between Ankara, Athens, and Nicosia, Cyrus Vance acted as President Johnson's envoy for peace.

As a result of his efforts, the parties no longer look at each other down the barrel of a gun but prepare once again to join hands as NATO's southernmost allies.

The historic settlement, hammered out with the able assistance of a special United Nations mediator and NATO Secretary General Manlio Brosio, is a defeat for no party and a victory for all who value peace.

NATO is again a firm European alliance from north to south. The rights of both Greek and Turkish Cypriots will be protected. And peace between allies has been preserved.

Cyrus Vance's mission of peace demonstrates to the world President Johnson's deep concern for peace and evidences the fruitful results of patient negotiation, rather than needless conflict.

The Johnson administration, its tireless emissary, and all parties concerned, have handed the world a diplomatic triumph which we can look upon with pride.

The Senate is proud of the President and proud of Cyrus Vance.

TRIBUTE TO SUCCESSFUL RESOLUTION OF CYPRUS CRISIS

Mr. PELL. Mr. President, I should like to pay tribute to the judgment of President Johnson and the achievement of the emissary he appointed, Cyrus Vance, in arranging what appears to be an effective resolution of the crisis in Cyprus. By taking the initiative for peace as has President Johnson and because of Mr. Vance's painstaking and patient efforts, an equitable formula has been been arrived at whereby Greece will withdraw the menacing presence of some 10,000 troops on the island, while Turkey pulls back the equally menacing presence of an invasion force on the mainland.

I salute President Johnson for the leadership for peace he has demonstrated in this Cyprus crisis.

In a more personal vein, I have known, like, and admired Cyrus Vance since considerably before he came to Government.

He is a man utterly without pretense, who is singularly devoted to accomplishment and possessed of great talent and stamina. His performance in the Cyprus crisis was altogether typical of his resourcefulness and his capacity for indefatigable attention to the problem at hand.

Mr. President, Cyrus Vance has a distinguished record of public service dating back to his service in this body 10 years ago as special counsel to the Preparedness Subcommittee of the Armed Services Committee. From that post he rose successively to be general counsel for the Department of Defense, Secretary of the Army, and Deputy Secretary of Defense. I am sure that many Members of this body shared my disappointment when he left Government service earlier this year. His reemergence on the public scene with such distinction is especially encouraging at this time when we face the prospect of a change of command at the highest level of our defense establishment. His record and his achievements recommend him highly for any future assignment to a position of the highest trust. In this connection, I ask unanimous consent that there be printed at this point an article from today's New York Times entitled "A Turnabout in Ankara."

There being no objection, the article was ordered to be printed in the RECORD, as follows:

A Turnabout in Ankara—Vance's Efforts for Accord on Cyprus Bring Marked Shift in Turkish Views

(By Sydney Gruson)

ANKARA, TURKEY, November 30.—When Cyrus R. Vance arrived last week as President Johnson's envoy in the Turkish-Greek crisis over Cyprus, there was a howl of rage in the Turkish press.

Mr. Vance was dismissed as a "nondescript lawyer" and the papers vied with each other for the nastiest phrases to damn the United States. Stronger than most but nevertheless an accurate reflection of nonofficial Turkish opinion, was an editorial in the pro-Government, mass-circulation Istanbul paper Hurriyet.

"This is enough, Johnson," it said. "As a nation, as youth, as press, as people, we are shouting at the top of our voices! This is enough! We are really and truly fed up with Johnson's actions.

"We have seen once again that America is not our true friend, that she is a supporter of Hellenism and an aid to Athens, whatever its regime. For God's sake, leave us alone. Withdraw your envoy and get out."

Hundreds of students and young intellectuals were at the airport and on Ankara's streets to demonstrate against Mr. Vance.

PRESS REFLECTS CHANGE

Today, with a settlement apparently reached, the press reflected the great change that has come about in the week during which Mr. Vance, scarcely sleeping, shuttled between Ankara and Athens reconciling the two countries' needs and demands.

The "nondescript lawyer" of last Thursday had become, in the words of one of today's papers, the "experienced and qualified statesman" who was not only trying to solve the immediate crisis but was also seeking a "permanent and basic solution" to the Cyprus problem.

The editorials also spoke of President Johnson's wise choice of an envoy, of Turkey's friends in the State Department, of America's "sense of fair play and of the United States' avoiding its mistakes of the past."

The fact that Turkey has mostly had her way in the settlement is the major factor in the turnabout, but Mr. Vance's tactfulness, his fairness and determination were being acknowledged by Turkish officials even before the settlement was in sight. Some of this is finally beginning to seep down to the public from the press.

INCREDIBLE PATIENCE

Mr. Vance kept himself away from newsmen throughout the delicate negotiations. Turkish and American officials who saw him at work were particularly impressed by what one American described as his "incredible patience" in fitting together the bits and pieces of an eventual agreement.

He showed great stamina in commuting between Athens and Ankara. One of his aides estimated that Mr. Vance averaged 2 hours and 20 minutes sleep a day during the first five days of his mission. By Tuesday, it was beginning to show in the lines of his face.

He catnapped between negotiating sessions, shaved when he could and once got off his plane at Ankara with shaving cream all over a pocket of his overcoat. He had forgotten to replace the cap on the tube of shaving cream.

There is widespread agreement that the Vance mission has cut considerably into the legacy of distrust of the United States that was left by President Johnson's methods in keeping the Turks from invading Cyprus in 1964.

When the 1964 crisis was on the verge of exploding into war, Mr. Johnson sent not an envoy but a letter to Premier Ismet Inonu in language considered so harsh that it might have been addressed to a hostile rather than to an allied country.

The letter threatened that if Turkey invaded, the obligation of the North Atlantic Treaty Organization to defend her against Soviet aggression would be withdrawn. It warned against using any United States equipment supplied under military aid agreements and it implied that Turkey could become responsible for another world war.

That dispute had been building up from the glory communal fighting on Cyprus in December 1963. George W. Ball, then Under Secretary of State, toured the area in the spring of 1964. He calmed but could not suppress the fierce passions on both sides.

GOODWILL UNDERCUT

Mr. Vance had more leverage. The Greeks in 1964 were united behind a political government; now they are under a military dictatorship that has divided the armed forces, the politicians and the public.

In the 1964 crisis, however, the Greeks had few regular army forces on the island. Mr. Vance was negotiating with a Greek Government that had on Cyprus thousands of well-equipped troops that could have badly bloodied an invader, whatever the final outcome of the fighting.

The President's letter of 1964 had a profound effect on Turkish attitudes toward the United States. It undercut the goodwill built up by the Truman Doctrine of 1947, which helped strengthen Turkey and Greece against communism, and by the huge amounts of aid under the Marshall Plan and afterward.

The letter did something else, something much more difficult for Turks to define. They thought it struck at their national honor.

INTENSE PASSIONS EMERGE

One American here put it this way: "They consider that they had lost some of their manhood and they won't really be satisfied until they prove themselves again."

At the height of the latest crisis, a Turk said to an American visitor: "We have to go to war to show that you cannot stop us—that we have a say in our own fate."

But even if hundreds of Turkish lives are lost? the American asked.

"Yes," replied the Turk. "That will be a small price to pay."

Intense passions come out during a crisis, pushing to the background the warm relationships that exist between the Turks and the 25,000 Americans here in American diplomatic and aid missions and North Atlantic Treaty Organization installations.

Mr. Johnson's letter also dates the beginning of Turkish diplomatic efforts to improve relations with the Soviet Union. Premier Aleksei N. Kosygin and Premier Suleyman Demirel have since exchanged visits. Soviet economic aid now is in evidence here and cultural exchanges have been arranged for the first time since World War II.

American diplomats here do not mind, since the efforts do not conflict with the North Atlantic alliance policy of détente with the Soviet Union. Besides, one letter, no matter how nasty it may have been considered, does not match the long history of warfare between the Turks and Russians.

Mr. PELL. In conclusion and returning to the subject of Greece, I stress my trust that there will be no flagging in the increasing efforts of our administration to persuade Greece to return to a constitutional form of government as quickly as possible and that there has been no weakening in this regard by our administration as a result of the resolution of the Cyprus crisis.

PRAISE DUE CYRUS R. VANCE

Mr. BYRD of West Virginia. Mr. President, as many as of us are aware, the very real possibility of war between the Governments of Greece and Turkey over the island nation of Cyprus has apparently been averted.

Much of the credit for the abatement of tensions is due to President Johnson and his special envoy, Cyrus R. Vance, former Deputy Secretary of Defense.

Mr. Vance was dispatched to the Middle East on November 22 and shuttled back and forth between the Greek capital of Athens and the Turkish capital of Ankara in a dedicated effort to avert a resort to arms.

If recent news reports are correct, it appears he has been successful in his mission.

A war between Greece and Turkey would have been a tragedy. Both of these nations are U.S. allies and both are members of NATO. In the days after World War II, when the Communists threatened to take over both of these countries, we were able, through the Truman doctrine, to rescue them.

Admittedly the situation in Cyprus is a difficult one, and I shall not comment on the merits of the dispute. However, I am glad that reason has prevailed, for there are many recourses to a situation other than war.

I think all Americans can be greatly indebted to Cyrus Vance. But, we in West Virginia can take some additional pride, because Cyrus Vance is one of our own, having been born in Clarksburg, W. Va.

Cyrus Vance's role has been that of mediator. It is a task that is totally demanding, thankless, wins no prizes, and little recognition. Yet, Cyrus Vance can be proud in the knowledge that because of his dedicated efforts, the men and women of two great nations, Greece and Turkey, have been spared the anguish and torment of war.

We can be justly proud of Cyrus Vance, and we can also be proud of our President for constantly seeking peace in the world.

CITY OF NOISE

Mr. CLARK. Mr. President, the New York Times of Sunday, November 26, 1967, contained a most interesting and significant editorial under the headline, "City of Noise."

Although the city of noise to which it refers is New York, it would be a mistake to assume that noise is peculiarly a New York problem. Whether in fact the Times is right in characterizing New York City as "probably the noisiest city of what is undoubtedly the noisiest country in the world," the fact remains that noise pollution is a great and growing menace to the health and well-being, and perhaps even the sanity, of every one of us.

I salute my colleague from New York, Senator ROBERT KENNEDY, for pointing out the need to control the generation of excessive noise at the source. The problem of sonic booms—which will be greatly aggravated if and when the proposed SST is built—is only the most dramatic example of the price we must pay for the widespread indifference of persons in positions of responsibility to the rights of the individual to a quality environment. And to me, the words "quality environment" mean clean streams, pure air—and a little peace and quiet.

Mr. President, I ask unanimous consent that the editorial to which I have referred be printed in the RECORD at this point.

There being no objection, the editorial was ordered to be printed in the RECORD, as follows:

CITY OF NOISE

New York City is probably the noisiest city of what is undoubtedly the noisiest country in the world—a country where 97 million automobiles contribute to the din by screeching brakes, noisy engines, tooting horns; where 75 jet airports make life miserable for nearby residents; where a multi-billion-dollar construction industry is allowed to operate unmuffled because it is cheaper that way.

The City Council is now at long last holding hearings on a proposed new building code that will contain comprehensive noise-control provisions. Great Britain, Germany, Sweden, the Netherlands and the U.S.S.R. have all developed strong codes of this nature in recent years. New York can learn from their experience. But, as Senator Robert F. Kennedy has pointed out, a great deal more will have to be done to cope with the noise menace than to develop an improved building code. Steps will have to be taken to control unnecessary noise at its source.

The first and most essential factor, however, is for Americans to realize that noise is not just an unpleasant annoyance, to be endured as part of the price of progress. It is a threat to health, not too dissimilar from air or water pollution, and determined efforts are needed to keep it within reasonable bounds.

PRAISE FOR PRESIDENT JOHNSON'S PEACE EFFORTS IN THE NEAR EAST

Mr. MONTOYA. Mr. President, President Johnson's emissary for peace on the Cyprus confrontation has secured peace between our two trusted allies, Greece and Turkey.

In a frenzied week of constant negotiations involving Nicosia, Ankara, and Athens, Cyrus Vance, with incredible patience and admirable stamina, fitted together the bits and pieces of an honorable settlement.

Under the tentative agreement, Greek and Turkish troops will be removed from Cyprus, the independence of Cyprus will be protected, and preparations for war will be ended.

But President Johnson and Cyrus Vance have not only helped to solve the immediate crisis, they have laid the foundation stones for a permanent solution to the longstanding Cyprus problem.

President Johnson chose one of his most trusted advisers—because the stakes for world peace were enormous. Greece and Turkey together form the southern link of our NATO defenses. Now, instead of locking fists in war, they will again join hands to protect the peace.

President Johnson chose his envoy well. When Cyrus Vance began his mission of peace, the atmosphere was charged with tension. In 1 week, his innate fairness, tactfulness, and determination to settle for nothing less than peace, defused one of the most dangerous situations of this decade.

When a tragic war is averted by an honorable solution, there are no losers, for the world has won a measure of peace.

Cyrus Vance performed his duty in the best spirit of American fairplay. He has carried President Johnson's prayers for peace with a dignity that reflects favorably on our President and the Nation. The United States—and nations the world over—owe Cyrus Vance a large debt of gratitude.

CONCLUSION OF MORNING BUSINESS

Mr. BYRD of West Virginia. Mr. President, is there further morning business?

The ACTING PRESIDENT pro tempore. Is there further morning business? If not, morning business is closed.

ELEMENTARY AND SECONDARY EDUCATION AMENDMENTS OF 1967

Mr. BYRD of West Virginia. Mr. President, I ask unanimous consent that the Senate proceed to the consideration of Calendar No. 710, H.R. 7819.

The ACTING PRESIDENT pro tempore. The bill will be stated by title.

The ASSISTANT LEGISLATIVE CLERK. A bill (H.R. 7819) to strengthen and improve programs of assistance for elementary and secondary education by extending authority for allocation of funds to be used for education of Indian children and children in overseas dependents schools of the Department of Defense, by extending and amending the National Teacher Corps program, by providing assistance for comprehensive educational planning, and by improving programs of education for the handicapped; to improve authority for assistance to schools in federally impacted areas and areas suffering a major disaster; and for other purposes.

The ACTING PRESIDENT pro tempore. Is there objection to the present consideration of the bill?

There being no objection, the Senate proceeded to consider the bill.

Mr. BYRD of West Virginia. Mr. President, I suggest the absence of a quorum.

The ACTING PRESIDENT pro tempore. The clerk will call the roll.

The bill clerk proceeded to call the roll.

Mr. BYRD of West Virginia. Mr. President, I ask unanimous consent that the order for the quorum call be rescinded.

The ACTING PRESIDENT pro tempore. Without objection, it is so ordered.

PRIVILEGE OF THE FLOOR

Mr. MORSE. Mr. President, I ask unanimous consent that the majority and minority staff members of the Committee on Labor and Public Welfare, whose presence on the floor of the Senate is needed by spokesmen for both the majority and the minority in connection with the consideration of the Elementary and Secondary Education Amendments of 1967, have permission to be on the floor of the Senate.

The ACTING PRESIDENT pro tempore. Without objection, it is so ordered.

Mr. MORSE. Mr. President, I have the honor to open debate today on a most significant educational bill, H.R. 7819, the Elementary and Secondary Education Amendments of 1967.

Because it is the view of the committee that the making of legislative history on this bill is of great importance in regard to future reference, I, as chairman of the subcommittee, propose to make the opening speech without yielding for interruption. After the legislative history speech has been made I want Senators to know that I shall welcome interruption, because I have but one desire and that is to clarify any part of the bill that in the opinion of any Senator needs clarification, and also to work out in colloquy with Senators on the floor of the Senate legislative history that will give us an understanding at least as to the intent of the committee and the intent of the manager of the bill speaking for the committee as to the meaning of any section of the bill.

I think Senators know that discussions that have already taken place off the floor of the Senate in regard to this bill make it of essential importance that such colloquies take place today so that we will remove any question as to the meaning of the bill from the standpoint of its legislative intent.

It is my hope that such colloquies will make it possible for us to iron out differences and reach understandings as to the administrative policies which will be followed by the Department of Health, Education, and Welfare in connection with administering the various parts of the program covered in the bill.

I also want to say to some colleagues with whom I have been consulting during the past several days, that although we are proceeding with consideration of the bill on the floor of the Senate this morning, conferences with Department of Health, Education, and Welfare are proceeding at the same time. Other members of the committee and other Members of the Senate and the staff on the committee are, this morning, in consultation with the Department of Health, Education, and Welfare in an endeavor to see if we can reach an agreement for administrative practices related specifically to the deferral of funds which will be more acceptable to some Members of the Senate who have a great many reservations about the bill in respect to that particular item.

I hope that such an understanding can be reached during the day. With that explanatory note, Mr. President, I now proceed to present the speech of legislative history on this most important elementary and secondary education bill.

Before I discuss it, however, I wish to pay tribute to the chairman of our full committee, the most distinguished senior Senator from Alabama, **Lister Hill**, who on Monday, November 6, set a standard for all to emulate by successfully bringing through this body four measures of major importance. The action of the Senate in accepting the recommendations of our committee as presented by our chairman on such important pieces of legislation augurs, I hope, well for consideration of the further educational legislation the committee now brings to the Senate.

In particular, because it is so closely related to the bill before us, I should like to observe that the further extension and expansion of the Library Services and Construction Act is a measure which commands great support in my State. Recently I had the opportunity to visit libraries which have been built under the provisions of the act in Coos Bay and elsewhere. I know that they will prove to be invaluable community assets, particularly to the young men and women in these areas who will use them as a prime educational resource in the furtherance of their studies.

In commenting upon the passage of this bill let me also pay tribute to the quality of testimony that has come before the Education Subcommittee when library concerns were before us. It is just such factually based advice that permits us to have confidence in solutions which are proposed and so although I salute Senator **Hill**, I salute also the dedicated men and women in every State of the Union who are devoting their lives to organizing and making available to the rest of us our cultural heritage.

BACKGROUND OF LEGISLATION

I turn now to H.R. 7819 as reported from the Committee on Labor and Public Welfare, and to Senate Report No. 726, which accompanied it to the floor.

The report and several volumes of the hearings are on the desks of each Senator. I shall be referring to the hearings during the day. It is with a great deal of pride, expressed on behalf of my subcommittee and the full committee, that I invite the attention of the Senate to the reports. I have managed a good many education bills through the Senate, but I have never brought to the floor a set of reports which, in my judgment, were better than the report and the volumes on the hearings now on the desk of each Senator—11 altogether.

Therefore, if anyone has the slightest doubt as to the care with which my committee has handled this piece of legislation, I offer the 11 volumes as my exhibit in rebuttal.

I know of no education bill which has been more thoroughly considered. I say this not only on behalf of the committee but also on behalf of the many witnesses who gave us of their expertise when they submitted their judgments, their views, and their evidence in regard to the various sections of the bill. For, after all, the educational groups, the various associations and individual educational experts, as well as the Department of Health, Education, and Welfare, all of them working together, have given us a set of volumes which is going to make my task much easier than it otherwise would be, because I feel that I will be able to turn to one volume or another and provide the questioner in the Senate not with my answer but the answers of the experts who have already answered their questions in the hearings, the record of which is before each Senator.

To recapitulate briefly, last January I had the honor of introducing for the administration S. 1125, the bill proposing to amend various statutes covering Federal programs for our elementary and secondary schools. A similar measure was introduced on the House side.

Our first hearings were held on May 25 and on June 23, 1967. In these hearings testimony was taken on the bill and upon other measures, including those introduced by the distinguished majority leader and the junior Senator from the State of Montana [Mr. **Metcalf**]—now presiding over the Senate—the distinguished Senators from Idaho, and the distinguished junior Senator from Wisconsin. These latter proposals related to improvements in our school disaster legislation, amendments to the impacted areas legislation and amendments designed to provide further emphasis to the use of auxiliary personnel in the elementary and secondary school system.

I mention this, Mr. President, because in those hearings and as the result of our further hearings of July 24, 25 and 26, August 7, 9, 10, 11, 14, 15, and 16, and in our final public hearing on September 18, 1967, during which testimony on all phases of the bills as introduced was elicited, we have substantially modified and in our judgement, improved the bill as introduced and as it passed the House in the form of H.R. 7819 on May 24.

In the interim, the Educational Professions Development Act of 1967 passed the Senate and became law on June 28. In it we incorporated elements originally in S. 1125 relating to a further extension and amendment of the Teacher Corps program as well as elements originally in the Higher Education Amendments of 1967, S. 1126.

Our hearings record in printed form the evidence in support of the bill which, as I have already said, is on each Senator's desk. Eight volumes of the nine which have been printed of our education hearings this year, together with the appendix containing communications on various matters covered by the legislation, constitute the hearings record upon which we rely in urging acceptance of H.R. 7819 as reported.

Mr. President, I ask unanimous consent that there appear at this point in my remarks the short summary of the principal provisions of the bill which are contained in Senate Report No. 726.

There being no objection, the summary was ordered to be printed in the Record, as follows:

SHORT SUMMARY OF THE PRINCIPAL PROVISIONS OF THE BILL

If H.R. 7819 were to be enacted as amended by the committee. the following changes would be made in existing law:

Part A of title I of H.R. 7819 would:

I. Provide that sums allotted to the State under the terms of the Labor-HEW appropriations act would be distributed within the State according to the following priorities:

1. The State agency programs for the handicapped, migratory children, and neglected and delinquent children in institutions would be allocated their maximum grants without any ratable reduction.

2. Every county within each State would be allocated an amount equal to its allocation in the preceding fiscal year for grants to local educational agencies within each county.

3. Every State educational agency would receive for administrative expenses 1 percent of the amounts allocated to State agencies and counties as provided in paragraphs 1 and 2, above, with a minimum of $150,000 to every State.

4. Any amounts remaining after allocations are made as described in paragraphs 1, 2, and 3 would be allocated in accordance with computations under the present formula ($3,000 low income factor—State option of one-half State per-pupil cost or one-half national per-pupil cost—AFDC).

II. Add technical and conforming amendments to title I to bring migrant, neglected and delinquent children formula factors into conformity with the other title I programs.

III. Add provisions (contained in the House bill as passed).

1. Increasing from $75,000 to $150,000 the dollar limitation for State administrative expenses;

2. Authorizing joint training programs for title I ESEA education aids and professional staff;

3. Requiring that caseload data used in the computation of the formula be that of the month of January for the preceding fiscal year; and

4. Authorizing studies by the Secretary of Health, Education, and Welfare to set forth the impact upon educational systems of children living in public housing units, and by the Commissioner of Education and the Secretary of Commerce to set forth recommendations concerning methods of calculating entitlements under title I for future years.

IV. Add provisions relating to the rules, regulations, guidelines and other published interpretations or orders issued by the Department of Health, Education, and Welfare to assure that such issuance shall contain citations of the legal authority upon which based and to assure uniform application and enforcement throughout the 50 States; and

V. Add technical amendments concerning definitions and the redesignation of section numbers, and

VI. Add in section 108 of H.R. 7819, as title I of ESEA, at a cost not to exceed $50 million a year a new program of special incentive grants to be distributed among those States whose educational effort exceeds the national educational effort. Such payments, however, may not in the case of any State exceed 15 percent of the total amounts appropriated for this purpose in any year.

The committee also adopted in modified form a House provision for the purpose of determining whether a local educational agency is in compliance with the provisions of Public Law 88–352, the Civil Rights Act of 1964.

In part B the committee has adopted the House provision extending for a 2-year period expiring provisions of the school library title of ESEA relating to schools for Indian children and Department of Defense overseas dependent schools. Title II ESEA, in other respects, would be extended for 3 fiscal years, as will all other titles of ESEA.

In part C of title I of H.R. 7819, which relates to supplementary educational centers and services under ESEA, the committee has adopted the House format of changing the existing program from a Federal into a State plan State grant operation. In doing so, however, it modified the House provision by:

(1) providing for a 3-year transfer period from the present pattern of operation to the proposed pattern of operation commencing in fiscal year 1969 under which for fiscal year 1969, $33\frac{1}{3}$ percent of the funds appropriated would be released directly to State educational agencies, in fiscal year 1970, 50 percent of funds appropriated would be available, and finally in fiscal year 1971 this amount would rise to $66\frac{2}{3}$ percent of the funds appropriated. In each year the remaining percentage of the funds would be administered by the Commissioner of Education as under existing law. The formula for apportioning funds among the States, however, remains that of existing law and was not disturbed either by the House or by the Senate committee. Fifteen percent of the amounts appropriated would be earmarked for title III programs for handicapped children.

(2) providing for the establishment and funding within the State educational agency of State advisory councils whose functions would include:

(a) Advising the chief State school officer on the preparation of the State plan for administration of title III grant moneys transmitted to the State.

(b) Reviewing annually the State plan and upon the basis of the review recommending to the chief State school officer modifications or amendments to the State plan.

(c) Reviewing applications received and upon the basis of such review recommending to the chief State school officer the disposition to be made of the applications and maintaining records of applications received.

(d) Annually reviewing for the purposes of evaluation the approved plans and programs funded under the authority within the State, transmitting its report upon the evaluation of plans and programs to the chief State school officer and to the National Advisory Council, together with its recommendations, based upon its analysis of the operations of the program, for such changes as in its judgment it believes to be warranted in the basic statute, the State plan, and the State or the National procedures governing the title III area.

(e) Based upon its evaluation and review procedures, selecting among programs funded, those which, in its judgment, it believes to be of an exemplary character. Arranging through the chief State school officer for appropriate dissemination of such programs to bring them to the attention of local educational agencies within the State, and through the National Advisory Council, to the attention of local educational agencies throughout the United States.

(3) Providing in parallel fashion for a change in the status of the present Advisory Committee on Supplementary Educational Centers and Services which currently is appointed by the Commissioner of Education by reconstituting it as a Presidentially appointed National Advisory Council on Supplementary Centers and Services, which is charged with the duties of (a) advising the Commissioner on the preparation of regulations; (b) reviewing the administration and operation of title III; (c) evaluating programs and projects carried out by the Commissioner; and (d) annually transmitting to the Congress its report containing recommendations for such legislative and administrative changes as it deems desirable.

Modest increases over the present $500 million authorization for title III are provided through increments of $25 million over the previous year's authorization for each of the 3 years the program is extended.

In part D of title I of H.R. 7819, are to be found amendments to title V of ESEA, concerned with strengthening State departments of education. Here the committee modified a House provision deleting the present 15 percent reservation of funds to the Commissioner by transferring it to the States. It did this by reducing the reservation for the Commissioner to 5 percent of the funds appropriated, while specifying that 10 percent of the appropriated funds would be henceforth transmitted, through the State educational agency, to local educational agencies for the purpose of strengthening their operations. In doing so, the committee left unchanged the $65 million authorization for fiscal year 1968 and the $80 million authorization for fiscal year 1969 of the House version of the bill. In conformity with the standard pattern of extending the duration of the titles, however, the committee added an authorization for $80 million for fiscal year 1970 and one of $85 million for fiscal year 1971.

The committee also, on the basis of testimony taken, and amendments submitted by Senator Nelson, broadened the uses to which title V funds may be put through the addition of a new paragraph encouraging the use of auxiliary personnel such as teacher aides in elementary and secondary schools.

The major addition to the House provisions on title V was the adoption by the committee, as a new part B of title V of ESEA, of an administration program providing for comprehensive planning grants to the States in the amount of $15 million for fiscal year 1968 and $20 million for each of the fiscal years 1969, 1970, and 1971 to carry out programs for the systematic planning and evaluation of education within each of the States.

Grants under part B of title V would be made on the basis of applications submitted through the State educational planning agency. The Commissioner is further authorized to make contracts or grants to public or private nonprofit agencies for specific projects to be conducted on an interstate regional or metropolitan area basis for planning of education in metropolitan areas covering more than one State.

Coverage under title V was further broadened by the committee to permit grants to be made to interstate commissions such as the Appalachian Regional Commission.

In part E of H.R. 7819 are to be found amendments to title VI, ESEA, relating to education of handicapped children. The committee, as in the House bill, adopted administration recommendations providing for regional resource centers dissemination of information in the area of special education. $7.5 million is provided for regional resource centers in fiscal year 1968, $8 million for fiscal year 1969, $10 million for fiscal year 1970, and $12 million for fiscal year 1971. The committee further established additional centers and related services for deaf-blind children authorized to be funded at $1 million for fiscal year 1968, $3 million for fiscal year 1969, $7 million for fiscal year 1970, and $9 million ending June 30, 1971.

In the captioned films for the deaf program (which hereafter will include all handicapped) authorizations were raised from $5 million to $8 million for the current fiscal year and fiscal year 1968 and from $7 million to $10 million for subsequent fiscal years.

In part F of title I of H.R. 7819 relating to the title containing general provisions applicable to ESEA the committee has:

(1) added to the presently authorized dissemination of information program funded at $2 million for fiscal year 1968, a new program of technical assistance to rural areas and provided authorization for funding of the combined program at $3.5 million for fiscal year 1968, $3.7 million for fiscal year 1969, $4 million for fiscal year 1970, and $4.2 million for fiscal year 1971, and

(2) added a new 3-year program of demonstration projects to prevent dropouts starting in fiscal year 1969 at yearly authorized appropriations of $30 million. (Under this program the Commissioner is authorized to arrange by contract or grant with local educational agencies for funding of programs in schools in urban areas having a high percentage of educationally deprived children to carry out, through innovative methods, systems, and materials those programs which show promise of reducing the number of children who do not now complete their education in an elementary or secondary school.)

In title II of H.R. 7819 which relates to federally impacted areas under Public Laws 815 and 875, the following changes are recommended: Adoption of language relating to:

(1) clarification of definitions,

(2) effective date provisions,

(3) extension of Public Law 89–313, the School Disaster Act.

(4) administration proposals modifying provisions relating to school construction assistance on Indian lands under Public Law 815,

(5) deletion from Public Law 874 of provisions requiring that certain contributions be deducted from entitlements under that act.

(6) the Chamizal international boundary change, and

(7) repeal of provisions requiring the use by States of mandatory group rate provisions under Public Law 874.

Further, the Commissioner of Education was provided, with discretionary authority to waive certain requirements of Public Law 815.

The committee estimates, upon advice from the Office of Education, that the total cost would be under $10 million annually for the foregoing changes.

The committee, while extending for a 3-year period the major school disaster provisions of Public Law 89–313, has further expanded these provisions to provide protection to schools in communities which may in the future suffer pinpoint disasters such as fire, flood, hurricane, earthquake, storm, or other catastrophe. The loan program, which provides for replacement of facilities, would be invoked upon the certification of the Governor of the State that the pinpoint disaster had occurred and that loan assistance is needed, in addition to State and local funds which are available, to meet the emergency.

In title III of H.R. 7819 are contained authorizations for programs under the bill and the duration of such programs.

Under title IV of H.R. 7819 may be found committee recommendations (1) to provide specially for funding advance planning of programs, and evaluation of programs, so as to promote effective use of program funds, and (2) to meet the problem of reconciling school budget and congressional appropriation cycles to provide a sound basis for planning and operation of educational programs, at the elementary and secondary levels. The first proposal would authorize, for each fiscal year for which program appropriations are authorized, appropriations for expenses (including grants, contracts, or other payments) for (1) planning for the succeeding year and (2) evaluation of programs. The second proposal, essentially, would permit the President to submit to the Congress, and the Congress to enact in one fiscal year his funding recommendations for education legislation for the next fiscal year; in the initial year of this system, appropriations for the succeeding year would be included in the appropriation Act for the current year. If these budget estimates were approved by the Congress, expenditures would not take place until the fiscal year designated. The action of the Congress and the President in approving advanced funding, it is the committee's hope, would stabilize a difficult situation which has caused much concern to State and local educational agencies, institutions of higher education, and others who must plan and make commitments in one fiscal year for expenditures in the next fiscal year.

Title IV would also require, not later than March 31 of each year, evaluation reports from the Secretary of Health, Education, and Welfare upon the effectiveness of programs under provisions which have been authorized and funded. The evaluation report filed in the penultimate fiscal year for which appropriations are authorized under a program would have to cover comprehensively the entire life of the program; the authorization of the program would be automatically extended for 1 year at the previous year's level if the legislative process authorizing or declining to authorize an extension of the program had not been completed by the end of the session in which the comprehensive evaluation report is filed.

Title IV of the bill also provides that if, by May 15 of any year, the appropriation for carrying out title I of the Elementary and Secondary Education Act of 1965 during the succeeding fiscal year has not yet been enacted, the Commissioner may execute grant agreements for such succeeding fiscal year but only at the current appropriation level.

Appropriations for any fiscal year for payments to educational agencies or institutions under any of the acts specified in title IV of the bill could be made available for expenditure by the agency or institution on the basis of an academic or a school year if this differs from the fiscal year.

The operation of title IV of the bill is limited to titles I, II, III, V, VI, VII, and VIII of the Elementary and Secondary Education Act of 1965 and the Adult Education Act of 1966.

Under title V of H.R. 7819, the Adult Education Act of 1966 is extended with authorization for funding of $70 million for fiscal year 1969, $80 million for fiscal year 1970, and $90 million for fiscal year 1971. Modifications of the act relate to the inclusion of the Trust Territories of the Pacific Islands with a Federal share of 100 percent and the provision of at least $100,000 to each State with the Federal share for such programs set at 90 percent.

Under title VI of H.R. 7819, the committee has authorized the Secretary of Health, Education, and Welfare, and the Secretary of Transportation to make a study and fund demonstration projects in the field of schoolbus safety at an authorization of $1 million.

Under title VII of H.R. 7819 the committee is recommending a program of bilingual education funded at $15 million for fiscal year 1968, $30 million in fiscal year 1969, and $40 million for fiscal year 1970 and 1971. The amendment would amend the Elementary and Secondary Education Act by adding a new title VII to the act to establish bilingual programs through financial assistance to local educational agencies having a high concentration of children with limited English-speaking ability.

Mr. MORSE. Mr. President, three major problems confronted the committee during its markup sessions. I propose to discuss briefly each of the problems and the proposed resolution of those problems prior to a more detailed presentation of the many more minor provisions of the bill.

The first problem concerns title I of Public Law 89–10, the Elementary and Secondary Education Act of 1965, as amended. The authorization for funding of title I will expire on June 30, 1968. As the statute is now written, the formula contained in the statute would generate an authorization for an appropriation in the magnitude of approximately $2.4 billion for this fiscal year. Unfortunately, the administration in its budget estimates requested only $1.2 billion.

Our colleagues in the House committee, noting the change in the flow of funds between the States which would occur as the result of the activation of one of the components of the formula sought to mitigate the disturbances which would occur at the local educational agency level by providing in their bill that if the appropriation for fiscal year 1968 were not fully funded, then the formula would revert to the formula which controlled the funds allocation in fiscal year 1967. That was the bill as it came from the House committee.

On the floor of the House, however, the bill was amended. One of the amendments restored to title I of Public Law 89–10 the formula factor which gives to the States for the purpose of computing the amounts received either one-half the State per pupil cost of education or one-half the national average per pupil cost. In effect, the formula that came to us in the House-passed version of H.R. 7819 was a hybrid formula which neither reflected the situation which prevailed in fiscal year 1967 nor would it reflect the terms of existing law.

The House Appropriations Committee, and their action was concurred in by the Senate in sending to the President the conference report on the Labor-HEW appropriations bill for this fiscal year, sought to remedy the funds transfer flow between the States that the formula in H.R. 7819, as it passed the House, would entail, by providing a savings clause in the appropriations bill, the effect of which was to insure that each State in fiscal year 1968 would receive at least what that State had received in fiscal year 1967.

This could be done since the funds actually appropriated in fiscal year 1968 were some $150 million more than were appropriated for fiscal year 1967.

In our hearings and in our committee markup sessions were explored further the results which would flow from the actions that had been taken by the House committee, by the floor action of the House, and by the appropriations action of both houses for the current fiscal year. We found, as is set forth in two committee prints which are available to every Senator, that unless further modification of the title I formula was made, although interstate transfer of funds would be minimized as the result of the savings clause in the appropriations bill, the various components of the formula within each State would initiate a transfer of funds among the various counties in each State, with the result that many of the local educational agencies would be faced with budgetary problems by the congressional actions taken.

In order to minimize the within-State transfer of funds, we requested and received language which assures that each county will receive at least what it received in fiscal year 1967, with some counties receiving slightly more. The matter is discussed in our committee report, first in the short summary and later in the body of the report under the heading "Adjustments When Necessitated by Appropriations."

I ask unanimous consent that these two excerpts from the committee report plus the section-by-section analysis covering the amendments under section 208 be printed at this point in my remarks.

There being no objection, the excerpts and analysis were ordered to be printed in the RECORD, as follows:

SHORT SUMMARY OF THE PRINCIPAL PROVISIONS OF THE BILL

If H.R. 7819 were to be enacted as amended by the committee, the following changes would be made in existing law:

Part A of title I of H.R. 7819 would:

I. Provide that sums allotted to the States under the terms of the Labor-HEW appropriations act would be distributed within the State according to the following priorities:

1. The State agency programs for the handicapped, migratory children, and neglected and delinquent children in institutions would be allocated their maximum grants without any ratable reduction.
2. Every county within each State would be allocated an amount equal to its allocation in the preceding fiscal year for grants to local educational agencies within each county.
3. Every State educational agency would receive for administrative expenses 1 percent of the amounts allocated to State agencies and counties as provided in paragraphs 1 and 2, above, with a minimum of $150,000 to every State.
4. Any amounts remaining after allocations are made as described in paragraphs 1, 2, and 3 would be allocated in accordance with computations under the present formula ($3,000 low income factor—State option of one-half State per-pupil cost or one-half national per-pupil cost—AFDC).

* * * * *

Adjustments when necessitated by appropriations

The committee recommends amendments to section 208 (relating to adjustments necessitated by appropriations) designed to mitigate the impact of the title I fiscal year 1968 appropriation for title I, which is only $147 million more than the appropriations for fiscal year 1967. Under existing law, the low-income factor effective for fiscal year 1968 is $3,000. In addition, beginning in fiscal year 1968 States which are below the national average in per-pupil expenditures receive title I allocations on the basis of the national average per pupil expenditure instead of the State average per-pupil expenditure.

If the maximum grants computed under the authorization formula are prorated down to the funds level appropriated, certain changes take place in the relative allocations of various school districts. In addition, the increased numbers of children counted under the $3,000 formula has produced the side effect of reducing the per-pupil amount available for the State agency programs for the handicapped, migratory children, and neglected and delinquent children in institutions. Fortunately the HEW appropriations bill for fiscal year 1968 provides that the aggregate allocations in no State will be any less in fiscal year 1968, than allocations for the preceding fiscal year. This reduces to a minimum interstate transfers of funds for fiscal year 1968 which would otherwise have occurred.

The committee recommends language providing that when the sums appropriated are insufficient to fund fully all maximum grants—

1. The State agency programs for the handicapped, migratory children, and neglected and delinquent children in institutions will be allocated their maximum grants without any ratable reduction.
2. Every county in each State will be allocated an amount equal to its allocation in the preceding fiscal year for grants to local educational agencies within each county.
3. Every State educational agency will receive for administrative expenses 1 percent of the amounts allocated to State agencies and counties as provided in paragraphs 1 and 2, above, with the minimum specified in section 207(b) ($150,000 to every State).
4. Amounts remaining after allocations are made as described in paragraphs 1, 2, and 3 shall be allocated to local educational agencies and to State educational agencies for administrative expenses in accordance with computations under the formula in section 203(a)(2).

The $3,000 low-income factor and the option to the State to choose either one-half the State per pupil expenditure or one-half the national average per pupil expenditure in existing law are retained even though the budgeted sums for title I fall below the maximum grant authorization approximately $2.4 billion is authorized compared with $1.2 billion appropriated for fiscal year 1968.

The amounts generated by the formula under existing law, which is not modified by the proposed amendment, bear no 1-to-1 relationship to the number of children to be served by local educational agencies. The latter is, and remains, the number of children participating in programs carried on in schools serving high concentrations of educationally deprived children.

The committee therefore does not expect there will be any dilution in the quality of programs funded. It hopes that the impact upon children participating in them will be strengthened. A program designed to provide more individualized attention for educationally deprived children (for example, a higher ratio of aides and other educational personnel per pupil) should not be expanded to cover more children merely because of the changed low-income factor if this would defeat the purposes of intensive educational effort when the sums available for the program are but slightly greater than for the preceding year.

The number of children participating in a local program should be based on the need to be served with the funds available rather than on the hypothetical numbers of children counted under the formula for computing maximum grants.

A mere proration of funds defeats the ends of the act. In providing to each county greater certainty by assuring that it will first receive allocations equal to the amounts allocated to local educational agencies within such county during the preceding year, the committee desires to provide some flexibility within the county, not only because school district boundaries may change but also to take into account shifting low-income population patterns. Beyond such considerations, however, the committee expects that a school district will be allocated first an amount equal to its allocation for the preceding year, and then its pro rata share of that county's allocations over and above the previous year's allocation. Among the reasons the committee did not specify in the amendment to section 208 that the adjustments would go down to school districts is that it desired to avoid rigidity and to fit the formula to the availability of census data, which is not always available at the school district level. Further, in the committee view, the role of the State education agency under the act ought not to be circumscribed. Under the reported bill no change is made in the important responsibilities exercised by the State educational agencies in selecting criteria governing title I participation of school districts within the county.

Where more recent satisfactory data is available on the various components which comprise educational deprivation which is appropriately applicable to school districts within counties, the State educational agency under the statutes can use such data in making subcounty allocations in order to assure that funds go to school districts in proportion to their current need. Thus, there may be some shifts of allocations among school districts within counties under these conditions.

SECTION-BY-SECTION ANALYSIS

Section 107. Adjustments where necessitated by appropriations

Section 208 of the act is amended to provide that when the sums appropriated are insufficient to fund fully all maximum grants—

(1) The State agency programs for the handicapped, migratory children, and neglected and delinquent children in institutions will be allocated their maximum grants without any ratable reduction.

(2) Every county in each State will be allocated an amount equal to its allocation in the preceding fiscal year for grants to local educational agencies within each county.

(3) Every State educational agency will receive for administrative expenses 1 percent of the amounts allocated to State agencies and counties as provided in paragraphs 1 and 2, above, with the minimum specified in section 207(b) ($150,000 to every State).

(4) Any amounts remaining after allocations are made as described in paragraphs 1, 2, and 3 shall be allocated for grants to local educational agencies and for administrative expenses to State educational agencies in accordance with computations under the formula in section 203(a)(2).

Mr. MORSE. Mr. President, I further ask unanimous consent to have printed at the conclusion of my remarks an appendix to my statement as appendix A, the county-by-county tables showing the amounts which would be received under the formula in existing law as modified by the county savings clause.

The ACTING PRESIDENT pro tempore. Without objection, it is so ordered.

(See appendix A.)

Mr. MORSE. Mr. President, for comparison purposes, I ask unanimous consent that as appendix B there be printed at the conclusion of my remarks the county-by-county tables showing the effect of the $2,000 family income factor without the county savings clause.

The ACTING PRESIDENT pro tempore. Without objection, it is so ordered.

(See appendix B.)

Mr. MORSE. These two appendixes will permit an analysis of the merits of this part of the measure before the Senate.

The problem was complicated by one amendment to title I of Public Law 89-10 which was in the House bill. This amendment raised the administrative expenses for the operation of title I programs from the present minimum of $75,000 per year to $150,000 per year.

In hearings and in executive session, we were advised that in fiscal year 1967, because funds requested were insufficient to fully fund the authorization, some of the programs we had added in 1966 would not receive full entitlement. Among these programs were those operated or supported by State educational agencies providing funds to residential schools for handicapped children, State educational efforts on behalf of the children of migratory workers, and neglected and dependent children.

It was our view in committee that, since these groups constitute a comparatively small proportion of the total number of youngsters to be benefited, they should have first call on our resources. That is why the county savings clause provision as set forth in the excerpts from the committee report provided that the sums allocated to States will be distributed within the States in accordance with a priority which will allocate maximum grants without ratable reduction to the State institutions educating handicapped, migratory, neglected, and delinquent children; secondly, that each county would be allocated an amount equal to its allocation in fiscal year 1967 for grants to local educational agencies within each county; third, that of the amounts remaining, the minimum of $150,000 would be allocated to every State and that sums remaining would then be allocated in accordance with the formula which comprises the factors of $3,000 family low income, the option of either one-half State per pupil or one-half the national average per pupil cost and the number of AFDC children in families whose income exceeds $3,000 a year.

Frankly, what we tried to do—and I think we accomplished it—was to take the points of view of the many Senators who talked to us about this troublesome problem and work out a formula which in its composite did the best that could be done to accommodate the needs of the Senators.

I do not have to tell the Presiding Officer of the Senate [Mr. METCALF] or any of my colleagues in the Senate that, when a bill is brought to the floor of the Senate, if it is going to result in some Senators being faced with the reality that the formula means a reduction in their States for education purposes from what the States received either at the county-to-county level or at the State level or a reduction in the funds the State received the year preceding, then one is headed for a little trouble on the floor of the Senate.

One thing I think I have made clear on the floor of the Senate is that I try to accommodate Senators on a fair solution to their problems, consonant with the objectives of a piece of legislation.

I am rather proud of the formula we have worked out. It is not going to satisfy every Senator. We will hear of it before the day is over. But one thing I am sure of, and that is that my committee could not have done a better job, in my opinion, of trying to work out reasonable compromises of a very complex situation than we have worked out in the formula I have just explained to the Senate.

The second problem in title I is of a different order. It relates to the administration of the program by the Office of Education and it refers specifically to the rules, regulations, and guidelines issued by the Office of Education in its administration of title I provisions.

There were three amendments to the basic act in H.R. 7819 in the form that it passed the House which related to this problem. Two of the amendments, which are to be found in section 2 of H.R. 7819, our committee accepted without change and in our report, under the heading of "Section 2 of H.R. 7819 Comment" there appears this language:

> Among the most significant of the House bill provisions which the committee accepted without change in the reported bill are those found in section 2 concerning the rules, regulations, and guidelines issued by the Secretary of Health, Education, and Welfare, and by the Office of Education. The committee deems section 2 to be of major importance in the exercise of its legislative oversight functions and in the continuing discharge of this responsibility it will expect to receive at an early date evidence in the form of revised issuances containing the required citations as to the authority under which such issuances have been released. The committee wishes to clarify any misunderstanding that may exist. In the committee view section 2 is of broad applicability to all statements concerning the administration of programs authorized or amended by H.R. 7819. Each and every issuance now outstanding must be revised to include the required citation and each issuance hereafter must embody it.
>
> Section 2 speaks of "other legal authority." By this is meant that in addition to the statutory or court order basis which is paramount, there may be cited also where appropriate, an Executive order imposing a duty upon the Secretary or the Department or its constituent officers or agencies. In the committee view a citation of only legal opinion of departmental counsel would not meet the requirements of the section.

In section 158 of the House bill as it passed the House of Representatives, there appeared language offered by Representative WHITENER which would have modified section 182 of title I of Public Law 89-10. The committee considered carefully the thrust of this amendment and agreed with the intent expressed, but it felt that the provision as drafted, and as it passed the House, opened undesirable areas of ambiguity. It therefore amended the language in section 112 of the reported bill which amended the language of section 182 of title I of Public Law 89-750.

The Whitener amendment in the House-passed bill reads as follows:

> Section 182 of title I of Public Law 89-750, Eighty-ninth Congress, is amended by striking the period at the end of section 182, inserting a comma therein and adding the following language: "*Provided,* That compliance by a local agency with an order or decision of a Federal court with respect to student or faculty assignment policies within such agency shall entitle such local agency to receive funds under the provisions of this Act and compliance by said local agency with such court order or decision will constitute compliance with title VI of the Civil Rights Act of 1964."

It is our belief that in its amended form the language of section 112 of the reported bill more precisely accomplishes the objective to be achieved. It reads as follows:

> Section 182 of title I of Public Law 89-750, Eighty-ninth Congress, is amended by striking the period at the end of section 182, inserting a colon therein and adding the following language: "*Provided,* That for the purpose of determining whether a local educational agency is in compliance with title VI of the Civil Rights Act of 1964 (Public Law 88-352), compliance by such agency with a final order or judgment of a Federal court for the desegregation of the school or school system operated by such agency shall be deemed to be compliance with such title VI, insofar as the matters covered in the order or judgment are concerned."

One further amendment made by the House in H.R. 7819 was considered by the committee and it was our decision to delete it from the reported bill. This is the Fountain amendment. By this amendment the House sought to undo the conference agreement in this area contained in the 1966 amendments to the Elementary and Secondary Education Act.

Senators will recall that this area was one in which after many long and difficult sessions a conscionable compromise accepted by both House and Senate was achieved. We feel that this area is one that was well resolved in the 1966 conference and further that the testimony taken this year does not provide us with a basis for modification.

We propose therefore to go into conference without the language contained in section 3 of H.R. 7819 which passed the House, fully aware that this area must be fully considered but, on the whole, hopeful that we can persuade our colleagues in the conference committee from the House side that the bill we report from conference and to the President for signature will be one which does not contain the Fountain provision.

Other title I changes made in the reported bill include in section 108 a new program which, at a maximum cost of $50 million a year would provide incentive grants to those States whose educational efforts exceed the national educational effort as measured by the index set forth. I ask unanimous consent that portions of the committee report in the short summary and in the body of the report under the heading "Special Incentive Grants for Educational Effort" be printed in the RECORD at this point.

There being no objection, the excerpts from the report (No. 726) were ordered to be printed in the RECORD, as follows:

SHORT SUMMARY OF THE PRINCIPAL PROVISIONS OF THE BILL

> If H.R. 7819 were to be enacted as amended by the committee, the following changes would be made in existing law:
>
> Part A of title I of H.R. 7819 would:
>
> * * * * *
>
> VI. Add in section 108 of H.R. 7819, as title I of ESEA, at a cost not to exceed $50 million a year a new program of special incentive grants to be distributed among those States whose educational effort exceeds the national educational effort. Such payments, however, may not in the case of any State exceed 15 percent of the total amounts appropriated for this purpose in any year.
>
> *Special incentive grants for educational effort*
>
> In Public Law 89-10 as originally enacted, provision was made for incentive payments to be made to local educational agencies whose educational effort, as measured by the resources available to them devoted to elementary and secondary education met or exceeded 105 percent of their previous year's effort. This provision was deleted in the 1966 amendments to the act, before the provisions became fully effective, because of the unanticipated problems which would have occurred as it was then drafted had it been retained.
>
> During the course of hearings on H.R. 7819 many witnesses were queried concerning the desirability of restoring the concept to title I. In executive session amendments were offered which persuaded the committee to reinstate the concept in the form submitted by the minority.
>
> The recasting of the concept in terms of the effort index of a State as compared to the national average index, with payments being based upon the number of children enumerated under the title I entitlement factor times the product of $1 for each one-hundreth of 1 percent the State effort index exceeds the national average effort index with a ceiling of $50 million for the Nation as a whole, would seem to have met many of the objections previously voiced.
>
> The incentive grant concept as now constructed is designed to encourage State and local effort in school funding by offering a bonus to States which exceed the national effort index based on the percent per child income used within the State to support public schools.
>
> The formula devised uses the basic entitlement factors of title I and it is the expectation of the committee that State educational agencies will concentrate the uses of the funds provided in those schools within the State having high concentrations of educationally deprived children.

Mr. MORSE. I further ask unanimous consent that table IV entitled "Estimated Amounts Under Section 108 of H.R. 7819 To Provide for Special Grants Under Public Law 80-10," be printed in the RECORD at this point.

There being no objection, the table was ordered to be printed in the RECORD, as follows:

TABLE IV-A.—*Estimated amounts under sec. 108 of H.R. 7819 to provide for special grants under Public Law 89-10*

[Estimated State amounts] [1]

50 States and District of Columbia	$50, 000, 000
Alabama	2, 953, 769

District of Columbia	0

[1] Amounts estimated on basis of "one dollar per each 0.01 per centum" by which "a State's index exceeds the national effort index" and the sum of the 5-17 population, low-income factor, $3,000 per annum AFDC (January 1967); migratory children of migratory agricultural workers (F.T.E., 1965-66); children in foster homes (public) January 1967; dependent and neglected children (May 1967); juvenile delinquent (May 1967). estimated A.D.A. handicapped children 1965-66. Effort index based on estimated total expenditures for public elementary and secondary education from all sources, 1966-67 and total personal income, 1966.

Mr. MORSE. This table sets forth the estimated amounts which would accrue were this provision to be fully funded in this fiscal year.

I wish to make it quite clear from the standpoint of legislative history that the amount authorized for this purpose is over and above the amounts authorized by the formula under title I and ought to be requested separately. It was not our intent in taking this amendment to diminish amounts to be appropriated for other provisions of title I.

At this point, Mr. President, I should like briefly to discuss amendments which appear in the House bill and were accepted by the Senate. These were not taken from the House bill; rather, the committee considered carefully an amendment proposed by the distinguished Senator from Wisconsin [Mr. NELSON] which incorporated these amendments, together with an amendment he offered to title III of Public Law 89-10.

The committee heard excellent testimony from the Senator from Wisconsin and from witnesses on behalf of the totality of his amendment. In the committee markup sessions a consensus evolved that the substance of the amendment had much merit but that the realities of the budgetary situation were such that it would be exceedingly difficult this year to further expand the teacher aide concept, other than by the expansion of which we could almost be assured of acceptance in title I and the title V ESEA companion.

No one regrets more than I do that as floor manager of this bill I came most reluctantly to this conclusion, and I wish to commend the distinguished junior Senator from Wisconsin for the magnificent presentation of his concept and to assure him that at other times it is my hope that the budgetary squeeze will be less and that we will be able to more fully realize the goal we share. That goal is to expand our teacher aides on a wide scale to all public elementary and secondary schools over and beyond the 73,000 such aides who are now employed under title I, in the title I schools.

Many of us share the conviction of the junior Senator from Wisconsin that aides could assist the teacher in countless ways. They could relieve the teachers of all monitorial duty before and after school, and during lunch time and recess time. Aides could do much of the clerical work that teachers perform, such as marking papers and collecting materials and similar tasks. Aides especially qualified could work under the supervision of the teacher in the classroom to help those students in need of individual attention, and students that have fallen behind in various subjects.

Aides would have been recruited from among housewives, some of whom might have had a college background, and from other personnel such as retired teachers who would devote part of the day to such work.

There remains in the Senate bill the House-passed language to strengthen the provisions of the training of aides under title I and title V of Elementary and Secondary Education Act. Maximum cooperation is required between the aides and the teaching staffs during the training period.

At this point, Mr. President, I should like to say a word about the duration of programs under the various titles of Public Law 89-10 and the Adult Education Act of 1965. We had accepted from the House the 2-year extension of those provisions of the act relating to the education of Indian children and Department of Defense overseas schools. In all other respects we held to a series of 3-year extensions. This was dictated by our desire to give as much assurance as possible to school districts throughout the country on the duration of the elementary and secondary programs and the authorized level of funding we hope will govern the appropriations process in each of those years.

In our wish to meet this criterion we further have authorized studies to be made upon matters of obtaining more rapidly precise caseload data factors. We have also in title IV of H.R. 7819, of which I shall speak later, provided for a mechanism which we hope will help to bring into consonance the budgetary cycle of the local school district and the appropriations cycle of the Congress.

Mr. President, in title II of Public Law 89-10, the title which is concerned with library resource materials for all schoolchildren, we have extended the program with moderate increases each year for the 3-year period. I ask unanimous consent that at this point in my remarks there appear excerpts from Senate Report No. 726 covering the title II program.

The ACTING PRESIDENT pro tempore. Without objection, the excerpts were ordered to be printed in the RECORD, as follows:

SHORT SUMMARY OF THE PRINCIPAL PROVISIONS OF THE BILL

If H.R. 7819 were to be enacted as amended by the committee, the following changes would be made in existing law:

Part A of title I or H.R. 7819 would:

* * * * *

In part B the committee had adopted the House provision extending for a 2-year period expiring provisions of the school library title of ESEA relating to schools for Indian children and Department of Defense overseas dependent schools. Title II ESEA, in other respects, would be extended for 3 fiscal years, as will all other titles of ESEA.

* * * * *

TITLE II, ESEA, COMMENTS CONCERNING TEXTBOOKS, LIBRARY BOOKS, AND OTHER INSTRUCTIONAL MATERIALS

For the second year, States and localities are spending more than $100 million for the basic tools of education—school library resources, textbooks, and other instructional materials. Title II was enacted in response to an overwhelming and well-documented need.

More than two-thirds of the public elementary schools had no libraries and more than 80 percent of those with libraries lacked trained librarians.

Public school levels of 6.2 library books per pupil and $2.28 annual expenditure for books per pupil were below the recommended professional standards of 10 books and a $4 to $6 per pupil annual expenditure for books.

The committee is pleased that funds from title II have helped schools meet this need. State plans indicate that:

3,637 new public school libraries were established.

49 million students and 1.9 million teachers in public and nonpublic elementary and secondary schools now have access to books and materials acquired with Federal assistance.

Five percent, or a minimum of $50,000, of each State's allotment is available for administrative expenses. In addition to meeting administrative costs, State educational agencies are using these funds to conduct workshops, to provide consultant services, and to prepare publications for inservice teacher education in selecting and utilizing instructional materials. The committee heard testimony that 27 States are developing instructional materials centers for demonstration and evaluation, and 19 States have added school library supervisors to their staffs.

The ESEA Amendments of 1966 added Indian children enrolled in schools operated by the Bureau of Indian Affairs and children enrolled in overseas dependent schools operated by the Department of Defense to those children served by title II.

This year, more than $125,000 will be spent to provide textbooks, library books, and other instructional materials for Indian children. Provisions for BIA and DOD schoolchildren were authorized for only 1 year. To insure the continuance of the program and to make the authority consistent with the rest of the title, the committee proposes program extension through fiscal year 1969.

In recommending an extension of the basic title II authorization through fiscal year 1971 the committee recognizes that this area of ESEA authority has attained widespread public acceptance and that it has provoked far less controversy than some feared at its inception. The committee congratulates all parties who have worked together in achieving the record of progress that has been made.

Mr. MORSE. Mr. President, with title III of Public Law 89–10, the supplementary educational services and centers title, we meet a third great problem.

In the House bill as it came to us title III of the present act was superceded by a State-grant-State-plan program, 100 percent federally financed but administered in its entirety in terms of the funds appropriated, through State educational agencies.

Our committee had been aware of the long-range need to transfer from the Office of Education this program. Senators will recall that in the 1966 amendments to the act, we proposed, and the Senate approved, a 25-percent reservation of title III funds for administration by the State educational agency. We were unable to convince our colleagues in conference as to the wisdom of this provision.

Subsequently, the 1966 amendments enacted into law left with the Office of Education the responsibility for administering on a project basis all funds appropriated for the title.

It is on this previous history that our present recommendations are based. We feel, as we expressed in the report, that a transition should take place in the administration of title III. Our recommendations are that the transition take place in an orderly fashion over a 3-year period, with increasing responsibility in each year being placed upon the State educational agency.

We therefore propose that for fiscal year 1969, one-third of the funds appropriated; in fiscal year 1970, 50 percent of the funds appropriated; and in fiscal year 1971, 66⅔ of the funds appropriated for the title be administered by State educational agencies.

Concomitantly, we have sought to provide a mechanism which will bring as directly and as objectively as possible to the Congress an evaluation of the programs funded under this title, together with recommendations from every State in the Union as to further changes which ought to be made in this title.

Our committee report on title III is most comprehensive. I ask unanimous consent that at this point in my remarks excerpts from the short summary and the body of the committee report and the section-by-section analysis relating to title III be printed.

The ACTING PRESIDENT pro tempore. Without objection, the material will be printed in the Record, as follows:

SHORT SUMMARY OF THE PRINCIPAL PROVISIONS OF THE BILL

If H.R. 7819 were to be enacted as amended by the committee, the following changes would be made in existing law:

Part A of title I of H.R. 7819 would:

In part C of title I of H.R. 7819, which relates to supplementary educational centers and services under ESEA, the committee has adopted the House format of changing the existing program from a Federal into a State plan State grant operation. In doing so, however, it modified the House provision by:

(1) providing for a 3-year transfer period from the present pattern of operation to the proposed pattern of operation commencing in fiscal year 1969 under which for fiscal year 1969, 33⅓ percent of the funds appropriated would be released directly to State educational agencies, in fiscal year 1970, 50 percent of funds appropriated would be available, and finally in fiscal year 1971 this amount would rise to 66⅔ percent of the funds appropriated. In each year the remaining percentage of the funds would be administered by the Commissioner of Education as under existing law. The formula for apportioning funds among the States, however, remains that of existing law and was not disturbed either by the House or by the Senate committee. Fifteen percent of the amounts appropriated would be earmarked for title III programs for handicapped children.

(2) providing for the establishment and funding within the State educational agency of State advisory councils whose functions would include:

(a) Advising the chief State school officer on the preparation of the State plan for administration of title III grant moneys transmitted to the State.

(b) Reviewing annually the State plan and upon the basis of the review recommending to the chief State school officer modifications or amendments to the State plan.

(c) Reviewing applications received and upon the basis of such review recommending to the chief State school officer the disposition to be made of the applications and maintaining records of applications received.

(d) Annually reviewing for the purposes of evaluation the approved plans and programs funded under the authority within the State, transmitting its report upon the evaluation of plans and programs to the chief State school officer and to the National Advisory Council, together with its recommendations, based upon its analysis of the operations of the program, for such changes as in its judgment it believes to be warranted in the basic statute, the State plan, and the State or the National procedures governing the title III area.

(e) Based upon its evaluation and review procedures, selecting among programs funded, those which, in its judgment, it believes to be of an exemplary character. Arranging through the chief State school officer for appropriate dissemination of such programs to bring them to the attention of local educational agencies within the State, and through the National Advisory Council, to the attention of local educational agencies throughout the United States.

(3) Providing in parallel fashion for a change in the status of the present Advisory Committee on Supplementary Educational Centers and Services which currently is appointed by the Commissioner of Education by reconstituting it as a Presidentially appointed National Advisory Council on Supplementary Centers and Services, which is charged with the duties of (a) advising the Commissioner on the preparation of regulations; (b) reviewing the administration and operation of title III; (c) evaluating programs and projects carried out by the Commissioner; and (d) annually transmitting to the Congress its report containing recommendations for such legislative and administrative changes as it deems desirable.

Modest increases over the present $500 million authorization for title III are provided through increments of $25 million over the previous year's authorization for each of the 3 years the program is extended.

TITLE III, ESEA, COMMENTS—SUPPLEMENTARY EDUCATIONAL CENTERS AND SERVICES

The program of grants to local educational agencies to assist and stimulate the establishment of supplementary educational centers and services is specifically designed to encourage the adoption of new or improved educational ideas, practices, and techniques in elementary and secondary schools throughout the Nation. New and improved educational ideas, practices, and techniques may be introduced by a variety of programs and activities—planning and developing new educational programs; comprehensive programs involving a full range of new approaches designed to improve the quality of education available in the schools of whole areas of a State; special educationally related services designed to enable and encourage persons to enter, remain in, or re-enter education programs; academic services for adults; specialized instruction for advanced students, handicapped persons, or preschool children; making modern educational equipment available to children; educational radio and television programs; programs designed to meet critical educational needs; special educational services for persons who are isolated from normal educational opportunities; and encouraging community involvement in education programs.

Since the enactment of title III, in 1965, more than 5,000 proposals have been submitted by 15,000 school districts, requesting $509 million. The Commissioner of Education, acting upon the recommendations of State educational agencies, the National Advisory Committee, and experts, has approved for support 2,235 proposals costing $208 million—39 percent of the proposals submitted and 29 percent of the amounts requested. Title III programs have served nearly 10 million public and nonpublic elementary and secondary school pupils, 93,000 preschool children, 250,000 out-of-school youth, 255,000 classroom teachers, and 131,000 parents and other adults.

The central purpose of title III is more relevant today than it was in 1965 when it was first enacted. After 2 years of experience in administering title III, the partnership of school districts, States, and the Office of Education is beginning to produce results. The educational community realizes which kinds of projects are valuable. State departments of education, local school systems, and the Office of Education are working out procedures and organizational structures for administering a program to bring purposeful change and experimentation to the schools on a regular basis.

The new Federal-State relationships developed in the administration of title III have occasioned some adjustment; they have also resulted in success and promise. These cooperative relationships have resulted in unprecedented communication and interaction at the various levels of education administration in the country. This has produced creative thinking and has stimulated activity which, in the opinion of the committee, would not have developed without the title III program.

In an independent study of title III directed by Prof. Richard Miller, of the University of Kentucky, nearly all of the 20 scholars engaged in the study were laudatory about the accomplishments of title III during its first year. They predicted even more significant accomplishments in the future. (The full text of the study is available in the committee print, "Notes and Working Papers Concerning the Administration of Programs Authorized Under Title III of Public Law 89–10.")

Dr. Richard J. Miller, director of the study, writes:

"Title IV [of ESEA] more in terms of larger regions and title III more in terms of local school systems within States have stimulated more serious, fresh, and creative educational conversation than anything else in our national history."

Harry Passow, professor of education at Teacher's College, Columbia University, says:

"Of all parts of the ESEA, title III is perhaps the most exciting and without doubt, the most challenging."

And Thomas Pettigrew, associate professor of social psychology at Harvard, observes:

"Only in America do we find national legislation explicitly to foster innovation and change in education as goals in themselves."

ADMINISTRATION OF THE PROGRAM

Under present law, the major administrative responsibility for the program of grants for supplementary centers and services is located in the Office of Education. Local educational agencies apply directly to the Commissioner of Education. The Commissioner, after receiving the advice and recommendations of the appropriate State educational agencies, expert field reviewers, and the Advisory Committee on Supplementary Centers and Services, approves applications and makes grants directly to local educational agencies.

The House bill, as referred to the committee, would amend the basic administrative mechanism to provide that all of the funds appropriated for the program would be paid to the States in fiscal year 1968. The States would then carry out the program on the basis of a State plan approved by the Commissioner. There would be no requirement that funds be granted to local educational agencies. If a chief State school officer so decided, a State educational agency could retain the Federal funds and administer the program directly.

In 1965, during the original work on Public Law 89–10, the Senate considered and rejected a proposal to provide such an administrative mechanism for title III. At that time it was felt that the administration of the program should be vested in the Office of Education and that the committee would reconsider the question when the program was reviewed.

Last year, the committee did reconsider the question and recommended that 25 percent of the funds be administered at the State level. This recommendation was passed by the Senate but was rejected in conference. The program was extended for 2 years without such a provision.

The amendment proposed in the House bill, presented once again to the committee, questions concerning the appropriate role of the States in the administration of title III.

The committee devoted a significant portion of the hearings to the consideration of the administration of title III. Most witnesses favored an increased degree of responsibility for State educational agencies in the program. These witnesses expressed concern that, unless the States were given greater responsibility, the program would result in an alteration of the present roles of the Federal, State, and local governments with respect to their respective responsibilities for educational decisionmaking.

However, a number expressed concern that the impact of a program such as title III would be lessened in some areas if the responsibility for administration were vested solely in the States. It was contended that the nature of the program did not lend itself to the State plan-State grant mechanism which is being used in other education programs.

Those who favored the present law pointed out that expressed intent of Congress in the authorization of the program was to stimulate the adoption of new educational programs and techniques which would bring recent findings of research to bear on critical educational problems. Therefore, they contended, the national perspective of the Office of Education, together with its educational resources, was vital to carry out this intent of Congress. Moreover, the nature of a State plan program is such that the hard data necessary for Congress to review the operation of the program and, thereby, evaluate its success, is difficult to obtain. If the Commissioner is charged by Congress with insuring that its intent is being carried out, he must have sufficient administrative control to do so.

The following arguments in favor of the present administrative mechanism were offered by the Commissioner of Education:

"Given the limited funds available for title III and given the limited number of demonstrations which can be supported, a nationwide selection of projects based on independent judgment which seeks a common standard of excellence to meet the needs of the schools will do more to raise the quality of education than any other way of administering the program.

"Nationwide selection avoids unnecessary duplication and conserves both human and financial resources.

"Many State educational agencies are not yet prepared to take over the administration of title III.

"The proposed House amendments made no provisions for funding programs satisfying a uniquely national need—the educational needs of the big cities are a case in point.

"Under a State plan system at the present time, there would be a tendency in many States to favor the needs of rural districts over those of the large metropolitan areas.

"The Office of Education has the drawing power to attract some of the best talent in the country to help administer title III."

Witnesses who favored the House amendment argued that the present administration of title III constitutes a threat to the present relationship between the Federal Government and the State and local educational agencies. It was stated that title III prohibited State educational agencies from exercising their administrative responsibilities.

The executive secretary of the Council of Chief State School Officers made the following recommendation:

"* * * that title III should be amended in 1967 to require operating State plans for its administration in every State not later than July 1, 1968, with State plans becoming effective during the current fiscal year as rapidly as the States can prepare such plans and the U.S. Commissioner of Education can approve them. That is what H.R. 7819 authorizes, and we respectfully request your concurrence with that authorization. State systems of regional service centers, administered with the financial assistance of the Federal Government with Federal funds earmarked for the Federal Government's own purposes, could provide the coordinated supplementary services needed in all States under the arrangements of H.R. 7819."

The committee, being firmly committed to the concept of the primacy of local and State control of education, in areas other than those governed by the Constitution of the United States, feels that the major part of the administrative responsibility for all Federal programs should be at the State and local levels. Federal aid programs should not—as a side effect—be an instrument for altering Federal-State-local relationships in the educational system. At the same time, the committee intends that Federal programs be effective in attaining the stated purpose of those programs: in the case of title III, this is to improve the quality of education by encouraging the communities served by school districts to adopt new and improved educational ideas and techniques.

Title III has never been an attempt to undercut the general responsibility of the State educational agency for the schools within the State. It certainly is not an attempt to set up a system of federally run schools. It is not an attempt by the Federal Government to take over the operational responsibility for American education. This responsibility must remain on the local and State levels.

During the course of the committee's deliberations, it was decided that the primary responsibility for the administration of title III should be vested in the State educational agencies under State plans. However, a part of the program, focused on critical educational problems, would remain with the Office of Education.

The committee amendment would amend title III in its entirety, to provide for—

(1) A change in the administration of the program by establishing a State plan-State grant program;

(2) Appropriate systems of review and evaluation to insure that the intent of Congress is being carried out;

(3) The establishment of State advisory councils to advise the States in the administration of the program and to evaluate programs and projects funded under the title; and

(4) The strengthening of the reconstituted National Advisory Council through provision for additional responsibilities and greater independence.

STATE PLANS

Sections 305 and 306 would be entirely new sections, added by the amendment, which reflect the basic changes in administrative structure of the program. Section 305 provides that States desiring to receive payments under this title for any fiscal year establish a State advisory council within the State educational agency. Further, a State would, for each fiscal year it desires to participate, set dates for the submission of applications by local educational agencies to the State agency, and submit, in substantially approvable form, a State plan to the Commissioner for his approval. Any State which has had its State plan for that fiscal year approved may receive payments to carry out the State plan. Any State which is dissatisfied with the final action of the Commissioner in disapproving its plan has a right to a hearing and may resort to judicial review of the Commissioner's final action.

In order to be approved, a State plan would need to meet the following requirements:

(1) A detailed plan under which funds paid to the State will be expended solely for the improvement of education in the State through grants to local educational agencies. Such plan must include a statement of the educational needs within the State and the manner in which the State will use the funds paid to the State under the title to meet the educational needs included in the statement. It is expected that the States will conduct surveys involving objective criteria and measurements in order to ascertain the educational needs of persons within the State.

(2) Set forth the administrative organization and procedures to be used in carrying out the State plan, including the qualifications for personnel having responsibilities in the administration of the State plan. Such organization and procedures are to be set forth in such detail as the Commissioner prescribes by regulation.

(3) Set forth criteria for achieving equitable distribution of assistance under the title throughout the State. Such criteria are to be based on consideration of the size and population of the State, the geographical distribution and density of the population within the State, and the relative need within the State for the kinds of services and activities to be provided in light of the relative financial ability of local educational agencies within the State to provide such services and activities.

The committee expects the Commissioner, in approving State plans, to scrutinize the criteria set forth and to make certain that the unique needs of persons in densely populated areas and in sparsely settled rural areas are given special consideration in such criteria. Failure to give adequate consideration to any significant geographical area of the State or to any group should raise grave questions as to whether the State plan is in substantial compliance with the provisions of the statute.

(4) Provision is made for giving special consideration to applications from local edu-

cational agencies which are making a reasonable tax effort but which are unable to meet critical educational needs (including preschool education and bilingual education) for better facilities which arise because some or all of their schools are seriously overcrowded, obsolete, or unsafe. Projects to meet such critical needs may be designed for more efficient educational use of present facilities or, where necessary, for construction of new facilities.

It is the feeling of the committee that if there is a need for new and improved educational ideas, practices, and techniques in any aspect of our education program, it is certainly in the area of the critical problems now being faced by our schools. It is expected that the States and the Office of Education will *focus* their attention on solving critical educational problems with the resources available under title III.

(5) Provision is made for giving special consideration to applications for operational grants proposing to carry out programs planned and developed with assistance from planning grants under the title. In general, local educational agencies desiring to initiate operational programs should give considerable time and effort to planning and developing the programs to be initiated. The present law and the amendment provide for planning grants to assist schools in preparing high-quality programs. The committee is impressed with the quality of operational programs which have been developed with planning grants. Therefore, it is expected that operational grants will be preceded by planning grants and that applications for operational grants which are intended to carry out programs planned under a planning grant take precedence over applications for operational grants not so planned.

(6) Provide for the adoption of workable procedures for the evaluation of the effectiveness of programs assisted under the title; dissemination of the results of such evaluation and of other information concerning such programs; and adoption, where appropriate, of promising educational practices developed through such programs.

The primary purpose of title III is to stimulate the adoption of new and improved educational ideas, practices, and techniques in the schools throughout the Nation. This cannot be effectuated unless programs are evaluated and the results of evaluations are widely disseminated. It is for this reason that States are required to adopt procedures for evaluation and dissemination. Furthermore, if schools are to adopt new educational programs as the result of contact with title III programs, the means for obtaining information must be made available and technical assistance must be given to those schools for effectuating necessary changes. The committee urges the States to provide local educational agencies which have not had title III grants with assistance in adopting promising educational programs developed or demonstrated.

(7) Provide that not less than 50 percent of the amount which the State is eligible to receive under the State plan shall be used for grants for planning programs or projects and operational programs and projects under paragraphs (1) and (2) of section 303(2). Failure to so provide would not constitute a defect sufficiently serious as to require rejection of the State plan on the grounds that the omission renders the State plan unapprovable. However, such omission would, under the selective veto provisions of section 305(c), result in a withholding of 50 percent of the funds otherwise available to the State for use by the Commissioner in funding such projects.

Title III grants may be made solely for the purpose of assisting local educational agencies in planning, establishing, and carrying out programs which are designed to stimulate, and which hold promise of making substantial progress toward effectuating, the adoption of new and improved educational ideas, practices, and techniques in the schools throughout the State. This requirement is implicit in the very nature of title III. Unless satisfactory assurance is provided in the State plan that grants will be made for this purpose, the Commissioner may not approve the State plan. In order to assure that this requirement is implemented to the satisfaction of congressional intent, the amendment requires that at least 50 percent of the amount a State receives must be used for planning projects and operational programs specifically designed to be demonstration programs.

(8) Provision must be made that not less than 15 percent of the amount for which the State is eligible under section 305 shall be used for programs and projects for handicapped children.

(9) Contain policies and procedures which will insure that Federal funds made available under this title for any fiscal year will not be commingled with State funds and will be so used as to supplement and, to the extent practical, increase the fiscal effort that would, in the absence of such Federal funds, be made by the applicant for educational purposes.

(10) Provide for such fiscal control and funds accounting procedures as may be necessary to insure that Federal funds paid to the State under the title are properly disbursed and accounted for.

(11) It must provide for making an annual report and such other reports, in such form and containing such information, as the Commissioner may reasonably require to carry out his functions under the title and to determine the extent to which funds provided under the title have been effective in improving the educational opportunities of persons in the areas served by programs supported under the State plan and in the State as a whole, including reports of evaluations made in accordance with objective measurements under the State plan pursuant to paragraph (6) of section 305(b), and for keeping such reports and for affording such access thereto as the Commissioner may find necessary to assume the correctness and verifications of such reports.

(12) Provide that final action with regard to the proposed final disposition of any application (or amendment thereto) shall not be taken without first affording the local educational agency or agencies submitting such application reasonable notice and opportunity for a hearing.

(13) It must contain satisfactory assurance that funds received pursuant to the title by any local educational agency will not affect the amount of funds such local educational agency may receive in the form of State aid.

In approving State plans, the Commissioner is expected to carefully review each plan and the recommendations of the National Advisory Council with regard to the approval of each plan. If the State plan does not meet the standards set forth by law, the plan shall not be approved.

The committee recognizes the fact that the standards laid down by the amendment are high. It is expected that, in order to meet those standards, State educational agencies will expend a great deal of time and effort in the preparation of plans. It is for this reason that the amendment provides for a special payment to the State to defray the cost of the administration of State plans.

Further, the amendment provides that, should the State fail in some aspects to meet the requirements, it is not precluded from participation in the program. Subsection (c) of section 305 provides that the Commissioner may, if he finds that a State plan is in substantial compliance with the requirements set forth by law, approve a part of the State plan and pay to the State that part of the amount for which the State is eligible under section 305 which is necessary to carry out the part of the State plan so approved. The remainder of the amount for which the State is eligible under section 305 may be paid to the State if the unapproved portion of the State plan is brought into complete compliance with the requirements set forth in the title. The Commissioner may not make payments to a State under subsection (c) unless the amount necessary to carry out the approved portion of the State plan is at least 50 percent of the maximum amount for which the State is eligible under section 305.

Local educational agencies in States which do not submit State plans or whose State plans are not approved are not precluded from the benefits of title III. In such instances, with regard to local educational agencies, the program will continue as it is in present law.

STATE ADVISORY COUNCILS

Under the amendment, a State would create within its State educational agency a State advisory council whose functions include—

(1) Advising the State educational agency on the preparation of the State plan for administration of title III grant moneys transmitted to the State.

(2) Reviewing annually the State plan and upon the basis of the review recommending to the State educational agency modifications or amendments to the State plan.

(3) Reviewing applications received and upon the basis of such review recommending to the State educational agency the disposition to be made of the applications and maintaining records of applications received.

(4) Annually reviewing, for the purposes of evaluation, the approved plans and programs funded under the authority within the State, transmitting its report upon the evaluation of plans and programs and other activities to the State educational agency and to the National Advisory Council, together with its recommendations, based upon its analysis of the operations of the program, for such changes as in its judgment it believes to be warranted in the basic statute, the State plan, and the State or the National procedures governing the title III area.

(5) Based upon its evaluation and review procedures, selecting among programs funded, those which, in its judgment, it believes to be of an exemplary character. Arranging through the State educational agency for appropriate dissemination of such programs to bring them to the attention of local educational agencies within the State, and through the National Advisory Council, to the attention of local educational agencies throughout the United States.

ORGANIZATION OF STATE ADVISORY COUNCILS

The State education authority would appoint to the council individuals who are broadly representative of the cultural and educational resources of the State and of the public interest in education for the purpose of obtaining from them advice and counsel upon the operation of the title III program within the State.

While no number is specified for the council's composition, as established within the State educational agency, it must contain persons representative of the elementary and secondary schools of the State, institutions of higher education within the State, professional organizations of teachers and school administrators within the State, and of organizations promoting the improvement of education within the State.

Additionally, each council must contain at least one individual representative of areas of professional competence in dealing with the educational needs of handicapped children.

It is expected that State advisory councils will have members who are representative of persons who are otherwise educationally deprived.

Although the members of the council are to be representative of the cultural resources of the State, the amendment provides that the appointing authority may, if it so chooses, appoint nonresidents of the State to the advisory council. This provision could be particularly helpful to the State educational agency of a sparsely settled State to assure that it would have available advice of a professional nature, particularly for those projects or programs which are reserved under the proposed language for meeting the educational needs of handicapped children.

To assist the council in carrying out its responsibilities, a separate authority for funding of salaries and expenses of professional and clerical staff has been provided. The separate authorization for carrying out the detail of the council activity is parallel to the language with respect to the grant funds of title III which, as in the House version, may not be commingled with State funds.

It is a method which could alleviate some of the difficulties that might be encountered in some States which may have limitations upon the uses for which State funds may be employed. Individuals recruited to perform the professional and clerical functions incident to the State advisory council operation are specifically exempted from Federal statutes relating to employment and compensation.

The State educational agency would establish for such employees such rates of compensation as it deems appropriate.

APPLICATIONS PROCEDURE

Consistent with the philosophy embodied in title I of ESEA, applications could be received only from a local educational agency or a group of such agencies.

An application, although received from a local educational agency would, as at present, be planned, prepared, and if funded, carried out with the participation of persons broadly representative of the cultural and educational resources of the area to be served. The definition of the term "cultural and educational resources" is contained in section 304(a).

The application would be transmitted by the local educational agency to the State educational agency. The head of the State educational agency upon receiving the application would direct it to the State advisory council and to such panels of experts in the particular area of the application as he designates for review. In coming to his decision upon the disposition to be made of the application, the head of the State educational agency would consider the recommendations from both the State advisory council and the panel of experts provided under section 304 (b)(3).

The head of the State educational agency would not be bound to follow the recommendations provided to him if he deemed, after having considered the points raised, that the project, program, or center is consistent with the authority contained in title III and it is his judgment that the project is meritorious or vice versa.

TRANSITION TO STATE ADMINISTRATION

Since title III is already in operation, it was felt that, if the burden of administration were shifted to the States at one time, there would be a disjuncture of the continuity of the program at the local level. Further, it was felt that there were certain educational problems of such universal nature that attention at the national level is necessary.

Therefore, it was decided to provide a 3-year, three-stage transition period during which the funds appropriated would be turned over to the States. One-third would be made available to the States in fiscal year 1969, one-half in fiscal 1970 and two-thirds in 1971. The funds not made available to the States under State plans would be available for grants to local educational agencies in the same manner as funds are available under present law.

Generally, grants made under the title III program entail a tentative commitment to fund for a period of up to 3 years. At the present time, grants which have been made tentatively commit approximately $200 million in fiscal year 1969. The committee does not intend that participating local schools suffer from the change in administration. The Commissioner and the States are expected to cooperate in assuring continuity of local programs.

Under these circumstances, where there are existing tentative commitments to fund ongoing programs, an assumption on the part of the State of all or part of such commitments may be arranged. Thus, in individual cases, the committee believes that the State educational agencies and the Office of Education have sufficient flexibility under their respective authorities to fund projects jointly.

The Commissioner and the States are expected to come to agreement with regard to continuing programs before the State plans are finally approved.

It is the committee hope that State educational agencies will want to include in their State plans provisions for affording joint funding of programs in future years.

SPECIAL PROGRAMS AND PROJECTS

Section 306 authorizes the Commissioner to make grants to local educational agencies for programs or projects which meet the purposes of section 303 (uses of Federal funds) from funds allotted to the States but which are not available for grants under State plan. In the case of a State for which a plan has been approved for a fiscal year grants to local educational agencies in that State must be for programs or projects which show promise of making substantial progress toward meeting educational needs common to all or several States. The Commissioner is directed to give special consideration to applications proposing to improve the quality of education available to children of migratory workers and applications proposing to solve the critical problems now facing educators in the big cities and in remote, sparsely settled rural areas.

The Commissioner may not approve an application under section 306 unless the application has been submitted to the appropriate State educational agency for comment and recommendation with respect to the action to be taken by the Commissioner with regard to the disposition of the application. At least 15 percent of the funds granted under section 306 must be used for programs designed to meet the educational needs of handicapped children. In establishing the Bureau of Education for the Handicapped last year, the Congress provided that this Bureau "be the principal agency in the Office of Education for administering and carrying out programs and projects relating to the education and training of the handicapped. * * * " The committee expects the Commissioner to utilize the current resources and expertise of the Bureau of Education for the Handicapped and add to these resources, for the administration of title III projects related to the handicapped.

PAYMENTS FOR ADMINISTRATIVE EXPENSES, ADVISORY COUNCILS, AND EVALUATION AND DISSEMINATION ACTIVITIES

Subsection (b) of section 307 authorizes the Commissioner to pay to each State, in addition to the amount it receives under section 305, amounts equal to the sums expended by such State for activities described in section 303(b) (administration of State plans, advisory council activities, and evaluation and dissemination). The amount so paid by the Commissioner may not exceed an amount equal to 7½ percent of the amount allotted to such State pursuant to section 302 for any fiscal year or $150,000 ($50,000 in the case of Puerto Rico, Guam, American Samoa, the Virgin Islands, and the Trust Territory of the Pacific Islands), whichever is greater. The amount paid for the administration of the State plan may not exceed an amount equal to 5 percent of the amount allotted or $100,000 ($35,000 in the case of Puerto Rico, Guam, American Samoa, the Virgin Islands, and the Trust Territory of the Pacific Islands), whichever is greater.

This provision is made because the committee, being firmly convinced that high-quality education is unattainable on a wide scale without proper and efficient administration, the advice of experts, and program evaluation, is assuring that adequate funding will be available for that purpose. The funds paid to the States for these purposes are an additional appropriation and are not to be commingled with grant money. These funds will be appropriated as a separate line item in the appropriation.

The second sentence of section 301(b) was added by the committee amendment in order to assure that *all* of the funds appropriated pursuant to the first sentence of section 301(b) will be used for *grants to local educational agencies*. Such funds may not be used for administrative expenses at either the Federal level or the State level. The diversion of title III grant money for dissemination of information by the Office of Education or for conferences is contrary to the intent of Congress. Funds appropriated pursuant to such second sentence shall be used for the proper and efficient administration of State plans, the activities required of the National and State advisory councils, and evaluation and disssemination activities.

NATIONAL ADVISORY COUNCIL ROLE

The committee views the reconstitution of the present title III Advisory Committee into a Presidentially appointed National Advisory Council as being of major importance, since to this new body have been assigned responsibilities and the capability to fulfill them, which are essential to the carrying out by the Congress of its proper function of review and evaluation of programs it authorizes and funds.

There has been a growing awareness on the part of the committee of the need for a clear and rapid channel of communication which could be utilized to bring to it periodically and in an orderly manner, the views of all elements which make up the educational community on the way in which programs are operating, the projected funding levels which would be required for further operation, and frank and full presentation of those aspects of the program which may stand in need of change. Equally important is the flow of information regarding exemplary programs in order that recognition can be given to ideas and concepts which have worked and should therefore be emulated and adapted elsewhere.

It is also the hope of the committee that the National Advisory Council could become the forum for a mutually beneficial exchange of viewpoints between the Office of Education and the Educational community which could lead to the resolution of differences of approach.

As set forth in the reported bill the reconstituted National Advisory Council provides a mechanism for the satisfaction of these needs. The Council has no power to impose its judgment upon the Commissioner on any point but it can and should be heard before a decision is taken. The committee is confident that the counsel which would be advanced by such a body as is here proposed, would be of great value to the Commissioner. The reports and findings of the Council will be invaluable to the committee and the Congress.

NEW OR IMPROVED EDUCATIONAL IDEAS, PRACTICES, OR TECHNIQUES

Some concern has been expressed that the standard used by the Office of Education for deciding whether an application embodied an "innovative" approach has been too rigid and unrealistic. The committee understands that, if an idea, practice, or technique was in use in one part of the country it was not "innovative" in another area of the country. If this be the case, the standard is not in accord with congressional intent. The very term "innovative" causes the committee some concern. It is not subject to such a precise and rigid definition as has been given it by the Office of Education. For the purposes of title III the term "innovation" is defined as *the adoption of new or improved educational ideas, practices, or techniques.*

This definition will not support the setting of a nationwide standard. A "new or improved" approach in one area may not be "new or improved" in another area. That which is "new or improved" in a suburban school may not be appropriate in a rural school or a city school. Therefore, the standards for a school serving suburbs need not be the same for nonsuburban schools. The decision as to whether an application embodies a "new or improved" approach must be *made on the basis of the area to be served by the applicant and not according to an abstract national or State standard.* The committee expects the Commissioner and the States to set high standards and to require applicants to meet them. However, those standards must be based on the needs of the persons in the individual areas being served.

THE FUTURE OF THE PROGRAM

The committee feels that the administrative mechanism provided by the amendment is an improvement on present law and that it should be reviewed to the end that it be considered in other traditional State plan programs. State educational agencies can be strengthened by these added responsibilities. Both the Office of Education and the State educational agencies working cooperatively together can gain new insights into the educational needs of American schoolchildren and thus attain enhanced expertise as a result of mutual contact afforded.

It is our hope that title III can become a major instrument by which quality education can be made available to all American children. No child need be limited in his educational opportunity by reason of his race, religion, place of residence, economic circumstances, or handicap. The committee expects the Office of Education and State educational agencies to cooperate with local school districts in attaining this goal.

SECTION-BY-SECTION ANALYSIS

PART C—REVISION OF TITLE III OF ELEMENTARY AND SECONDARY EDUCATION ACT OF 1965

Section 131 amends title III of the Elementary and Secondary Education Act of 1965 in its entirety.

Appropriations authorized

Subsection (a) of section 301 of the existing law authorizes the Commissioner to carry out a program of grants for supplementary educational centers and services through fiscal year 1970.

The bill would amend this subsection to delete the fiscal year limitation on the duration of the program; thus making the duration of the program continuous with the authorization of appropriations (through fiscal year 1971).

Subsection (b) of section 301 of the existing law authorizes specific appropriations through fiscal year 1968, but for the 2 succeeding fiscal years only such sums may be appropriated as may be hereafter authorized by Congress.

The bill would add appropriations authorizations of $525 million for fiscal year 1969, $550,000,000 for fiscal year 1970, and $575 million for fiscal year 1971. In addition, the bill authorizes the appropriation for each of fiscal years 1968 through 1971 of such sums as may be necessary for the administration of State plans, the activities of the National and State advisory councils, and the evaluation and dissemination activities required under the title.

Allotment among States

Section 302 of existing law provides for apportionment of title III funds among the States and the outlying areas. The new section 302 provides for *allotment* instead of apportionment. The termination date of the authority to transfer funds to the Secretary of the Interior and to the Secretary of Defense would be set at the end of fiscal year 1969 (existing law terminates this authority June 30, 1967). Present law authorizes apportionment of the amount necessary for assistance *for children and teachers in elementary and secondary schools operated for Indian children by the Department of the Interior.* The bill would revise this provision so that there would be allotted to the Secretary of the Interior the amount necessary to provide programs and projects for the purpose of this title *for individuals on reservations serviced by elementary and secondary schools operated for Indian children by the Department of the Interior.*

The authority for reapportionment contained in the existing section 302 is recast to provide that the amount allotted to any State which the Commissioner determines will not be required during the period for which that amount is available shall be available for grants in that State under section 306, or if not needed for that purpose may be reallotted or used for grants under section 306 in other States.

With respect to amounts not granted in one fiscal year and made available under section 306 or reallotted, the bill authorizes a carryover of such funds so that they remain available for grants during the next succeeding fiscal year.

Uses of Federal funds

Section 303 provides for the uses of funds under title III. This section would be revised by inserting a new paragraph (2) setting forth, as a purpose for which funds are to be used under title III, the establishment or expansion of exemplary and innovative educational programs for the purpose of stimulating the adoption of new educational programs in the schools of the State. This paragraph specifically includes dual enrollment programs among exemplary and innovative educational programs; also educational research and demonstration projects described in section 503(4) and special programs for handicapped children are included as new educational programs which exemplary and innovative programs should be designed to stimulate.

The existing subsection (b) of section 303 is embodied in paragraph (3) of subsection (a) with the following principal modifications:

(1) Programs for supplementary educational services and activities are to be provided especially through new and improved approaches.

(2) Language is included similar to that contained in section 304(c) of existing law providing for initiating and carrying out programs or projects designed to meet critical educational needs (particularly projects which will result in more effective use of existing facilities) in the case of any local educational agency which is making a reasonable tax effort but which is nevertheless unable to meet such critical needs, including preschool education, because some or all of its schools are seriously overcrowded, obsolete, or unsafe.

(3) Bilingual education methods would be specifically included among the examples of supplementary educational services that may be funded.

(4) Encouraging community involvement in educational programs would be included in the listing of supplementary educational services and activities.

In addition to the uses of funds under grants made to local educational agencies in accordance with approved applications, the bill would add a new subsection (b) to section 303, providing that funds may be used for (1) administration of State plans, (2) obtaining technical, professional, and clerical assistance and the services of experts and consultants to assist the State and National advisory councils under the title, and (3) evaluation of plans, programs, and projects, and dissemination of the results of such evaluations. As stated in the analysis of section 301, these activities would be funded by separate appropriations.

Applications for grants and conditions for approval

Section 304 is revised to make its provisions, which concern the approval of applications for grants, applicable both to grants under the State plan and grants made by the Commissioner. The provision in section 304(b)(2) requiring the program to be consistent with criteria designed to achieve an equitable geographical distribution is deleted and transferred to the new section 305 setting forth the requirements for State plans. The new section 304 adds a provision that an application may be approved only if it has been reviewed by a panel of experts. The provisions regarding review and recommendation of the application by the State educational agency is transferred to section 306 concerning the Commissioner's approval of special programs and projects. The present subsection (c) of section 304, requiring that the Commissioner give special consideration to the application of any local educational agency which is making a reasonable tax effort but which is nevertheless unable to meet critical educational needs, is deleted; but substantially identical provisions are included in the uses of funds in the revised section 303(a) under paragraph (3)(F) and in the State plan requirements in paragraph (4) of the new section 305.

State advisory councils and State plans

The bill would add a new section 305 setting forth the requirements which must be met in order to have a State plan approved under this title. Subsection (a) provides, in addition to certain procedural requirements, that the State must establish a State advisory council within the State educational agency. The State advisory council must be broadly representative of the cultural and educational resources of the State and of the public. Included on the council must be persons representative of elementary and secondary schools, institutions of higher education, professional organizations of teachers and school administrators, organizations promoting the improvement of education, and areas of professional competence in dealing with children needing special education because of physical or mental handicaps. The legislation would make clear that nothing in it shall be construed to preclude the appointment of nonresidents of a State to the State advisory council of that State.

The State advisory council so established would advise the State educational agency on the preparation of the State plan as well as policy matters arising in the administration of the State plan and would review and make recommendations to the State educational agency on the action to be taken on each application. The State advisory council would also evaluate programs and projects assisted under title III and make reports to the National Advisory Council established by the new section 309.

Subsection (b) provides that the Commissioner approve a State plan if he determines that the plan submitted for that fiscal year—

(1) Sets forth a program (including educational needs, and their basis, and the manner in which the funds will be used in meeting such educational needs) under which funds under the State plan will be expended solely for grants to local educational agencies;

(2) Sets forth the administrative organization and procedures to be used in carrying out the State plan;

(3) Sets forth criteria for achieving an equitable distribution of assistance, considering the size and population of the State, the geographic distribution and density of population within the State, and the relative need of persons in different geographic areas and population groups within the State for the kinds of services and activities described in section 303, and the financial ability of the local educational agencies serving such persons to provide such services and activities;

(4) Provides for giving special consideration to the application of any local educational agency which is making a reasonable tax effort but which is nevertheless unable to meet critical educational needs, including preschool education and bilingual education, because some or all of its schools are seriously overcrowded, obsolete, or unsafe;

(5) Provides that applications to carry out programs or projects previously planned under this title will receive special consideration in approving grant applications.

(6) Provides for adoption of effective procedures (*a*) for the evaluation by the State advisory council of the effectiveness of programs and projects supported under the State plan, at least annually, (*b*) for disseminating the results of such evaluations and other pertinent information, and (*c*) for adopting promising educational practices developed through such programs or projects;

(7) Provides that at least 50 percent of the amount which the State receives to carry out the State plan for the fiscal year shall be used for planning projects described in paragraph (1) of section 303(a) and exemplary and innovative programs described in paragraph (2) of such section;

(8) Provides that not less than 15 percent of the amount received by the State for the fiscal year shall be used for special programs or projects for the education of handicapped children;

(9) Sets forth policies and procedures giving satisfactory assurance that Federal funds made available under this title will not be commingled with State funds and will be used to supplement and increase the fiscal effort that would, in the absence of such Federal funds, be made by the applicant for educational purposes;

(10) Provides fiscal control and fund accounting procedures;

(11) Provides for reports, including reports of evaluations made in accordance with objective measurements under the State plan pursuant to paragraph (6);

(12) Provides that final action regarding the proposed final disposition of any application shall not be taken unless the local educational agency or agencies submitting the application have been afforded reasonable notice and opportunity for a hearing; and

(13) Contains satisfactory assurance that no grants under this title will be taken into consideration in determining the eligibility of any local educational agency for State aid or the amount of such aid.

Subsection (c) of the new section 305 provides that, if the Commissioner finds that a State plan for any fiscal year is in substantial compliance with the requirements of subsection (b) of this section, he may approve that part of the State plan which is in compliance with such requirements. In such case, the Commissioner would make available to that State such portion of the State's allotment as he determines to be necessary for carrying out the part of the State plan which has been approved, but only if that amount is at least 50 percent of the maximum amount the State is eligible to receive.

Subsection (d) of the new section 305 provides that a State which has had a State plan approved may receive to carry out such plan up to 33⅓ percent for fiscal year 1969, 50 percent for fiscal year 1970, and 66⅔ percent for fiscal year 1971, of its allotment as determined for that fiscal year in accordance with section 302.

Paragraph (1) of subsection (e) provides that the Commissioner shall not finally disapprove any State plan unless the State educational agency submitting the plan is first afforded opportunity for a hearing.

Paragraph (2) of such section provides that whenever the Commissioner, after opportunity for hearing has been provided, finds that there has been a failure to comply substantially with any requirement in the plan of that State, or with any requirement in the application of a local educational agency, further payments shall not be made to the State under this title, or (if so determined by the Commissioner) the State may not make further payments to the local educational agencies affected by the failure, until he is satisfied that there is no longer any such failure to comply.

Paragraph (3) of subsection (e) contains the usual provisions for judicial review of the Commissioner's action with respect to State plans.

Subsection (f) provides for judicial review of the final action of a State educational agency if the local educational agency is dissatisfied with its final action with respect to approval of an application by the local agency.

Special programs and projects

Subsection (a) of the new section 306 provides that the amount of the allotment to any State (as determined in accordance with sec. 302) which is not made available under a State plan approved pursuant to section 305, shall be available to the Commissioner to make grants to local educational agencies for programs and projects meeting the purposes of section 303. In the case of an application from a local educational agency in a State which has an approved State plan, such programs or projects must hold promise of making a substantial contribution to the solution of critical educational problems common to all or several States. Applications must be submitted to the appropriate State educational agency for comment and recommendation before the Commissioner may approve an application under this section.

Subsection (b) of this section provides that not less than 15 percent of the funds granted under this section in any fiscal year must be used for programs or projects designed to meet the special educational needs of handicapped children.

Payments

Subsection (a) of the new section 307 authorizes the Commissioner to pay to each State the amount necessary to carry out its State plan as approved.

Subsection (b) of section 307 authorizes the Commissioner to pay each State amounts necessary for the activities described in section 303(b), i.e., administration of the State plan, the cost of obtaining technical, professional, and clerical assistance and the services of experts and consultants for the State advisory council, and evaluation and dissemination activities, except that (1) the total of such payments to any State could not exceed an amount equal to 7½ percent of the State's allotment for a fiscal year or, if greater, $150,000 ($50,000 for outlying areas), and (2) the amount paid for administration of the State plan could not exceed an amount equal to 5 percent of the State's allotment or, if greater, $100,000 ($35,000 for outlying areas).

This section also provides that no payments shall be made to any local educational agency unless the Commissioner finds that the combined fiscal effort of that local agency and the State with respect to free public education provided by that agency for the preceding fiscal year was not less than such combined fiscal effort for the second preceding fiscal year; and no payments shall be made to any State unless the Commissioner finds that the fiscal effort of that State for State aid for free public education for the preceding fiscal year is not less than it was for the second preceding fiscal year.

National Advisory Council

Under the existing law (sec. 306), an Advisory Committee on Supplementary Educational Centers and Services was established in the Office of Education.

The bill would replace that Advisory Committee with a new presidentially appointed National Advisory Council on Supplementary Centers and Services (sec. 309).

The National Advisory Council would advise the Commissioner in the preparation of general regulations; review the administration and operation of title III, including its effectiveness in meeting the purposes set forth in section 303; review and make recommendations with respect to each State plan submitted to the Commissioner under section 305 and application under 306; set forth procedures for submission of reports by State advisory councils to the National Advisory Council; review, evaluate, and transmit the reports of State advisory councils to the Congress, the President, and the Secretary of Health, Education, and Welfare; evaluate programs or projects under this title and disseminate the results of such evaluations; and make recommendations for improvements in title III and in its administration and operation.

The National Advisory Council would consist of 12 members, a majority of whom must be broadly representative of the educational and cultural resources of the Nation, including one person who has professional competence in the area of education of handicapped children. Membership on the Council would extend for a term of 3 years, and terms would be staggered. The Council is required to make reports of its findings and recommendations not later than January 20 of each year.

Labor standards

Section 310 contains the labor standards provisions set forth in section 308 of the existing title III.

Section 132. Effective date

The revision of title III set forth above is effective July 1, 1968, except that the provisions with respect to State advisory councils and the National Advisory Council shall be effective upon enactment.

The Commissioner is authorized, upon enactment, to take appropriate steps to implement the revised title III.

Mr. MORSE. Mr. President, in title V of Public Law 89–10, which is concerned with strengthening State departments of education, we have sought to meet halfway the House proposal that 100 percent of the funds for this title be transferred to the State. Currently, 85 percent of the funds flow to State educational agencies. Fifteen percent is reserved for funding by the Commissioner of special project grants.

We have done this by taking the 15-percent reservation to the Commissioner in existing law, and we have directed that 10 percent of the funds of this title be channeled to local educational agencies through the State educational agency for the purpose of strengthening the operations of local educational agencies. Five percent only remains to the Commissioner to fund projects in this area.

I am sure that I need not tell my Senate colleagues that the Department of Health, Education, and Welfare is not happy about that. It sincerely believes that we have gone too far. If I had thought we had, I would not be presenting a report to the Senate with my vote, and it comes to the Senate with my vote.

I think that the 5 percent that remains for the Department, although a reduced amount, will provide them with sufficient funds to meet those special circumstances and cases in which they ought to have the authority that the reservation of the 5 percent gives to them.

I think also that the adding of the 10 percent, which we have done, to the State agencies for local school districts planning, will be a great inducement to the local educational agencies to bring about the necessary internal, administrative, and operational changes that will give them a greater opportunity to do what they claim they want to do, and that is to perfect their administrative policies and practices and to improve planning of their educational programs. The committee kept the $15 million increase in title V–A added by the House. We did so as an inducement to the State educational agencies to help to bring about similar improvements, so that in time, a number of the functions that are now vested in the Department of Health, Education, and Welfare can be transferred to the States.

We believe it important that at least 5 percent be left with the Commissioner because we are made aware of projects now funded by the Commissioner which bring together the educational resources of a number of States to seek joint solutions to common problems. In my own State of Oregon, for example, we are cooperating with a number of States on projects involving the children of migratory workers, and I have had expressions of concern from educators in the Oregon State Department of Education lest this project which they believe to be vital should be left without adequate financing in future years. And it will be so left, unless we have what I consider to be the minimal reservation of funds in the Department of Health, Education, and Welfare.

In our recommendations to the Senate on title V we were also mindful of the administration recommendations for the addition of a new part B to title V for funding of comprehensive educational planning. This language does not appear in the House-passed version of H.R. 7819, although it was reported favorably by our sister committee.

We, therefore, have restored this language sought by the administration and have funded it with $15 million for this fiscal year and with $20 million a year for the 3 succeeding years. I ask unanimous consent that the material appearing in Senate Report No. 726 on part I–D of H.R. 7819 appear at this point in my remarks.

The ACTING PRESIDENT pro tempore. Without objection, the material will be printed in the RECORD, as follows:

SHORT SUMMARY OF THE PRINCIPAL PROVISIONS OF THE BILL

If H.R. 7819 were to be enacted as amended by the committee, the following changes would be made in existing law:

In part D of title I of H.R. 7819, are to be found amendments to title V of ESEA, concerned with strengthening State departments of education. Here the committee modified a House provision deleting the present 15 percent reservation of funds to the Commissioner by transferring it to the States. It did this by reducing the reservation for the Commissioner to 5 percent of the funds appropriated, while specifying that 10 percent of the appropriated funds would be henceforth transmitted, through the State educational agency, to local educational agencies for the purpose of strengthening their operations. In doing so, the committee left unchanged the $65 million authorization for fiscal year 1968 and the $80 million authorization for fiscal year 1969 of the House version of the bill. In conformity with the standard pattern of extending the duration of the titles, however, the committee added an authorization for $80 million for fiscal year 1970 and one of $85 million for fiscal year 1971.

The committee also, on the basis of testimony taken, and amendments submitted by Senator Nelson, broadened the uses to which title V funds may be put through the addition of a new paragraph encouraging the use of auxiliary personnel such as teacher aids in elemnetary and secondary schools.

The major addition to the House provisions on title V was the adoption by the committee, as a new part B of title V of ESEA, of an administration program providing for comprehensive planning grants to the States in the amount of $15 million for fiscal year 1968 and $20 million for each of the fiscal years 1969, 1970, and 1971 to carry out programs for the systematic planning and evaluation of education within each of the States.

Grants under part B of title V would be made on the basis of applications submitted through the State educational planning agency. The Commissioner is further authorized to make contracts or grants to public or private nonprofit agencies for specific projects to be conducted on an interstate regional or metropolitan area basis for planning of education in metropolitan areas covering more than one State.

Coverage under title V was further broadened by the committee to permit grants to be made to interstate commissions such as the Appalachian Regional Commission.

The current formula for apportionment of funds among the States under section 503 is based strictly on public school enrollment. As a result, sparsely populated States receive a smaller share of title V funds than their need warrants. To correct this inequity, the committee recommends a change in the allotment formula: of the funds available for basic grants under section 503, 40 percent will be allotted equally among the States; the remaining 60 percent will be distributed on the basis of public-school-age population.

The committee has been impressed with the benefits derived from the utilization of subprofessional personnel in classrooms across the country. For this reason, it recommends that specific attention be given to programs designed to encourage the full and adequate acceptance and utilization of auxiliary personnel, such as teacher aides, in elementary and secondary schools on a permanent basis.

The committee also recommends that the Commissioner's share of funds authorized under the special projects section, section 505, be reduced from 15 to 5 percent. Of the 95 percent reserved to the State educational agencies, 10 percent must be directed to local educational agencies. From the Commissioner's share, public regional interstate commissions and agencies for educational planning and research—such as the Educational Advisory Committee of the Appalachian Regional Commission—would become eligible to receive grants on the same basis as State educational agencies. The opportunities for initiating a revitalization of the State educational agencies ought to be afforded to local educational agencies, for that reason 10 percent has been earmarked for local agencies.

A new part B was added by the committee, to allow the States to conduct systematic, comprehensive, long-range educational planning at all levels. In order that State and local educational agencies may continue to carry out their present responsibilities and that Federal programs may meet the needs intended by the Congress, systematic planning must be encouraged. Therefore the committee proposes that it receive this measure of Federal support.

Any State interested in receiving a grant for long-range planning purposes shall designate or establish a single State agency as the sole agency for carrying out or supervising the carrying out of a comprehensive statewide program of systematic planning and evaluation of education. Higher education planning shall be included only if the State so elects, and a separate agency may be designated to carry out such planning, in coordination with the State educational planning agency.

Applications for funds under this part shall include provision for—

Setting statewide educational goals and establishing priorities among these goals;

Developing through analyses alternative means of achieving these goals, taking into account the resources available and the educational effectiveness of each of the alternatives (including, in the case of higher education, the resources and plans of private institutions in the State bearing upon the State's goals and plans for public higher education);

Planning new programs and improvements in existing programs based on the results of these analyses:

Developing and strengthening the capabilities of the State to conduct, on a continuous basis, objective evaluations of the effectiveness of educational programs; and

Developing and maintaining a permanent system for obtaining and collating significant information necessary to the assessment of progress toward the State's educational goals.

Seventy-five percent of the funds authorized for this part will be allotted among the States according to the following formula: 40 percent would be allotted equally among the States, and 60 percent would be allotted on the basis of the State's population. The remaining 25 percent of the funds would be reserved to the Commissioner of Education for special project grants and contracts.

For part A, the committee recommends an authorization of $65 million for fiscal year 1968, $80 million for fiscal years 1969 and 1970, and $85 million for fiscal year 1971. An additional $15 million may be made available for comprehensive planning under the new part B for fiscal year 1968, and up to $20 million each for fiscal years 1969 and 1970, and $25 million in fiscal year 1971.

SECTION-BY-SECTION ANALYSIS

PART D—AMENDMENTS TO TITLE V OF THE ELEMENTARY AND SECONDARY EDUCATION ACT OF 1965

Section 141. Duration and funds

This section amends section 501 of the Elementary and Secondary Education Act of 1965 to extend the authorizations through fiscal year 1971, to increase the appropriations authorized for fiscal year 1968 from $50 million in the existing law to $65 million, and to authorize appropriations of $80 million for each of fiscal years 1969 and 1970, and $85 million for fiscal year 1971.

Section 142. Inclusion of Trust Territory of Pacific Islands

This section would amend sections 502 and 701 of the Elementary and Secondary Education Act of 1965 to make the Trust Territory of the Pacific Islands eligible for grants out of the 2 percent reserved for outlying areas.

Section 143. Apportionment formula

This section would revise the formula for apportioning among the States the sums appropriated which remains after the set-aside for special projects. The present formula provides that up to 2 percent of this amount shall be reserved for the outlying areas, and that from the remainder $100,000 shall be apportioned to each State and the residue of such remainder apportioned among the States in proportion to their relative numbers of public school pupils. This bill would change the formula to provide that. of the amount remaining after the set-aside for outlying areas, 40 percent shall be apportioned equally among the States and 60 percent shall be apportioned among the States in proportion to their relative numbers of public school pupils.

Section 144. Encouragement of use of auxiliary personnel

This section amends section 503 of the act by inserting a new paragraph (7) describing programs and other activities to encourage the utilization and acceptance of auxiliary personnel (such as teacher aides) in elementary and secondary schools on a permanent basis.

Section 145. Comprehensive planning grants

This section further amends section 503 of such act by adding two new paragraphs. Paragraph (13) describes programs for providing grants to local educational agencies in metropolitan areas to enable them to engage in comprehensive planning, either alone or in cooperation with other agencies.

Paragraph (14) describes a program to be included in the overall program for each fiscal year under this section for distributing at least 10 percent of the apportionment of the State among local educational agencies on the basis of need to carry out any of the purposes of this title.

Subsection (b) of such section 145 would amend section 502 of such act to increase the portion of the sums appropriated pursuant to section 501 available to the State from 85 to 95 percent. Section 505 would be correspondingly amended to reduce the set-aside to the Commissioner for special projects from 15 to 5 percent.

Section 146. Grants to interstate commissions

This section would amend section 505 of the act, relating to the set-aside to the Commissioner for special projects, to authorize the Commissioner to make section 505 grants to public regional interstate commissions or agencies for educational planning and research.

Section 147. Comprehensive planning

This section would amend title V of the Elementary and Secondary Education Act of 1965 to make the existing sections of that title part A—headed "Grants for Strengthening Leadership Resources of Grants for Comprehensive Educational Planning and Evaluation"; and to add a new part B—Grants for Comprehensive Educational Planning and Evaluation.

Section 521 of the new part B authorizes the Commissioner of Education to make comprehensive planning and evaluation grants to the States in accordance with section 523 and special project grants pursuant to section 524, to the end of enhancing the capability of the several States to make effective progress, through comprehensive and continuing planning, toward the achievement of opportunities for high quality education for all segments of the population throughout the State. For this purpose, $15 million would be authorized for fiscal year 1968, and $20 million each for fiscal years 1969, 1970, and 1971.

Section 522 reserves 25 percent of the sums appropriated for carrying out this part for special projects under section 524. Of the remaining 75 percent, which will be available for grants to States under section 528, the Commissioner shall apportion not in excess of 2 percent among the Commonwealth of Puerto Rico, Guam, American Samoa, the Virgin Islands, and the Trust Territory of the Pacific Islands. The remainder would be apportioned as follows: 40 percent would be apportioned among the States in equal amounts, and 60 percent would be apportioned among the States in proportion to their relative populations. This section provides that a State's apportionment for fiscal year 1968 would be available for obligation through fiscal year 1969 and provides that the Commissioner may reapportion to other States sums which he determines will not be required, during the period of their availability, for grants to the State to which they were originally apportioned.

Section 523(a) of the new part would provide that a State applying for a grant out of its apportionment under section 522 must designate or establish a single State agency for carrying out, or supervising the carrying out, of a comprehensive statewide program of systematic planning and evaluation relating to education at all levels (including remedial education and retraining of adults), except that the field of higher education would be included only if the State so elects, and that a separate State agency may, in that event, be designated or established for carrying out or supervising the carrying out of such planning and evaluation program with respect to higher education. If the State does include higher education and decides to make a separate State agency responsible for carrying out, or supervising the carrying out, of higher education planning, either combined or separate applications may be submitted from the two agencies, and the Commissioner could allocate a State's apportionment between the two planning agencies.

An application for a statewide program of planning and evaluation is to include provision for setting and establishing priorities among educational goals for the State, developing through analyses alternative means of achieving these goals, taking into account the resources available and the educational effectiveness of each of the alternatives, planning new programs and improvements in existing programs based on the results of these analyses, developing and strengthening the capabilities of the State to conduct, on a continuous basis, objective evaluations of the effectiveness of educational programs, and developing and maintaining a permanent system for obtaining and collating significant information necessary to the assessment of progress toward the State's educational goals. (The application must contain satisfactory assurance that assistance under this section, together with other available resources, will be so used as to result in the maximum possible effective progress toward the achievement of a high level of competence with respect to each of these purposes.)

Section 523(b) of the new part provides that the Commissioner may approve an application only if it has been submitted to the chief executive of the State for review and recommendations; if it sets forth arrangements, where the State has designated a separate State higher education planning agency, for coordination with the rest of the State's educational planning program; and if it contains satisfactory assurance that the assistance provided under this section will be used primarily in strengthening the capabilities of the planning and evaluation staff of the State planning agency involved, or agencies carrying out parts of the program under the supervision of that agency. (Part of the funds may be used by the State's planning agency or agencies involved, to employ consultants or to enter into contracts for special projects with public or private agencies, institutions, or organizations having special competence in the areas of planning and evaluation.) The application must also make adequate provision for using funds (other than funds granted for higher education planning) to make program planning and evaluation services available to local educational agencies and, in the case of local educational agencies in areas, particularly metropolitan areas, with school populations sufficiently large to warrant their own planning or evaluation staffs, to assist (financially or through technical assistance) such agencies to strengthen their planning and evaluation capabilites and to promote coordinated areawide planning for such areas.

Section 524 authorizes the Commissioner of Education to make grants to public or private nonprofit agencies, institutions, or organizations, or to make contracts with public or private agencies, institutions, or organizations, for special projects related to the purposes of part B, to be conducted on an interstate, regional, or metropolitan area basis. Examples of such projects include educational planning in metropolitan areas covering more than one State or large cities within a State with due regard to the complexities of adequate metropolitan planning, comparative and cooperative studies agreed upon between States or metropolitan areas, conferences involving different States, and publications of general use to the planning of more effective and efficient educational services and other activities for the dissemination of information related to the purposes of this part.

Section 525 of this part authorizes payments in installments, and in advance or by way of reimbursement, with necessary adjustments.

TITLE V, ESEA, COMMENTS—STRENGTHENING STATE EDUCATIONAL AGENCIES

The increasing demands made on State educational agencies prompted the committee to make special provisions for strengthening such agencies, when the act was first passed in 1965. The eagerness with which the States embraced the program is evidence that congressional concern was fully justified. Of the $17 million appropriated for the first year of operation, 85 percent was available to the States in the form of basic grants. Personnel needs ranked high, with funds for 1,800 positions being requested to perform the following functions:

Studying, planning, developing, and evaluating educational programs and educational research—24.5 percent of the funds and 27 percent of the positions;

Extending instructional aid to local school authorities—23 percent of the money and 26.5 percent of the jobs;

General administration—17 percent of the funds and 16 percent of the positions;

Statistics and data processing—11.5 percent of the funds and 9.5 percent of the jobs;

Administrative aid to local educational agencies—6 percent of the funds and 7 percent of the positions.

Unfortunately, of the 1,800 jobs State agencies sought to fill, they succeeded in filling only 1,000, roughly one-half of them, 522, professional. Scarcity of trained personnel proved the bottleneck.

Mr. MORSE. Mr. President, title VI is one of the titles of ESEA which is of great and continuing interest, not only to members of the committee, but also to the Senate as a whole, because it deals with the education of our handicapped children. We have added in this title to the administration recommendations, for resource centers and services devoted to solving the educational problems of the handicapped child—provisions for the child that is both deaf and blind. I was dumbfounded, as we listened to the testimony before the committee, to learn that there are so many.

These resources and centers are a complement to those recently enacted into law in the Vocational Amendments Act but which serve young people of age 16 and beyond. I ask unanimous consent that excerpts from the short summary and the body of the report and the section-by-section analysis of the title VI amendments be printed at this point in my remarks without my taking the time of the Senate. It will give the Senate the statistics in regard to the very sad plight of a very large group of little boys and girls in this country who are both deaf and blind, which fact, I am sure that many of my colleagues, as was true in my own case, are quite unaware of.

The ACTING PRESIDENT pro tempore. Without objection, the material will be printed in the Record, as follows:

Short Summary of the Principal Provisions of the Bill

If H.R. 7819 were to be enacted as amended by the committee, the following changes would be made in existing law:

Part A of title I of H.R. 7819 would:

In part E of H.R. 7819 are to be found amendments to title VI, ESEA, relating to education of handicapped children. The committee, as in the House bill, adopted administration recommendations providing for regional resource centers, dissemination of information in the area of special education. $7.5 million is provided for regional resource centers in fiscal year 1968, $8 million for fiscal year 1969, $10 million for fiscal year 1970, and $12 million for fiscal year 1971. The committee further established additional centers and related services for deaf-blind children authorized to be funded at $1 million for fiscal year 1968, $3 million for fiscal year 1969, $7 million for fiscal year 1970, and $9 million ending June 30, 1971.

In the captioned films for the deaf program (which hereafter will include all handicapped) authorizations were raised from $5 million to $8 million for the current fiscal year and fiscal year 1968 and from $7 million to $10 million for subsequent fiscal years.

Title VI—Education of Handicapped Children

During the 89th Congress a new title was added to the Elementary and Secondary Education Act, designed to specifically meet the educational needs of handicapped children by providing Federal support for personnel recruitment, training, programs, and research. To further meet this need the Congress directed the U.S. Commissioner of Education to establish a new Bureau for the Education of the Handicapped. Although $50 million was authorized in title VI for education of the handicapped for fiscal year 1967, only $2½ million was made available and this was limited to planning purposes. In the current year only $15 million of an authorized amount of $150 million was requested by the administration. The committee is distressed that this critically important program has not received more attention by those who control the budget requests in the executive branch of the Government.

The committee is somewhat encouraged, however, by the prompt creation of the Bureau for the Education of the Handicapped and urges continued support for personnel and funds. Further demonstrating its support of this program, the committee has recommended the extension of title VI for 3 additional years and authorized appropriations of $175 million in fiscal year 1969, $200 million in fiscal year 1970, and $225 million in fiscal year 1971.

Many children are unable to learn because of undiagnosed physical or mental handicapping conditions. Early identification and educational evaluation of every handicapped child, at easily accessible centers throughout the Nation, is essential to assure the optimum development for each individual. For this reason, the committee proposes the establishment of regional resource centers, with an authorization of $7.5 million for fiscal year 1968, $8 million for fiscal year 1969, $10 million for fiscal year 1970, and $12 million for fiscal year 1971. These centers would—

Provide testing and evaluation services to determine the special educational needs of the handicapped child;

Develop educational programs to meet these special needs; and

Assist schools and other agencies in a particular region to provide educational programs for the handicapped child.

The regional resource centers offer unique opportunities for providing consultation, evaluation, and other services to local schools and their teachers. As the program develops, centers will be expected to concern themselves with such diverse educational challenges as education of the handicapped in rural areas in one State or combinations of States, or education of the handicapped in a central urban city. Maximum flexibility in approaching unique educational situations will be provided by allowing local educational agencies to apply for such centers singly or in combinations with other local and State education agencies and institutions of higher learning.

In addition, the committee would like to point out that, at present, the majority of this Nation's deaf-blind children receive no special education and training services. They remain at home, untreated and uneducated, their potential for optimum development in our society neglected. Neither specialists in the area of the visually handicapped nor in the area of the auditorially handicapped know the best approaches for meeting the multiple needs of the deaf-blind child. What is needed is a special environment which would provide the opportunity for many diverse specialists to contribute their expertise to total education and training programs for deaf-blind children. In the current school year seven educational facilities in the United States are providing special services for 110 of the estimated 500 deaf-blind persons under 21 years. The problem of lack of services is further highlighted by statistics on the effects, both visual and auditory, of the 1963–65 rubella outbreak. From evaluation studies conducted thus far, it is estimated that 1,500–4,500 rubella-syndrome children may have significant visual and auditory handicaps.

To help alleviate the inadequacy of services for deaf-blind children the committee proposes an amendment to authorize the Secretary to make grants to or contracts with public or nonprofit private agencies organizations, or institutions to assist in the establishment or operation of centers and services for deaf-blind children—including research, development, demonstrations, dissemination, and training of personnel. For such centers and services for deaf-blind children, the committee authorizes $1 million for fiscal year 1968 and $3 million for fiscal year 1969, and rising to $9 million in fiscal year 1971. The centers would serve as models for comprehensive diagnostic, educational and related services and they would be located in various sections of the country. This amendment would provide a national program to meet a national need for a group of multiple-handicapped children who have been, for the most part, neglected in terms of educational and training opportunities which would help assure their full potential for communication, adjustment, participation, and self-fulfillment in society.

Although the statutory authority to provide for deaf-blind centers is lodged in the Secretary of Health, Education, and Welfare, the committee expects this authority to be delegated to the U.S. Commissioner of Education and that the Commissioner will place the responsibility for the operation and planning of this program in the Bureau of Education for the Handicapped. One of the requirements for making a grant or contract to establish a center for deaf-blind children is that the center will provide, among other services, "comprehensive diagnostic and evaluative services for deaf-blind children" and "a program for the adjustment, orientation, and education of deaf-blind children which integrates all the professional and allied services necessary therefor." In setting forth these requirements the committee does not intend that all services necessarily be available physically at the center established under this bill. The committee realizes that to provide some of the services it may be necessary for the deaf-blind center to utilize persons with the necessary professional competence from nearby metropolitan areas without having them located at the center. For example, a center might be established at a university with some diagnostic and evaluative services being provided from professionally trained individuals located in nearby metropolitan areas or on other nearby university campuses.

It is estimated that some 300,000 teachers and other professional personnel specially trained for work with handicapped children will be needed within the next decade. At the present time, such professionals number only about 70,000.

The need for more professional personnel has been documented many times in congressional hearings. However, data on needs which were documented as long ago as a year are not accurate today. Title VI of ESEA with funds to support educational programs for the handicapped will encourage more school districts across the nation to open new classes for their handicapped children. Attempts to improve existing programs through a reduction in pupil-teacher ratios will further accentuate the need for more teachers. The immediate problem is to attract top quality young people and to interest them in careers of service for handicapped children.

Parents of handicapped children are met with two major problems. One is learning to adjust to the fact that their child is handicapped and will need special education, care, and attention. The second problem is in finding where such special care, attention, and particularly education is available. The committee feels that a concerted effort must be made to assist parents of such children and to that end has authorized a program (1) to assist parents in obtaining information about available special services; (2) to organize in a meaningful way, information about such services; and (3) to alert parents as to the sources and availability of such information.

The committee has, therefore, recommended a nationwide recruitment and information dissemination program. We propose an authorization of $1 million for fiscal year 1968 and for each of the three succeeding fiscal years for such recruitment and information dissemination activities.

One of the most successful existing Federal programs in the area of special education is the captioned-films-for-the-deaf program, authorized by Public Law 85–905, as amended. This program has four major components: research, production, dissemination, and training. The committee proposes expansion of the captioned films program to provide assistance for all handicapped children, thereby assuring a program of successive steps from the inception of an idea through research, development, testing, and final dissemination of a finished product in an actual educational situation. In expanding the authority of the Secretary of Health, Education, and Welfare to engage in the production of educational media for the use of handicapped persons—the committee does not intend to authorize the Secretary to engage in the direct commercial production of such media within the Department of Health, Education, and Welfare. Eight million dollars would be authorized for this expanded media program for fiscal years 1968 and 1969 and $10 million for each fiscal year thereafter.

The committee also proposes to authorize the Commissioner of Education to contract with private educational or research agencies and organizations. This change would allow the research program to take advantage of the expertise of private, as well as public, educational and research agencies and organizations. The committee would also authorize the training of research personnel and a limited amount of research and evaluation by the Bureau of Education for the Handicapped.

Section-by-Section Analysis

PART E—AMENDMENTS TO TITLE VI OF THE ELEMENTARY AND SECONDARY ACT OF 1965, AND RELATED AMENDMENTS

Section 151. Regional resource centers, services for deaf-blind children, recruitment of personnel

New Part B—Regional Resource Centers

This section would amend title VI (Education of Handicapped Children) of the Elementary and Secondary Education Act of 1965 by grouping the present sections 601 through 607 in a part A—headed "Assistance of States for Education of Handicapped Children", and by adding a new part B which would provide assistance in establishing and operating regional resource centers for improvement of education of the handicapped. Appropriations of $7,500,000 for fiscal year 1968, $8,000,000 for fiscal year 1969, $10,000,000 for fiscal year 1970, and $12,000,000 for fiscal year 1971.

As the name implies, a regional resource center would serve a particular section of the country, usually including several States. An application for a project under this section would be made by an institution of higher education, a State educational agency, or, in most cases, by a combination of such institutions or agencies. Funds could be provided pursuant to grants or contracts to pay part or all of the cost of establishing (including construction) of facilities and operating the center.

A regional resource center would provide a bank of advice and technical services upon which educators in the region could draw in order to improve the education of handicapped children. The primary task of the center would be to focus on the special educational problems of individual handicapped children referred to it. The center would provide testing and educational evaluation of the child, and in the light of this evaluation would develop a program of education to meet the child's particular requirements. Working closely with the handicapped child's parents and teachers, the center would then assist the school (or other appropriate agency) in providing this program, periodically reexamining and reevaluating the program, and making any adjustments which are necessary to keep the program responsive to the educational needs of the handicapped child.

New Part C—Centers and Services for Deaf-Blind Children

A new section 609 would be added to title VI of the Elementary and Secondary Education Act authorizing the Secretary of Health, Education, and Welfare to make grants to or contracts with public or nonprofit private agencies, organizations, or institutions to pay all or part of the cost of establishment (including construction, where necessary) or operation (or both) of centers for deaf-blind children.

In determining whether to make a grant or contract, the Secretary shall consider the need for a center for deaf-blind children in the light of the general availability and generality of existing services for such children in the part of the county involved.

A grant or contract under this section shall be made by the Secretary only if the center provides services including at least comprehensive diagnostic and evaluative services for deaf-blind children; a program for the adjustment, orientation, and education of deaf-blind children which integrates necessary professional and allied services; and effective consultative services for parents, teachers, and others who play a direct role in the lives of deaf-blind children to enable them to understand the special problems of such children and to assist them in the process of their adjustment, orientation, and education.

Such services may be provided to deaf-blind children (and, where applicable, other persons) whether or not they reside in the center and such services may be provided at some place other than the center, and may include the provision of transportation for any such children, including an attendant, and for parents.

The Secretary would be further authorized to pay the cost of research, and of development and demonstration of new or improved methods, approaches, or techniques which would contribute to the adjustment and education of deaf-blind children. Training of professional and allied personnel and the dissemination of materials and information is also authorized.

This section authorizes appropriation of $1 million for fiscal year 1968, $3 million for fiscal year 1969, $7 million for fiscal year 1970, and $9 million for fiscal year 1971.

New Part D—Recruitment of Personnel and Information on Educational Opportunities for the Handicapped

Title VI of the Elementary and Secondary Education Act of 1965 would be further amended by inserting a new part D (sec. 610) authorizing the Commissioner of Education to make grants to public or nonprofit private agencies, organizations, or institutions, or to enter into contracts with public or private agencies, organizations, and institutions, for projects which will improve recruiting of personnel in the various fields of education of the handicapped, or which will improve dissemination of information about programs and services available for the education of the handicapped.

For these purposes, an appropriation of $1 million would be authorized for fiscal year 1968, and such sums as may be necessary would be authorized for each of the 4 succeeding fiscal years.

Section 152. Transfer of definition and other technical amendments

This section would make certain technical changes in title VI and title VII of the Elementary and Secondary Education Act of 1965 to accommodate the other amendments made by this part of the bill.

Section 153. Including schools for Indian children operated by the Department of the Interior and Defense Department overseas dependents schools in title VI

This section would amend section 603(a)(1) of the Elementary and Secondary Education Act of 1965 to provide that for the fiscal year 1968, schools for the fiscal year 1968, schools for Indian children operated by the Department of the Interior and Defense Department overseas dependents schools will be allotted funds for assistance in educating handicapped children from the special appropriation authorized by existing law for allotments to outlying areas (Puerto Rico, Guam, American Samoa, the Virgin Islands, and the Trust Territory of the Pacific Islands).

Section 154. Short title of title VI of Elementary and Secondary Education Act of 1965

This section would add a new section 615 to title VI of the Elementary and Secondary Education Act of 1965 to provide that title VI may be cited as the "Education of the Handicapped Act."

Section 155. Expansion of instructional media programs to include all handicapped children

Subsection (a) amends paragraph (b) of the first section of the act dealing with captioned films for the deaf (42 U.S.C. 2491) to conform to objectives of Public Law 89–258. The amendment substitutes the word "handicapped" for the word "deaf" throughout such paragraph dealing with (1) research in the use of media, (2) distribution of educational media, and (3) the training of persons in the use of such media, for handicapped persons.

Subsection (b) amends section 2 of the act dealing with captioned films for the deaf (42 U.S.C. 2492) to define "handicapped" as "deaf, mentally retarded, speech impaired, visually handicapped, emotionally disturbed, crippled, or other health impaired persons."

Subsection (c). This section amends section 3 of the act dealing with captioned films for the deaf (42 U.S.C. 2493) to substitute the word "handicapped" for the word "deaf" throughout this section providing a loan service of captioned films and educational media.

Subsection (d) authorizes the payment of stipends to persons being trained in the use of films and media under this program.

Subsection (e) amends section 4 of the act dealing with captioned films for the deaf (42 U.S.C. 2494) to increase the authorization from $5 to $8 million for each of fiscal years 1968 and 1969 and from $7 to $10 million for each of fiscal years 1970 and 1971.

Section 156. Authorizing contracts, as well as grants, for research in education of the handicapped

This section amends section 302(a) of title III of Public Law 88–164 dealing with research and demonstration in the education of handicapped children to authorize the Commissioner to contract with public and private educational organizations, agencies, and institutions and to conduct research, surveys, or demonstrations, in addition to the authority the Commissioner now has to make grants to public and private nonprofit educational agencies, organizations, and institutions.

Mr. MORSE. Mr. President, in full committee, upon the recommendation of the Special Subcommittee on Bilingual Education, there was added to the Elementary and Secondary Education Act a new title VII.

I shall not speak at length in this statement of it because I know that my good friend and colleague, Senator YARBOROUGH, chairman of the special subcommittee, will wish to develop this program for the Senate.

I therefore ask unanimous consent, Mr. President, that there appear at this point in my remarks the section-by-section analysis relating to bilingual education which appear in Senate Report 726.

The ACTING PRESIDENT pro tempore. Without objection, it is so ordered.

Section-by-Section Analaysis

TITLE VII—BILINGUAL EDUCATION PROGRAMS

Section 701. Findings of Congress

This section states that Congress finds that one of the most acute educational problems in the United States involves millions of children of limited English-speaking ability.

Section 702. Amendment to Elementary and Secondary Education Act of 1965

This section adds a new title VII to the Elementary and Secondary Education Act.

NEW TITLE VII—BILINGUAL EDUCATION PROGRAMS

Section 701 provides that the new title may be cited as the "Bilingual Education Act."

Section 702 contains the declaration of Congressional policy.

Section 703 authorizes $15 million for fiscal year 1968, $30 million for fiscal year 1969, and $40 million each for fiscal years 1970 and 1971.

Section 704 provides for uses of funds for bilingual education programs.

Section 705 sets forth the conditions of approval for grant applications.

Section 706 is the payments section.

Section 707 provides that the Commissioner shall establish in the Office of Education an Advisory Committee on the Education of Bilingual Children.

Section 708 contains labor standards provisions.

Section 703. Conforming amendments

This section contains conforming, technical amendments.

Section 704. Amendments to Higher Education Act of 1965

This section amends title V of the Higher Education Act of 1965 to place emphasis upon bilingual education.

Section 705. Amendments to title XI of the National Defense Education Act of 1958

This section amends the title XI institutes program to place emphasis upon programs to prepare persons to engage in bilingual education programs.

Section 706. Amendments to Cooperative Research Act

This section amends the Cooperative Research Act to refer specifically to bilingual education.

Mr. MORSE. Mr. President, I turn now to the general provisions of the Elementary and Secondary Education Act. Senators will recall that in the 1966 amendments there was added for the dissemination of information purposes a $2 million authorization. This year we learned that this important function was not funded for fiscal year 1968. Budget requests for this item did not come to the Congress from the Bureau of the Budget and the White House. The matter was of considerable concern to the committee, and in extensive colloquy with administration witnesses we sought to make sure that in subsequent years the matter would not again be overlooked.

Further, and here I wish to pay tribute to Senator RANDOLPH, we increased the authorization by $1.5 million a year and directed that this amount be expended when appropriated for the purpose of providing technical services to rural schools at the elementary and secondary level. These would be schools serving children of communities whose population is less than 10,000 individuals. The Commissioner, upon receiving requests from State educational agencies, would provide counseling and technical assistance to elementary and secondary schools in rural areas in determining benefits available to them under Federal laws, in preparing applications and meeting other requirements for such benefits.

We also in this title authorized demonstration projects which hopefully will develop methods to prevent school dropouts. In the new section 707 of the Elementary and Secondary Education Act, the Commissioner of Education would be authorized to arrange by contract, grant, or otherwise, with the local educational agency to provide, upon the basis of a carefully thought-out plan of action, for the funding of projects which would involve the use of innovative methods, systems, materials, or programs which show promise of reducing the number of children who do not complete their education in elementary and secondary schools. This and the previous provision of title VI of H.R. 7819, which relates to a study and demonstration funding in the realm of school bus safety, we feel would apply intelligently Federal resources to the resolution of educational problems which are in the national interest.

I ask, Mr. President, that at this point in my remarks materials be printed from Committee Report No. 726 dealing with both of these matters.

There being no objection, the material was ordered to be printed in the RECORD, as follows:

SHORT SUMMARY OF THE PRINCIPAL PROVISIONS OF THE BILL

If H.R. 7819 were to be enacted as amended by the committee, the following changes would be made in existing law:

Part A of title I of H.R. 7819 would: * * *

In part F of title I of H.R. 7819 relating to the title containing general provisions applicable to ESEA the committee has:

(1) added to the presently authorized dissemination of information program funded at $2 million for fiscal year 1968, a new program of technical assistance to rural areas and provided authorization for funding of the combined program at $3.5 million for fiscal year 1968, $3.7 million for fiscal year 1969, $4 million for fiscal year 1970, and $4.2 million for fiscal year 1971, and

(2) added a new 4-year program of demonstration projects to prevent dropouts starting in fiscal year 1969 at yearly authorized appropriations of $30 million. (Under this program the Commissioner is authorized to arrange by contract or grant with local educational agencies for funding of programs in schools in urban areas having a high percentage of educationally deprived children to carry out, through innovative methods, systems, and materials those programs which show promise of reducing the number of children who do not now complete their education in an elementary or secondary school.)

TITLE VIII—GENERAL PROVISIONS

TECHNICAL ASSISTANCE TO RURAL AREAS

During the hearings, this year and last, many comments were received as to the need for establishment of a program of technical assistance for small schools in rural areas in order that federal assistance under the various statutes which have been enacted could be brought to bear in the solution of their problems.

The committee can well appreciate, in light of the initiation of a great many such programs within a relatively short time, the importance of strengthening the dissemination of information function in the Office of Education to enable assistance to be given to all elementary and secondary educational entities to enable each to obtain pertinent benefits to which entitlement may have been given.

In the Elementary and Secondary Education Amendments of 1966, there was authorized for such purposes $2 million. Regrettably, in the view of the committee, the budget estimates submitted contained no funding request for this program.

In colloquy with administration witnesses, the committee members upon a number of occasions returned to this point. It arose also in connection with committee questioning of witnesses upon the substance of section 701.

Based upon the testimony received, it was decided to increase by $1.5 million the existing authorization for fiscal year 1968 so that $3.5 million would be authorized for this program, $1.5 million of which would be used to fund the new rural areas program.

The term "rural areas" as it appears in the section is not defined, by intention, to permit some flexibility in the application of the benefits. The committee understands that except in very rare and unusual cases, the Commissioner would provide the assistance contemplated to elementary and secondary schools serving children living in communities of less than 10,000 population to meet their needs prior to expending funds in areas having a greater population.

DROPOUT DEMONSTRATION PROJECTS

The committee recommends an amendment which authorizes an additional $30 million for dropout prevention projects designed to make a concerted and concentrated effort to reduce the number of, or prevent, dropouts.

The program is designed to give maximum flexibility and freedom at the local level for experimentation. It is based on the premise that answers have not as yet been found which will make dramatic changes in poverty area schools. Under the proposal, local educational agencies will, after receiving the approval of the State educational agency, submit innovative proposals which zero in on a particular school or a particular classroom in an effort to have a major impact on the dropout problem. The amendment requires that eligible schools be located in an urban area, have a high percentage of children from families of low income, and have a high percentage of children who drop out of school.

Before approving projects conceived at the local level, the local school district is required to identify the school, analyze the reasons for and tailor programs to meet the dropout problem, provide effective procedures, including objective measurements of educational achievement, for evaluating the program, and secure the approval of the State educational agency.

Dr. James Conant in 1961 in his book, entitled "Slums and Suburbs," warned that social dynamite was accumulating in our large cities. Of course, the Nation is making some progress. In January of 1967 it was estimated that 97 percent of the 5- to 17-year-olds in America were in school. This as compared to 80 percent of the same age group in 1900. Also in January of 1967 it was conjectured that of the 3.8 million youngsters in this country then enrolled in ninth grade, some 2.9 million, or 77 percent, would graduate from high school. This represents a significant increase over similar data collected for the 2.7 million ninth graders of 1956, of whom only 1.9 million, or 69 percent, ultimately graduated.

But reversed, the figures do not appear so reassuring. We are still faced, according to these 1967 predictions, with a possible 23 percent dropout rate in 1970.

It has been estimated that approximately 1 million students drop out of school each year. The seriousness of the problem is magnified by the technological changes in our society which demand skilled workers. Currently in the United States, for every 10 unskilled workers there are seven skilled job vacancies. And by 1970, it is estimated, no more than 5 percent of our jobs will be unskilled. Yet today there are more than 1 million young men and women under 21 who have left school and are unemployed. And it is estimated that the decade of the sixties, by its conclusion, will have produced some seven and a half million such school dropouts.

SCHOOLBUS SAFETY

The number of schoolbus passengers increased 40 percent from 1960 to 1965 while the accident rate has increased 75 percent.

Sixteen million pupils travel daily on schoolbuses and this number may be expected to mount as suburban education systems grow.

Schoolbus safety standards throughout the Nation are spotty, substandard, and lax. The president of the Physicians for Automotive Safety has said that in the area of school transportation, not a single State is doing all that safety authorities believe must be done to protect human life on the highway. He also stated that we were shocked to discover that known safety measures that can be taken to safeguard young people in school vehicles are largely being ignored at the local level. In the area of driver training, the PAS says their 1967 survey shows the majority of States do not conduct an adequate program. Other controls are equally spotty: Only 18 States forbid pupils to stand in moving buses; 35 States have no maximum age for schoolbus drivers and of those with age limits, four permit an age of 70 and the rest allow 65.

While the Department of Transportation has authorized a $52,000, 6-month study on schoolbus safety practices to be undertaken by the National Committee on Safety Education of the NEA there seems to be little other effort in this area.

The National Safety Council has urged that some testing and research is desirable on schoolbus design and safety practices and the Department of Health, Education, and Welfare has acknowledged that study and demonstration projects are needed in this area which has long been neglected.

Section 601 calls for the Secretary of HEW to request from and cooperate with the Secretary of Transportation to have studies made and conduct demonstration projects on school bus safety and further to facilitate the adoption of minimum standards in the community for school bus safety. This should be done with a view toward receiving recommendations by January 31, 1969, from the administration with respect to including provisions in education legislation for the establishment of minimum safety standards for schoolbuses.

SECTION-BY-SECTION ANALYSIS

TITLE VI—DEMONSTRATION PROJECTS AND STUDY FOR SCHOOLBUS SAFETY

Section 601. Study and demonstration projects authorized

This section would authorize the Secretary of DHEW together with the Secretary of DOT to make grants, contracts or other arrangements for a study to determine minimum safety standards for schoolbuses and for demonstration projects for the purposes of such study. The Secretary would be required to report the findings of the study to the Congress by January 31, 1969, together with legislative recommendations concerning such standards.

Section 602. Appropriations authorized

This section would authorize $1 million for the purposes of this title.

PART F—AMENDMENTS TO TITLE VII OF THE ELEMENTARY AND SECONDARY EDUCATION ACT OF 1965

Section 171. Technical assistance to rural areas

Section 706 of the Elementary and Secondary Education Act of 1965 would be amended by inserting a new subsection (b) providing that the Commissioner, upon request from a State educational agency, shall provide counseling and technical assistance to elementary and secondary schools in rural areas in determining benefits available to such agencies and schools under Federal laws, and in preparing applications and meeting other requirements for such benefits.

The authorized appropriations in the present law for fiscal year 1968 would be increased from $2 million to $3,500,000, and appropriations would be authorized of $3,700,000 for fiscal year 1969, $4,000,000 for fiscal year 1970, and $4,200,000 for fiscal year 1971.

Section 172. Demonstration projects to prevent dropouts

A new section 707 would be added to Elementary and Secondary Education Act authorizing the Commissioner to assist local educational agencies in carrying out demonstration projects in schools which are located in an urban area, have a high percentge of children from low-income families, and have a high percentage of such children who do not complete their elementary or secondary education. Appropriations of not to exceed $30 million would be authorized for the period ending June 30, 1969, and $30 million each for fiscal years 1970 and 1971 for the purpose of this section.

Mr. MORSE. Mr. President, I have reserved until now my discussion of the reported bill as it concerns the perennial favorites of legislation, the federally impacted areas. Public Laws 815 and 874 since 1950 have been with us on an annual and biannual basis. Each session, however, their provisions are refined, and in each session we find that we can expand their concepts to cover additional purposes.

As Senators know, Public Law 89–313, the major school disaster bill, is on the statute books as an amendment to these laws. In title II of H.R. 7819 we have asked that the school disaster bill be authorized for an additional 3-year period and that there be incorporated within its provisions to cover what the majority leader and the junior Senator from Montana have fittingly described as pinpoint disaster. These are those sad occasions which occur with great frequency in this country, where as the result of tornado, or hurricane, or earthquake or other disaster, damage to school facilities occurs. This damage might not be extensive enough to warrant Presidential findings that a major disaster had occurred, but to the communities involved, the damage is as if it were a major disaster.

Essentially, these provisions are loans which are repaid to the Treasury, grant aspects covering a limited number of years following the disaster, and the amounts which are loaned or granted are only those amounts which the Governor of the State certifies are needed over and beyond the resources of the State or the community to meet.

Mr. President, with regard to the further provisions of the changes recommended in Public Laws 815 and 874, I believe they are fully covered in the committee report; and I therefore ask unanimous consent that relevant extracts from Senate Report No. 726 be printed at this point in my remarks.

There being no objection, the extracts were ordered to be printed in the RECORD, as follows:

SHORT SUMMARY OF THE PRINCIPAL PROVISIONS OF THE BILL

If H.R. 7819 were to be enacted as amended by the committee, the following changes would be made in existing law:

Part A of title I of H.R. 7819 would:

I. Provide that sums allotted to the State under the terms of the Labor-HEW appropriations act would be distributed within the State according to the following priorities:

* * * * *

In title II of H.R. 7819 which relates to federally impacted areas under Public Laws 815 and 875, the following changes are recommended: Adoption of language relating to:

(1) clarification of definitions,

(2) effective date provisions,

(3) extension of Public Law 89–313, the School Disaster Act,

(4) administration proposals modifying provisions relating to school construction assistance on Indian lands under Public Law 815,

(5) deletion from Public Law 874 of provisions requiring that certain contributions be deducted from entitlements under that act,

(6) the Chamizal international boundary change, and

(7) repeal of provisions requiring the use by States of mandatory group rate provisions under Public Law 874.

Further, the Commissioner of Education was provided with discretionary authority to waive certain requirements of Public Law 815.

The committee estimates, upon advice from the Office of Education, that the total cost would be under $10 million annually for the foregoing changes.

The committee, while extending for a 3-year period the major school disaster provisions of Public Law 89–313, has further expanded these provisions to provide protection to schools in communities which may in the future suffer pinpoint disasters such as fire, flood, hurricane, earthquake, storm, or other catastrophe. The loan program, which provides for replacement of facilities, would be invoked upon the certification of the Governor of the State that the pinpoint disaster had occurred and that loan assistance is needed, in addition to State and local funds which are available, to meet the emergency.

TITLE II, H.R. 7819—COMMENTS

AMENDMENTS TO PUBLIC LAWS 81–815 AND 81–874—ASSISTANCE FOR SCHOOL CONSTRUCTION AND CURRENT EXPENDITURES IN IMPACTED AREAS

Extension of impact aid

The temporary provisions of Public Law 81–874 providing grants to local educational agencies to compensate for the burdens imposed by Federal activity in the school district are extended by the bill to June 30, 1971. The corresponding provisions of Public Law 81–815 relating to school construction in such areas are extended to June 30, 1971.

Clarifying definitions of "Federal property"

The bill would amend Public Law 81–815 and Public Law 81–874 to spell out plainly that the term "Federal property" includes any interest (under an easement, lease, license, permit, or other arrangement) in any property defined as "Federal property," and any improvements (other than pipelines or utility lines) on such property.

The bill would amend Public Law 81–874 by eliminating the definition of "other Federal payments" in section 2(b), by authorizing computation of entitlement under section 2(a) without considering the amount the local educational agency derived from other Federal payments with respect to the real property acquired by the Federal Government and which forms the basis for such entitlement; and would repeal section 3(e), thus eliminating the requirement that certain Federal contributions with respect to Federal property be deducted from entitlement under section 3.

MODIFYING PROVISIONS RELATING TO SCHOOL CONSTRUCTION IN OTHER FEDERALLY AFFECTED AREAS

The bill would change the reference to "Federal property" in section 14 of Public Law 81-815 to "Indian lands," and would liberalize existing law in two ways. First, it would amend the existing subsection (a) of section 14 in a manner which would retain the "burden and effort" requirements but would provide that once a local educational agency qualifies for assistance, it would receive sufficient funds to provide minimum school facilities for all the "unhoused" children in its school district. Second, the bill would add a new subsection (b) to section 14, basically patterned on subsection (2), but the burden and effort requirements would be eliminated. This will make qualifying for assistance easier, and the amount of assistance available in such cases would be limited to the cost of providing school facilities for children who reside on Indian lands. The bill would make section 14 applicable only to a local educational agency which provides free public education for children who reside on Indian lands, and then only if (1) the total number of such children represents a substantial percentage of the school population in that district, or (2) if the Indian lands constitute a substantial part of the school district of the local educational agency, or (3) if the agency provides free public education for at least 100 children who reside on Indian land outside the school district. The requirements in items (1) and (3) are in existing law; item (2) would be added.

The cost of these amendments is estimated to be, for fiscal year 1968, approximately $4 million.

MISCELLANEOUS AMENDMENTS

Public Law 89-750 amended Public Laws 81-874 and 81-815 to provide that, effective after fiscal year 1968, where free public education for children who reside on Federal property within the school district of a local educational agency is not or cannot be provided by such agency, there would be deducted from the Public Law 874 payments to that agency for the "B" category of children an amount equal to the additional expense to the United States of educating a full Federal expense the category "A" children on base. In addition, the 1966 amendment would prohibit school districts in a State from counting for purposes of entitlement for "B" category children if State law prohibits expenditures of State or local funds for the education of children living on that property. The present bill would defer to fiscal year 1970 the effective date for operation of these provisions in order to provide ample time for States to make appropriate adjustments, if it desires.

The bill would repeal the mandatory group rate provisions in subsection 3(d) of Public Law 81-874 as amended by section 201(b) of Public Law 89-750, to have been effective for fiscal years beginning after June 30, 1967.

Section 201(d) and section 227 of Public Law 89-750 authorized payments at the "B" category rates of payment under sections 3(b) of Public Law 81-874 and section 5(a)(4) of Public Law 81-815 because of children whose membership in the schools of a local educational agency resulted from a change in residence from land transferred to Mexico as part of a relocation of an international boundary of the United States. A provision in the 1966 law made appropriated fund unavailable during fiscal year 1967 to make the additional payments under Public Law 81-874. The bill would authorize payment of the additional amount a local educational agency would have been entitled to receive under the 1966 law to be added to such agency's entitlement for the first fiscal year for which funds appropriated to carry out the act may be used for such purpose.

The bill would authorize the Commissioner of Education to waive the requirement in subsection 5(f) of Public Law 81-815 where unusual circumstances exist to justify such waiver.

The limitation in existing law creates an inequity in some few school districts where, for example, a Federal grant is based in part on membership of children residing in Federal housing and the housing subsequently becomes non-Federal property, or on the membership of children whose parents are employed in a Federal activity, such as a dam or reclamation project, which activity was completed or greatly reduced. In these types of cases, the children formerly classified as federally connected because of such Federal housing or activity may nevertheless remain in the school district when the Federal housing is sold or the Federal activity ceases. This results in a substantial decrease in federally connected children, but little or no decrease in total enrollment in the district. At a subsequent time, increased or reactivated Federal activities may cause a substantial increase in the number of federally connected children in the district, and create a critical need for new school facilities; but under the provisions of subsection 5(f) the district is not eligible for additional Federal assistance to house the new increase in federally connected children until this increase exceeds the total number of federally connected children which formed the basis for payment on the last eligible applications.

The provisions of subsection 5(f) are considered to be reasonable and well adapted to the problem that exists in most federally impacted districts. It makes possible using the moving increase period and base year, on an overlapping basis, yet prevents paying twice for the same increase. It does not fit those few situations described above where at some period in the past, perhaps as long ago as 8 to 10 years, the federally owned housing became non-Federal or other Federal activities were discontinued or greatly decreased and most of the former federally connected children remained in the district as non-federally connected children.

This additional waiver provision is intended to relieve only the extreme hardship caused by the type of Federal impacts discussed above. It is intended to be used only in those situations where an impact that occurred a number of years earlier created a continuing need for the school facilities which were constructed to house the federally connected membership because they remained in the school district as nonfederally connected pupils, and the school facilities constructed earlier with the aid of Public Law 81-815 funds are not currently available to house the subsequent increase in federally connected membership resulting from a new or increased Federal activity.

The cost of these amendments are estimated, on the basis of fiscal year 1967, to be less than $6 million.

MINIMUM SCHOOL FACILITIES

The committee recommends establishment of a more up-to-date concept of "minimum" school facilities than was included when the law was originally enacted in 1950 and which has been followed since that time. Educational needs and programs have changed materially since 1950 and, insofar as possible, the type of the facilities to be constructed should meet current educational needs. It is intended that this more liberal concept of "minimum" school facilities apply to the entire Public Law 815 program, but it is particularly significant for section 14. The committee supports the following statement included in the House Report No. 188 which accompanied H.R. 7819:

"Public Law 815 was enacted September 23, 1950, to provide Federal assistance for the construction of school facilities in areas in which Federal activities have been or are being conducted. Section 210(10) of the original act (now sec. 15(9) defined school facilities as follows:

"The term 'school facilities' includes classrooms and related facilities; and initial equipment, machinery, and utilities necessary or appropriate for school purposes. Such term does not include athletic stadiums, or structures or facilities intended primarily for athletic exhibitions, contests, or games or other events for which admission is to be charged to the general public. Except as used in sections 203 and 204, such term does not include interests in land and off-site improvements."

Under the terms of this original act quoted above, eligible school districts could use the Federal grants to construct any type of school facility desired except those expressly prohibited by the second sentence of section 210(10). The term "minimum school facilities" had not been incorporated into the legislation introduced.

In 1953 there were major changes made in some provisions of Public Law 815 by the passage of Public Law 246. These changes incorporated into the act the concept of "minimum school facilities." The act, as amended by Public Law 246, provided that Federal payment to an eligible school district in no event could exceed the cost of constructing "minimum" school facilities in the district and the following provision was added to section 210(11) (now sec. 15(10)):

"Whether or not school facilities are minimum school facilities shall be determined by the Commissioner, after consultation with the State and local educational agencies, in accordance with regulations prescribed by him."

The amended act did not define minimum school facilities, but House Report 702, dated July 3, 1953, included the following statement:

"The term 'minimum' school facilities used in the bill does not mean that the test to be applied will be one based on the use of inferior materials or on the provision of inadequate space for the basic school needs of the children. *There is no substantive difference between 'minimum' and 'complete' school facilities so far as facilities for classroom, administrative, or operational purposes are concerned.* The difference between these two terms comes primarily in the fact that under the term 'minimum' school facilities, allowance is not made for a room which must be used *exclusively* as an auditorium, a gymnasium, or for some other special activity. It should be further pointed out that the term 'minimum facilities' merely insures against Federal participation in expenditures beyond those *needed to conduct an adequate school program,* and hence, spreads Federal funds as far as possible to meet adequately the basic needs. Under this concept, *the Federal payment to the school district will be based on the cost of the type of facility which the average school district has in recent years been building out of its own funds.*"

Since the Federal law did not specifically define "minimum school facilities," the Office of Education followed the guidelines given in the committee report. Under this concept Federal funds have been approved to construct school facilities of the size and type which school districts have been providing in recent years with their own funds but have generally excluded single-purpose auditorium, and single-purpose gymnasium.

The committee believes that the concept of minimum school facilities has served a useful purpose in this law for the past 14 years and that it should be retained in the act to prevent unnecessary or unwise expenditure of Federal funds. *However, the committee feels that the concept needs to be modernized to fit the current trends in educational programs, techniques, and pur-*

poses. The last session of Congress began this change with the passage of Public Law 89–750 by requiring the applicant to give consideration to excellence of architecture and design of any building constructed with the use of Federal funds, by authorizing not to exceed 1 percent of the project grant for incorporation of works of art in building plans and by requiring that all facilities having Federal funds be made readily usable by handicapped persons. The committee feels that it should give further guidelines in this report for updating the concept of minimum school facilities in line with current educational needs and technology.

A school district should not be prevented from using Federal funds to construct an auditorium or a gymnasium or both if justified by the size of the schools' enrollment, the educational program to be conducted and standards and practices in the State. With new devices for instruction becoming more widely used such as educational television, the auditorium or gymnasium may be used more intensively than any other special facilities in the entire school building. *The committee believes that minimum school facilities should include in addition to regular classrooms, special rooms for such purposes as speech therapy, remedial reading, music appreciation, language laboratories, electronic data processing, and other facilities and equipment necessary for and useful in conducting special programs or activities for educationally deprived children. No longer should the Commissioner refuse, as he has in the past, to approve inclusion of features in buildings or other specialized facilities until their use becomes common practice in a State. The criteria to be used should be their need in the light of the school program operated by the applicant school district.*

The committee also believes that it is within the concept of minimum facilities to use Federal funds particularly under section 14 in appropriate situations for construction of consolidated school facilities in cases of consolidation of small districts or to replace small isolated, inadequate buildings with modern facilities; even though the district may have enough classroom space to house all of the children. The Commissioner should have considerable leeway in determining what constitutes minimum school facilities in specific situations in consultation with the State educational agency. However, he should set forth in regulations or in operating instructions the guidelines to be followed in making these determinations.

This amendment to section 14 was recommended by the administration in a letter dated April 26, 1967, to Senator Lister Hill, chairman of the Senate Committee on Labor and Public Welfare, by Ralph K. Huitt, Assistant Secretary for Legislation. That recommendation reached the Congress too late to be included in the Elementary and Secondary Education Act amendments which have been passed by the House.

Excerpts from Senate Report No. 1154, dated May 1966, on the 1967 Interior Department appropriations

The committee urges the Department of the Interior to study the desirability of Federal financial assistance to public school districts for construction of public school facilities to serve Indian children; and if such assistance is determined to be desirable, to propose legislation to the Congress to authorize the assistance. A report on this matter will be made to the committee by January 15, 1967.

The committee feels that some thought should be given at this time to those children who are not now served by existing school facilities, particularly in Alaska. Regional high schools and boarding facilities or their equivalent would at least be a partial answer to the problem of keeping children in school and upgrading their general education and their economic efficiency.

Excerpts from the letter, dated January 27, 1967, from the Secretary of the Interior to the chairman of the Senate Appropriations Committee

In compliance with Senate Report No. 1154, dated May 10, 1966, on the 1967 Interior Department appropriation bill, we wish to make the following report:

"We have carefully studied construction proposals which have been requested by several public schools enrolling Indian children, and find that there is a dire need for additional classroom space to meet more adequately present and growing Indian enrollments, and also to provide facilities to accommodate special educational programs so necessary in improving Indian education.

"Inasmuch as funding for construction assistance to public schools enrolling Indian children already is a function of the Department of Health, Education, and Welfare under Public Law 81–815, we do not believe that the Department of the Interior, through its Bureau of Indian Affairs, is the best resource in meeting this growing need. With this in mind, the Bureau of Indian Affairs and the U.S. Office of Education officials have had a series of conferences to discuss needs and the most feasible procedures to meet these needs."

ASSISTANCE FOR SCHOOL CONSTRUCTION AND CURRENT EXPENDITURES IN MAJOR DISASTER AREAS

Assistance for disaster areas occurring after June 30, 1967

At present the provisions authorizing disaster relief under Public Law 81–815 and Public Law 81–874 apply only to major disasters occurring before July 1, 1967. The bill would make these provisions applicable to disasters occurring before July 1, 1971.

Authorizing, in cases in which the disaster has not destroyed or damaged public schools, assistance for construction of public school facilities needed because of destruction of private facilities which will not be replaced

The proposed amendment would correct a defect in existing law by amending section 16 of Public Law 81–815 to permit financial assistance for the construction of public school facilities to serve children who will be attending the public schools because the private schools they were attending have been destroyed by a major disaster and will not be replaced. Under the original section 16, this may be done only if there has also been destruction of, or damage to, a public school.

Modifying conditions of eligibility with respect to local effort and minimum damage required

This bill would amend both Public Law 81–815 and Public Law 81–874 in two respects: (1) It would relax the eligibility requirements for disaster relief assistance by substituting a requirement that the local educational agency is utilizing or will utilize all State and other financial assistance available for the replacement or restoration of damaged or destroyed school facilities for the present requirement that the local educational agency is making a reasonable tax effort and is exercising due diligence in availing itself of other financial assistance; (2) it would add a minimum need provision ($1,000 or one-half of 1 percent of the local educational agency's current operating expenditures during the preceding fiscal year, whichever is less) as a condition of eligibility.

The first change is necessary because the terms "reasonable tax effort" and "due diligence," in the context of Public Law 81–815 and Public Law 81–874, have acquired a gloss which imposes rather severe requirements on local educational agencies suffering damage from a major disaster.

The second change is necessary to discourage applications for insignificant amounts of assistance.

Determining level of education to be restored according to level at time of disaster instead of level during a base year

Section 7(a) of Public Law 81–874 at present limits disaster relief for current operating expenditures to that amount needed to restore the level of education provided during the last full fiscal year preceding the year in which the disaster occurred. Since this arbitrarily ignores any recent improvement, this proposal would amend this provision to specify an amount of assistance sufficient to restore the level of education provided immediately before the disaster occurred.

Authorizing disaster relief assistance for technical, vocational, and other special schools

The committee recommends amendment to the disaster relief provisions of Public Law 81–815 and Public Law 81–874 to make technical, vocational, and other special schools operated by public agencies other than local educational agencies eligible for assistance.

Clarifying authority to provide funds for minor repairs under Public Law 874

Local educational agencies commonly pay for minor repairs to school facilities from their funds for current operating expenditures. This amendment would merely make it explicit that assistance under the disaster relief provisions of Public Law 81–874 also may be used for that purpose.

ASSISTANCE FOR SCHOOL CONSTRUCTION AND FOR CURRENT SCHOOL EXPENDITURES IN CASES OF CERTAIN DISASTERS

The bill contains an alternate amendment which would further amend section 16 of Public Law 815 and section 7 of Public Law 874 to provide, in addition to assistance authorized to local school districts in declared major disaster areas, immediate loan assistance under Public Laws 874 and 815 in the case of "pinpoint" disasters, that is, those disasters which are localized and not large enough to be classed as a Federal disaster area. In the case of construction to replace destroyed facilities such assistance must be in the form of repayable advances. The provision in section 7 of Public Law 874 would also authorize grants where funds are required for renting temporary facilities, purchase of equipment, and operational expenses which cannot be repaid from other sources such as insurance proceeds and regular school funds. The additional assistance would be authorized upon a finding by the Commissioner that public elementary and secondary school facilities have been destroyed or seriously damaged as a result of fire, flood, hurricane, earthquake, storm, malicious action of any person, or other catastrophe and the Governor of the State certifies the need for disaster assistance and gives assurance of the expenditure of a reasonable amount of State and local funds for the same purpose.

SECTION-BY-SECTION ANALYSIS

TITLE II—FEDERALLY AFFECTED AREAS

Part A—Assistance for school construction and current expenditures in impacted areas

Section 201. Clarifying definitions of "Federal property"

This section amends the definition of "Federal property" as used in section 15 of Public Law 81–815 and section 303 of Public Law 81–874 so as to make clear that the term "Federal property" includes any interest in real property owned by or leased from the United States and not specifically excluded from the term, whether such interest be created by an easement, lease, license, permit, or other arrangement, and includes as well, any improvements of any nature (other than pipelines or utility lines) on such property, even though such interests or improvements are subject to taxation by a State or political subdivision of a State or by the District of Columbia.

Section 202. Effective date of certain 1966 amendments

Section 204 of Public Law 89–750 added a new subsection (f) to section 6 of Public Law 81–874. The existing subsection 6(f) provides that if no tax revenues of a State or any political subdivision of the State may be spent for educating children who reside on Federal property within the State, or if no tax revenues of a State are allocated for educating these children, then the property on which the children reside may not be considered Federal property for purposes of making payments under sections 3 and 4 of the act. If none of these situations exist, but a local educational agency still refuses to educate children who reside on Federal property within the school district of the agency, there would be deducted from the payments to that agency for category "B" children an amount equal to the additional expense to the United States of educating the category "A" children on base. Section 229 of Public Law 89–750 added a new subsection (c) to section 10 of Public Law 81–815, which provides that if no tax revenues of a State or any political subdivision of the State may be spent for educating children who reside on Federal property within the State, or if no tax revenues of a State are allocated for educating these children, then the property on which such children reside shall not be considered Federal property for the purposes of section 5 of Public Law 81–815. Section 241 of Public Law 89–750 provided that if the amendment made by section 204 or 229 would have reduced payments to a local educational agency for the fiscal year ending June 30, 1966, if it had been in effect for that year, the amendment shall not apply to that local educational agency for fiscal years ending prior to July 1, 1968. Section 202 of the bill would make the provisions of sections 204 and 299 effective only with respect to fiscal years beginning after June 30, 1969.

Section 203. Modifying provisions relating to school construction resistance under section 14 of Public Law 81–815

When Public Law 815 was originally enacted it included as federally connected those children living on or whose parents were employed on Indian reservations. However, the requirement for eligibility in Public Law 815—a substantial increase in membership in a 2-year period—was characteristic of areas having military installations but not of the problems confronting districts with Indian reservations. As a result, very few Indian districts were eligible for assistance the first 2 years the law was in effect. Congress met this situation by adding section 14 which was designed specifically to meet this problem. The section has worked well. Under it approximately $58 million has been allocated to school districts to construct school facilities for about 50,000 Indian children in 22 States. However, some additional needs have developed which this section does not meet. As a result, there are a number of requests made to Congress each year for special appropriations to construct school facilities for children in specific districts having Indian reservation lands.

The amendment proposed by the Administration recommends two changes in section 14 to meet this relatively small number of critical school housing problems. The first change amends subsection 14(a) to meet the applicable school housing problem in those school districts having large Indian Reservations, a substantial impairment of the district's ability to finance education because of Federal ownership of property, and substantial numbers of "unhoused" children. It eliminates the present reference in the subsection to "Federal property" and substitutes in its place "Indian lands." The present eligibility requirement in this section is that the number of children who live on Indian lands represent a substantial percentage of the total number of children for whom the agency provides free public education. The amendment would add as an alternative eligibility requirement that *"Indian lands constitute a substantial part of the school district of the local educational agency."* It would continue the present financial burden and effort requirement but would relate this requirement to a *"substantial percentage of the children in membership of its schools"* rather than to "the total number of children in the school district." If a district meets requirements for eligibility and the test of financial need, the Commissioner could provide the financial assistance necessary for schoolchildren in the district for whom no school facilities were available after taking into account the amount that could reasonably be made available for this purpose from State and local sources.

The second change proposed by the amendment would add a subsection (b) to section 14 directed only to school facilities for children living on Indian Reservation lands. This change would continue the present "substantial percentage" requirement for eligibility and would also add to the alternative eligibility requirement added to subsection (a). It would eliminate for the purposes of providing facilities for children living on Indian lands the "burden" and "effort" requirements and would authorize the Commissioner to provide the amount he determined to be in the public interest to build necessary school facilities for children living on Indian lands once the eligibility requirements have been met. This provision is essentially the same concept now embodied in subsections 5(a)(1) and 5(a)(2) of providing the amount authorized by the formula to school districts that meet the eligibility requirements without imposing on them a test of financial need, burden, and effort.

The wording of the amendment restricts its provision to districts in isolated areas with very meager financial resources which have among their school population substantial numbers of Indian children who are among the most educationally disadvantaged children in the Nation. There are not a large number of districts covered by this amendment but their needs are urgent and critical. It is estimated that this amendment would increase the costs of this section from the present requirements of $3 million a year to an average of $5 million a year for perhaps 5 years with an additional million dollars each of the first two years.

Elsewhere in this report the committee proposes to establish a more up-to-date concept of "minimum" school facilities which is particularly significant for section 14.

Section 204. Deleting requirements that certain contributions be deducted

Section 204(a) would amend existing section 2(a) of Public Law 81–874 so that other Federal payments with respect to the property in the school district which has been acquired by the Federal Government are not required to be considered in determining whether the school district is being substantially compensated for the loss in revenue resulting from the acquisition of land by the Federal Government. Section 204(b) eliminates the provision requiring deduction of the amount a local educational agency derived from other Federal payments with respect to property acquired by the Federal Government from the amount of the agency's entitlement under section 2.

Section 204(c) makes a conforming amendment by eliminating the definition of "other Federal payments" in the existing subsection 2(b)(1) of Public Law 81–874, and redesignating as section 2(b) the existing subsection 2(b)(2), with wording modification. The redesignated section 2(b) continues to exclude any real property with respect to which payments are being made under section 13 of the Tennessee Valley Authority Act of 1933, as amended, as Federal property for purposes of section 2.

Section 204(d) repeals the existing subsection (e) of section 3, including the caption heading of the subsection, and redesignates the existing subsection (f) as subsection (e). This would eliminate the requirement for making deductions of any other Federal payments from entitlements under sections 3 and 4 of Public Law 874.

Section 205. Children moving into an area as a result of an international boundary relocation

Section 201(d) of Public Law 89–750 added to section 3(b) of Public Law 81–874 a sentence that provided that, in addition to the children who otherwise may be counted for eligibility and payment under Public Law 81–874, a school may count for eligibility and payment under subsection 3(b) for the fiscal year ending June 30, 1967, only, the number of children in the district for whom such agency provided free public education during such year as a result of a charge in residence from land transferred to Mexico as a part of the relocation of an international boundary of the United States. A corresponding provision was added to section 5(a) of Public Law 81–815 by section 227 of Public Law 89–950. Public Law 89–787, approved November 7, 1966, appropriating funds for the Department of Health, Education, and Welfare for the 1967 fiscal year, included funds for payment under title I of Public Law 81–874 and imposed the following limitation on the use of funds appropriated for title I of Public Law 81–874: "Provided further that no part of this appropriation shall be available to carry out the provisions of legislation enacted after June 30, 1966." The effect of this provision in the appropriation act was that none of the funds appropriated for fiscal year 1967 for title I of Public Law 81–874 were available for payment to those school districts that became eligible under the above-mentioned amendment made by Public Law 89–750, enacted November 3, 1966. There was no such limitation on the appropriation for Public Law 81–815.

The amendment made by section 205(a) of the bill would provide that, in cases where the provisions of the last sentence of section 3(b) of Public Law 81–874 were not considered in computing the entitlement of a local educational agency for the fiscal year ending June 30, 1967, the additional amount to which such agency would have been entitled under the provision shall be added to the agency's entitlement for the first fiscal year for which funds appropriated to carry out the act may be used for such purposes. Subsection (b) of section 205 adds a similar provision to the corresponding subsection 5(a)(4) of Public Law 81–815.

Section 206. Repeal of mandatory group rate provisions

Public Law 89–750, in section 201(b), amended section 3(d) of Public Law 81–874, to provide that the local contribution rate for all school districts which do not use either of the alternative minimum rates of one-half of the State or one-half of the national average cost per pupil in average daily attendance, will be based on current expenditures per pupil derived from local revenue sources in groups of generally comparable districts determined by the Commissioner, after consultation with the State educational agency. The amendment was to become effective beginning with the 1967–68 school year, and would have eliminated individual selection of "comparable districts."

Section 206 repeals the 1966 amendment by restoring the wording in section 3(d) as it was effective during fiscal year 1967.

Section 207. Discretion to waive certain requirements

Section 207 would amend subsection 5(e) of Public Law 81–815 to give the Commissioner of Education, in addition to the authority he now has to waive or decrease certain eligibility requirements, discretionary authority to waive or reduce the requirements of subsection 5(f) in exceptional circumstances where it is necessary to do so in order to avoid inequity and avoid defeating the purposes of the act. Subsection 5(f) specifies that in determining the total of the payments which may be made to a local educational agency on the basis of a current application, the total number of federally connected children counted for payment may not exceed the estimated number of such children as of the end of the increase period covered by the current application minus the number of federally connected children which formed the basis for payment under the last eligible application of such agency.

Section 208. Effective date

This section provides that the amendments to Public Laws 81–874 and 81–815 made by sections 201, 203, 204, 205, 206 and 207 shall be deemed to have been enacted before June 30, 1967, and shall be effective for fiscal year beginning after that date.

Part B.—Assistance for School Construction and Current Expenditures in Disaster Areas

Section 217. School construction assistance in disasters occurring after July 1, 1967

This section extends until July 1, 1971, the authority to provide Federal assistance to local educational activities for the restoration or replacement of elementary and secondary schools in areas affected by a major disaster, which authority is contained in section 16 of Public Law 81–815 as a result of amendments to the act contained in Public Law 89–313, and amends the section to authorize disaster school assistance to any other publicly operated school providing technical, vocational, or other special education to children of elementary or secondary school age.

The proposed section 217 authorizes assistance also, in cases in which the disaster has not destroyed or damaged public elementary or secondary school facilities, but where private school facilities in the school attendance area of the local educational agency have been destroyed or seriously damaged and will not be replaced, thereby increasing the need of such agency for school construction assistance. Under the existing provision, assistance to a local educational agency may be provided only where public school facilities are damaged or destroyed. The amendment section retains the present requirement that assistance may be provided only if the local agency has made arrangements in conformity with section 7(a) of Public Law 81–874 for participation of private school children (also affected by the disaster) in programs the agency conducts. No assistance is provided, either under existing law or under the amendment, for the construction of facilities to accommodate private school children whose facilities are destroyed by a major disaster.

The amendment also authorizes assistance in the form of a repayable loan for the restoration or replacement of school facilities not in a declared disaster area where the Commissioner determines that public elementary and secondary school facilities of a local educational agency have been destroyed or seriously damaged as a result of fire, flood, hurricane, earthquake, storm, malicious action of any person known or unknown, or other catastrophe, and the Governor of the State certifies the need for disaster assistance and gives assurance of the expenditure of a reasonable amount of State or local funds for the same purpose.

The amendment would eliminate the requirement of a "reasonable tax effort and the exercise of due diligence" by the educational agency in availing itself of State and other financial assistance, but would require such agency to use all State and other financial assistance available for the restoration of facilities as a condition to the receipt of assistance. The amendment provides a minimum amount of assistance that may be extended for construction consisting of the lesser of $1,000, or one-half of 1 percent of such agency's operating expenditures during the fiscal year preceding the one in which the disaster occurred.

The amendment finally includes among eligible facilities those of any public agency providing technical, vocational, or other special education to children of elementary or secondary school age.

Section 218. Current School Expenditures Assistance

This section extends until July 1, 1971, the provisions of Section 7(a) of Public Law 81–874 authorizing Federal assistance for current school expenditures in declared disaster areas and makes corresponding amendments to section 7(a) of the act noted above for section 16 of Public Law 81–815 with respect to (1) extension of assistance to publicly operated schools providing technical, vocational, or other special education to children of elementary and secondary school age; (2) assistance in cases of localized or "pinpoint" disasters to elementary and secondary educational agencies in other than declared disaster areas; (3) elimination of the requirement for a determination of reasonable tax effort and exercise of "due diligence" of the local educational or other public agency in availing itself of State and other financial assistance and the requirement that such agency use all State and other financial assistance available; and (4) establishing the minimum for assistance available to such agencies for school operating following a disaster.

Section 7(a) is further amended to authorize assistance to provide a level of education equivalent to that maintained in the schools of such agency prior to the occurrence of the disaster, and not to the "last full fiscal year" prior to the occurrence of disaster as is now required. Section 7(b), which authorizes additional assistance for cost of replacement of instructional and maintenance supplies, equipment, and materials (including textbooks), destroyed or seriously damaged as a result of the disaster, and to lease or otherwise provide school and cafeteria facilities needed to replace temporarily such facilities made unavailable as a result of the disaster, is amended to make clear the authority to use grant funds to make minor repairs to facilities where necessitated by a major disaster.

Mr. MORSE. Finally, Mr. President, I wish to address myself to title IV of H.R. 7819, in which are contained provisions for adequate leadtime for planning and evaluation in elementary and secondary school programs. At the beginning of my presentation I detailed the considerations which undergirded our decisions upon formula language of title I of ESEA. Yet a review of the testimony in our hearings record will reveal that almost as much testimony was received on late funding as on any other issue before us. From every level of school administration, from every kind of school district, rural, intermediate or urban-metropolitan, and from every citizen serving on the school boards of our country, there came an entreaty—represented through their associations—that a way be found for some certainty in our educational programs which would permit schools to plan their activities in an orderly fashion.

The provisions of title IV of H.R. 7819 are devoted to meeting this plea. In our executive sessions, we had presented to us a plan which resulted from the task force that had been working in this area at the request of the President of the United States. I ask unanimous consent that the basic document used in support of the proposal, together with the material contained in the study of the U.S. Office of Education, entitled "Report No. 1 of the Special Subcommittee on Education," be printed at this point in the RECORD, together with as many of the charts as are permissible.

There being no objection, the material was ordered to be printed in the RECORD, as follows:

IMPROVING DHEW SUPPORT OF EDUCATIONAL PROGRAMS—A MODEL AUTHORIZATION AND FUNDING SYSTEM FOR ELEMENTARY AND SECONDARY EDUCATION, SEPTEMBER 1967

DEPARTMENT OF HEALTH,
EDUCATION, AND WELFARE,
Washington, D.C., September 14, 1967.

Hon. JOHN W. GARDNER,
Secretary of Health, Education and Welfare,
Washington, D.C.

DEAR MR. SECRETARY: The President in his Health and Education Message to the Congress this past February 28, expressed his deep concern with the late funding of education programs in the section entitled, "A better education timetable" as follows:

"One condition which severely hampers educational planning is the congressional schedule for authorizations and appropriations. When Congress enacts and funds programs near the end of a session, the Nation's schools and colleges must plan their programs without knowing what Federal resources will be available to them to meet their needs. As so many Governors have said, the Federal legislative calendar often proves incompatible with the academic calendar.

"*I urge that the Congress enact education appropriations early enough to allow the Nation's schools and colleges to plan effectively*. I have directed the Secretary of Health, Education, and Welfare to work with the Congress toward this end."

Pursuant to the President's direction you formed a task force to develop approaches to this problem which would result in an improved system for authorizing, funding, and administering the federally-assisted educational programs.

I am pleased to submit to you a report of this task force which we believe offers promise of a constructive solution to the problem of timing DHEW appropriations for educational programs. We believe that the plan presented in this report if adopted would go a long way toward improving the effectiveness of these programs.

We recognize, of course, that the legislative recommendations implicit in this plan will be weighed by the President in the light of the overall requirements of the Government and the condition prevailing at the time his plans are submitted to the Congress.

Sincerely yours,

JAMES F. KELLY,
Assistant Secretary, Comptroller,
Chairman of the Task Force.

TASK FORCE ON TIMING OF DHEW APPROPRIATIONS FOR EDUCATIONAL PROGRAMS

Albert J. Abrams, Secretary of the Senate, State of New York, Albany, New York.

Ben Barnes, Speaker, House of Representatives, State of Texas, Austin, Texas.

Paul Carlin, Director of Federal and Congressional Relations, National School Boards Association, Washington, D.C.

Donald W. Dunnan, Superintendent, The St. Paul Public Schools, St. Paul, Minnesota.

J. W. Edgar, Commissioner of Education, State of Texas, Austin, Texas.

T. N. Hurd, Director of the Budget, State of New York, Albany, New York.

Robert F. Kerley, Vice President for Business Affairs and Treasurer, University of Kentucky, Lexington, Kentucky.

Jesse M. Unruh, Speaker of the California State Assembly, State of California, Sacramento, California.

DHEW members

James F. Kelly, Assistant Secretary, Comptroller, Department of Health, Education, and Welfare.*

J. Graham Sullivan, Deputy Commissioner, Office of Education, Department of Health, Education, and Welfare.

Sam A. Kimble, Associate Director, Office of Extramural Programs, Public Health Service, Department of Health, Education, and Welfare.

Technical assistance and data were provided by the Bureau of the Budget.

BACKGROUND

President Johnson has directed the Secretary of Health, Education, and Welfare to study ways and means of improving the timing of key Federal actions affecting educational programs receiving grant support. In undertaking this study the Department has recognized the need to reconcile the requirements of the thoughtful and complex Congressional authorization and appropriation cycle with the requirements of the cycles of Federal, State, and local implementation. Recent studies by the Special Subcommittee on Education of the House Committee on Education and Labor,[1] and by the Council of State Governments [2] underscore the seriousness of the problems created by the disparities between these two cycles.

The Secretary established a task force of informed administrators, State legislators, and educators from States, cities, and universities to assist the Department in fully identifying and evaluating alternative solutions and developing recommendations. Because the solution ultimately recommended is a combination of several methods which we have tried and used with success in the past, the resulting report is felt to provide a basis for changes which are practical, effective and reasonable. Though the methods themselves are not new, the systematic melding of these methods into a comprehensive plan of action represents a new approach to the problem.

THE PROBLEM

The Federal process which results in the authorization, appropriation, and administration of national programs of educational support is an extended and complex process involving cooperation at all levels of Government. For example, Congress must carefully consider the substance and content of new programs, and it must determine a suitable level of funding. Federal agencies must develop necessary administrative rules and regulations. States must coordinate the actions of their legislatures with those of their local governments, and local school districts must plan, budget and hire necessary staff.

Nonetheless, the significance of the programs being enacted frequently induces a desire to achieve their earliest possible implementation. When the activities necessary for implementation are compressed, however, several significant problems result:

1. A tight time schedule makes it considerably more difficult for education officials to plan effectively for the development and implementation of school programs.

2. The recruitment and employment of teachers is substantially hindered if they cannot be hired at the time of the year when the most able of them are available for interviews and seeking new employment.

3. Initiation of new or expanded educational programs is unnecessarily delayed until well into the school year when they cannot produce the most effective results.

4. Community pressure for full utilization of Federal funds late in the school year often results in expenditures for lower priority school needs.

5. School districts which attempt to anticipate the amount of Federal assistance which will be available to them, at times, find themselves overcommitted when the subsequent allocation of appropriated funds results in their receiving less money than they had anticipated.

6. Public expectations for the Federally assisted program remain unfulfilled partly because school administrators are unable to utilize fully and most effectively funds which are received after the school year has begun.

7. Careful evaluation of Federally assisted programs is hampered by the lateness of available information concerning the nature and effectiveness of educational improvements which such assistance has made possible.

MAJOR ALTERNATIVES REVIEWED BY STUDY GROUP

The heavy workload of Congressional legislative and appropriation committees makes it impractical to anticipate that legislative authorization and appropriations can be speeded up to any appreciable extent. Even if such Congressional actions could be completed by July 1 of each year, it would not provide the kind of lead time necessary for effective program planning and implementation. The study group has found it necessary, therefore, to explore other alternative solutions that might improve effective program implementation within the present timing pattern of Congressional action. The following are alternatives which the study group has considered on the basis of their proven effectiveness in other programs and their possible applicability to State and local primary and secondary education programs:

1. *Fund programs from a Congressional appropriation which is made a fiscal year in advance of the grant period.* This arrangement has been used effectively in the support of graduate training programs, where it is necessary for colleges and universities to select students for training support several months in advance of the beginning of their training period. By approving grants between January and April from currently available appropriations for training programs to begin the following July it has been possible to permit the schools to follow a schedule in developing and conducting their training programs which conforms to the needs of both the students and the schools. Except when a Federal grant program adopts such a system at its inception, the use of this system requires for the first fiscal year of its implementation a doubled appropriation—one to support the on-going program for the current year and one to support the program for the upcoming year.

2. *Establish a different 12 month period from the traditional July 1–June 30 period for the availability of financial support for State and local program operations.* This approach has proved effective with respect to research grants and some types of demonstration programs. It has the advantage of permitting operations to start at any time during a fiscal year. Federal support would be available for 12 or more months from that date both for the initial period of funding and all subsequent periods of support. This approach has only limited applicability to most continuing State and local education programs, however, since the established operational cycle for these agencies is usually a September-August period.

3. *Provide that each fiscal year appropriation shall be available for use during two fiscal years.* This arrangement has worked well in a number of construction grant programs. It permits a longer lead time for the development of programs and avoids the tendency to commit funds for marginally important purposes near the end of fiscal year to prevent the funds from lapsing. This system has the disadvantage, however, of permitting a build-up of program costs in a fiscal year as a result of carry-over funds. If in a subsequent year for instance corresponding carry-over funds are not available, these costs can be sustained only with great difficulty, if at all.

4. *Provide a period of time and funds for advance planning before the initiation of a new program.* This arrangement provides an opportunity for both the Federal administering agency and the State and local agencies to do the necessary advance preparation for the initiation of a new program. It is a technique which was used effectively in the establishment of the Medicare program when the benefits under the program became effective 12 months or 18 months after the program was authorized.

5. *Provide authority in the appropriation act of one fiscal year for the Federal agency to obligate funds for grants during that year, although actual payment would come from funds included in the appropriation for the next fiscal year.* This arrangement is used in a limited way in the various HEW student loan programs. It would have the advantage of providing a firm commitment to State and local agencies at a time earlier than the beginning of the grant period without the necessity for the Congressional appropriation to be made at that earlier date.

RECOMMENDATION—THE PRINCIPLES

On the basis of its analysis of the problem, the study group has concluded that any proposal for corrective action should include the following principles if it is to prove most effective:

The period of program authorization should be sufficiently long and stable to permit an evaluation of program effectiveness prior to consideration of extension legislation.

Time and funds for planning on a continuing basis should be included.

The authorizing legislation should provide a basis for making firm advance commitments of funds to State and local agencies in the spring of the year.

A period of at least one year lead time should be provided on Congressional action to terminate, extend, or revise a Federal assistance program.

THE PLAN

In order to carry out these principles the study group recommends that the following specifications be included in legislation authorizing Federal grant assistance for State and local primary and secondary education programs:

1. The Federal assistance program should be authorized for a minimum of five years.

2. Authorizing legislation should provide that a planning and evaluation grant would be available to States and localities for each of the five years, with the amount for each year to be keyed to the level of operational funds authorized for the subsequent year.

3. The legislation should authorize grant funds for program operations for each of four years, beginning with the second of the five year program.

4. Appropriations should be advanced one year thus giving notice to officials at the Federal, State and local level of the amounts which will become available at the beginning of the next fiscal year. This will require appropriation action with respect to two years in order to put on-going programs

---

*Chairman.

[2] Council of State Governments, Chicago, Illinois, Report RM-401, "Cost to the States Resulting from Delays in Authorization or Appropriation of Federal Grants-in-Aid", May 1967.

on the new schedule. This will not constitute doubling up in as much as the funds for each year would be available for obligation only with respect to the year identified. This should give local officials sufficient notice of funds to become available so that they can with confidence enter into advance commitments for the employment of staff and long lead time equipment.

5. Recognize the school year September 1 to August 31 as the period for which the funds are available.

6. The legislation should require that an annual evaluation report be provided to the House and Senate legislative committees and that a comprehensive evaluation report be made during the fourth year.

7. The legislation should provide for Congress to consider the extension or modification of the program authorization during the fourth year in order to provide a year's lead time for State and local planning purposes.

8. The legislation should provide that appropriations are authorized to be made for one additional year (the sixth year) if legislation to authorize an extension has not been either enacted or rejected by the beginning of the fifth fiscal year of the authorization.

(See Appendix II for example of model in operation).

SUMMARY

The net effect of this recommended system would be to establish a Federal-State-local relationship which can better foster the planning necessary in order to meet pressing and long-run educational needs. In a word, this system provides for a firm commitment of Federal funds at a point in time which allows local school boards to take into account Federal as well as State and local funds in formulating their next year's school program and teacher employment requirements. It also allows for the continuing evaluation of program results with reports available to local, State, and Federal administrators and legislators, as well as providing lead time for any extension, termination, or revision of Federal assistance provisions. The study group is convinced that such a system is feasible and that in operation it would prove to be an effective and efficient arrangement for strengthening State and local education programs and for protecting and enhancing the Federal investment in such programs.

STUDY OF THE U.S. OFFICE OF EDUCATION—LATE FUNDING

The detrimental effects of late funding on the various Federal programs (and especially on those under the Elementary and Secondary Education Act of 1965 and on the several student financial aid programs) have been brought home repeatedly to the subcommittee through its Washington hearings, its series of field investigations, its national survey of local and institutional program administrators, and its day-to-day contacts with the educational community at large. Indeed, of all the problem areas identified and discussed during the course of the subcommittee's study, late funding was perhaps brought up more frequently than any other matter, and the body of comments on it displayed the highest degree of uniformity.

The roots of the problem of late funding are easily discerned. They lie in the disparity that exists between the academic calendar and the Federal fiscal calendar.

Generally, the local school agency (and the institution of higher education) conducts its planning for the academic year during the spring of the preceding academic year. Of course, sensible planning must be predicated on a firm knowledge of the fiscal resources that will be available in the following September. When Federal funds represented only a minuscule portion of the agency's overall budget, the agency could form its plans without an exact knowledge of the amount of such funds it would ultimately receive. But as the flow of Federal money has increased, the feasibility of this sort of planning has decreased. Today, many agencies and institutions simply cannot lay adequate plans for the coming academic year unless they have a firm idea of the amount of Federal support they will be granted.

For the most part, however, the congressional appropriations process does not mesh with the educational planning process. The former, unlike the latter, is not directed at all to the spring of the year; rather, it is tied to the fiscal year running from July 1 to June 30. A firm commitment of Federal funds at the very beginning of this fiscal period would lead to difficulties for local agencies, since, by necessity, they must plan during the spring months. In practice, however, actual appropriations, at least for educational assistance programs, are more likely to be made in August, September, or even October than in July. (See app. 1.) It may be said that if July commitments would lead to difficulties, commitments made in September or October—after the school year has already begun—can lead only to something akin to chaos.

Yet it is just this sort of chaos that local school agencies are, all too often, faced with in the matter of Federal funds. The funding history of the Elementary and Secondary Education Act offers the prime case in point. That act was approved by the President on April 11, 1965—during the very period when many agencies were in the process of drawing up their budgets for the 1965–66 school year. The appropriation for the act, however, was not approved until September 23, or more than 5 months after enactment, and nearly a month into the school calendar. Up to this point, the onus of the late funding rested on Congress alone. But after final approval of the appropriation on September 23, it took the Office of Education another month to calculate State-by-State allocations and make the first commitment of funds. And added to the difficulties stemming from late funding per se were other difficulties originating from the slowness of OE in issuing guidelines and regulations for the various programs authorized under the act. (See app. 2.) In view of all this, it is small wonder that many local agencies could not get their programs underway until January of 1966.

It was apparent to all concerned that the late funding had exerted noticeable effects on the quality of the programs implemented in that first year of experience under ESEA. In fact, the National Advisory Council on the Education of Disadvantaged Children, in its first report on title I of the act, included the following among its 10 recommendations:

"There is no doubt that implementation of title I was greatly hampered this year by the nonavailability of funds until after the school year began. Most personnel in needed specialties were already under contract, and school administrators were forced to plan projects almost overnight. The pressures of time gave State departments of education little opportunity to revise substantially many quickly conceived programs. We strongly urge the Congress to enact the next title I appropriations bill as early as possible, but not later than early summer 1966, to permit more careful program development and thus assure more effective use of the funds."

Unfortunately, this recommendation, which was but an echo of what nearly every local school chief involved in the program had been saying, was not heeded by Congress in 1966. There were extenuating circumstances; the act was up for fairly major legislative amendments, which had to be considered before appropriations could be made. Due to the press of affairs, these amendments were not brought to the floor until early in October of 1966, and final agreement was not reached until October 20.

The fiscal year 1967 appropriation for title I of the amended act was contained in Public Law 89–697, which was signed on October 27. It was not until late November that the Office of Education could inform each State of its "estimated allocation." Worse still, it was almost the end of February 1967 before OE informed the States of their *actual* allotment funds for use in the school year which had begun nearly 6 months earlier.

Moreover, disparities between "estimated" title I allocations as of November 1966 and actual allocations as of February 1967 furnish a vignette of the hazards that lie in trying to plan without a firm knowledge of the amount of grants to be made. The November estimate for the State of California, for example, was $80.7 million; but the February actual proved to be only $74.3 million, or 92 percent of the estimate. On the other hand, Pennsylvania's estimated allocation was set at $46.4 million, while its actual allotment was calculated 3 months later at $48.6 million. Differences of this magnitude between estimated and actual grants, even if they occurred in the preceding spring rather than in the middle of the school year, could not help but set planning awry.

The consternation over late funding among State, local, and Federal schoolmen can be abundantly documented from the record of the subcommittee's Washington and field hearings. On the second day of the Washington hearings, for example, there was this from Commissioner of Education Harold Howe II:

"One of the problems to which I would like to call attention is the disparity between the appropriation timetable of the Congress and the planning timetable of schools and colleges. Any efforts which can be made to resolve the difficulties involved in this matter will be a boon to education. Typically, schools engage new personnel and plan during the early spring for new programs which start in September. As larger percentages of their commitments involve Federal funds, they have great difficulty in planning effectively, since these funds are not appropriated by the time decisions must be reached. Although "continuing resolutions" passed in late June are helpful, they are far from the ideal solution to this problem. If the Federal Government is going to have a significant role in school financing, it seems to me essential to look for appropriations practices which would prevent relationships with States and communities from being regularly conducted on a crisis basis."

A small sampling of other statements on this matter from representatives of the elementary-secondary level of education follows:

From the Deputy Commissioner of Education of Maine:

"I have a few conclusions or suggestions that I would like to make. * * * Failure to make appropriations on time. By that I mean prior to or at the beginning of a fiscal year has proven to be costly in terms of employment of competent personnel. We have the problem, for example, of employing personnel in September or October. Under the terms and code of ethics, teacher personnel are not expected to make changes after the first of August. This has been somewhat restrictive—in terms of employment, personnel, and organizations, effectiveness in evaluating and reporting, and probably has caused higher financial outlays."

From the deputy commissioner of the Missouri State Department of Education:

"An area of great concern is the late date we obtain appropriations from Congress for the various Federal programs. The U.S. Budget Office and the Office of Education further delay the actual time we receive the State allocations for the various acts.

"For instance, Congress did not appropriate funds this year until October 22, 1966, and as of December 1, 1966, the Missouri State Department of Education had not received information concerning official State allocations for any of the various Federal programs.

"This prevents the State department of education and the local school districts from making maximum use of provisions of the Federal programs. The degree of uncertainty concerning the appropriations, State allocations, and interpretation of new acts and amendments to existing acts limits the effective use of provisions of Federal programs and the funds appropriated by Congress.

"Large-sized school districts must begin budget planning by September, and medium-sized school districts by December of the prior fiscal year for efficient operation of their educational program.

"The total school budget consists of three interrelated parts: (1) Educational plan; (2) spending plan; and (3) financing plan.

"Federal funds should be included as an integral part of the total school budget. The budget must be completed by February so the board of education can study the budget and recommend the tax rate to be presented to the patrons of the district.

"In accordance with the budget, school districts employ personnel during April and May for the next school year.

"This type of planning is essential to effectively utilize the Federal funds to improve education at the local level to the greatest degree of efficiency.

"Congress should pass educational acts and make appropriations by September of the previous fiscal year in order to obtain the maximum results for funds invested."

From a spokesman for the California School Boards Association:

"Congressional appropriations calendar and school district budgeting: Once again there is almost unanimous opinion that the appropriations for local school districts must be made by Congress early in the year (in California before May 15), or the appropriations should be for more than 1 year. Otherwise, the program will lack continuity, and there will be a loss of trained personnel when they feel job uncertainty due to lack of funding. California law requires that a notice in writing be sent to teachers by May 15 if they are not going to be hired for the following year. When Congress does not appropriate funds by this date, superintendents must notify the teachers that they may not be rehired. The result is chaotic."

From a Minnesota school superintendent:

"Then in conclusion I just would like to say that one of the most difficult problems with Federal programs is the time of the year that appropriations are made by Congress. We do not know if the programs will be financed—or to what degree—until after the school year begins.

"This makes it difficult to keep personnel from year to year, and it makes it necessary to start many programs without the needed supplies and equipment.

"If we are to obtain the best results from the funds expended, the appropriations should be made a year in advance, or, at the latest, by March of each year.

"We have a very difficult time on our title I and to some extent title II programs because we never know if we can hire people for the following year. Because of the shortage of teachers, they have just about their own choice of where to go. Therefore, if we do not know until September or October, we cannot hold these teachers. This means we have to go out and hire a new staff the following year and this makes the program inefficient.

"I don't think under this type of situation we are getting true value for the money that the Federal Government is spending for the educational program."

From the director of Federal relations of the St. Louis public schools:

"Most of the school systems were very afraid of what would happen to the ESEA legislation in the hurried last days of the Congress. Every time we picked up a newspaper we noted some new direction in the legislation. At the same time we were committed to personnel and programs with no real assurance that the needed money would be appropriated. I suppose that there are few things on which all public school administrators agree but I am sure that they agree that they must know much earlier in the year how much money will be available for programs. The date on which funds are appropriated is not too important for the reimbursable programs like NDEA Title III and the Vocational Education Act. But the ESEA provides funds before programs start. Any program involving teachers and other personnel must be planned months in advance of the starting date. We therefore desperately need a firm commitment for program and funds in the spring of the year if the projects are to start in the fall."

From the Georgia State coordinator of title I, ESEA:

"One of my areas of concern is the late date in a given fiscal year on which firm figures are available for the amount of money which may be used by the various local educational agencies.

"Another concern is the altering of legislation affecting title I operations for a given fiscal year after much of the fiscal year has passed.

"I would suggest that legislation and appropriations be established well in advance of the fiscal year in which they are to become effective. This would, I believe, make for better planning, more effective programs, and wiser use of the money available.

"Mrs. GREEN. Thank you very much, Mr. Beemon.

"May I say that in all of the hearings we have been conducting the point which you raised in your last paragraph has become abundantly clear that Congress is still operating on the time schedule which existed prior to a major involvement by the Federal Government in education. I think that Congress has not taken notice of the problems of the school year in authorizing legislation or appropriating the funds.

"Mr. BEEMON. I appreciate your recognizing that fact."

And from the deputy State superintendent of public instruction, Wisconsin:

"Our school year starts with an upswing in September and ends with a downswing in June. Educational planning for this period must be done at least 3 to 6 months in advance. This leadtime is necessary not only for recruitment of personnel, but also for action to be taken on educational programs by local school boards and school electors during the annual school meetings in July. Crash programs initiated after the beginning of the school year and late appropriations cause problems."

This documentation could be extended for a great number of pages, especially if one wanted to add to this subcommittee's record the record of hearings on both the 1966 and 1967 amendments to ESEA. Rather than belaboring the point in piecemeal fashion, however, the subcommittee would present results of a questionnaire item which bears directly on it.

The subcommittee's questionnaire on ESEA was sent to approximately 3,500 local school agencies. About 2,500 completed questionnaires were returned. Item II–(H) on the questionnaire asked the local administrators: "What is the latest month you would like to have firm commitment of funds that will be available for the following school year?"

Viewed cumulatively, the response to this item show that 18 percent of the agencies would like to have a definite commitment of funds no later than the end of February of the school year preceding the year in which the funds would be used. Thirty-three percent asked for definite allocations by the end of March; 46 percent by April 30; 58 percent by the end of May; and fully 76 percent by the end of June. Only 22 percent of the agencies felt they could get by with July or August commitments, and none, it must be assumed, favored the current practice of delaying commitments until after commencement of the school year.

Finally, the Elementary and Secondary Education Act of 1965 as originally enacted and as first implemented afforded examples of two practices which the subcommittee feels have contributed to or exacerbated the problem of late funding.

The first of these centered on program authorizations. The authorization for title I of the Elementary and Secondary Education Act is based on a formula, and thus it must be computed anew each year to reflect changes in the several factors of the formula. Titles II, III, and V, however, were given dollar amount authorizations, but only for the first year of the 5-year period for which the programs were authorized. The original authorization language for title II is typical of the three:

"For the purpose of making grants under this title, there is hereby authorized to be appropriated the sum of $100,000,000 for the fiscal year ending June 30, 1966; but for the fiscal year ending June 30, 1967, and the 3 succeeding fiscal years, *only such sums may be appropriated as the Congress may hereafter authorize by law.*"

Thus, as originally enacted, titles II, III, and V of ESEA, and also title III of the Higher Education Act of 1965, required a yearly enactment of authorizing legislation before any appropriation could be made. This year-by-year method is, of course, justifiable in new and highly original programs, since it allows Congress to subject the programs to a detailed annual review. At the same time, however, it is cumbersome and slow, and it acts as a definite brake on the speed of the appropriations process. Consequently, the subcommittee recommends that, in all save special circumstances, appropriations for education programs be authorized over a 2-year period; and further, that decisions as to the renewal or termination of these authorizations be taken 1 full year in advance of their scheduled expiration dates. In this way, appropriations would not be held up annually to wait on authorizing legislation, and the users of the programs might have a better idea of what level of support to expect under a particular program.

It should perhaps be noted that Congress is apparently already moving in the direction recommended above. Most of the new programs authorized under the Higher Education Act of 1965, for example, were given dollar-figure authorizations for a 3-year period. Again, the 1966 amendments to ESEA authorized appropriations under titles II, III, and V for fiscal years 1967 and 1968, rather than for fiscal year 1967 only.

It might also be pointed out that, as a practical matter, local school districts and colleges and universities can find little guidance with respect to the expected level of funding by reference to the authorization figures. Appropriation requests of the U.S. Office of Education for fiscal year 1968 offer an illustration. Across the board, the fiscal year 1968 request for programs for which there is a specific dollar authorization represents approximately only 58 percent of the statutory authorizations, and the subsequent requests by the Office of Education for only partial funding contribute greatly to the widespread uncertainty at the local level with respect to the level of funding. It is highly desirable that more careful consideration be given to the authorization levels established by the Congress when appropriations requests are presented.

The second area of difficulty associated with the original ESEA centered on the "crash" schedule for implementation of the programs. As noted, the law was enacted in April and was to go into full effect nationally during the school year which was to commence in but 5 months' time. After delays attributable to the deliberateness of the appropriations process and to the slowness of OE in getting out regulations, guidelines, and finally payments, many school agencies were faced with the pleasant-seeming but nonetheless pressing necessity of spending large sums of money within small periods of time, or of having that money taken away from them. And with the enactment of the Higher Education Act of 1965, the whole hurryup process was repeated, with even less leadtime in which prospective participants could familiarize themselves with the programs and plan their activities on an integrated basis.

Accepting the assertion that the Federal Government is now and will continue to be a bona fide junior partner in the educational system, the subcommittee would point out that the need for immediate action has given considerable way to that for careful planning. With respect to future educational enactments, the subcommittee therefore recommends that, whenever possible, a first year of limited funding be authorized, which year will serve as a time for planning and preparation in all the affected layers of the educational complex. Under such an arrangement, the Office of Education would have ample time to form up its program staff and attend to the matter of regulations, guidelines, and general program information in a far less frenetic and more thorough manner than has obtained; and the potential user in the educational community would be able to integrate the newly authorized assistance into its overall program rather than merely adding it to the top.

Turning from ESEA to view higher education assistance programs, and especially those affording aid to students, the deleterious effects of late funding are again quite evident. The typical institution of higher education is currently in the student assistance business in a large way. Its overall program is likely to involve its own funds—from State or private sources, or both—and funds under one or more of the several Federal programs of loans, grants, and work-study. It is becoming quite common for one student to receive an aid package made up of assistance from two or more of these multiple sources.

To figure such a package so that it meets a student's need in the most economical and useful manner, the institutional aid officer, it goes without saying, must know how much money he can count on from each source at the time of his determination. As was the case with elementary-secondary schools, the usual time for making these determinations is the spring preceding the academic year in which the aid will be used. This spring determination is especially essentially in the case of freshmen-to-be, since the very matriculation of an increasing proportion of those young men and women is dependent on the assistance they might be granted.

Yet the fact remains that the institutions are not given firm comitments under the Federal student assistance programs during the vital spring months. In fact, it is not uncommon for the institution to receive its Federal funds after the academic year has already begun.

Throughout the course of the study of the Office of Education, nearly every institutional financial aid officer with whom the subcommittee held converse directed remarks to the problem of late funding, either in formal statements or informally. The following excerpts from the record of the field hearings should suffice to give the tenor of their concern:

"I would like at this time to express concern over three major problems.

"1. The first of these is late notification of National Defense Student Loan Program funds.

"At this point I would like to stop and give the dates from 1962 to 1966, the dates on which the University of Maine received a firm commitment of National Defense funds. In 1962, we got our commitment on August 15; in 1963, on September 5; in 1964, on September 16; 1965 was a very good year, June 16; in 1966, on August 5.

"This causes great problems in committing money to students since we don't have a commitment ourselves as to exactly how much money we will have to loan.

"The U.S. Office of Education need not share the blame here. It seems that Congress insists on waiting until the 11th hour to appropriate the funds.

"However, the wrath of participating institutions must be borne by the Office of Education. It would seem advisable for Congress to put the appropriation of the money for this program at the top of the calendar in order to give participating institutions an opportunity to receive a commitment of their allocation at the earliest possible time. It seems that year after year, school is about to open before a firm commitment of funds is received" (assistant director of student aid, University of Maine).

"* * * the staff of HEW and those of us responsible for planning and administrating many and extensive student aid programs are severely handicapped by the disparity between the appropriation timetable and the timetable required by HEW and the colleges in planning and budgeting for student aid programs. Colleges should have a firm commitment of support funds for each student aid program not later than March preceding the next fiscal year's operation. I join other college administrators and personnel of HEW in appealing to you to help resolve the difficulties caused by the lateness in the appropriation of support funds. Much of our present difficulty can be alleviated if we could remove the crisis method of conducting student aid programs. Inefficiency and waste, for which we could be critizied can be largely eliminated if our time and energies could be directed toward planning and coordinating multiple student aid programs" (director, Bureau of Student Loans and Scholarships, University of Minnesota).

"Unanimous support was given the recommendation that the Federal programs be funded earlier in the year so that colleges would be aware of the amount of support at the time awards would be made. (For instance, admissions at Illinois State University for the 1966–67 school year were closed in March 1966, before we knew what funds would be available to students.)" (director, student financial aids, Southern Illinois University, reporting on a meeting of the Midwest Association of Financial Aids Administrators)

"* * * the NDSL programs seems to provide the greatest benefit for the largest number of students. We would urge that it be continued. Our suggestions for change are few: The most valuable change would be the firm commitment of our annual allocation somewhat earlier than in past years" (dean of students, University of Missouri at Kansas City).

In its attempt to measure the effects and isolate the defects of the several Federal student aid programs, the subcommittee again resorted to the questionnaire procedure. The instrument was sent to 600 institutions of higher education, of all types and in all parts of the country, and 470 of the institutions completed and returned it. Three of the items on the questionnaire bear directly on the matter of late funding. Responses to those items would seem to confirm that concern over the matter is fully as widespread as the excerpts cited above indicate.

Item VIII(2) put this question to the institutions: "Does late funding by Congress present problems in administering your financial aid programs?" To this query, 75 percent of the reporting institutions replied in the affirmative. Moreover, the survey indicates that in the larger institutions, where the incidence of participation in Federal student assistance programs is likely to be higher, the percentage of affirmative replies is even greater. Thus, of the smaller stratum of institutions—those with student enrollment of under 600—60 percent replied that late funding was an obstacle to the efficient administration of the programs. But of the schools with enrollment between 2,500 and 9,999 students, 82 percent found this to be the case. And for the largest schools (enrollment of 10,000 and above), fully 89 percent replied that late funding was indeed a problem.

The related questionnaire item VIII(3) asked those institutions which answered the item treated above with a "yes" to comment on the problems caused by late funding. A small random sampling of these comments is appended in the interest of completing the record:

"There have been occasions when the checks needed for the NDSL program have arrived after the registration period is over. We are required by State law to charge late registration fees for students who do not pay their registration fees on time."

"Late National Defense last year made us cautious in committing funds to entering students in April when letters are sent. We should know our funding by February or March each year for all 3 programs to gain maximum benefit to the student."

"How do you establish matching funds for an unknown budget?"

"Firm commitments cannot be made to students thereby creating a problem for those who preregister and for incoming students whose enrollment is dependent upon the financial aid package."

"The greatest of all problems—we must know in March for the fall and spring semesters."

"We can't prepare our institutional budget adequately when relying on late funds from

Congress. We have to make assumptions which may prove false."

"Late appropriations usually make it impossible for us to make a firm commitment to the students for the school year, thereby making it necessary for them to borrow from other sources, where the interest and repayment terms are not as satisfactory as the Federal loan programs."

"We find ourselves tentatively committing funds that we might not receive."

"It makes us nervous; we generally assume approval and make commitments; so far we have been lucky."

Finally from the student financial aid questionnaire, item VIII(4) asked those institutions which were troubled by late funding to indicate the latest month by which they would like to have a firm commitment of Federal funds for the next academic year. The single month cited most often was March, which was named by 30 percent of all the respondents. Cumulatively, 61 percent of the reporting institutions replied that commitments were desirable no later than the end of April, and 77 percent felt the need for commitments by the end of May.

The problem of late funding must be solved if the educational assistance programs of the Office of Education are to accomplish the purposes set for them by Congress. The subcommittee has already recommended: 2-year authorizations, with review a year before termination; and consideration of a low-funded first year for new programs to afford both OE and the potential users adequate planning time.

In addition, the subcommittee recommends that the problem of late funding be subjected to a thorough and concerted study by a joint committee to be composed of members from the House Committee on Education and Labor, the Senate Committee on Labor and Public Welfare, and from the Committees on Appropriations in both bodies. A decision must be made, and made shortly, if the best interests of American education are to be served.

Appendixes

Appendix 1. Appropriation acts for selected programs of Federal educational assistance

I. National Defense Education Act of 1958 (Public Law 85–864, September 2, 1958)

Fiscal year 1959:

Independent Offices Appropriation Act, 1959 (Public Law 85–844, August 28, 1958). Second Supplemental Appropriation Act, 1959 (Public Law 86–30, May 20, 1959).

Fiscal year 1960:

Departments of Labor, and Health, Education, and Welfare Appropriation Act, 1960 (Public Law 86–158, August 14, 1959). Second Supplemental Appropriation Act, 1960 (Public Law 86–424, April 13, 1960).

Fiscal year 1961:

Departments of Labor, and Health, Education, and Welfare Appropriation Act, 1961 (Public Law 86–703, September 2, 1960). Second Supplemental Appropriation Act, 1961 (Public Law 86–722, September 8, 1960).

Fiscal year 1962:

Departments of Labor, and Health, Education, and Welfare Appropriation Act, 1962 (Public Law 87–290, September 22, 1961). Supplemental Appropriation Act, 1962 (Public Law 87–332, September 30, 1961).

Fiscal year 1963:

Departments of Labor, and Health, Education, and Welfare Appropriation Act, 1963 (Public Law 87–582, August 14, 1962).

Fiscal year 1964:

Departments of Labor, and Health, Education and Welfare Appropriation Act, 1964 (Public Law 88–136, October 11, 1963). Department of Health, Education and Welfare Supplemental Appropriation Act, 1964, (Public Law 88–268, February 10, 1964).

Fiscal year 1965:

Departments of Labor, and Health, Education, and Welfare Appropriation Act, 1965 (Public Law 88–605, September 19, 1964). [(Public Law 89–16, April 30, 1965, appropriated no additional funds for NDEA in fiscal year 1965, but it authorized the use of up to $516,810 of the amount appropriated under Public Law 88–605 for making payments to institutions for cancellation of student loans.)] Supplemental Appropriation Act, 1965 (Public Law 88–635, October 7, 1964).

Fiscal year 1966:

Departments of Labor, and Health, Education, and Welfare Appropriation Act, 1966 (Public Law 89–156, August 31, 1965).

Fiscal year 1967:

Departments of Labor, and Health, Education, and Welfare Appropriation Act, 1967 (Public Law 89–787, November 7, 1966).

II. Higher Education Facilities Act of 1963 (Public Law 88–204, December 16, 1963)

Fiscal year 1965:

Departments of Labor, and Health, Education, and Welfare Appropriation Act, 1965 (Public Law 88–605, September 19, 1964).

Fiscal year 1966:

Departments of Labor, and Health, Education, and Welfare Appropriation Act, 1966 (Public Law 89–156, August 31, 1965).

Fiscal year 1967:

Supplemental Appropriation Act, 1967 (Public Law 89–697, October 27, 1966).

III. Vocational Education Act of 1963 (Public Law 88–210, December 18, 1963)

Fiscal year 1965:

Departments of Labor, and Health, Education, and Welfare Appropriation Act, 1965 (Public Law 88–605, September 19, 1964).

Fiscal year 1966:

Departments of Labor, and Health, Education, and Welfare Appropriation Act, 1966 (Public Law 89–156, August 31, 1965).

Fiscal year 1967:

Departments of Labor, and Health, Education, and Welfare Appropriation Act, 1967 (Public Law 89–787, November 7, 1966).

IV. Elementary and Secondary Education Act of 1965 (Public Law 89–10, April 11, 1965)

Fiscal year 1966:

Departments of Labor, and Health, Education, and Welfare Supplemental Appropriation Act, 1966 (Public Law 89–199, September 23, 1965). Second Supplemental Appropriation Act, 1966 (Public Law 89–426, May 13, 1966).

Fiscal year 1967:

Supplemental Appropriation Act, 1967 (Public Law 89–697, October 27, 1966).

V. Higher Education Act of 1965 (Public Law 89–329, November 8, 1965)

Fiscal year 1966:

Supplemental Appropriation Act, 1966 (Public Law 89–309, October 31, 1965). Second Supplemental Appropriation Act, 1966 (Public Law 89–426, May 13, 1966).

Fiscal year 1967:

Supplemental Appropriation Act, 1967 (Public Law 89–697, October 27, 1966). Departments of Labor, and Health, Education, and Welfare Appropriation Act, 1967 (Public Law 89–787, November 7, 1966).

APPENDIX 2

A. TIME SEQUENCE AND ACTIVITY FOLLOWING PRESIDENT JOHNSON'S SIGNING OF THE APPROPRIATION ACTS FOR THE ELEMENTARY AND SECONDARY EDUCATION ACT OF 1965 AND THE ESEA AMENDMENTS OF 1966

Activity	1965												1966											
	January	February	March	April	May	June	July	August	September	October	November	December	January	February	March	April	May	June	July	August	September	October	November	December
Appropriation signed by President Johnson (Sept. 23, 1965)									I–II III V															
Draft regulations (June 23, 1965)								I–II	III															
Regulations published in Federal Register (Sept. 15, 1965)									I–II V	III														
Draft guidelines issued (September–October 1965)									III	I														
Final guidelines issued ¹									II	III			I											
Funds available to local school district or State department									I–II		V		III											
	1966												1967											
Amendments to ESEA (1966) ²																								
President signed appropriation (Nov. 7, 1966)												I–II III												
Regulations published (Feb. 8, 1967)														I–II III										
Notified funds available (Nov. 19, 1966)												I–II III												
Final allocations (Feb. 17, 1967)														I–II										

[1] Title V has no guidelines.

[2] All allocations retroactive to July 1, 1966.

B. CHRONICLE OF ESEA

House:

1. Bill introduced: Jan. 12, 1965.
2. Bill reported from Education and Labor Committee (H.R. 143). Mar. 8, 1965.
3. Passed House: Mar. 29, 1965.

Senate:

1. Senate received: Mar. 29, 1965.
2. Bill reported from Labor and Public Welfare Committee: Apr. 6, 1965.
3. Passed Senate: Apr. 9, 1965.
4. Congress passed appropriations: Sept. 9, 1965.

Presidential action:

1. Signed: Apr. 11, 1965.
2. Signed appropriations: Sept. 23, 1965.

USOE action:

1. Draft regulations: June 23, 1965.
2. Regulations published: Sept. 15, 1965.
3. Draft guidelines: Oct. 13, 1965.
4. Final guidelines.[1]

Amendments to ESEA:

1. H.R. 13160, to amend Public Law 89-10, introduced: Mar. 1, 1966.
2. Approved by Education and Labor Committee: July 28, 1966.
3. Passed House: Oct. 6, 1966.
4. Passed Senate (S. 3046). Oct. 6, 1966.
5. President signed: Nov. 7, 1966.
6. Appropriations introduced (H.R. 14745): Jan. 24, 1966.
7. House passed: May 5, 1966.
8. Senate passed: Sept. 28, 1966.
9. President signed: Nov. 7, 1966.
10. Regulations published: Feb. 9, 1967.
11. Funds available to local school districts: Nov. 19, 1966.
12. Final allocations: Feb. 17, 1967.
13. Allocations retroactive to: July 1, 1966.

* * * * *

EXAMPLE OF SYSTEM IN OPERATION

FY-1: Appropriate FY-1 funds for planning and evaluation grants. Appropriate FY-2 funds for operations.

FY-2: Appropriate FY-2 funds for planning and evaluation grants. Appropriate FY-3 funds for program operations grants.

FY-3: Appropriate FY-3 funds for planning and evaluation grants. Appropriate FY-4 funds for program operations grants.

FY-4: Appropriate FY-4 funds for planning and evaluation grants. Appropriate FY-5 funds for program operations grants. Enact extension of program.

FY-5: Appropriate FY-5 funds for planning and evaluation grants. Appropriate FY-6 funds for program operations grants. Pursuant to new authorization.

Note: To convert an existing program to the proposed funding system it will be necessary to appropriate funds for the current year and the subsequent year in the same appropriation act. This will not constitute doubling up since each appropriation will be available for obligation only in the designated year.

APPENDIX 3. REPORT PRESENTATION IN CHART FORM

A proposal to make HEW support of education more effective.

A model authorization and funding system for elementary and secondary education.

The problem: The Federal fiscal year and the flow of annual appropriations for ESEA (and education programs generally) are out of phase with academic year.

The educational community contends that this—coupled with existing short-term authorizations (1-2 years) and abrupt legislative changes in Federal program support—creates uncertainties and impairs the effectiveness of Federal support.

Study of the problem

Representatives from State and local school systems, State governments, worked with HEW in a study of these problems.

They found that the problems are real and significant.

They concluded that—

1. The Federal funding cycle: Results in inadequate utilization of enlarged Federal support. Interferes with Federal/State coordination and State and local planning.

2. Short-term authorizations do create uncertainties for educational agencies.

3. Particular difficulties do arise during the period immediately before and after an authorization is scheduled to expire.

4. These factors adversely affect program quality and the achievement of program objectives.

5. These same problems and uncertainties exist among a number of federally-supported programs.

Let's look at the funding cycle and its relationship to planning and operation of a school year:

	Availability of Federal funds	*School spending and operating cycle*
JANUARY	President sends budget to Congress.	School board approves budget (September-August operating year) hiring interviews.
APRIL		Teacher and other contracts signed.
JULY	Federal fiscal year begins. Allotments (interim) made under continuing resolution.	Summer session begins (based on previous years budget).
SEPTEMBER		Regular school year begins.
SEPTEMBER–NOVEMBER	Appropriation act. Apportionment by Bureau of Budget. Allotments to States.	
SEPTEMBER–NOVEMBER OR LATER		Receipt of allocations by States and school districts.

Under the two cycles: School budgets are made 9-10 mo. ahead of Federal funds. Commitments to spend occur 6 mo. ahead of Federal funds.

Because of this: Schools don't know whether to expect Federal support at the same level, whether to accelerate, slow-down, stop, etc.

Is it true that authorizations are short-term—and that abrupt changes have been made in Federal support for education?

Examples of legislation with short-term authorizations:

1 year—ESEA (original law enacted for one year, 1966), title III Higher Education Act, Juvenile Delinquency Act (one year until 1967), partnership for health formula grants (1968).

2 years—ESEA amendments of 1966 (1967 and 1968), Adult Education Act (1967 and 1968), parts of Higher Education Act (1967 and 1968), Vocational Rehabilitation Act of 1966 (1966 and 1967), Older Americans Act (1966 and 1967).

Examples of late starting dates:

ESEA Amendments of 1966: Signed into law November 3, 1966, effective for entire year, beginning July 1, 1966.

ESEA Amendments of 1967: Change in formula now pending. House bill would make change effective for entire fiscal year 1968—although enactment won't occur before October.

Higher Education Act of 1965: Signed into law November 8, 1966, effective for entire year, beginning July 1, 1966.

Narcotics Rehabilitation Act: Signed into law in November 1966, effective as of July 1, 1966.

Examples of abrupt changes and uncertainties about extension legislation:

Title I ESEA: Formula has changed twice in two years—may change a third time (in middle of 1968); two of three changes will have affected one year (1968).

Teacher Corps: Scheduled to expire on 6/30/67; extended on 6/29.

Older Americans Act: Expired on 6/30/67; extended on 7/1.

Higher Education Facilities Act: Expired on 6/30/66; not extended until October 1966.

A model system to correct these problems:

The model is tailored to elementary and secondary education.

If Congress agrees and it proves workable, it could be applied to other programs.

The model is designed to: 1. Achieve longer program authorizations. 2. Provide a time period and special funds for planning. 3. Improve the federal funding cycle. 4. Provide lead-time of at least one year for any proposal to terminate, extend or significantly revise the program.

The model

A. Proposal for longer authorizations: Authorizations would be for a minimum of five years.

B. Provisions for planning and evaluation:

1. Planning and evaluation grants to States and localities would be available for each of the five years of authorization. Planning and evaluation grants authorized for each year would be related to and identified with the overall operational support grant authorized for the next year.

2. For new programs, regular program operation grants would be authorized first in the second year of the program. Allowing the first year for planning. A planning grant would be authorized for the first year of a new program.

3. Appropriation action would provide separate planning and evaluation grant funds.

4. The program administrator would be required to furnish annual reports to Congress and by the fourth year, a comprehensive "evaluation report" as a basis for congressional consideration of extension legislation.

C. Provision for advance funding: Appropriate operational funds in the appropriation act a year in advance to the effective date. This will give notice of funding levels and will facilitate early commitments for teachers. To convert existing programs to the new timetable appropriate funds for each of two years. Separately identify the amounts by period of availability to avoid doubling up.

D. Proposed bridge between expiring legislation and extension legislation:

1. Provide for consideration of extension legislation in the fourth year—to allow lead-time.

2. Appropriations would be authorized for one additional year (the 6th year) in the event extension legislation has not been enacted by the last year of the then current authorization (the 5th year).

Mr. MORSE. Although the presentation was based upon a 5-year authorization concept, upon questioning we were advised that the plan could work, albeit with difficulty, upon a 3-year basis, and it is in the latter form that it appears in title IV of our recommended bill.

In order that the Senate may have as

---

[1] See preceding table.

full information as possible on this major area of concern, I ask unanimous consent that relevant excerpts from the committee report be printed at this point in my remarks.

There being no objection, the excerpts were ordered to be printed in the Record, as follows:

Short Summary of the Principal Provisions of the Bill

If H.R. 7819 were to be enacted as amended by the committee, the following changes would be made in existing law:

TITLES III AND IV, H.R. 7819, COMMENTS—DURATION OF AN AUTHORIZATION FOR PROGRAMS AND PROVISIONS FOR ADEQUATE LEADTIME AND FOR PLANNING AND EVALUATION IN ELEMENTARY AND SECONDARY EDUCATION PROGRAMS

The committee has long been concerned with the need to reconcile the requirements of the congressional authorization and appropriation cycle regarding education legislation with the requirements of Federal, State, and local implementation of education programs. The Federal process which results in the authorization, appropriation, and administration of national programs of educational support is an extended and complex process involving cooperation at all levels of government. The Congress must carefully consider the substance and content of new programs, and it must determine a suitable level of funding. Federal agencies must develop necessary administrative rules and regulations. States must coordinate the actions of their legislatures with those of their local governments, and local school districts must plan, budget, and hire necessary staff.

Perhaps no other aspect of the Elementary and Secondary Education Act of 1965, as amended, has disturbed the educational authorities in the States and communities more than the late funding of programs authorized by the law. The school year ordinarily begins on September 1. Planning for the opening of the school involves budgetary commitments by local educational agencies in the preceding March and April. In many States contracts are signed with teachers in late April. Other States under their contract laws specify that contracts are automatically extended if by a date certain termination notices have not been received. The Congressional appropriations cycle is, of course, governed by the dates the budget estimates are received by the Congress in January. The hearings process, committee action and floor action in the House of Representatives has traditionally preceded floor action in the Senate. Few, if any, of the major regular appropriations bills in recent years have been signed by the President prior to July 1. If school districts must plan to fund activities authorized under educational legislation only after the appropriations bill has been signed by the President, many vital activities of local school districts are compressed.

When these activities which are vital to the implementation of programs are compressed, however, significant problems result. Planning of high-quality programs becomes impossible; recruitment and employment of teachers and specialists needed to achieve the best results from new programs is difficult in the middle of an ongoing school year—often, auxiliary personnel are hired on the basis of availability rather than experience and ability; and finally, community pressure for full utilization of funds, often in a quarter of the time which would ordinarily be required, results in expenditures for low-priority school needs—funds are used for more of the same, antiquated approaches to critical educational problems.

As a result of these critical situations, public expectations and enthusiasm for federally assisted programs remain unfulfilled and considerably dampened.

This year, in his message to the Congress on health and education, President Johnson urged that the Congress enact education appropriations early enough to allow the Nation's schools and colleges to plan effectively. He directed Secretary John W. Gardner to work with the Congress toward this end. In September of this year, the Task Force on Timing of Department of Health, Education, and Welfare Appropriations for Educational Programs presented the findings and recommendations of its study to the Secretary. Title IV of the committee bill provides for program planning and evaluation, advance funding, contingent extension of expiring appropriation authority, and availability of appropriations on a school year basis. It is the result of our discussions with Department of Health, Education, and Welfare. The aforementioned amendments would authorize the following:

1. All programs amended by H.R. 7819 would be extended through fiscal year 1971.

2. Funds would be available to the Secretary for grants to States and localities and for contracts and other payments of expenses for planning and evaluation of programs under titles I, II, III, VI, VII, and VIII of the Elementary and Secondary Education Act for each fiscal year.

3. Appropriations are authorized to be advanced 1 year, thus giving notice to officials at the Federal, State, and local level of the amounts which will become available at the beginning of the next fiscal year. This will require appropriation action with respect to 2 years in order to put ongoing programs on the new schedule. This will not constitute doubling up inasmuch as the funds for each year would be available for obligation only with respect to the year identified.

4. The Secretary of DHEW shall make an annual evaluation report to the Congress on March 31 of each year. He shall make a comprehensive report based on the entire past life of a program to be submitted in the penultimate fiscal year for which appropriations are authorized for the program. This report would include legislative recommendations. Thus, the Congress would consider the extension or modification of the program authorization during the penultimate fiscal year in order to provide a year's leadtime for State and local planning purposes.

5. Appropriations are authorized to be made for 1 additional year if legislation to authorize an extension has not been either enacted or rejected by the end of the congressional session in which the comprehensive evaluation report for the past life of the program is filed with Congress. The committee further added a provision that if, by May 15 of any fiscal year, the appropriation for carrying out title I of the ESEA during the succeeding fiscal year has not been enacted, the Commissioner may execute grant agreements for such succeeding fiscal year, but only at the current appropriation level.

6. Appropriations for any fiscal year may be made available for expenditure by the agency or institution on the basis of an academic or school year different from such fiscal year.

Section-by-Section Analysis

TITLE III—DURATION OF AND AUTHORIZATION FOR PROGRAMS

Section 301. Extension of programs

Subsection (a) extends title I of the Elementary and Secondary Education Act of 1965 (title II, Public Law 81–874) to June 30, 1971.

Paragraph (b) extends title II of the Elementary and Secondary Education Act of 1965 (school library resources, textbooks, and other instructional materials) to June 30, 1971, and authorizes appropriations of $175,000,000 for fiscal year 1969, $200,000,000 for fiscal year 1970, and $225,000,000 for fiscal year 1971.

Subsection (c) extends part A of title VI of the Elementary and Secondary Education Act (relating to grants to the States for education of handicapped children) to June 30, 1971, and authorizes appropriations of $175,000,000 for fiscal year 1969, $200,000,000 for fiscal year 1970, and $225,000,000 for fiscal year 1971.

Subsection (d) extends the temporary provisions of Public Law 81–815 to June 30, 1971.

Subsection (e) extends the temporary provisions of Public Law 81–874 to June 30, 1971.

TITLE IV—PROVISIONS FOR ADEQUATE LEADTIME AND FOR PLANNING AND EVALUATION IN ELEMENTARY AND SECONDARY EDUCATION PROGRAMS

Section 401. Acts subject to this title

This section provides that the provisions of this title shall apply to title I, II, III, V, VI, VII, and VIII of the Elementary and Secondary Education Act, and the Adult Education Act.

Section 402. Program planning and evaluation

This section authorizes the appropriation, for each fiscal year for which appropriations are authorized under any legislation referred to in section 401, of such sums as may be necessary for expenses for planning and evaluation of programs or projects authorized under such legislation.

Section 403. Advance funding

This section authorizes the inclusion of appropriations to carry out the provisions of any of the acts referred to in section 401 in the appropriation act for the fiscal year preceding the fiscal year for which they are available for obligation. The section further provides that this authorization shall apply even though in its initial application two separate appropriations may be enacted in the same fiscal year, one for the then current fiscal year and one for the succeeding fiscal year.

Section 404. Evaluation reports and congressional review

This section provides that the Secretary of Health, Education, and Welfare, shall transmit to the committees having legislative jurisdiction and the appropriations committees of each house of Congress an evaluation report not later than March 31 of each year, and the Secretary shall include his recommendations relating thereto (including legislative recommendations). Subsection (b) provides that any such report in the next-to-the-last fiscal year for which appropriations are authorized for any such program, shall include a comprehensive review and evaluation which shall be cumulative for the entire past life of such program.

Section 405. Contingent extension of expiring appropriation authority

Subsection (a) provides that if Congress has not passed or formally rejected legislation extending the authorization for any legislation during the regular session in which a comprehensive report is required, in accordance with the preceding section, the authorization is automatically extended for one fiscal year beyond its expiration date and at the same level of the last year's authorization.

Subsection (b) provides that, if an appropriation for title I of the Elementary and Secondary Education Act has not been enacted prior to May 15 preceding the beginning of any fiscal year, the Commissioner may execute agreements for grants under title I for such fiscal year, at a level continuing at the same rate as the appropriation for the preceding fiscal year.

Section 406. Availability of appropriations on academic or school year basis.

This section provides that appropriations may be made available on an academic year or school year basis differing from a fiscal year, in accordance with regulations of the Secretary.

Mr. MORSE. Mr. President, this has been a very long presentation but the matter covered in this bill is of the greatest consequence to the future of American education.

In closing this presentation, I wish to pay unstinting tribute to each of my colleagues on the subcommittee, and in full committee, for each has contributed greatly to the result we bring to the Senate in accordance with the criterion that has ever guided our operations. I think I can say without fear of contradiction this year, even more than in all previous years, that the committee has acted as a committee without regard to partisan considerations in bringing to the Senate what we believe to be the best solutions to many problems. I urge that in floor consideration of the measure, Senators keep in mind this point; and it is my hope that we can bring from conference before long a conference report which will reflect the care and thought that has been given in both Houses to the proposed legislation. I pledge for myself that this will be my objective; and in order that the RECORD may contain the full history of this legislation. I ask unanimous consent that at this point in my remarks the text of H.R. 7819 as reported be printed, to be followed by the appendices for which permission has already been secured, together with sundry tables relevant to the provisions of the bill and Cordon print with changes in existing law made by the bill.

There being no objection, the material was ordered to be printed in the RECORD, as follows:

H.R. 7819

An act to strengthen and improve programs of assistance for elementary and secondary education by extending authority for allocation of funds to be used for education of Indian children and children in overseas dependents schools of the Department of Defense, by extending and amending the National Teacher Corps program, by providing assistance for comprehensive educational planning, and by improving programs of education for the handicapped; to improve authority for assistance to schools in federally impacted areas and areas suffering a major disaster; and for other purposes

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled, That this Act may be cited as the "Elementary and Secondary Education Amendments of 1967".

ADMINISTRATION

SEC. 2. Rules, regulations, guidelines, or other published interpretations or orders issued by the Department of Health, Education, and Welfare or the United States Office of Education, or by any official of such agencies, in connection with, or affecting the administration of programs authorized by this Act or by any Act amended by this Act shall contain immediately following each substantive provision of such rules, regulations, guidelines, interpretations, or orders, citations to the particular section or sections of statutory law or other legal authority upon which such provision is based. All such rules, regulations, guidelines, interpretations, or orders shall be uniformly applied and enforced throughout the fifty States.

TITLE I—AMENDMENTS TO THE ELEMENTARY AND SECONDARY EDUCATION ACT OF 1965, AND RELATED AMENDMENTS

PART A—AMENDMENTS TO TITLE I OF ELEMENTARY AND SECONDARY EDUCATION ACT OF 1965

PROVISIONS RELATING TO SCHOOLS FOR INDIAN CHILDREN

SEC. 101. The third sentence of section 203 (a)(1)(A) of the Act of September 30, 1950 (Public Law 874, Eighty-first Congress), is amended by striking out "June 30, 1967," and inserting in lieu thereof "June 30, 1968, and the fiscal year ending June 30, 1969,".

RAISING THE DOLLAR LIMITATION FOR STATE ADMINISTRATIVE EXPENSES UNDER TITLE II OF PUBLIC LAW 874

SEC. 102. Effective for fiscal years beginning after June 30, 1967, section 207(b)(2) of the Act of September 30, 1950 (Public Law 874, Eighty-first Congress), is amended by striking out "$75,000" and inserting in lieu thereof "$150,000".

TECHNICAL CORRECTIONS WITH RESPECT TO PAYMENTS ON ACCOUNT OF NEGLECTED OR DELINQUENT CHILDREN

SEC. 103. (a) The first sentence of section 203(a)(2) of the Act of September 30, 1950 (Public Law 874, Eighty-first Congress), is amended by inserting "(other than such institutions operated by the United States)" immediately after "living in institutions for neglected or delinquent children", and by striking out "paragraph (5)" and inserting in lieu thereof "paragraph (7)".

(b) Section 205(c)(1)(C) of such Act is amended by striking out "(8)" and inserting in lieu thereof "(11)".

(c) Section 206(a)(3) and section 207(b) of such Act are each amended by striking out "section 205(a)(5)" and inserting in lieu thereof "section 205(a)(6)".

CONFORMING AMENDMENTS TO MAKE STATE OR NATIONAL AVERAGE PER PUPIL EXPENDITURE OPTION AVAILABLE TO STATE AGENCY PROGRAMS UNDER TITLE I

SEC. 104. (a)(1) The second sentence of section 203(a)(6) of the Act of September 30, 1950, is amended by striking out "average per pupil expenditure in the United States" and inserting in lieu thereof the following: "average per pupil expenditure in that State or, if greater, in the United States".

(2) The first sentence of section 203(a)(7) of such Act is amended by inserting after "average per pupil expenditure in that State" the following: "or, if greater, in the United States".

(b)(1) Section 203(a)(2) of such Act is amended by striking out the last sentence thereof.

(2) Section 203(a)(6) of such Act is amended by striking out the last sentence thereof.

(3) Section 203 of such Act is amended by adding at the end thereof the following subsection:

"(e) For purposes of this section, the 'average per pupil expenditure' in a State, or in the United States, shall be the aggregate current expenditures, during the second fiscal year preceding the fiscal year for which the computation is made, of all local educational agencies as defined in section 303(6)(A) in the State, or in the United States (which for the purposes of this subsection means the fifty States and the District of Columbia), as the case may be, plus any direct current expenditures by the State for operation of such agencies (without regard to the sources of funds from which either of such expenditures are made), divided by the aggregate number of children in average daily attendance to whom such agencies provided free public education during such preceding year."

(4) The first sentence of section 203(a)(2) and the first sentence of section 203(a)(5) are each amended by striking out the matter in the parenthesis immediately after "United States".

USE OF RECENT CASELOAD DATA

SEC. 105. The third sentence of section 203(d) of the Act of September 30, 1950 (Public Law 874, Eighty-first Congress), is amended by striking out "latest calendar or fiscal year data, whichever is later" and inserting in lieu thereof "caseload data for the month of January of the preceding fiscal year".

JOINT TRAINING PROGRAMS FOR EDUCATION AIDES AND PROFESSIONAL STAFF

SEC. 106. Section 205(a) of the Act of September 30, 1950 (Public Law 874, Eighty-first Congress), is amended by inserting a semicolon at the end of paragraph (9), by striking out the period at the end of paragraph (10) and inserting in lieu thereof a semicolon and the word "and", and by adding at the end thereof the following new paragraph:

"(11) in the case of projects involving the use of education aides, the local educational agency sets forth well-developed plans providing for coordinated programs of training in which education aides and the professional staff whom they are assisting will participate together."

ADJUSTMENTS WHERE NECESSITATED BY APPROPRIATIONS

SEC. 107. (a) Section 208 of the Act of September 30, 1950 (Public Law 874, Eighty-first Congress) is amended (1) by dividing it into two subsections composed, respectively, of the first two sentences as subsection "(a)" and the remainder as subsection "(b)", and (2) by amending the first sentence of such section to read as follows: "If the sums appropriated for any fiscal year for making the payments provided in this title are not sufficient to pay in full the total amounts which all local and State educational agencies are eligible to receive under this title for such year—

"(1) the amount available for each grant to a State agency eligible for a grant under paragraph (5), (6), or (7) of section 203(a) shall be equal to the maximum grant as computed under such paragraph;

"(2) the minimum aggregate amount available for each county, for grants to local educational agencies having school districts in such county, shall be equal to the aggregate amount allocated for such county from appropriations for the preceding fiscal year: *Provided,* That, if the total of such allocations for all counties exceeds the amount remaining after allocations are made under paragraphs (1) and (3) of this sentence, the amounts of allocations pursuant to this paragraph shall be reduced ratably;

"(3) the minimum amount available for payments to each State educational agency for the purposes of section 207(b) shall be equal to 1 per centum of the aggregate amounts available within that State pursuant to paragraphs (1) and (2) of this sentence (including, when applicable, the proviso to paragraph (2)), except that no State shall receive less than the minimum amount provided for in section 207(b)(2); and

"(4) any amount of such appropriations remaining after making the allocations prescribed pursuant to the preceding paragraphs shall be allocated by computing such remainder in accordance with section 203(a)(2) and section 207(b)(1), as ratably reduced: *Provided,* That the aggregate amount allocated to any State under this paragraph and paragraph (3) for the purposes of section 207(b) shall not, except where necessary to provide the minimum amount specified in section 207(b)(2), exceed 1 per centum of the aggregate amount computed for other purposes under this paragraph and paragraphs (1) and (2) (including the proviso to paragraph (2)."

(b) Such section 208 is further amended by adding thereto the following subsections:

"(c) This section shall not apply to States to which allotments are made under section 203(a)(1).

"(d) In the case of any State (or multicounty part thereof) that consists of a single school district, the term 'county', as used in this section, means such State (or multicounty part thereof)."

SPECIAL INCENTIVE GRANTS

SEC. 108. (a) Title II of the Act of September 30, 1950 (Public Law 874, Eighty-first Congress), is further amended by—

(1) inserting "PART A—BASIC GRANTS" immediately after the heading of such title;

(2) striking out "this title" wherever it appears in sections 201 through 208 and inserting in lieu thereof "this part";

(3) inserting "PART C—GENERAL PROVISIONS" immediately before the section heading of section 209;

(4) redesignating sections 209 through 214 and references thereto as sections 231 through 236; and

(5) inserting after section 208 thereof the following new part:

"PART B—INCENTIVE GRANTS

"SPECIAL INCENTIVE GRANTS

"SEC. 221. (a) A special incentive grant shall be made for any fiscal year beginning after June 30, 1967, to the State educational agency of each State which has an effort index for such year that exceeds the national effort index for such year. The amount of such special incentive grant shall be determined by multiplying the amount of $1 for each 0.01 per centum by which such State's effort index for such year exceeds the national effort index for such year times the aggregate number of children counted for purposes of entitling local educational agencies within such State to basic grants in accordance with classes (2), (5), (6), and (7) of section 203(a) of this Act. If the sum of the amounts so determined for all the States exceeds the amount appropriated pursuant to this part for any fiscal year, such amounts shall be ratably reduced. No State agency shall receive in any year a grant pursuant to this section which is in excess of 15 per centum of the total amount appropriated for such year for the purpose of this section. The State educational agency shall distribute such grant to those local educational agencies in such State which are in the greatest need of additional funds, for the purposes set forth in section 205(a), and amounts so distributed shall be used by such agencies in accordance with the provisions governing the use of grants to such agencies under this title.

"(b) Grants pursuant to this section shall be made upon application containing such information as the Commissioner may require for the purpose of this section. The Commissioner shall not finally disapprove such an application except after reasonable notice and opportunity for a hearing to the State educational agency.

"(c) For the purpose of this section the term 'State effort index' means the per centum expressing the ratio of expenditures from all sources in a State for public elementary and secondary education to the total personal income in such State, and the term 'national effort index' means the per centum expressing the ratio of such expenditures in all States to the total personal income in all States.

"(d) For the purpose of making grants under this part there are authorized to be appropriated not in excess of $50,000,000 each for the fiscal year ending June 30, 1968 and the three succeeding fiscal years."

(b) Sections 232 and 233(a) of such Act (as redesignated by subsection (a) of this section) are each amended by striking out "or 206(b)" and inserting in lieu thereof ", 206(b) or 221(b)".

(c) The amendments made by this section shall be effective with respect to appropriations enacted after the date of enactment of this Act.

AGRICULTURAL WORKERS

SEC. 109. Section 205(c) of the Act of September 30, 1950 (Public Law 874, Eighty-first Congress), is amended by adding at the end thereof the following new paragraph:

"(3) For purposes of this subsection, with the concurrence of his parents, a migratory child of a migratory agricultural worker shall be deemed to continue to be such a child for a period, not in excess of five years, during which he resides in the area served by the agency carrying on a program or project under this subsection."

REDESIGNATING SECTION NUMBERS IN TITLE II OF PUBLIC LAW 874

SEC. 110. For the purpose of avoiding confusion between references to section numbers of title II of the Elementary and Secondary Education Act of 1965 and references to section numbers of title II of Public Law 874, Eighty-first Congress (which latter title is also generally cited as title I of the Elementary and Secondary Education Act of 1965), sections 201 through 208, 221, and 231 through 236 of Public Law 874, Eighty-first Congress, as amended by the preceding sections of this Act, are redesignated as sections 101 through 108, 121, and 131 through 136, respectively, and all references to any such section in that or any other law, or in any rule, regulation, order, or agreement of the United States are amended so as to refer to such section as so redesignated.

STUDY OF IMPACT OF CHILDREN LIVING IN PUBLIC HOUSING

SEC. 111. The Secretary of Health, Education, and Welfare shall make a study of the burden imposed on a local educational agency by the presence of low-rent public housing within the boundaries of its school district. The Secretary shall submit a report on the results of his study to the Senate and House of Representatives on or before January 10, 1968. Such report shall include such recommendations for legislation as the Secretary deems appropriate.

COMPLIANCE WITH CIVIL RIGHTS ACT OF 1964

SEC. 112. Section 182 of title I of Public Law 89–750, Eighty-ninth Congress, is amended by striking the period at the end of section 182, inserting in lieu thereof a colon and the following language: "*Provided*, That, for the purpose of determining whether a local educational agency is in compliance with title VI of the Civil Rights Act of 1964 (Public Law 88–352), compliance by such agency with a final order or judgment of a Federal court for the desegregation of the school or school system operated by such agency shall be deemed to be compliance with such title VI, insofar as the matters covered in the order or judgment are concerned."

STUDY OF DATA USED TO ESTABLISH ENTITLEMENTS

SEC. 113. The Commissioner of Education and the Secretary of Commerce, acting together, shall prepare and submit to the Senate and House of Representatives, on or before May 1, 1968, a report setting forth a method of determining the information necessary to establish entitlements within each of the several States under title I of the Elementary and Secondary Education Act of 1965 on the basis of data later than 1960. Such report shall include recommendations for legislation necessary to permit the adoption of such method.

PART B—AMENDMENTS TO TITLE II OF THE ELEMENTARY AND SECONDARY EDUCATION ACT OF 1965

EXTENDING FOR TWO YEARS PROVISIONS RELATING TO SCHOOLS FOR INDIAN CHILDREN AND DEFENSE DEPARTMENT OVERSEAS DEPENDENTS SCHOOLS

SEC. 121. Section 202(a)(1) of the Elementary and Secondary Education Act of 1965 is amended by striking out "June 30, 1967" and inserting in lieu thereof "June 30, 1968, and the fiscal year ending June 30, 1969".

PART C—REVISION OF TITLE III OF ELEMENTARY AND SECONDARY EDUCATION ACT OF 1965

SEC. 131. Title III of the Elementary and Secondary Education Act of 1965 is amended to read as follows:

"TITLE III—SUPPLEMENTARY EDUCATIONAL CENTERS AND SERVICES

"APPROPRIATIONS AUTHORIZED

"SEC. 301. (a) The Commissioner shall carry out a program for making grants for supplementary educational centers and services, to stimulate and assist in the provision of vitally needed educational services not available in sufficient quantity or quality, and to stimulate and assist in the development and establishment of exemplary elementary and secondary school educational programs to serve as models for regular school programs.

"(b) For the purpose of making grants under this title, there is hereby authorized to be appropriated the sum of $100,000,000 for the fiscal year ending June 30, 1966; $175,000,000 for the fiscal year ending June 30, 1967; $500,000,000 for the fiscal year ending June 30, 1968; $525,000,000 for the fiscal year ending June 30, 1969; $550,000,000 for the fiscal year ending June 30, 1970; and $575,000,000 for the fiscal year ending June 30, 1971. In addition, there are hereby authorized to be appropriated for the fiscal year ending June 30, 1968, and each of the three succeeding fiscal years, such sums as may be necessary for the administration of State plans, the activities of advisory councils, and the evaluation and dissemination activities required under this title.

"ALLOTMENT AMONG STATES

"SEC. 302. (a)(1) There is hereby authorized to be appropriated for each fiscal year for the purposes of this paragraph an amount equal to not more than 3 per centum of the amount appropriated for such year for grants under this title. The Commissioner shall allot the amount appropriated pursuant to this paragraph among Puerto Rico, Guam, American Samoa, the Virgin Islands, and the Trust Territory of the Pacific Islands according to their respective needs for assistance under this title. In addition for each fiscal year ending prior to July 1, 1969, he shall allot from such amount to (A) the Secretary of the Interior the amount necessary to provide programs and projects for the purpose of this title for individuals on reservations serviced by elementary and secondary schools operated for Indian children by the Department of the Interior, and (B) the Secretary of Defense the amount necessary for such assistance for children and teachers in the overseas dependents schools of the Department of Defense. The terms upon which payments for such purpose shall be made to the Secretary of the Interior and the Secretary of Defense shall be determined pursuant to such criteria as the Commissioner determines will best carry out the purposes of this title.

"(2) From the sums appropriated for making grants under this title for any fiscal year pursuant to section 301 (b), the Commissioner shall allot $200,000 to each State and shall allot the remainder of such sums among the States as follows:

"(A) He shall allot to each State an amount which bears the same ratio to 50 per centum of such remainder as the number of children aged five to seventeen, inclusive, in the State bears to the number of such children in all the States, and

"(B) He shall allot to each State an amount which bears the same ratio to 50 per centum of such remainder as the population of the State bears to the population of all the States.

For the purposes of this subsection, the term 'State' does not include the Commonwealth of Puerto Rico, Guam, American Samoa, the Virgin Islands, and the Trust territory of the Pacific Islands.

"(b) The number of children aged five to seventeen, inclusive, and the total population of a State and of all the States shall be determined by the Commissioner on the basis of the most recent satisfactory data available to him.

"(c) The amount allotted to any State under subsection (a) for any fiscal year, which the Commissioner determines will not be required for the period for which that amount is available, shall be available for grants pursuant to section 306 in such State, and if not so needed may be reallotted or used for grants pursuant to section 306 in other States. Funds available for reallotment may be realloted from time to time, on such dates during that period as the Commissioner may fix, among other States in proportion to the amounts originally allotted among those States under subsection (a) for that year, but with the proportionate amount for any of the other States being reduced to the extent it exceeds the sum the Commissioner estimates that State needs and will be able to use for that period; and the total of these reductions may be similarly reallotted among the States whose proportionate amounts were not so reduced. Any amount reallotted to a State under this subsection from funds appropriated pursuant to section 301 for any fiscal year shall be deemed to be a part of the amount allotted to it under subsection (a) for that year.

"(d) The amounts made available under the first sentence of subsection (c) for any fiscal year shall remain available for grants during the next succeeding fiscal year.

"USES OF FEDERAL FUNDS

"SEC. 303. (a) Funds appropriated pursuant to section 301 shall, except as provided in subsection (b), be available only for grants in accordance with applications approved pursuant to this title for—

"(1) planning for and taking other steps leading to the development of programs or projects designed to provide supplementary educational activities and services described in paragraphs (2) and (3), including pilot projects designed to test the effectiveness of plans so developed;

"(2) the establishment or expansion of exemplary and innovative educational programs (including dual-enrollment programs and the lease or construction of necessary facilities) for the purpose of stimulating the adoption of new educational programs (including those described in section 503(4) and special programs for handicapped children) in the schools of the State; and

"(3) the establishment, maintenance, operation, and expansion of programs or projects, including the lease or construction of necessary facilities and the acquisition of necessary equipment, designed to enrich the programs of local elementary and secondary schools and to offer a diverse range of educational experience to persons of varying talents and needs by providing, especially through new and improved approaches, supplementary educational services and activities, such as—

"(A) comprehensive guidance and counseling, remedial instruction, and school health, physical education, recreation, psychological, social work, and other services designed to enable and encourage persons to enter, remain in, or reenter educational programs, including the provision of special educational programs and study areas during periods when schools are not regularly in session;

"(B) comprehensive academic services and, where appropriate, vocational guidance and counseling, for continuing adult education;

"(C) specialized instruction and equipment for students interested in studying advanced scientific subjects, foreign languages, and other academic subjects which are not taught in the local schools or which can be provided more effectively on a centralized basis, or for persons who are handicapped or of preschool age;

"(D) making available modern educational equipment and specially qualified personnel, including artists and musicians, on a temporary basis for the benefit of children in public and other nonprofit schools, organizations, and institutions;

"(E) developing, producing, and transmitting radio and television programs for classroom and other educational use;

"(F) in the case of any local educational agency which is making a reasonable tax effort but which is nevertheless unable to meet critical educational needs (including preschool education), because some or all of its schools are seriously overcrowded, obsolete, or unsafe, initiating and carrying out programs or projects designed to meet those needs, particularly those which will result in more effective use of existing facilities;

"(G) providing special educational and related services for persons who are in or from rural areas or who are or have been otherwise isolated from normal educational opportunities including, where appropriate, the provision of mobile educational services and equipment, special home study courses, radio, television, and related forms of instruction, bilingual education methods, and visiting teachers' programs;

"(H) encouraging community involvement in educational programs; and

"(I) other specially designed educational programs or projects which meet the purposes of this title.

"(b) In addition to the uses specified in subsection (a), funds appropriated for carrying out this title may be used for—

"(1) proper and efficient administration of State plans;

"(2) obtaining technical, professional, and clerical assistance and the services of experts and consultants to assist the advisory councils authorized by this title in carrying out their responsibilities; and

"(3) evaluation of plans, programs, and projects, and dissemination of the results thereof.

"APPLICATIONS FOR GRANTS—CONDITIONS FOR APPROVAL

"SEC. 304. (a) A grant under this title pursuant to an approved State plan or by the Commissioner for a supplementary educational center or service program or project may be made only to a local educational agency or agencies, and then only if there is satisfactory assurance that, in the planning of that program or project there has been, and in the establishment and carrying out thereof there will be, participation of persons broadly representative of the cultural and educational resources of the area to be served. The term 'cultural and educational resources' includes State educational agencies, institutions of higher education, nonprofit private schools, public and nonprofit private agencies such as libraries, museums, musical and artistic organizations, educational radio and television, and other cultural and educational resources. Such grants may be made only upon application to the appropriate State educational agency or to the Commissioner, as the case may be, at such time or times, in such manner, and containing or accompanied by such information as the Commissioner deems necessary. Such applications shall—

"(1) provide that the activities and services for which assistance under this title is sought will be administered by or under the supervision of the applicant;

"(2) set forth a program for carrying out the purposes set forth in section 303(a) and provide for such methods of administration as are necessary for the proper and efficient operation of the programs;

"(3) set forth policies and procedures which assure that Federal funds made available under this title for any fiscal year will be so used as to supplement and, to the extent practical, increase the level of funds that would, in the absence of such Federal funds, be made available by the applicant for the purposes described in section 303(a), and in no case supplant such funds;

"(4) provide, in the case of an application for assistance under this title which includes a project for the construction of necessary facilities, satisfactory assurance that—

"(A) reasonable provision has been made, consistent with the other uses to be made of the facilities, for areas in such facilities which are adaptable for artistic and cultural activities,

"(B) upon completion of the construction, title to the facilities will be in a State or local educational agency,

"(C) in developing plans for such facilities, (i) due consideration will be given to excellence of architecture and design and to the inclusion of works of art (not representing more than 1 per centum of the cost of the project), and (ii) there will be compliance with such standards as the Secretary may prescribe or approve in order to insure that, to the extent appropriate in view of the uses to be made of the facilities, such facilities are accessible to and usable by handicapped persons, and

"(D) the requirements of section 310 will be complied with;

"(5) provide for such fiscal control and fund accounting procedures as may be necessary to assure proper disbursement of and accounting for Federal funds paid to the applicant under this title; and

"(6) provide for making an annual report and such other reports, in such form and containing such information, as the Commissioner may reasonably require to carry out his functions under this title and to determine the extent to which funds provided under this title have been effective in improving the educational opportunities of persons in the area served, and for keeping such records and for affording such access thereto as the Commissioner may find necessary to assure the correctness and verification of such reports.

"(b) An application by a local educational agency for a grant under this title may be approved only if it is consistent with the applicable provisions of this title and—

"(1) meets the requirements set forth in subsection (a);

"(2) provides that the program or project for which application is made—

"(A) will utilize the best available talents and resources and will substantially increase the educational opportunities in the area to be served by the applicant;

"(B) to the extent consistent with the number of children enrolled in nonprofit private schools in the area to be served whose educational needs are of the type provided by the program or project, makes provision for the participation of such children; and

"(3) has been reviewed by a panel of experts.

"(c) Amendments of applications shall, except as the Commissioner may otherwise provide by or pursuant to regulations, be subject to approval in the same manner as original applications.

"STATE ADVISORY COUNCILS AND STATE PLANS

"SEC. 305. (a)(1) Any State desiring to receive payments for any fiscal year to carry out a State plan under this title shall (A) establish within its State educational agency a State advisory council (hereinafter referred to as the 'State advisory council') which meets the requirements set forth in paragraph (2), (B) set dates before which local educational agencies must have submitted applications for grants to the State educational agency, and (C) submit to the Commissioner, through its State educational agency, a State plan at such time and in such detail as the Commissioner may deem necessary. The Commissioner may, by regulation, set uniform dates for the submission of State plans and applications.

"(2) The State advisory council, established pursuant to paragraph (1) shall—

"(A) be broadly representative of the cultural and educational resources of the State (as defined in section 304(a)) and of the public, including persons representative of—

"(i) elementary and secondary schools,

"(ii) institutions of higher education,

"(iii) professional organizations of teachers and school administrators,

"(iv) organizations promoting the improvement of education, and

"(v) areas of professional competence in dealing with children needing special education because of physical or mental handicaps, but nothing in this subparagraph shall be construed to preclude the appointment of nonresidents of a State to the State advisory council of that State;

"(B) advise the State educational agency on the preparation of, and policy matters arising in the administration of, the State plan, including the development of criteria for approval of applications under such State plan;

"(C) review, and make recommendations to the State educational agency on the action to be taken with respect to, each application for grant under the State plan;

"(D) evaluate programs and projects assisted under this title;

"(E) prepare and submit a report of its activities, recommendations, and evaluations to the National Advisory Council, established pursuant to this title, at such times, in such form, and in such detail as the National Advisory Council may prescribe; and

"(F) obtain such professional, technical, and clerical assistance as may be necessary to carry out its functions under this title.

"(b) The Commissioner shall approve a State plan, or modification thereof, if he determines that the plan submitted for that fiscal year—

"(1) sets for a program (including educational needs, and their basis, and the manner in which the funds paid to the State under this title shall be used in meeting such educational needs) under which funds paid to the State under section 307(a) will be expended solely for the improvement of education in the State through grants to local educational agencies for programs or projects in accordance with sections 303 and 304: *Provided*, That, in the case of a State educational agency that also is a local educational agency, its approval of a program or project to be carried out by it in the latter capacity shall, for the purposes of this title, be deemed an award of a grant by it upon application of a local educational agency if the State plan contains, in addition to the provisions otherwise required by this section, provisions and assurances (applicable to such program or project) that are fully equivalent to those otherwise required of a local educational agency;

"(2) sets forth the administrative organization and procedures in such detail as the Commissioner may prescribe by regulation to be used in carrying out the State plan, including the qualifications for personnel having responsibilities in the administration of the plan;

"(3) sets forth criteria for achieving an equitable distribution of assistance under this title, which criteria shall be based on consideration of (A) the size and population of the State, (B) the geographic distribution and density of the population within the State, and (C) the relative need of persons in different geographic areas and in different population groups within the State for the kinds of services and activities described in section 303, and the financial ability of the local educational agencies serving such persons to provide such services and activities;

"(4) provides for giving special consideration to the application of any local educational agency which is making a reasonable tax effort but which is nevertheless unable to meet critical educational needs, including preschool education for four- and five-year-olds and including where appropriated bilingual education, because some or all of its schools are seriously overcrowded (as a result of growth or shifts in enrollment or otherwise), obsolete, or unsafe;

"(5) provides that, in approving applications for grants for programs or projects, applications proposing to carry out programs or projects planned under this title will receive special consideration;

"(6) provides for adoption of effective procedures (A) for the evaluation, at least annually, of the effectiveness of the programs and projects, by the State advisory council, supported under the State plan in meeting the purposes of this title, (B) for appropriate dissemination of the results of such evaluations and other information pertaining to such programs or projects, and (C) for adopting, where appropriate, promising educational practices developed through such programs or projects;

"(7) provides that not less than 50 per centum of the amount which such State receives to carry out the plan in such fiscal year shall be used for purposes of paragraphs (1) and (2) of section 303(a);

"(8) provides that not less than 15 per centum of the amount which such State receives to carry out the plan in such fiscal year shall be used for special programs or projects for the education of handicapped children;

"(9) sets forth policies and procedures which give satisfactory assurance that Federal funds made available under this title for any fiscal year (A) will not be commingled with State funds, and (B) will be so used as to supplement and, to the extent practical, increase the fiscal effort (determined in accordance with criteria prescribed by the Commissioner, by regulation) that would, in the absence of such Federal funds, be made by the applicant for educational purposes;

"(10) provides for such fiscal control and fund accounting procedures as may be necessary to assure proper disbursement of and accounting for Federal funds paid to the State under this title;

"(11) provides for making an annual report and such other reports, in such form and containing such information, as the Commissioner may reasonably require to carry out his functions under this title and to determine the extent to which funds provided under this title have been effective in improving the educational opportunities of persons in the areas served by programs or projects supported under the State plan and in the State as a whole, including reports of evaluations made in accordance with objective measurements under the State plan pursuant to paragraph (6), and for keeping such records and for affording such access thereto as the Commission may find necessary to assure the correctness and verification of such reports;

"(12) provides that final action with respect to any application (or amendment thereof) regarding the proposed final disposition thereof shall not be taken without first affording the local educational agency or agencies submitting such application reasonable notice and opportunity for a hearing; and

"(13) contains satisfactory assurance that, in determining the eligibility of any local educational agency for State aid or the amount of such aid, grants to that agency under this title shall not be taken into consideration.

"(c) The Commissioner may, if he finds that a State plan for any fiscal year is in substantial compliance with the requirements set forth in subsection (b), approve that part of the plan which is in compliance with such requirements and make available (pursuant to section 307) to that State that part of the State's allotment which he determines to be necessary to carry out that part of the plan so approved. The remainder of the amount which such State is eligible to receive under this section may be made available to such State only if the unapproved portion of that State plan has been so modified as to bring the plan into compliance with such requirements: *Provided*, That the amount made available to a State pursuant to this subsection shall not be less than 50 per centum of the maximum amount which the State is eligible to receive under this section.

"(d) A State which has had a State plan approved for any fiscal year may receive for the purpose of carrying out such plan an amount not in excess of 33⅓ per centum of its allotment pursuant to section 302 for the fiscal year ending June 30, 1969, 50 per centum thereof for the fiscal year ending June 30, 1970, and 66⅔ per centum thereof for the fiscal year ending June 30, 1971.

"(e)(1) The Commissioner shall not finally disapprove any plan submitted under subsection (a), or any modification thereof, without first affording the State educational agency submitting the plan reasonable notice and opportunity for a hearing.

"(2) Whenever the Commissioner, after reasonable notice and opportunity for hearings to any State educational agency, finds that there has been a failure to comply substantially with any requirement set forth in the plan of that State approved under section 305 or with any requirement set forth in the application of a local educational agency approved pursuant to section 304, the Commissioner shall notify the agency that further payments will not be made to the State under this title (or, in his discretion, that the State educational agency shall not make further payments under this title to specified local educational agencies affected by the failure) until he is satisfied that there is no longer any such failure to comply. Until he is so satisfied, no further payments shall be made to the State under this title, or payments by the State educational agency under this title shall be limited to local educational agencies not affected by the failure, as the case may be.

"(3)(A) If any State is dissatisfied with the Commissioner's final action with respect to the approval of a plan submitted under subsection (a) or with his final action under paragraph (2), such State may, within sixty days after notice of such action, file with the United States court of appeals for the circuit in which such State is located a petition for review of that action. A copy of the petition shall be forthwith transmitted by the clerk of the court to the Commissioner. The Commissioner thereupon shall file in the court the record of the proceedings on which he based his action as provided in section 2112 of title 28, United States Code.

"(B) The findings of fact by the Commissioner, if supported by substantial evidence, shall be conclusive; but the court, for good cause shown, many remand the case to the Commissioner to take further evidence, and the Commissioner may thereupon make new or modified findings of fact and may modify his previous action, and shall certify to the court the record of the further proceedings.

"(C) The court shall have jurisdiction to affirm the action of the Commissioner or to set it aside, in whole or in part. The judgment of the court shall be subject to review by the Supreme Court of the United States upon certiorari or certification as provided in section 1254 of title 28, United States Code.

"(f)(1) If any local educational agency is dissatisfied with the final action of the State educational agency with respect to approval of an application by such local agency for a grant pursuant to this title, such local agency may, within sixty days after such final action or notice thereof, whichever is later, file with the United States court of appeals for the circuit in which the State is located a petition for review of that action. A copy of the petition shall be forthwith transmitted by the clerk of the court to the State educational agency. The State educational agency thereupon shall file in the court the record of the proceedings on which the State educational agency based its action as provided in section 2112 of title 28, United States Code.

"(2) The findings of fact by the State educational agency, if supported by substantial evidence shall be conclusive; but the court, for good cause shown, may remand the case to the State educational agency to take further evidence, and the State educational agency may thereupon make new or modified findings of fact and may modify its previous action, and shall certify to the court the record of the further proceedings.

"(3) The court shall have jurisdiction to affirm the action of the State educational agency or to set it aside, in whole or in part. The judgment of the court shall be subject to review by the Supreme Court of the United States upon certiorari of certification as provided in section 1254 of title 28, United States Code.

"SPECIAL PROGRAMS AND PROJECTS

"SEC. 306. (a) From the amount allotted to any State, pursuant to section 302, which is not available for grants under a State plan approved pursuant to section 305, the Commissioner is authorized, subject to the provisions of section 304, to make grants to local educational agencies in such State for programs or projects which meet the purposes of section 303 and which, in the case of a local educational agency in a State which has a State plan approved, hold promise of making a substantial contribution to the solution of critical educational problems common to all or several States. The Commissioner may not approve an application under this section unless the application has been submitted to the appropriate State educational agency for comment and recommendation with respect to the action to be taken by the Commissioner regarding the disposition of the application.

"(b) Not less than 15 per centum of the funds granted pursuant to this section in any fiscal year shall be used for programs or projects designed to meet the special educational needs of handicapped children.

"PAYMENTS

"SEC. 307. (a) From the allotment to each State pursuant to section 302, for any fiscal year, the Commissioner shall pay to each State, which has had a plan approved pursuant to section 305 for that fiscal year, the amount necessary to carry out its State plan as approved.

"(b) The Commissioner is authorized to pay to each State amounts necessary for the activities described in section 303(b), during any fiscal year, except that (1) the total of such payments shall not be in excess of an amount equal to 7½ per centum of its allotment for that fiscal year or $150,000 ($50,000 in the case of the Commonwealth of Puerto Rico, Guam, American Samoa, the Virgin Islands, and the Trust Territory of the Pacific Islands), whichever is greater, and (2) in such payment, the amount paid for the administration of the State plan during such year shall not exceed an amount equal to 5 per centum of its allotment for that fiscal year or $100,000 ($35,000 in the case of the Commonwealth of Puerto Rico, Guam, American Samoa, the Virgin Islands, and the Trust Territory of the Pacific Islands), whichever is greater.

"(c) The Commissioner shall pay to each applicant which has an application approved pursuant to section 306 the amount necessary to carry out the program or project pursuant to such application.

"(d) Payments under this section may be made in installments and in advance or by way of reimbursement, with necessary adjustments on account of overpayments or underpayments.

"(e) No payments shall be made under this title to any local educational agency or to any State unless the Commissioner finds, in the case of a local educational agency, that the combined fiscal effort of that agency and the State with respect to the provision of free public education by that agency for the preceding fiscal year was not less than such combined fiscal effort for that purpose for the second preceding fiscal year or, in the case of a State, that the fiscal effort of that State for State aid (as defined by regulation) with respect to the provision of free public education in that State for the preceding fiscal year was not less than such fiscal effort for State aid for the second preceding fiscal year.

"RECOVERY OF PAYMENTS

"SEC. 308. If within twenty years after completion of any construction for which Federal funds have been paid under this title—

"(a) the owner of the facility shall cease to be a State or local educational agency, or

"(b) the facility shall cease to be used for the educational and related purposes for which it was constructed, unless the Commissioner determines in accordance with regulations that there is good cause for releasing the applicant or other owner from the obligation to do so,

the United States shall be entitled to recover from the applicant or other owner of the facility an amount which bears to the then value of the facility (or so much thereof as constituted an approved project or projects) the same ratio as the amount of such Federal funds bore to the cost of the facility financed with the aid of such funds. Such value shall be determined by agreement of the parties or by action brought in the United States district court for the district in which the facility is situated.

"NATIONAL ADVISORY COUNCIL

"SEC. 309. (a) The President shall, by January 31, 1968, appoint a National Advisory Council on Supplementary Centers and Services which shall—

"(1) advise the Commissioner in the preparation of general regulations;

"(2) review the administration and operation of this title, including its effectiveness in meeting the purposes set forth in section 303;

"(3) review each State plan and application submitted to the Commissioner pursuant to sections 305 and 306, and make recommendations to the Commissioner with respect to the action to be taken on such plan or application;

"(4) set forth procedures for the submission of reports by State advisory councils to the National Advisory Council;

"(5) review, evaluate, and transmit the reports of State advisory councils to the Congress, the President, and the Secretary;

"(6) evaluate programs and projects carried out under this title and disseminate the results thereof; and

"(7) make recommendations for the improvement of this title, and its administration and operation.

"(b) The Council shall be appointed by the President without regard to the civil service laws and shall consist of twelve members, a majority of whom shall be broadly representative of the educational and cultural resources of the United States including at least one person who has professional competence in the area of education of handicapped children. Such members shall be appointed for terms of three years except that (1) in the case of the initial members, four shall be appointed for terms of one year each and four shall be appointed for terms of two years each, and (2) appointments to fill the unexpired portion of any term shall be for such portion only. The Secretary shall make available to the Council such technical, professional, secretarial, clerical, and other assistance and such pertinent data prepared by the Department of Health, Education, and Welfare as it may require to carry out its functions.

"(c) The Council shall make an annual report of its findings and recommendations (including recommendations for changes in the provisions of this title) to the President and the Congress not later than January 20 of each year. The President is requested to transmit to the Congress such comments and recommendations as he may have with respect to such report.

"(d) Members of the Council who are not regular full-time employees of the United States shall, while serving on business of the Council, be entitled to receive compensation at rates fixed by the President, but not exceeding $100 per day, including travel-time; and while so serving away from their homes or regular places of business, they may be allowed travel expenses, including per diem in lieu of subsistence, as authorized by section 5703 of title 5, United States Code, for persons in Government service employed intermittently.

"(e) The Council is authorized to appoint without regard to the provisions of title 5, United States Code, covering appointment in the competitive service, and fix the compensation of, without regard to chapter 51 and subchapter III of chapter 53 of such title, such professional and technical personnel as may be necessary to enable it to carry out its duties.

"LABOR STANDARDS

"SEC. 310. All laborers and mechanics employed by contractors or subcontractors on all construction projects assisted under this title shall be paid wages at rates not less than those prevailing on similar construction in the locality as determined by the Secretary of Labor in accordance with the Davis-Bacon Act, as amended (40 U.S.C. 276a—276a-5). The Secretary of Labor shall have with respect to the labor standards specified in this section the authority and functions set forth in Reorganization Plan Numbered 14 of 1950 (15 F.R. 3176) and section 2 of the Act of June 13, 1934, as amended (40 U.S.C. 276c)."

EFFECTIVE DATE

SEC. 132. (a) The amendment made by section 131 shall be effective July 1, 1968, except as specifically provided in subsection (b).

(b)(1) That part of section 305(a) of the Elementary and Secondary Education Act of 1965, as amended by section 131, concerning State advisory councils, and section 309 of such Act, as so amended, shall be effective upon enactment of this Act.

(2) The second sentence of section 301(b) of such Act, as so amended, shall be effective upon enactment of this Act.

(c) The Commissioner is authorized, upon enactment of this Act, to take such steps as he may deem appropriate in order to prepare to implement the amendment made by section 131.

PART D—AMENDMENTS TO TITLE V OF THE ELEMENTARY AND SECONDARY EDUCATION ACT OF 1965

DURATION OF AND FUNDS FOR TITLE

SEC. 141. (a) Section 501(a) of the Elementary and Secondary Education Act of 1965 is amended by striking out "during the fiscal year ending June 30, 1966, and each of the four succeeding fiscal years,".

(b) Section 501(b) of such Act is amended by striking out "and $50,000,000 for the fiscal year ending June 30, 1968" and inserting in lieu thereof the following: "$65,000,000 for the fiscal year ending June 30, 1968, and $80,000,000 each for the fiscal years ending June 30, 1969, and June 30, 1970; and $85,000,000 for the fiscal year ending June 30, 1971,".

INCLUSION OF TRUST TERRITORY OF PACIFIC ISLANDS

SEC. 142. (a) The first and third sentences of paragraph (1) of section 502(a) of the Elementary and Secondary Education Act of 1965, relating to apportionment of appropriations, are each amended by striking out "and" after "Samoa," and by inserting ", and the Trust Territory of the Pacific Islands" after "Virgin Islands".

(b)(1) Paragraph (j) of section 701 of such Act, defining the term "State", is amended by striking out "and for purposes of title II and title III, such term includes the Trust Territory of the Pacific Islands" and inserting in lieu thereof ", and for purposs of titles II, III, and V such term also includes the Trust Territory of the Pacific Islands".

(2) Such section 701 is further amended by inserting ", except when otherwise specified" immediately after "As used in titles II, III, and V of this Act".

REVISION OF APPORTIONMENT FORMULA

SEC. 143. The second sentence of paragraph (1) of section 502(a) of the Elementary and Secondary Education Act of 1965 is amended to read as follows: "The remainder of such per centum of such sums shall be apportioned by the Commissioner as follows:

"(A) He shall apportion 40 per centum of such remainder among the States in equal amounts.

"(B) He shall apportion to each State an amount that bears the same ratio to 60 per centum of such remainder as the number of public school pupils in the State bears to the number of public school pupils in all the States, as determined by the Commissioner on the basis of the most recent satisfactory data available to him."

ENCOURAGEMENT OF USE OF AUXILIARY PERSONNEL

SEC. 144. Section 503 of the Elementary and Secondary Education Act of 1965 is amended by redesignating paragraphs (7). (8), (9), (10), and (11) as (8), (9), (10), (11), and (12), respectively, and by inserting after paragraph (6) the following new paragraph:

"(7) programs and other activities specifically designed to encourage the full and adequate utilization and acceptance of auxiliary personnel (such as teacher aides) in elementary and secondary schools on a permanent basis;".

COMPREHENSIVE PLANNING GRANTS

SEC. 145. (a) Section 503 of the Elementary and Secondary Education Act of 1965 is amended by striking out "and" at the end of the next to the last paragraph, by striking out the period at the end thereof and inserting a semicolon, and by adding at the end thereof the following new paragraphs:

"(13) programs for providing grants to local educational agencies in metropolitan areas to enable them to engage in comprehensive planning to meet their particular needs, either alone or in cooperation with other such agencies; and

"(14) a program, which shall be included in each such overall program for each fiscal year pursuant to this section, for distributing in the State in an equitable manner on the basis of need among local educational agencies, within the State at least 10 per centum of such amount to be used by such agencies for any of the purposes of this title as applied to a local educational agency in lieu of a State educational agency."

(b)(1) Section 502(a) of such Act is amended by striking out "85" each time it appears and inserting "95" in lieu thereof.

(2) Section 502(a)(2) of such Act is amended by striking out "Fifteen" and inserting in lieu thereof "Five".

(3) Section 505 of such Act is amended by striking out "Fifteen" and inserting in lieu thereof "Five".

GRANTS TO INTERSTATE COMMISSIONS

SEC. 146. Section 505 of the Elementary and Secondary Education Act of 1965 is amended by striking out the period at the end of such section and inserting in lieu thereof the following: ", and for grants to public regional interstate commissions or agencies for educational planning and research."

COMPREHENSIVE EDUCATIONAL PLANNING

SEC. 147. (a) Title V of the Elementary and Secondary Education Act of 1965 is further amended by adding "AND FOR STATEWIDE EDUCATIONAL PLANNING" to its heading and by inserting the following immediately below its heading:

"PART A—GRANTS FOR STRENGTHENING LEADERSHIP RESOURCES OF STATE EDUCATIONAL AGENCIES"

(b) Title V of such Act is further amended by striking out the words "this title" wherever they appear and inserting in lieu thereof "this part", and by adding at the end thereof the following new part:

"PART B—GRANTS FOR COMPREHENSIVE EDUCATIONAL PLANNING AND EVALUATION

"AUTHORIZATION

"SEC. 521. To the end of enhancing the capability of the several States to make effective progress, through comprehensive and continuing planning, toward the achievement of opportunities for high-quality education for all segments of the population throughout the State, the Commissioner is authorized to make, in accordance with the provisions of this part, comprehensive planning and evaluation grants to States that have submitted, and had approved by the Commissioner, an application pursuant to section 523, and special project grants, related to the purposes of this part, pursuant to section 524. For the purpose of making such grants, there are authorized to be appropriated $15,000,000 for the fiscal year ending June 30, 1968, $20,000,000 for the fiscal year ending June 30, 1969, and for each of the two succeeding fiscal years.

"APPORTIONMENT AMONG THE STATES

"SEC. 522. (a)(1) From the sums appropriated for carrying out this part for each fiscal year, 25 per centum shall be reserved for the purposes of section 524 and the remaining 75 per centum shall be available for grants to States under section 523.

"(2) The Commissioner shall apportion not in excess of 2 per centum of the amount available for grants under section 523 among the Commonwealth of Puerto Rico, Guam, American Samoa, the Virgin Islands, and the Trust Territory of the Pacific Islands, according to their respective needs for carrying out the purposes of this part. The remainder of such amount shall be apportioned by the Commissioner as follows:

"(A) He shall apportion 40 per centum of such remainder among the States in equal amounts.

"(B) He shall apportion to each State an amount that bears the same ratio to 60 per centum of such remainder as the population of the State bears to the population of all the States, as determined by the Commissioner on the basis of the most recent satisfactory data available to him.

For purposes of the preceding sentence, the term 'State' does not include the Commonwealth of Puerto Rico, Guam, American Samoa, the Virgin Islands, and the Trust Territory of the Pacific Islands.

"(b) The amount apportioned under this section to any State for the fiscal year ending June 30, 1968, shall be available for obligation for grants pursuant to applications approved during that year and the succeeding fiscal year.

"(c) The amount of any State's apportionment for any fiscal year under paragraph (2) of subsection (a) which the Commissioner determines will not be required for grants to that State under section 523 during the period for which such apportionment is available may from time to time be reapportioned by the Commissioner to other States, according to their respective needs, as the Commissioner may determine. Any amount so reapportioned to a State from funds appropriated for any fiscal year shall be deemed to be a part of the amount apportioned to it under subsection (a) for that year.

"COMPREHENSIVE PLANNING GRANTS

"SEC. 523. (a)(1) Any State desiring to receive a grant or grants under this section from its apportionment under section 522 for any fiscal year shall designate or establish a single State agency or office (hereafter in this part referred to as the State educational planning agency) as the sole agency for carrying out or supervising the carrying out of a comprehensive statewide program of systematic planning and evaluation relating to education at all levels (including remedial education and retraining of adults), except that—

"(A) the field of higher education shall be included only if the State so elects and so provides in an application (or amended or supplemental application) under this section, and

"(B) in the event of such election the State may designate or establish a separate State agency (hereafter in this part referred to as the State higher education planning agency) for carrying out or supervising the carrying out of such planning and evaluation program with respect to higher education.

"(2) A grant to a State may be made under this section only upon approval of an application submitted to the Commissioner through the State educational planning agency, except that, with respect to States electing to include the field of higher education as provided in clause (A) of paragraph (1) of this subsection and designating or establishing a State higher education planning agency as provided in clause (B) of paragraph (1), the Commissioner, by or pursuant to regulation—

"(A) shall authorize the submission of a combined application which includes higher education (or an amended or supplemental application filed upon the making of such election) jointly through both the State's planning agencies involved, or the submission of a separate application (or supplement) through the State's higher educational planning agency as to so much of the State's program as relates to planning and evaluation in the field of higher education, and

"(B) may provide for allocating, between the State's two planning agencies, the amount of any grant or grants under this section from the State's apportionment.

"(3) An application (or amendment or supplement thereto) under this section shall set forth, in such detail as the Commissioner deems necessary, the statewide program referred to in paragraph (1) (or, in the case of a separate application or amendment or supplement with respect to the field of higher education, so much of the statewide program as relates to that field), which shall include provision for—

"(A) setting statewide educational goals and establishing priorities among these goals;

"(B) developing through analyses alternative means of achieving these goals, taking into account the resources available and the educational effectiveness of each of the alternatives (including, in the case of higher education, the resources and plans of private institutions in the State bearing upon the State's goals and plans for public higher education);

"(C) planning new programs and improvements in existing programs based on the results of these analyses;

"(D) developing and strengthening the capabilities of the State to conduct, on a continuous basis, objective evaluations of the effectiveness of educational programs; and

"(E) developing and maintaining a permanent system for obtaining and collating significant information necessary to the assessment of progress toward the State's educational goals.

"(b) Applications (including amendments and supplements thereto) for grants under this section may be approved by the Commissioner only if the application—

"(1) has been submitted to the chief executive of the State for review and recommendations;

"(2) sets forth, if the State has elected to include the field of higher education and has designated or established a separate State higher education planning agency, such arrangements for coordination, between the State's educational planning program in that field and the remaining educational planning program submitted by the State, as will in the Commissioner's judgment be effective;

"(3) contains satisfactory assurance—

"(A) that the assistance provided under this section, together with other available resources, will be so used for the several purposes specified in subparagraphs (A) through (E) of paragraph (3) of subsection (a) of this section as to result in the maximum possible effective progress toward the achievement of a high level of competence with respect to each of them, and

"(B) that assistance under this part will, by the State planning agency involved, be used primarily in strengthening the capabilities of its own planning and evaluation staff or, to the extent that the program is to be carried out under the supervision of that agency by other agencies, the planning and evaluation staffs of such other agencies; but consistently with this objective part of the funds received under a grant under this section may be used, in appropriate circumstances, to employ consultants, or to enter into contracts for special projects with public or private agencies, institutions, or organizations having special competence in the areas of planning or evaluation;

"(4) makes adequate provision (consistent with such criteria as the Commisisoner may prescribe) for using funds granted to the applicant under this section, other than funds granted for planning and evaluation in the field of higher education, (A) to make program planning and evaluation services available to local educational agencies, and (B) in the case of such agencies in areas (particularly metropolitan areas) with school populations sufficiently large to warrant their own planning or evaluation staffs, to assist such agencies (financially or through technical assistance, or both) to strengthen their planning and evaluation capabilities and to promote coordinated areawide planning for such areas;

"(5) provides for such methods of administration as are necessary for the proper and efficient operation of the program;

"(6) provides for such fiscal control and fund accounting procedures as may be necessary to assure proper disbursement of and accounting for Federal funds paid under this part to the State (including any such funds paid by the State to agencies, institutions, or organizations referred to in paragraph (4)(B) or paragraph (3) of this subsection); and

"(7) provides for making such reports, in such form and containing such information as the Commissioner may reasonably require (copies of which shall also be sent to the chief executive of the State), and for keeping such records and for affording such access thereto as the Commissioner may find necessary to assure the correctness and verification of such reports.

"(c) A grant made pursuant to an approval of an application under this section may be used to pay all or part of the cost of activities covered by the approved application and included in such grant, but excluding so much, if any, of such cost as is paid for from grants under part A.

SPECIAL PROJECTS

"SEC. 524. (a) The sums reserved pursuant to section 522(a)(1) for the purposes of this section shall be used for grants for special projects in accordance with subsection (b) of this section.

"(b) The Commissioner is authorized to make grants to public or private nonprofit agencies, institutions, or organizations, or to make contracts with public or private agencies, institutions, or organizations for special projects related to the purposes of this part, to be conducted on an interstate, regional, or metropolitan area basis, including projects for such purposes as—

"(1) metropolitan planning in education in areas covering more than one State;

"(2) improvement and expansion in the educational planning of large cities within a State with due regard to the complexities of adequate metropolitan planning in such places;

"(3) comparative and cooperative studies agreed upon between States or metropolitan areas;

"(4) conferences to promote the purposes of this part and involving different States;

"(5) publications of general use to the planning of more effective and efficient educational services, and other activities for dissemination of information related to the purposes of this part.

"PAYMENTS

"SEC. 525. Payments under this part may be made in installments, and in advance or by way of reimbursement, with necessary adjustments on account of overpayments or underpayments, as the Commissioner may determine."

PART E—AMENDMENTS TO TITLE VI OF THE ELEMENTARY AND SECONDARY EDUCATION ACT OF 1965, AND RELATED AMENDMENTS

REGIONAL RESOURCE CENTERS, SERVICES FOR DEAF-BLIND CHILDREN, RECRUITMENT OF PERSONNEL

SEC. 151. Title VI of the Elementary and Secondary Education Act of 1965 is amended by—

(1) inserting immediately below the heading of such title

"PART A—ASSISTANCE TO STATES FOR EDUCATION OF HANDICAPPED CHILDREN";

(2) inserting immediately above the heading of section 608

"PART E—GENERAL PROVISIONS";

(3) redesignating sections 608, 609, and 610 and references thereto as sections 611, 612, and 613, respectively;

(4) striking out the words "this title" wherever they occur in sections 601, and 603 through 607, and inserting in lieu thereof "this part"; and

(5) inserting immediately after section 607 the following:

"PART B—REGIONAL RESOURCE CENTERS FOR IMPROVEMENT OF THE EDUCATION OF HANDICAPPED CHILDREN

"REGIONAL RESOURCE CENTERS

"SEC. 608. (a) For the purpose of aiding in the establishment and operation of regional centers which will develop and apply the best methods of appraising the special educational needs of handicapped children referred to them and will provide other services to assist in meeting such needs, there authorized to be appropriated $7,500,000 for the fiscal year ending June 30, 1968, $8,000,000 for the fiscal year ending June 30, 1969, $10,000,000 for the fiscal year ending June 30, 1970, and $12,000,000 for the fiscal year ending June 30, 1971.

"(b) Appropriations under this section shall be available to the Commissioner for grants to or contracts with institutions of higher education, State educational agencies, local educational agencies, or combinations of such agencies or institutions, within particular regions of the United States, to pay all or part of the cost of establishment (including construction) or operation of regional resource centers for the improvement of education of the handicapped in such regions. Centers established or operated under this section shall (1) provide testing and educational evaluation to determine the special educational needs of handicapped children referred to such centers, (2) develop educational programs to meet those needs, and (3) assist schools and other appropriate agencies, organizations, and institutions in providing such educational programs through services such as consultation (including, in appropriate cases, consultation with parents or teachers of handicapped children at such regional centers), periodic reexamination and reevaluation of special education programs, and other technical services.

"(c) In determining whether to approve an application for a project under this section, the Commissioner shall consider the need for such a center in the region to be served by the applicant and the capability of the applicant to develop and apply, with the assistance of funds under this section, new methods, techniques, devices, or facilities relating to educational evaluation or education of handicapped children.

"(d) Payment pursuant to grants or contracts under this section may be made (after necessary adjustments on account of previously made underpayments or overpayments) in advance or by reimbursement, and in such installments and on such conditions as the Commissioner may determine."

"PART C—CENTERS AND SERVICES FOR DEAF-BLIND CHILDREN

"SEC. 609. (a) It is the purpose of this part to provide, through a limited number of model centers for deaf-blind children, a program designed to develop and bring to bear upon such children, beginning as early as feasible in life, those specialized, intensive professional and allied services, methods, and aids that are found to be most effective to enable them to achieve their full potential for communication with and adjustment to the world around them, for useful and meaningful participation in society, and for self-fulfillment.

"(b) The Secretary is authorized, upon such terms and conditions (subject to the provisions of subsection (d)(1) of this section) as he deems appropriate to carry out the purposes of this part, to make grants to or contracts with public or nonprofit private agencies, organizations, or institutions to pay all or part of the cost of establishment (including, when necessary, construction) or operation, or both, of centers for deaf-blind children.

"(c) In determining whether to make a grant or contract under subsection (b), the Secretary shall take into consideration the need for a center for deaf-blind children in the light of the general availability and quality of existing services for such children in the part of the country involved.

"(d)(1) A grant or contract pursuant to subsection (b) shall be made only if the Secretary determines that there is satisfactory assurance that the center will provide such services as he has by regulation prescribed, including at least—

"(A) comprehensive diagnostic and evaluative services for deaf-blind children;

"(B) a program for the adjustment, orientation, and education of deaf-blind children which integrates all the professional and allied services necessary therefor; and

"(C) effective consultative services for parents, teachers, and others who play a direct role in the lives of deaf-blind children to enable them to understand the special problems of such children and to assist in the process of their adjustment, orientation, and education.

"(2) Any such services may be provided to deaf-blind children (and, where applicable, other persons) regardless of whether they reside in the center, may be provided at some place other than the center, and may include the provision of transportation for any such children (including an attendant) and for parents.

"(e) The Secretary is further authorized, either as part of any grant or contract under subsection (b), or by separate grant to or contract with an agency, organization, or institution operating a center meeting the requirements prescribed by or pursuant to subsection (d), to provide for the payment of all or part of the cost of such activities as—

"(1) research to identify and meet the full range of special needs of deaf-blind children;

"(2) development or demonstration of new, or improvements in existing, methods, approaches, or techniques which would contribute to the adjustment and education of deaf-blind children;

"(3) training (either directly or otherwise) of professional and allied personnel engaged or preparing to engage in programs specifically designed for deaf-blind children, including payment of stipends for trainees and allowances for travel and other expenses for them and their dependents; and

"(4) dissemination of materials and information about practices found effective in working with deaf-blind children.

"(f) For purposes of this part, the term 'construction' includes, in addition to those matters set forth in section 701(b), construction of residential facilities; and the cost of construction shall be deemed to include the cost of acquisition of land in connection with any of the foregoing, but not the cost of off-site improvements.

"(g) If within twenty years after the completion of any construction (except minor remodeling or alteration) for which funds have been paid pursuant to a grant or contract under this part the facility constructed ceases to be used for the purposes for which it was constructed, the United States, unless the Secretary determines that there is good cause for releasing the recipient of the funds from its obligation, shall be entitled to recover from the applicant or other owner of the facility an amount which bears the same ratio to the then value of the facility as the amount of such Federal funds bore to the cost of the portion of the facility financed with such funds. Such value shall be determined by agreement of the parties or by action brought in the United States district court for the district in which the facility is situated.

"(h) For purposes of this part, the determination of children who are both deaf and blind shall be made in accordance with regulations of the Secretary.

"(i) Payments pursuant to grants or contracts under this part may be made (after necessary adjustment on account of previously made overpayments or underpayments) in advance or by way of reimbursements, and in such installments and on such conditions as the Secretary may determine.

"(j) For the purpose of carrying out this part, there are authorized to be appropriated $1,000,000 for the fiscal year ending June 30, 1968, $3,000,000 for the fiscal year ending June 30, 1969, $7,000,000 for the fiscal year ending June 30, 1970, and $9,000,000 for the fiscal year ending June 30, 1971.

"PART D—RECRUITMENT OF PERSONNEL AND INFORMATION ON EDUCATION OF THE HANDICAPPED

"GRANTS OR CONTRACTS TO IMPROVE RECRUITING OF EDUCATIONAL PERSONNEL, AND TO IMPROVE DISSEMINATION OF INFORMATION CONCERNING EDUCATIONAL OPPORTUNITIES FOR THE HANDICAPPED

"SEC. 610. (a) The Commissioner is authorized to make grants to public or nonprofit private agencies, organizations, or institutions, or to enter into contracts with public or private agencies, organizations, or institutions for projects for—

"(1) encouraging students and professional personnel to work in various fields of education of handicapped children and youth through, among other ways, developing and distributing imaginative or innovative materials to assist in recruiting personnel for such careers, or publicizing existing forms of financial aid which might enable students to pursue such careers, or

"(2) disseminating information about the programs, services, and resources for the education of handicapped children, or providing referral services, to parents, teachers, and other persons especially interested in the handicapped.

"(b) To carry out the purposes of this section, there are authorized to be appropriated $1,000,000 for the fiscal year ending June 30, 1968, and for each of the three succeeding fiscal years."

TRANSFER OF DEFINITION AND OTHER TECHNICAL AMENDMENTS

SEC. 152. (a) Section 602 of title VI of the Elementary and Secondary Education Act of 1965 is redesignated as section 614 and transferred to the end of such title.

(b) Section 601 of such title is amended by—

(1) striking out the section heading and inserting in lieu thereof the heading

"GRANTS TO STATES FOR EDUCATION OF HANDICAPPED CHILDREN";

(2) striking out "(a)" in subsection (a);

(3) redesignating section 601(b) and references thereto as section 602 by striking out "(b)" in subsection (b) and inserting "SEC. 602." in lieu thereof; and

(4) inserting above section 602 as so redesignated the section heading

"APPROPRIATIONS AUTHORIZED"

(c) (1) The portion of section 701 of the Elementary and Secondary Education Act of 1965 (containing definitions) which precedes subsection (a), as amended by section 142(b) of this Act, is further amended by striking out "As used in titles II, III, and V" and inserting in lieu thereof "As used in titles II, III, V, and VI."

(2) Paragraph (j) of such section 701, as amended by section 142(b) of this Act, is further amended by striking out "and V" and inserting in lieu thereof "V, and VI."

INCLUDING SCHOOLS FOR INDIAN CHILDREN OPERATED BY THE DEPARTMENT OF THE INTERIOR AND DEFENSE DEPARTMENT OVERSEAS DEPENDENTS SCHOOLS IN TITLE VI

SEC. 153. (a) So much of paragraph (1) of section 603(a) of the Elementary and Secondary Education Act of 1965 as follows the first sentence is amended to read as follows: "The Commissioner shall allot the amount appropriated pursuant to this paragraph among—

"(A) Puerto Rico, Guam, American Samoa, the Virgin Islands, and the Trust Territory of the Pacific Islands according to their respective needs, and

"(B) for the fiscal year ending June 30, 1968, and the succeeding fiscal year, (i) the Secretary of the Interior according to the need for such assistance for the education of handicapped children on reservations serviced by elementary and secondary schools operated for Indian children by the Department of the Interior, and (ii) the Secretary of Defense according to the need for such assistance for the education of handicapped children in the overseas dependents schools of the Department of Defense. The terms upon which payments for such purpose shall be made to the Secretary of the Interior and the Secretary of Defense shall be determined pursuant to such criteria as the Commissioner determines will best carry out the purposes of this part."

(b) The first sentence of paragraph (2) of section 603(a) of the Elementary and Secondary Education Act of 1965 is amended by changing the period at the end thereof to a comma and adding the following: "except that no State shall be allotted less than $100,000 or three-tenths of 1 per centum of such amount available for allotment to the States, whichever is greater."

SHORT TITLE OF TITLE VI OF ELEMENTARY AND SECONDARY EDUCATION ACT OF 1965

SEC. 154. Title VI of the Elementary and Secondary Education Act of 1965 is further amended by adding at the end thereof the following new section:

"SHORT TITLE

"SEC. 615. This title may be cited as the 'Education of the Handicapped Act'."

EXPANSION OF INSTRUCTIONAL MEDIA PROGRAMS TO INCLUDE ALL HANDICAPPED CHILDREN

SEC. 155. (a) Subsection (b) of the first section of the Act entitled "An Act to provide in the Department of Health, Education, and Welfare for a loan service of captioned films for the deaf" (42 U.S.C. 2491 et seq.), is amended to read as follows in order to conform its statement of objectives to amendments made to such Act by Public Law 89-258 and by this Act:

"(b) to promote the educational advancement of handicapped persons by (1) carrying on research in the use of educational media for the handicapped, (2) producing and distributing educational media for the use of handicapped persons, their parents, their actual or potential employers, and other persons directly involved in work for the advancement of the handicapped, and (3) training persons in the use of educational media for the instruction of the handicapped."

(b) Section 2 of such Act is amended by adding the following at the end thereof:

"(4) The term 'handicapped' means deaf, mentally retarded, speech impaired, visually handicapped, seriously emotionally disturbed, crippled, or other health impaired persons."

(c) Section 3 of such Act is amended by striking out the word "deaf" and inserting in lieu thereof "handicapped" each time it occurs therein.

(d)(1) Subsection (b)(5) of section 3 of such Act is amended by inserting immediately before the semicolon at the end thereof the following: ", including the payment to those persons of such stipends (including allowances for travel and other expenses of such persons and their dependents) as he may determine, which shall be consistent with prevailing practices under comparable federally supported programs".

(2) This subsection shall take effect on the date of enactment of this Act, except that as to payments made pursuant to such section 3 prior to such date this subsection shall be effective as of September 28, 1962.

(e) Section 4 of such Act is amended by striking out "$5,000,000" and inserting "$8,-

000,000" in lieu thereof and by striking out "$7,000,000" and inserting "$10,000,000" in lieu thereof.

AUTHORIZING CONTRACTS, AS WELL AS GRANTS, FOR RESEARCH IN EDUCATION OF THE HANDICAPPED

SEC. 156. (a) The first sentence of section 302(a) of Public Law 88-164 is amended by inserting ", and to make contracts with States, State or local educational agencies, public and private institutions of higher learning, and other public or private educational or research agencies and organizations, for research and related purposes (as defined in this section) and to conduct research, surveys, or demonstrations," immediately before "relating to education for mentally retarded," and by striking out "for research or demonstration project".

(b) The second sentence of such section 302(a) is amended by striking out "Such grants shall be made" and inserting in lieu thereof "Payments pursuant to grants or contracts under this section may be made".

PART F—AMENDMENTS TO TITLE VII OF THE ELEMENTARY AND SECONDARY EDUCATION ACT OF 1965

TECHNICAL ASSISTANCE TO RURAL AREAS

SEC. 171. (a) Section 706 of the Elementary and Secondary Education Act of 1965 is amended by redesignating subsection (b) as subsection (c) and by inserting before such subsection a new subsection as follows:

"(b) For such purpose and also for the purpose of carrying out more effectively other provisions of Federal law, the Commissioner, upon request from a State educational agency, shall provide counseling and technical assistance to elementary and secondary schools in rural areas, as defined by the Commissioner, of such State (1) in determining benefits available to such agencies and schools under Federal laws, and (2) in preparing applications and meeting other requirements for such benefits. Assistance pursuant to this subsection may, in accordance with such request, be provided by personnel from the Office of Education or be provided in the form of grants in such amounts as may be necessary for such State educational agency to employ such personnel as may be necessary to provide such assistance."

(b) Section 706 of such Act is amended in subsection (c), as redesignated by subsection (a), by striking out "and not to exceed $2,000,000 for the fiscal year ending June 30, 1968" and inserting in lieu thereof "$3,500,000 for the fiscal year ending June 30, 1968, $3,700,000 for the fiscal year ending June 30, 1969, $4,000,000 for the fiscal year ending June 30, 1970, and $4,200,000 for the fiscal year ending June 30, 1971".

DEMONSTRATION PROJECTS TO PREVENT DROPOUTS

SEC. 172. Title VII of the Elementary and Secondary Education Act of 1965 is amended to inserting at the end thereof a new section as follows:

"DROPOUT PREVENTION PROJECTS

"SEC. 707. (a) The Commissioner is authorized to arrange by contract, grant, or otherwise, with local educational agencies for the carrying out by such agencies in schools which (1) are located in an urban area, (2) have a high percentage of children from families with an income not exceeding the low-income factor, as defined in section 103(c), and (3) have a high percentage of such children who do not complete their education in elementary or secondary school, of demonstration projects involving the use of innovative methods, systems, materials, or programs which show promise of reducing the number of such children who do not complete their education in elementary and secondary schools.

"(b) The Commissioner shall approve arrangements pursuant to this section only on application by a local educational agency and upon his finding:

"(1) that the project will be carried out in one or more schools described in subsection (a);

"(2) that the applicant has analyzed the reasons for such children not completing their education and has designed a program to meet this problem;

"(3) that effective procedures, including objective measurements of educational achievements, will be adopted for evaluating at least annually the effectiveness of the project; and

"(4) that the project has been approved by the appropriate State educational agency.

"(c) There is authorized to be appropriated not to exceed $30,000,000 for the period ending June 30, 1969, and $30,000,000 each for the fiscal year ending June 30, 1970, and for the succeeding fiscal year for the purpose of this section."

TITLE II—FEDERALLY AFFECTED AREAS

PART A—ASSISTANCE FOR SCHOOL CONSTRUCTION AND CURRENT EXPENDITURES IN IMPACTED AREAS

CLARIFYING DEFINITIONS OF "FEDERAL PROPERTY"

SEC. 201. Section 15(1) of the Act of September 23, 1950 (Public Law 815, Eighty-first Congress), and section 303(1) of the Act of September 30, 1950 (Public Law 874, Eighty-first Congress), are each amended by—

(a) striking out the second sentence thereof;

(b) striking out "also" in the penultimate sentence thereof; and

(c) inserting immediately before the last sentence thereof the following new sentence: "Such term also includes any interest in Federal property (as defined in the foregoing provisions of this paragraph) under an easement, lease, license, permit, or other arrangement, as well as any improvements of any nature (other than pipelines or utility lines) on such property even though such interests or improvements are subject to taxation by a State or political subdivision of a State or by the District of Columbia."

EFFECTIVE DATE FOR CERTAIN 1966 AMENDMENTS

SEC. 202. The amendment made by section 204, and the amendment made by section 229, of the Elementary and Secondary Education Amendments of 1966 shall be effective only with respect to fiscal years beginning after June 30, 1969.

MODIFYING PROVISIONS RELATING TO SCHOOL CONSTRUCTION ASSISTANCE IN OTHER FEDERALLY AFFECTED AREAS

SEC. 203. (a) Subsection (a) of section 14 of the Act of September 23, 1950 (Public Law 813, Eighty-first Congress) is amended in the following respects:

(1) Paragraph (1) is amended by striking out "Federal property" and inserting in lieu thereof "Indian lands", and by inserting ", or that such Indian lands constitute a substantial part of the school district of such local educational agency," immediately after "such agency provides free public education".

(2) Paragraph (2) is amended by striking out "Federal property" and inserting in lieu thereof "Indian lands".

(3) Paragraph (4) is amended by striking out "in its school district" and inserting in lieu thereof "of a substantial percentage of the children in the membership of its schools".

(4) Such subsection (a) is further amended by—

(A) striking out "is attributable to children who reside on Federal property, and which" in the portion of the first sentence of subsection (a) which follows paragraph (4);

(B) striking out "in the case of any application for additional assistance on account of children who reside on Indian lands" in the second sentence of such subsection (a);

(C) striking out "subsection (c)" and inserting in lieu thereof "subsection (d)" in the third sentence of such subsection (a); and

(D) striking out "third" and inserting in lieu thereof "second" in the last sentence of such section (a).

(b) Section 14 of such Act, as amended by this section, is further amended by redesignating subsections (b), (c), (d), and (e) as subsections (c), (d), (e), and (f), respectively, and by inserting immediately after subsection (a) the following new subsection (b):

"(b) If the Commissioner determines with respect to any local educational agency that—

"(1) such agency is providing or, upon completion of the school facilities for which provision is made herein, will provide free public education for children who reside on Indian lands, and whose membership in the schools of such agency has not formed and will not form the basis for payments under other provisions of this Act, and that the total number of such children represents a substantial percentage of the total number of children for whom such agency provides free public education, or that such Indian lands constitute a substantial part of the school district of such local educational agency, or that the total number of such children who reside on Indian lands located outside the school district of such agency equals or exceeds one hundred; and

"(2) the immunity of such Indian lands to taxation by such agency has created a substantial and continuing impairment of its ability to finance needed school facilities; he may, upon such terms and in such amounts (subject to the provisions of this section) as the Commissioner may consider to be in the public interest, provide the additional assistance necessary to enable such agency to provide the minimum school facilities required for free public education of children in the membership of the schools of such agency who reside on Indian lands; but such additional assistance may not exceed the portion of the cost of constructing such facilities which the Commissioner estimates has not been, and is not to be, recovered by the local educational agency from other sources, including payments by the United States under any other provisions of this Act or any other law. Notwithstanding the provisions of this subsection, the Commissioner may waive the percentage requirement in paragraph (1) whenever, in his judgment, exceptional circumstances exist which make such action necessary to avoid inequity and avoid defeating the purposes of this section. Assistance may be furnished under this subsection without regard to paragraph (2) (but subject to the other provisions of this subsection and subsection (d)) to any local educational agency which provides free public education for children who reside on Indian lands located outside its school district. For purposes of this subsection 'Indian lands' mean Indian reservations or other real property referred to in the second sentence of section 15(1)."

(c) Subsection (d) of section 14 of such Act, as redesignated by subsection (b) of this section, is amended by inserting "or (b)" immediately after "subsection (a)" each time it occurs in such subsection.

(d) Subsection (e) of section 14 of such Act as redesignated by subsection (b) of this section, is amended by inserting "or (b)" immediately after "subsection (a)".

DELETING REQUIREMENT THAT CERTAIN CONTRIBUTIONS BE DEDUCTED

SEC. 204. (a)(1) Paragraph (3) of section 2(a) of the Act of September 30, 1950 (Public Law 874, Eighty-first Congress), is amended by striking out "(A) other Federal payments with respect to the property so acquired, or (B)".

(2) Section 2(a) of such Act is further amended by striking out in the matter following paragraph (3) of such section the following: ", to the extent such agency is not compensated for such burden by other Federal payments with respect to the property so acquired".

(b) The last sentence of section 2(a) of such Act is amended by striking out ", minus the amount which in his judgment the local educational agency derived from other Federal payments with respect to the property so acquired and had available in such year for current expenditures".

(c) Subsection (b) of section 2 of such Act is amended to read as follows:

"(b) For the purposes of this section any real property with respect to which payments are being made under section 13 of the Tennessee Valley Authority Act of 1933, as amended, shall not be regarded as Federal property."

(d) Section 3 of such Act is amended by striking out subsection (e) thereof, including the heading of such subsection, and by redesignating subsection (f) of such section as subsection (e).

PROVISION FOR INTERNATIONAL BOUNDARY CHANGE

SEC. 205. (a) The last sentence of section 3(b) of the Act of September 30, 1950 (Public Law 874, Eighty-first Congress), is amended by inserting before the period at the end thereof the following: "; but if, by reason of any other provision of law, this sentence is not considered in computing the amount to which any local educational agency is entitled for the fiscal year ending June 30, 1967, the additional amount to which such agency would have been entitled had this sentence been so considered, shall be added to such agency's entitlement for the first fiscal year for which funds appropriated to carry out this Act may be used for such purpose".

(b) Section 5(a)(4) of the Act of September 23, 1950 (Public Law 815, Eighty-first Congress), is amended by inserting before the period at the end thereof the following: "; but if, by reason of any other provision of law, this clause is not considered in computing the maximum payments a local educational agency may receive for the fiscal year ending June 30, 1967, the additional amount such agency would have been entitled to receive shall be added to such agency's entitlement for the first fiscal year for which funds appropriated to carry out this Act may be used for such purpose".

REPEAL OF MANDATORY GROUP RATE PROVISIONS

SEC. 206. (a) Effective for fiscal years beginning after June 30, 1967, subsection (d) of section 3 of the Act of September 30, 1950 (Public Law 874, Eighty-first Congress), as amended, is amended as follows:

(1) The first sentence is amended by inserting "and the local educational agency" following "the State educational agency".

(2) Clauses (1) and (2) of the first sentence are amended to read as follows:

"(1) he shall determine which school districts within the State are in his judgment generally comparable to the school districts of the agency for which the computation is being made; and

"(2) he shall then divide (A) the aggregate current expenditures during the second fiscal year preceding the fiscal year for which he is making the computation, which the local educational agencies of such comparable school districts made from revenues derived from local sources, by (B) the aggregate number of children in average daily attendance to whom such agencies provided free public education during such second preceding fiscal year."

(3) The third sentence is amended by striking out "If, in the judgment of the Commissioner, the current expenditures in the school districts within the generally comparable group as determined under clause (1)" and inserting in lieu thereof "If, in the judgment of the Commissioner, the current expenditures in those school districts which he has selected under clause (1)".

DISCRETION TO WAIVE CERTAIN REQUIREMENT

SEC. 207. Section 5(e) of the Act of September 23, 1950 (Public Law 815, Eighty-first Congress), is amended (1) by striking out "subsections (c) and (d)" and inserting in lieu thereof "subsections (c), (d), and (f)", and (2) by inserting before the period at the end thereof the following: "; or (3) he may waive or reduce the requirement contained in subsection (f)".

EFFECTIVE DATE

SEC. 208. The amendments made by sections 201, 203, 204, 205, 206, and 207 of this part shall be deemed to have been enacted prior to June 30, 1967, and shall be effective for fiscal years beginning thereafter.

PART B—ASSISTANCE FOR SCHOOL CONSTRUCTION AND CURRENT EXPENDITURES IN DISASTER AREAS

SCHOOL CONSTRUCTION ASSISTANCE

SEC. 217. Section 16(a) of the Act of September 23, 1950 (Public Law 815, Eighty-first Congress), is amended to read as follows:

"SCHOOL CONSTRUCTION ASSISTANCE IN CASES OF CERTAIN DISASTERS

"SEC. 16. (a) In any case in which—

"(1) (A) the Director of the Office of Emergency Planning determines with respect to any local educational agency (including for the purpose of this section any other public agency which operates schools providing technical, vocational, or other special education to children of elementary or secondary school age) that such agency is located in whole or in part within an area which, after August 30, 1965, and prior to July 1, 1971, has suffered a major disaster as the result of any flood, drought, fire, hurricane, earthquake, storm, or other catastrophe which, in the determination of the President pursuant to section 2(a) of the Act of September 30, 1950 (42 U.S.C. 1855(a)), is or threatens to be of sufficient severity or magnitude to warrant disaster assistance by the Federal Government; or

"(B) the Commissioner determines with respect to any such agency that public elementary or secondary school facilities (or, in the case of a public agency other than a local educational agency, school facilities providing technical, vocational, or other special education to children of elementary or secondary school age) of such agency have been destroyed or seriously damaged as a result of fire, flood, hurricane, earthquake, storm, malicious action of any person known or unknown, or other catastrophe; and

"(2) the Governor of the State in which such agency is located has certified the need for disaster assistance under this section, and has given assurance of expenditure of a reasonable amount of the funds of the government of such State, or of any political subdivision thereof, for the same or similar purposes with respect to such catastrophe; and if the Commissioner determines with respect to such agency that—

"(3) as a result of such major disaster, (A) public elementary or secondary school facilities of such agency (or, in the case of a public agency other than a local educational agency, school facilities providing technical, vocational, or other special education to children of elementary or secondary school age) have been destroyed or seriously damaged, or (B) private elementary or secondary school facilities serving children who reside in the area served by such agency have been destroyed and will not be replaced, thereby increasing the need of such agency for school facilities;

"(4) such agency is utilizing or will utilize all State and other financial assistance available for the replacement or restoration of such school facilities;

"(5) such agency does not have sufficient funds available to it from State, local, and other Federal sources (including funds available under other provisions of this Act), and from the proceeds of insurance on such school facilities, and requires an amount of additional assistance equal to at least $1,000 or one-half of 1 per centum of such agency's current operating expenditures during the fiscal year preceding the one in which such disaster occurred, whichever is less, to provide the minimum school facilities needed (A) for the restoration or replacement of the school facilities of such agency so destroyed or seriously damaged or (B) to serve, in facilities of such agency, children who but for the destruction of the private facilities referred to in clause (3)(B) would be served by such private facilites; and

"(6) in the case of any such major disaster, to the extent that the operation of private elementary and secondary schools in the school attendance area of the local educational agency has been disrupted or impaired by such disaster, such local educational agency has complied with the provisions of section 7(a)(4) of the Act of September 30, 1950 (Public Law 874, Eighty-first Congress), with respect to provisions for the conduct of educational programs under public auspices and administration in which children enrolled in such private elementary and secondary schools may attend and participate, the Commissioner may provide the additional assistance necessary to enable such agency to provide such facilities, upon such terms and in such amounts (subject to the provisions of this section) as the Commissioner may consider to be in the public interest; but such additional assistance, plus the amount which he determines to be available from State, local, and other Federal sources (including funds available under other provisions of this Act, and from the proceeds of insurance, may not exceed the cost of construction incident to the restoration or replacements of the school facilities destroyed or damaged as a result of the disaster. In all cases determined pursuant to clause (1)(B) of this subsection, and in any other case deemed appropriate by the Commissioner, such assistance shall be in the form of a repayable advance subject to such terms and conditions as he considers to be in the public interest."

CURRENT SCHOOL EXPENDITURES ASSISTANCE

SEC. 218. Section 7 of the Act of September 30, 1950 (Public Law 874, Eighty-first Congress), is amended to read as follows:

"ASSISTANCE FOR CURRENT SCHOOL EXPENDITURES IN CASES OF CERTAIN DISASTERS

"SEC. 7. (a) In any case in which—

"(1) (A) the Director of the Office of Emergency Planning determines with respect to any local educational agency (including for the purpose of this section any other public agency which operates schools providing technical, vocational, or other special education to children of elementary or secondary school age) that such agency is located in whole or in part within an area which after August 30, 1965, and prior to July 1, 1971, has suffered a major disaster as the result of any flood, drought, fire, hurricane, earthquake, storm, or other catastrophe which, in the determination of the President pursuant to section 2(a) of the Act of September 30, 1950 (42 U.S.C. 1855a(a)), is or threatens to be of sufficient severity or magnitude to warrant disaster assistance by the Federal Government; or

"(B) the Commissioner determines with respect to any such agency that public elementary or secondary school facilities of such agency have been destroyed or seriously damaged as a result of fire, flood, hurricane, earthquake, storm, malicious action of any person known or unknown, or other catastrophe; and

"(2) the Governor of the State in which such agency is located has certified the need for disaster assistance under this section, and has given assurance of expenditure of a reasonable amount of the funds of the government of such State, or of any political subdivision thereof, for the same or similar purposes with respect to such catastrophe; and if the Commissioner determines with respect to such agency that—

"(3) such agency is utilizing or will utilize all State and other financial assistance available to it for the purpose of meeting the cost of providing free public education for the children attending the schools of such agency, but as a result of such disaster it is unable to obtain sufficient funds for such purpose and requires an amount of additional assistance equal to at least $1,000 or one-half of 1 per centum of such agency's current operating expenditures during the fiscal year preceding the one in which such disaster occurred, whichever is less, and

"(4) in the case of any such major disaster to the extent that the operation of private elementary and secondary schools in the school attendance area of such local educational agency has been disrupted or impaired by such disaster, such local educational agency has made provisions for the conduct of educational programs under public auspices and administration in which children enrolled in such private elementary and secondary schools may attend and participate: *Provided*, That nothing contained in this Act shall be construed to authorize the making of any payment under this Act for religious worship or instruction,

the Commissioner may provide to such agency the additional assistance necessary to provide free public education to the children attending the schools of such agency, upon such terms and in such amounts (subject to the provisions of this section) as the Commissioner may consider to be in the public interest. Such additional assistance may be provided for a period not greater than a five-fiscal-year period beginning with the fiscal year in which it is determined pursuant to clause (1) of this subsection that such agency suffered a disaster. The amount so provided for any fiscal year shall not exceed the amount which the Commissioner determines to be necessary to enable such agency, with the State, local, and other Federal funds available to it for such purpose, to provide a level of education equivalent to that maintained in the schools of such agency prior to the occurrence of such disaster, taking into account the additional costs reasonably necessary to carry out the provisions of clause (4) of this subsection. The amount, if any, so provided for the second, third, and fourth fiscal years following the fiscal year in which it is so determined that such agency has suffered a disaster shall not exceed 75 per centum, 50 per centum, and 25 per centum, respectively, of the amount so provided for the first fiscal year following such determination.

"(b) In addition to and apart from the funds provided under subsection (a), the Commissioner is authorized to provide to such agency an amount which he determines to be necessary to replace instructional and maintenance supplies, equipment, and materials (including textbooks) destroyed or seriously damaged as a result of such disaster, to make minor repairs, and to lease or otherwise provide (other than by acquisition of land or erection of facilities) school and cafeteria facilities needed to replace temporarily such facilities which have been made unavailable as a result of the disaster.

"(c) There is hereby authorized to be appropriated for each fiscal year such amounts as may be necessary to carry out the provisions of this section. Pending such appropriation, the Commission may expend (without regard to subsections (a) and (e) of section 3679 of the Revised Statutes (31 U.S.C. 665)) from any funds heretofore or hereafter appropriated for expenditure in accordance with other sections of this Act, such sums as may be necessary for immediately providing assistance under this section, such appropriations to be reimbursed from the appropriations authorized by this subsection when made.

"(d) No payment may be made to any local educational agency under this section except upon application therefor which is submitted through the appropriate State educational agency and is filed with the Commissioner in accordance with the regulations prescribed by him. In determining the order in which such applications shall be approved, the Commissioner shall consider the relative educational and financial needs of the local educational agencies which have submitted approval applications.

"(e) Amounts paid by the Commissioner to local educational agencies under this section may be paid in advance or by way of reimbursement and in such installments as the Commissioner may determine. Any funds paid to a local educational agency and not expended or otherwise used for the purposes for which paid shall be repaid to the Treasury of the United States."

TITLE III—DURATION OF AND AUTHORIZATIONS FOR PROGRAMS

EXTENSION OF CERTAIN PROGRAMS UNDER ELEMENTARY AND SECONDARY EDUCATION ACT OF 1965 AND PUBLIC LAWS 815 AND 874, EIGHTY-FIRST CONGRESS

SEC. 301. (a)(1) Section 102 of title I of the Elementary and Secondary Education Act of 1965 (as redesignated by section 110 of this Act) is amended by striking out "June 30, 1968" and inserting in lieu thereof "June 30, 1971".

(2) The second sentence of section 103(c) of such Act (as redesignated by section 110 of this Act) is amended by inserting "and for each of the three succeeding fiscal years" after "June 30, 1968".

(b)(1) Section 201(a) of the Elementary and Secondary Education Act of 1965 is amended by striking out "during the fiscal year ending June 10, 1966, and each of the four succeeding fiscal years,".

(2) Section 201(b) of such Act is amended by striking out "and $150,000,000 for the fiscal year ending June 30, 1968; but for the fiscal year ending June 30, 1969, and the succeeding fiscal year, only such sums may be appropriated as the Congress may hereafter authorize by law" and inserting in lieu thereof "$150,000,000 for the fiscal year ending June 30, 1968, $175,000,000 for the fiscal year ending June 30, 1969, $200,000,000 for the fiscal year ending June 30, 1970, and $225,000,000 for the fiscal year ending June 30, 1971."

(c)(1) Section 601 of such Act (as redesignated by section 152 of this Act) is amended by striking out "during the fiscal year ending June 30, 1967, and the succeeding fiscal year,".

(2) Section 602 of such Act (as redesignated by section 152 of this Act) is amended by striking out "and $150,000,000 for the fiscal year ending June 30, 1968" and inserting in lieu thereof the following: $150,000,000 for the fiscal year ending June 30, 1968, $175,000,000 for the fiscal year ending June 30, 1969, $200,000,000 for the fiscal year ending June 30, 1970, and $225,000,000 for the fiscal year ending June 30, 1971".

(d)(1) Section 3 of the Act of September 23, 1950 (Public Law 815, Eighty-first Congress), is amended by striking out "June 30, 1967" and inserting in lieu thereof "June 30, 1971".

(2) Section 15(15) of such Act is amended by striking out "1962–1963" and inserting in lieu thereof "1966–1967".

(e) Section 2(a), 3(b), and 4(a) of the Act of September 30, 1950 (Public Law 874, Eighty-first Congress), are each amended by striking out "1968" wherever it occurs and inserting in lieu thereof "1971".

TITLE IV—PROVISIONS FOR ADEQUATE LEADTIME AND FOR PLANNING AND EVALUATION IN ELEMENTARY AND SECONDARY EDUCATION PROGRAMS

ACTS SUBJECT TO THIS TITLE

SEC. 401. The provisions of this title shall apply to title I of the Elementary and Secondary Education Act of 1965 (title II of Public Law 81–874), titles II, III, V, VI, VII, and VIII of the Elementary and Secondary Education Act of 1965, and the Adult Education Act of 1966 (title III of the Elementary and Secondary Education Amendments of 1966), as now in effect or hereafter time to time amended.

PROGRAM PLANNING AND EVALUATION

SEC. 402. There are authorized to be appropriated, for each fiscal year for which appropriations are otherwise authorized under any title or Act referred to in section 401, such sums as may be necessary, to be available to the Secretary, in accordance with regulations prescribed by him, for expenses, including grants, contracts, or other payments, for (1) planning for the succeeding year programs or projects authorized under such title or Act and (2) evaluation of programs or projects so authorized.

ADVANCE FUNDING

SEC. 403. To the end of affording the responsible State, local, and Federal officers concerned adequate notice of available Federal financial assistance for education, appropriation for grants, contracts, or other payments under any Act referred to in section 401 are authorized to be included in the appropriation Act for the fiscal year preceding the fiscal year for which they are available for obligation. In order to effect a transition to this method of timing appropriation action, the preceding sentence shall apply notwithstanding that its initial application under any such Act will result in the enactment in the same year (whether in the same appropriation Act or otherwise) of two separate appropriations, one for the then current fiscal year and one for the succeeding fiscal year.

EVALUATION REPORTS AND CONGRESSIONAL REVIEW

SEC. 404. (a) No later than March 31 of each calendar year, the Secretary shall transmit to the respective committees of the Congress having legislative jurisdiction over any Act referred to in section 401 and to the respective Committees on Appropriations a report evaluating the results and effectiveness of programs and projects assisted thereunder during the preceding fiscal year, together with his recommendations (including any legislative recommendations) relating thereto.

(b) In the case of any such program, the report submitted in the penultimate fiscal year for which appropriations are then authorized to be made for such program shall include a comprehensive and detailed review and evaluation of such program (as up to date as the due date permits) for its entire past life, based to the maximum extent practicable on objective measurements, together with the Secretary's recommendations as to proposed legislative action.

CONTINGENT EXTENSION OF EXPIRING APPROPRIATION AUTHORITY

SEC. 405. (a) Unless the Congress, in the regular session in which a comprehensive evaluation report required by section 404(b) is submitted to Congress, has passed or formally rejected legislation extending the authorization for appropriations then specified for any title, part, or section of law to which such evaluation relates, such authorization is hereby automatically extended for one fiscal year beyond, and at the level specified for, the terminal year of such authorization.

(b) In the event that no appropriation for the purpose of making payments pursuant to title I of the Elementary and Secondary Education Act of 1965 is made prior to the 15th day in May immediately preceding the beginning of any fiscal year, the Commissioner may execute grant agreements for grants pursuant to such title for such fiscal year. Such grant agreements shall be obligations of the United States. The amounts of such grant agreements shall be determined on the basis of an appropriation for the purposes of such title equal to the amount appropriated for such purposes prior to the 15th day in May for the fiscal year in which such day occurs.

AVAILABILITY OF APPROPRIATIONS ON ACADEMIC OR SCHOOL YEAR BASIS

SEC. 406. Appropriations for any fiscal year for grants, contracts, or other payments to educational agencies or institutions under any Act referred to in section 401 may, in accordance with regulations of the Secretary, be made available for expenditure by the agency or institution concerned on the basis of an academic or school year differing from such fiscal year.

TITLE V—EXTENSION OF ADULT EDUCATION PROGRAM

REVISION OF ALLOTMENTS

SEC. 501. The first sentence of section 305(a) of the Adult Education Act of 1966 (title III of Public Law 89–750) is amended to read as follows: "From the sums available for purposes of section 304(b) for any fiscal year, the Commissioner shall allot (1) not more than 2 per centum thereof among Puerto Rico, Guam, American Samoa, the Trust Territory of the Pacific Islands, and the Virgin Islands according to their respective needs for assistance under such section, and (2) $100,000 to each State."

INCLUDING PRIVATE NONPROFIT AGENCIES

SEC. 502. (a) Section 304(b) of the Adult Education Act of 1966 is amended by striking out the period at the end thereof and inserting in lieu thereof the following: "and private nonprofit agencies."

(b) Section 306(a)(7) of such Act is amended by inserting immediately after "local educational agencies" the following: "and private nonprofit agencies".

FEDERAL SHARE

SEC. 503. The second sentence of section 307(a) of the Adult Education Act of 1966 is amended to read as follows: "For the fiscal year ending June 30, 1967, and succeeding fiscal years, the Federal share for each State shall be 90 per centum, except that with respect to the Trust Territory of the Pacific Islands such Federal share shall be 100 per centum."

AUTHORIZATION EXTENDED

SEC. 504. Section 314 of the Adult Education Act of 1966 is amended by striking out "and" before "$60,000,000" and by inserting the following after "June 30, 1968,": "$70,000,000 for the fiscal year ending June 30, 1969, $80,000,000 for the fiscal year ending June 30, 1970, and $90,000,000 for the fiscal year ending June 30, 1971,".

TITLE VI—DEMONSTRATION PROJECTS AND STUDY FOR SCHOOLBUS SAFETY

STUDY AND DEMONSTRATION PROJECTS AUTHORIZED

SEC. 601. (a) The Secretary of Health, Education, and Welfare, in cooperation with the Secretary of Transportation, is authorized to conduct or to make grants, contracts, or other arrangements for (1) a study and investigation in order to determine minimum safety standards for the operation of schoolbuses, and (2) demonstration projects for the purposes of such study. Such projects shall include such research and testing activities as the Secretary determines to be necessary to carry out the provisions of this title.

(b) The Secretary of Health, Education, and Welfare shall report the results of such study to the Congress not later than January 31, 1969, together with such recommendations for additional legislation for the establishment of minimum safety standards for schoolbuses as he deems advisable.

APPROPRIATIONS AUTHORIZED

SEC. 602. There is hereby authorized to be appropriated $1,000,000 to carry out the provisions of this title.

TITLE VII—BILINGUAL EDUCATION PROGRAMS

FINDINGS OF CONGRESS

SEC. 701. The Congress hereby finds that one of the most acute educational problems in the United States is that which involves millions of children of limited English-speaking ability because they come from environments where the dominant language is other than English; that additional efforts should be made to supplement present attempts to find adequate and constructive solutions to this unique and perplexing educational situation; and that the urgent need is for comprehensive and cooperative action now on the local, State, and Federal levels to develop forward-looking approaches to meet the serious learning difficulties faced by this substantial segment of the Nation's school-age population.

AMENDMENT TO ELEMENTARY AND SECONDARY EDUCATION ACT OF 1965

SEC. 702. The Elementary and Secondary Education Act of 1965 is amended by redesignating title VII as title VIII, by redesignating sections 701 through 707 and references thereto as sections 801 through 807, respectively, and by inserting after title VI the following new title:

"TITLE VII—BILINGUAL EDUCATION PROGRAMS

"SHORT TITLE

"SEC. 701. This title may be cited as the 'Bilingual Education Act'.

"DECLARATION OF POLICY

"SEC. 702. In recognition of the special educational needs of the large numbers of children of limited English-speaking ability in the United States, Congress hereby declares it be the policy of the United States to provide financial assistance to local educational agencies to develop and carry out new and imaginative elementary and secondary school programs designed to meet these special educational needs. For the purposes of this title, 'children of limited English-speaking ability' means children who come from environments where the dominant language is other than English.

"AUTHORIZATION AND DISTRIBUTION OF FUNDS

"SEC. 703. (a) For the purposes of making grants under this title, there is authorized to be appropriated the sum of $15,000,000 for the fiscal year ending June 30, 1968, $30,000,000 for the fiscal year ending June 30, 1969, and $40,000,000 for the fiscal year ending June 30, 1970, and the succeeding fiscal year.

"(b) In determining distribution of funds under this title, the Commissioner shall give highest priority to States and areas within States having the greatest need for programs pursuant to this title. Such priorities shall take into consideration the number of children of limited English-speaking ability between the ages of three and eighteen in each State.

"USES OF FEDERAL FUNDS

"SEC. 704. Grants under this title may be used, in accordance with applications approved under section 705, for—

"(a) planning for and taking other steps leading to the development of programs designed to meet the special educational needs of children of limited English-speaking ability in schools having a high concentration of such children from families (A) with incomes below $3,000 per year, or (B) receiving payments under a program of aid to families with dependent children under a State plan approved under title IV of the Social Security Act, including research projects, pilot projects designed to test the effectiveness of plans so developed, and the development and dissemination of special instructional materials for use in bilingual education programs; and

"(b) providing preservice training designed to prepare persons to participate in bilingual education programs as teachers, teacher-aides, or other ancillary education personnel such as counselors, and inservice training and development programs designed to enable such persons to continue to improve their qualifications while participating in such programs; and

"(c) the establishment, maintenance, and operation of programs, including acquisition of necessary teaching materials and equipment, designed to meet the special educational needs of children of limited English-speaking ability in schools having a high concentration of such children from families (A) with incomes below $3,000 per year, or (B) receiving payments under a program of aid to families with dependent children under a State plan approved under title IV of the Social Security Act, through activities such as—

"(1) bilingual education programs;

"(2) programs designed to impart to students a knowledge of the history and culture associated with their languages;

"(3) efforts to establish closer cooperation between the school and the home;

"(4) early childhood educational programs related to the purposes of this title and designed to improve the potential for profitable learning activities by children;

"(5) adult education programs related to the purposes of this title, particularly for parents of children participating in bilingual programs;

"(6) programs designed for dropouts or potential dropouts having need of bilingual programs;

"(7) programs conducted by accredited trade, vocational, or technical schools; and

"(8) other activities which meet the purposes of this title.

"APPLICATIONS FOR GRANTS AND CONDITIONS FOR APPROVAL

"SEC. 705. (a) A grant under this title may be made to a local educational agency or agencies, or to an institution of higher education applying jointly with a local educational agency, upon application to the Commissioner at such time or times, in such manner, and containing or accompanied by such information as the Commissioner deems necessary. Such application shall—

"(1) provide that the activities and services for which assistance under this title is sought will be administered by or under the supervision of the applicant;

"(2) set forth a program for carrying out the purpose set forth in section 704 and provide for such methods of administration as are necessary for the proper and efficient operation of the program;

"(3) set forth a program of such size, scope, and design as will make a substantial step toward achieving the purpose of this title:

"(4) set forth policies and procedures which assure that Federal funds made available under this title for any fiscal year will be so used as to supplement and, to the extent practical, increase the level of funds that would, in the absence of such Federal funds, be made available by the applicant for the purposes described in section 704, and in no case supplant such funds;

"(5) provide for such fiscal control and fund accounting procedures as may be necessary to assure proper disbursement of and accounting for Federal funds paid to the applicant under this title;

"(6) provide for making an annual report and such other reports, in such form and containing such information, as the Commissioner may reasonably require to carry out his functions under this title and to determine the extent to which funds provided under this title have been effective in improving the educational opportunities of persons in the area served, and for keeping such records and for affording such access thereto as the Commissioner may find necessary to assure the correctness and verification of such reports;

"(7) provide assurance that provision has been made for the participation in the project of those children of limited English-speaking ability who are not enrolled on a full-time basis; and

"(8) provide that the applicant will utilize in programs assisted pursuant to this title the assistance of persons with expertise in the educational problems of children of limited English-speaking ability and make optimum use in such programs of the cultural and educational resources of the area to be served; and for the purposes of this paragraph, the term 'cultural and educational resources' includes State educational agencies, institutions of higher education, nonprofit private schools, public and nonprofit private agencies such as libraries, museums, musical and artistic organizations, educational radio and television, and other cultural and educational resources.

"(b) Applications for grants under title may be approved by the Commissioner only if—

"(1) the application meets the requirements set forth in subsection (a);

"(2) the program set forth in the application is consistent with criteria established by the Commissioner for the purpose of achieving an equitable distribution of assistance under this title within each State, which criteria shall be developed by him on the basis of a consideration of (A) the geographic distribution of children of limited English-speaking ability, (B) the relative need of persons in different geographic areas within the State for the kinds of services and activities described in paragraph (c) of section 704, and (C) the relative ability of particular local educational agencies within the State to provide those services and activities;

"(3) the Commissioner determines (A) that the program will utilize the best available talents and resources and will substantially increase the educational opportunities in the area to be served by the applicant, and (B) that, to the extent consistent with the number of children enrolled in nonprofit private schools in the area to be served whose educational needs are of the type which this program is intended to meet, provision has been made for participation of such children; and

"(4) the State educational agency has been notified of the application and been given the opportunity to offer recommendations.

"(c) Amendments of applications shall, except as the Commissioner may otherwise provide by or pursuant to regulations, be subject to approval in the same manner as original applications.

"PAYMENTS

"SEC. 706. (a) The Commissioner shall pay to each applicant which has an application approved under this title an amount equal to the total sums expended by the applicant under the application for the purposes set forth therein.

"(b) Payments under this title may be made in installments and in advance or by way of reimbursement, with necessary adjustments on account of overpayments or underpayments.

"ADVISORY COMMITTEE

"SEC. 707. (a) The Commissioner shall establish in the Office of Education an Advisory Committee on the Education of Bilingual Children, consisting of nine members appointed, without regard to the civil service laws, by the Commissioner with the approval of the Secretary. The Commissioner shall appoint one such member as Chairman. At least four of the members of the Advisory Committee shall be educators experienced in dealing with the educational problems of children whose native tongue is a language other than English.

"(b) The Advisory Committee shall advise the Commissioner in the preparation of general regulations and with respect to policy matters arising in the administration of this title, including the development of criteria for approval of applications thereunder. The Commissioner may appoint such special advisory and technical experts and consultants as may be useful and necessary in carrying out the functions of the Advisory Committee.

"(c) Members of the Advisory Committee shall, while serving on the business of the Advisory Committee, be entitled to receive compensation at rates fixed by the Secretary, but not exceeding $100 per day, including traveltime; and while so serving away from their homes or regular places of business, they may be allowed travel expenses, including per diem in lieu of subsistence, as authorized by section 5703 of title 5 of the United States Code for persons in the Government service employed intermittently.

"LABOR STANDARDS

"SEC. 708. All laborers and mechanics employed by contractors or subcontractors on all minor remodeling projects assisted under this title shall be paid wages at rates not less than those prevailing on similar minor remodeling in the locality as determined by the Secretary of Labor in accordance with the Davis-Bacon Act, as amended (40 U.S.C. 276a—276a-5). The Secretary of Labor shall have, with respect to the labor standards specified in this section, the authority and functions set forth in Reorganization Plan Numbered 14 of 1950 and section 2 of the Act of June 13, 1934, as amended (40 U.S.C. 276c)."

CONFORMING AMENDMENTS

SEC. 703. (a) That part of section 801 (as so redesignated by section 702 of this Act) of the Elementary and Secondary Education Act of 1965 which precedes clause (a) is amended by striking out "and VI" and inserting in lieu thereof "VI, and VII".

(b) Clause (j) of such section 801 as amended by this Act is further amended by striking out "and VI" and inserting in lieu thereof "VI, and VII".

AMENDMENTS TO TITLE V OF THE HIGHER EDUCATION ACT OF 1965

SEC. 704. (a) The third sentence of section 521 of the Education Professions Development Act (title V of the Higher Education Act of 1965) is amended (1) effective for the fiscal year ending June 30, 1968, only, by inserting after "a career of teaching in elementary or secondary schools" a new phrase as follows: ", a career of teaching children of limited English-speaking ability", and (2) effective with respect to subsequent fiscal years, by inserting ", and including teaching children of limited English-speaking ability" after "including teaching in preschool and adult and vocational education programs".

(b) Effective for the fiscal year ending June 30, 1968, only, section 522(a) of such Act is amended by striking out "ten thousand fellowships for the fiscal year ending June 30, 1968" and inserting in lieu thereof "eleven thousand fellowships for the fiscal year ending June 30, 1968".

(c)(1) Section 528 of such Act is amended, effective with respect to fiscal years ending after June 30, 1967, by striking out "$275,000,000" and inserting in lieu thereof "$285,000,000"; striking out "$195,000,000" and inserting in lieu thereof "$205,000,000"; striking out "$240,000,000" and inserting in lieu thereof "$250,000,000"; and striking out "July 1, 1968" and inserting in lieu thereof "July 1, 1970".

(2) The amendments made by this subsection shall, notwithstanding section 9(a) of Public Law 90–35, be effective with regard to fiscal years beginning after June 30, 1967.

(d) Section 531(b) of such Act is amended by redesignating clauses (8) and (9) thereof as clauses (9) and (10), respectively, and by inserting immediately after clause (7) the following new clause:

"(8) programs or projects to train or retrain persons engaging in special educational programs for bilingual students;".

AMENDMENTS TO TITLE XI OF THE NATIONAL DEFENSE EDUCATION ACT OF 1958

SEC. 705. (a) Section 1101 of the National Defense Education Act of 1958 is amended by striking out "and for each of the two succeeding fiscal years" and inserting in lieu thereof "and for the succeeding fiscal year, and $51,000,000 for the fiscal year ending June 30, 1968".

(b) Such section is further amended by striking out the period at the end of clause (3) and inserting in lieu thereof a comma and the word "or", and by inserting after such clause a new clause as follows:

"(4) who are engaged in or preparing to engage in special educational programs for bilingual students."

AMENDMENTS TO COOPERATIVE RESEARCH ACT

SEC. 706. Subsections (a) and (b) of section 2 of the Cooperative Research Act are each amended by inserting "and title VII" after "section 503(a)(4)".

APPENDIX A

COUNTY ALLOTMENTS UNDER TITLE I, ELEMENTARY AND SECONDARY EDUCATION ACT, FOR FISCAL YEAR 1968 BASED UPON $1.2 BILLION APPROPRIATION DISTRIBUTED UNDER FAMILY INCOME FACTORS OF $2,000 AND $3,000 WITH COUNTY SAVINGS CLAUSE ADDED

FAMILY INCOME FACTOR UNDER $2,000

BUREAU OF ELEMENTARY AND SECONDARY EDUCATION

Preliminary county aggregate maximum basic grants for fiscal year 1968 under Public Law 874, title II, or Public Law 89-10, title I

ALABAMA

The tables which follow set forth as understood relevant statistical information concerning the various titles of H.R. 7819 as reported:

DEPARTMENT OF HEALTH, EDUCATION, AND WELFARE, OFFICE OF EDUCATION

TABLE I—ELEMENTARY AND SECONDARY EDUCATION AMENDMENTS OF 1967

[H.R. 7819]

New obligational authority	1968	1969	1970	1971
Title I—Amendments to the Elementary and Secondary Education Act of 1965, and related amendments:				
Pt. A, title I—Assistance for education of children of low-income families		$2,725,959,699	$2,862,175,945	$3,005,201,677
Special incentive grants	$50,000,000	50,000,000	50,000,000	50,000,000
Pt. B, title II—School library resources, textbooks, and other instructional materials		180,250,000	206,000,000	231,750,000
Pt. C, title III—Supplementary educational centers and services		540,750,000	566,500,000	592,250,000
Pt. D, title V:				
Pt. A.—Strengthening State departments of education	[1] 65,000,000	80,000,000	80,000,000	85,000,000
Pt. B.—Comprehensive educational planning	15,000,000	20,000,000	20,000,000	20,000,000
Pt. E, title VI—Education of handicapped children:				
Regional resource centers	7,500,000	8,000,000	10,000,000	12,000,000
Centers and services for deaf-blind children	1,000,000	3,000,000	7,000,000	9,000,000
Recruitment of personnel and information	1,000,000	1,000,000	1,000,000	1,000,000
Instructional media programs	[2] 3,000,000	[2] 8,000,000	[3] 10,000,000	[3] 10,000,000
Grants to States		180,250,000	206,000,000	231,750,000
Pt. F, title VIII—Dissemination of information	[4] 3,500,000	3,700,000	4,000,000	4,200,000
Title II—Federally affected areas: Pt. A—School construction (Public Law 815)	[5] 62,000,000	[5] 66,000,000	[5] 66,000,000	[5] 64,000,000
Maintenance and operations (Public Law 874)	[5] 15,884,000	[5] 386,223,000	[5] 421,723,000	[5] 456,723,000
Title V—Extension of adult education programs		70,000,000	80,000,000	90,000,000
Title VI—Demonstration projects and study for school bus safety		1,000,000	([6])	
Title VII—Bilingual education	15,000,000	30,000,000	40,000,000	40,000,000
Title VIII—Dropout prevention projects	([7])	[7] 30,000,000	30,000,000	30,000,000
Total	243,884,000	4,384,132,699	4,660,398,945	4,932,874,677

[1] Includes $50,000,000 currently authorized.
[2] Includes $5,000,000 currently authorized.
[3] Includes $7,000,000 currently authorized.
[4] Includes $2,000,000 currently authorized.
[5] Excludes amounts currently authorized.
[6] Total of $1,000,000 authorized for both fiscal years.
[7] Total of $30,000,000 authorized for both fiscal years.

TABLE II—INCREASES OVER CURRENT 1968 AUTHORIZATIONS

ELEMENTARY AND SECONDARY EDUCATION AMENDMENTS OF 1967

[H.R. 7819]

New obligational authority	1968	1969	1970	1971
Title I—Amendments to the Elementary and Secondary Education Act of 1965, and related amendments:				
Part A—Title I, "Assistance of Education of Children of Low-Income Families"		$140,348,896	$276,565,142	$419,590,874

---

[1] Estimated authorizations for fiscal year 1968 for county local educational agencies based on the county total of estimated 5 to 17 population in families with incomes of less than $3,000 per annum (1959), in families with incomes of more than $3,000 per annum from AFDC payments (January 1967), estimated 5 to 17 average daily population in institutions for neglected or delinquent children (May 1967) not counted for the purpose of a grant to a State agency, and estimated 5 to 17 population being supported in foster homes with public funds (January 1967) and 50 percent of the State or national average current expenditure per pupil in average daily attendance, 1965–66, whichever is greater. Authorizations revised to exclude ineligible counties (26 children in 4 counties in 3 States).

[2] Total of estimated authorizations for fiscal year 1968 based on estimated migratory children of migratory agricultural workers (FTE, 1965–66), estimated ADA in State-supported or State-operated institutions for juvenile delinquents (May 1967), dependent and neglected children (May 1967), and handicapped children, 1965–66 and 50 percent State or national average current expenditure per pupil in average daily attendance, 1965–66, whichever is greater.

TABLE III-C.—ESTIMATED AUTHORIZATIONS UNDER PART A OF TITLE I, PUBLIC LAW 89-10, AS PROPOSED TO BE AMENDED, FISCAL YEAR 1968

AUTHORIZATIONS AND ALLOTMENTS—GRANTS TO STATE AGENCIES ($3,000 PER ANNUM)

	Estimated total amounts, State agency programs	Amounts for migratory children (FTE, 1965–66) [1]	Amounts for juvenile delinquents (May 1967) [2]	Amounts for handicapped children (1965–66) [2]	Amounts for dependent and neglected children (May 1967)

[1] Estimated reduction of authorization for Public Law 89-10, title I, at the $3,000 per annum income level, $150,000 minimum administration amount, to the proposed total appropriation amount of $1,200,000,000, fiscal year 1968, under H.R. 7819, proposed amendment, Senate committee. Neither the income level, the minimum administration amount nor the appropriation amount is definite as of this date.

[2] Total estimated grant allotment for all title I programs. Total allocations were computed as in proposed amendment to Public Law 89-10, title I.

[3] 1 percent of the aggregate amount available within the State, as provided in the proposed amendment, or $150,000, whichever is greater.

---

[1] Distribution of $15,000,000 with 25 percent ($3,750,000) reserved for sec. 524 and the remainder ($11,250,000) distributed with 2 percent ($225,000) withheld for the outlying areas, and the balance ($11,025,000) distributed (a) 40 percent ($4,410,000) among the States in equal amounts and (b) 60 percent ($6,615,000) on the basis of total resident population, July 1, 1965.

[2] Estimated distribution of $20,000,000 with 25 percent reserved for special projects. Of the balance of $15,000,000, 2 percent withheld for outlying areas; of the remainder of $14,700,000, 40 percent ($5,880,000) distributed in equal payments to 50 States and the District of Columbia, and 60 percent ($8,820,000) distributed on basis of total resident population, July 1, 1965.

Note: Estimated distribution of 95 percent of total authorization, with 2 percent reserved for the outlying areas and 40 percent of the balance distributed in equal payments, 60 percent distributed on the basis of total public school enrollment, fall 1966.

TABLE VIII.—ESTIMATED DISTRIBUTION OF FUNDS UNDER PROPOSED AMENDMENT TO PUBLIC LAW 89-10, TITLE VI, EDUCATION OF HANDICAPPED CHILDREN: FISCAL YEAR 1969, FISCAL YEAR 1970, AND FISCAL YEAR 1971

	Fiscal year 1969	Fiscal year 1970	Fiscal year 1971
United States and outlying areas	$180,250,000	$206,000,000	$231,750,000

District of Columbia	345,521	384,412	421,304
Outlying areas	1,400,000	1,600,000	1,800,000

[1] Distribution of $70,000,000 for fiscal year 1969 with 2 percent reserved for outlying areas; $100,000 basic amount to 50 States and the District of Columbia, balance distributed on basis of the population 18 and over with less than 6 grades of school completed. Distribution of $80,000,000 for fiscal year 1970 and $90,000,000 for 1971 with distribution made as described for fiscal year 1969.

CHANGES IN EXISTING LAW

In compliance with subsection 4 of rule XXIX of the Standing Rules of the Senate, changes in existing law made by the bill, as reported, are shown as follows (existing law proposed to be omitted is enclosed in black brackets, new matter is printed in italic, existing law in which no change is proposed is shown in roman):

ELEMENTARY AND SECONDARY EDUCATION ACT OF 1965 (P.L. 89-10)

An act to strengthen and improve educational quality and educational opportunities in the Nation's elementary and secondary schools.

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled, That this Act may be cited as the "Elementary and Secondary Education Act of 1965".

TITLE I—FINANCIAL ASSISTANCE TO LOCAL EDUCATIONAL AGENCIES FOR THE EDUCATION OF CHILDREN OF LOW-INCOME FAMILIES AND EXTENSION OF PUBLIC LAW 874, EIGHTY-FIRST CONGRESS [1]

* * * * *

TITLE II—SCHOOL LIBRARY RESOURCES, TEXTBOOKS, AND OTHER INSTRUCTIONAL MATERIALS

APPROPRIATIONS AUTHORIZED

SEC. 201. (a) The Commissioner shall carry out **[**during the fiscal year ending June 30, 1966, and each of the four succeeding fiscal years,**]** a program for making grants for the acquisition of school library resources, textbooks, and other printed and published instructional materials for the use of children and teachers in public and private elementary and secondary schools.

(b) For the purpose of making grants under this title, there are hereby authorized to be appropriated the sum of $100,000,000 for the fiscal year ending June 30, 1966, $125,000,000 for the fiscal year ending June 30, 1967, **[**and $150,000,000 for the fiscal year ending June 30, 1968; but for the fiscal year ending June 30, 1969, and the succeeding fiscal year, only such sums may be appropriated as the Congress may hereafter authorize by law.**]** *$150,000,000 for the fiscal year ending June 30, 1968, $175,000,000 for the fiscal year ending June 30, 1969, $200,000,000 for the fiscal year ending June 30, 1970, and $225,000,000 for the fiscal year ending June 30, 1971.*

---

[1] For amendments to title I of the Elementary and Secondary Education Act of 1965 see title II of Public Law 874, 81st Congress.

ALLOTMENT TO STATES

SEC. 202. (a) (1) There is hereby authorized to be appropriated for each fiscal year for the purposes of this paragraph an amount equal to not more than 3 per centum of the amount appropriated for such year for payments to States under section 201(b). The Commissioner shall allot the amount appropriated pursuant to this paragraph among Puerto Rico, Guam, American Samoa, the Virgin Islands, and the Trust Territory of the Pacific Islands according to their respective needs for assistance under this title. In addition, for the fiscal year ending [June 30, 1967] *June 30, 1968 and the fiscal year ending June 30, 1969,* he shall allot from such amount to (A) the Secretary of the Interior the amount necessary for such assistance for children and teachers in elementary and secondary schools operated for Indian children by the Department of the Interior, and (B) the Secretary of Defense the amount necessary for such assistance for children and teachers in the overseas dependents schools of the Department of Defense. The terms upon which payments for such purpose shall be made to the Secretary of the Interior and the Secretary of Defense shall be determined pursuant to such criteria as the Commissioner determines will best carry out the purposes of this title.

(2) From the sums appropriated for carrying out this title for any fiscal year pursuant to section 201(b), the Commissioner shall allot to each State an amount which bears the same ratio to the total of such sums as the number of children enrolled in the public and private elementary and secondary schools of that State bears to the total number of children so enrolled in such schools in all of the States. The number of children so enrolled shall be determined by the Commissioner on the basis of the most recent satisfactory data available to him. For purposes of this subsection, the term "State" shall not include the Commonwealth of Puerto Rico, Guam, American Somoa, the Virgin Islands, and the Trust Territory of the Pacific Islands.

* * * * *

TITLE III—SUPPLEMENTARY EDUCATIONAL CENTERS AND SERVICES

APPROPRIATIONS AUTHORIZED

SEC. 301. (a) The Commissioner shall carry out a program for making grants for supplementary educational centers and services, to stimulate and assist in the provision of vitally needed educational services not available in sufficient quantity or quality, and to stimulate and assist in the development and establishment of exemplary elementary and secondary school educational programs to serve as models for regular school programs.

(b) For the purpose of making grants under this title, there is hereby authorized to be appropriated the sum of $100,000,000 [,] for the fiscal year ending June 30, 1966; $175,000,000 for the fiscal year ending June 30, 1967; [and] $500,000,000 for the fiscal year ending June 30, 1968; [but for the fiscal year ending June 30, 1969, and the succeeding fiscal year, only such sums may be appropriated as the Congress may hereafter authorize by law] *$525,000,000 for the fiscal year ending June 30, 1969; $550,000,000 for the fiscal year ending June 30, 1970; and $575,000,000 for the fiscal year ending June 30, 1971. In addition, there are hereby authorized to be appropriated for the fiscal year ending June 30, 1968, and each of the three succeeding fiscal years, such sums as may be necessary for the administration of State plans, the activities of advisory councils, and the evaluation and dissemination activities required under this title.*

[APPORTIONMENT] *Allotment* AMONG STATES

SEC. 302. (a) (1) There is hereby authorized to be appropriated for each fiscal year for the purposes of this paragraph an amount equal to not more than 3 per centum of the amount appropriated for such year for grants under this title. The Commissioner shall [apportion] *allot* the amount appropriated pursuant to this paragraph among Puerto Rico, Guam, American Samoa, the Virgin Islands, and the Trust Territory of the Pacific Islands according to their respective needs for assistance under this title. In addition, for [the fiscal year ending June 30, 1967,] *each fiscal year ending prior to July 1, 1969,* he shall [apportion] *allot* from such amount to (A) the Secretary of the Interior the amount necessary [for such assistance for children and teachers in] *to provide programs and projects for the purpose of this title for individuals on reservations serviced by* elementary and secondary schools operated for Indian children by the Department of the Interior, and (B) the Secretary of Defense the amount necessary for such assistance for children and teachers in the overseas dependents schools of the Department of Defense. The terms upon which payments for such purpose shall be made to the Secretary of the Interior and the Secretary of Defense shall be determined pursuant to such criteria as the Commissioner determines will best carry out the purposes of this title.

(2) From the sums appropriated for [carrying out] *making grants under* this title for any fiscal year pursuant to section 301(b), the Commissioner shall [apportion] *allot* $200,000 to each State and shall [apportion] *allot* the remainder of such sums among the States as follows:

(A) He shall [apportion] *allot* to each State an amount which bears the same ratio to 50 per centum of such remainder as the number of children aged five to seventeen, inclusive, in the State bears to the number of such children in all the States, and

(B) He shall [apportion] *allot* to each State an amount which bears the same ratio to 50 per centum of such remainder as the population of the State bears to the population of all the States.

For the purposes of this subsection, the term "State" does not include the Commonwealth of Puerto Rico, Guam, American Samoa, the Virgin Islands, and the Trust Territory of the Pacific Islands.

(b) The number of children aged five to seventeen, inclusive, and the total population of a State and of all the States shall be determined by the Commissioner on the basis of the most recent satisfactory data available to him.

[(c) The amount apportioned under this section to any State for the fiscal year ending June 30, 1966, shall be available for payments to applicants with approved applications in that State during that year and the next fiscal year.]

[(d)] (*c*) The amount [apportioned] *allotted* to any State under subsection (a) for any fiscal year, which the Commissioner determines will not be required for the period for which that amount is available [shall be available for reapportionment], *shall be available for grants pursuant to section 306 in such State, and if not so needed may be reallotted or used for grants pursuant to section 306 in other States. Funds available for reallottment may be reallotted* from time to time, on such dates during that period as the Commissioner may fix, among other States in proportion of the amounts originally [apportioned] *allotted* among those States under subsection (a) for that year, but with the proportionate amount for any of the other States being reduced to the extent it exceeds the sum the Commissioner estimates that State needs and will be able to use for that period; and the total of these reductions [shall] *may* be similarly [reapportioned] *reallotted* among the States whose proportionate amounts were not so reduced. Any amount [reapportioned] *reallotted* to a State under this subsection from funds appropriated pursuant to section 301 for any fiscal year shall be deemed to be a part of the amount [apportioned] *allotted* to it under subsection (a) for that year.

(*d*) *The amounts made available under the first sentence of subsection* (*c*) *for any fiscal year shall remain available for grants during the next succeeding fiscal year.*

USES OF FEDERAL FUNDS

SEC. 303. (a) [Grants under this title may be used, in accordance with applications approved under section 304(b), for—] *Funds appropriated pursuant to section 301 shall, except as provided in subsection* (b), *be available only for grants in accordance with applications approved pursuant this title for:*

[(a)] (*1*) planning for and taking other steps leading to the development of programs *or projects* designed to provide supplementary educational activities and services described in [paragraph (b)], *paragraphs* (*2*) *and* (*3*), including pilot projects designed to test the effectiveness of plans so developed; and

(*2*) *the establishment or expansion of exemplary and innovative educational programs (including dual-enrollment programs and the lease or construction of necessary facilities) for the purpose of stimulating the adoption of new educational programs* (*including those described in section 503*(*4*) *and special programs for handicapped children*) *in the schools of the State; and*

[(b)] (*3*) the establishment, maintenance, [and] operation, *and expansion* of, programs *or projects,* including the lease or construction of necessary facilities and the acquisition of necessary equipment, designed to enrich the programs of local elementary and secondary schools and to offer a diverse range of educational experience to persons of varying talents and needs by [providing] *providing, especially through new and improved approaches,* supplementary educational services and activities such as—

[(1)] (*A*) comprehensive guidance and counseling, remedial instruction, and school health, physical education, recreation, psychological, [and] social work, *and other* services designed to enable and encourage persons to enter, remain in, or reenter educational programs, including the provision of special educational programs and study areas during periods when schools are not regularly in session;

[(2)] (*B*) comprehensive academic services and, where appropriate, vocational guidance and counseling, for continuing adult education;

[(3) developing and conducting exemplary educational programs, including dual-enrollment programs, for the purpose of stimulating the adoption of improved or new educational programs (including those programs described in section 503(4) in the schools of the State;]

[(4)] (*C*) specialized instruction and equipment for students interested in studying advanced scientific subjects, foreign languages, and other academic subjects which are not taught in the local schools or which can be provided more effectively on a centralized basis, or for persons who are handicapped or of preschool age;

[(5)] (*D*) making available modern educational equipment and specially qualified personnel, including artists and musicians, on a temporary basis [to] *for the benefit of children in* public and other nonprofit schools, organizations, and institutions;

[(6)] (*E*) developing, producing, and transmitting radio and television programs for classroom and other educational use;

(*F*) *in the case of any local educational agency which is making a reasonable tax effort but which is nevertheless unable to meet critical educational needs (including preschool education), because some or all of its schools are seriously overcrowded, obsolete, or unsafe, initiating and carrying out programs or projects designed to meet those* *needs, particularly those which will result in more effective use of existing facilities;*

[(7)] (*G*) providing special educational and related services for persons who are in or from rural areas or who are or have been otherwise isolated from normal educational opportunities, including, where appropriate, the provision of mobile educational services and equipment, special home study courses, radio, television, and related forms of instruction, *bilingual education methods,* and visiting teachers' programs; [and]

(H) encouraging community involvement in educational programs; and

[(8)] (*I*) other specially designed educational programs *or projects* which meet the purposes of this title.

(b) In addition to the uses specified in subsection (a), funds appropriated for carrying out this title may be used for—

(1) proper and efficient administration of State plans;

(2) obtaining technical, professional, and clerical assistance, and the services of experts and consultants to assist the advisory councils authorized by this title in carrying out their responsibilities; and

(3) evaluation of plans, programs, and projects, and dissemination of the results thereof.

APPLICATION FOR GRANTS AND CONDITIONS FOR APPROVAL

SEC. 304. (a) A grant under this title [for a program of supplementary educational services] *pursuant to an approved State plan or by the Commissioner for a supplementary educational center or service program or project* may be made *only* to a local educational agency or agencies, [but] *and then* only if there is satisfactory assurance that, in the planning of that program *or project* there has been, and in the establishment and carrying out [of that program] *thereof* there will be, participation of persons broadly representative of the cultural and educational resources of the area to be served. [For the purposes of this section, the] *The* term "cultural and educational resources" includes State educational agencies, institutions of higher education, nonprofit private schools, public and nonprofit private agencies such as libraries, museums, musical and artistic organizations, educational radio and television, and other cultural and educational resources. Such grants may be made only upon application *to the appropriate State educational agency or* to the Commissioner, *as the case may be,* at such time or times, in such manner, and containing or accompanied by such information as the Commissioner deems necessary. Such applications shall—

(1) provide that the activities and services for which assistance under this title is sought will be administered by or under the supervision of the applicant;

(2) set forth a program for carrying out the purposes set forth in [paragraph (a) or paragraph (b) of] section 303(*a*) and provide for such methods of administration as are necessary for the proper and efficient operation of the program;

(3) set forth policies and procedures which assure that Federal funds made available under this title for any fiscal year will be so used as to supplement and, to the extent practical, increase the level of funds that would, in the absence of such Federal funds, be made available by the applicant for the purposes described in [paragraphs (a) and (b) of] section 303(*a*), and in no case supplant such funds;

[(4) in the case of an application for assistance under this title which includes a project for construction of necessary facilities, provide satisfactory assurance (A) that reasonable provision has been made, consistent with the other uses to be made of the facilities, for areas in such facilities which are adaptable for artistic and cultural activities, (B) that upon completion of the construction title to the facilities will be in a State or local educational agency, (C) that, in developing plans for such facilities, due consideration will be given to excellence of architecture and design, and to the inclusion of works of art (not representing more than one per centum of the cost of the project), and there will be compliance with such standards as the Secretary may prescribe or approve in order to insure that facilities constructed with the use of Federal funds under this title shall be, to the extent appropriate in view of the uses to be made of the facilities, accessible to and usable by handicapped persons, and (D) that the requirements of section 308 will be complied with on all construction projects, assisted under this title;]

(4) provide, in the case of an application for assistance under this title which includes a project for the construction of necessary facilities, satisfactory assurance that—

(A) reasonable provision has been made, consistent with the other uses to be made of the facilities, for areas in such facilities which are adaptable for artistic and cultural activities,

(B) upon completion of the construction, title to the facilities will be in a State or local educational agency,

(C) in developing plans for such facilities, (i) due consideration will be given to excellence of architecture and design and to the inclusion of works of art (not representing more than 1 per centum of the cost of the project), and (ii) there will be compliance with such standards as the Secretary may prescribe or approve in order to insure that, to the extent appropriate in view of the uses to be made of the facilities, such facilities are accessible to and usable by handicapped persons, and

(D) the requirements of section 310 will be complied with;

(5) provide for such fiscal control and fund accounting procedures as may be necessary to assure proper disbursement of and accounting for Federal funds paid to the applicant under this title; and

(6) provide for making an annual report and such other reports, in such form and containing such information, as the Commissioner may reasonably require to carry out his functions under this title and to determine the extent to which funds provided under this title have been effective in improving the educational opportunities of persons in the area served, and for keeping such records and for affording such access thereto as the Commissioner may find necessary to assure the correctness and verification of such reports.

(b) [Applications for grants under this title may be approved by the Commissioner only if—] *An application by a local educational agency for a grant under this title may be approved only if it is consistent with the applicable provisions of this title and—*

(1) [the application] meets the requirements set forth in subsection (a);

[(2) the program set forth in the application is consistent with criteria established by the Commissioner for the purpose of achieving an equitable distribution of assistance under this title within each State, which criteria shall be developed by him on the basis of a consideration of (A) the size and population of the State, (B) the geographic distribution of the population within the State, (C) the relative need of persons in different geographic areas and in different population groups within the State for the kinds of services and activities described in paragraph (b) of section 303, and their financial ability to provide those services and activities, and (D) the relative ability of particular local educational agencies within the state to provide those services and activities;]

(2) provides that the program or project for which application is made—

(A) will utilize the best available talents and resources and will substantially increase the educational opportunities in the area to be served by the applicant,

(B) to the extent consistent with the number of children enrolled in nonprofit private schools in the area to be served whose educational needs are of the type provided by the program or project, makes provision for the participation of such children; and

(3) has been reviewed by a panel of experts.

[(3) in the case of an application for assistance for a program for carrying out the purposes described in paragraph (b) of section 303, the Commissioner determines (A) that the program will utilize the best available talents and resources and will substantially increase the educational opportunities in the area to be served by the applicant, and (B) that, to the extent consistent with the number of children enrolled in nonprofit private schools in the area to be served whose educational needs are of the type which the supplementary educational activities and services provided under the program are to meet, provision has been made for participation of such children; and

[(4) the application has been submitted for review and recommendations to the State educational agency.

[(c) In approving applications under this title for grants for any fiscal year beginning after June 30, 1967, the Commissioner must give special consideration to the application of any local educational agency which is making a reasonable tax effort but which is nevertheless unable to meet critical educational needs, including preschool education for four and five year olds, because some or all of its schools are seriously overcrowded (as a result of growth or shifts in enrollment or otherwise), obsolete, or unsafe.]

[(d)] (*c*) Amendments of applications shall, except as the Commissioner may otherwise provide by or pursuant to regulations, be subject to approval in the same manner as original applications.

State advisory councils and State plans

Sec. 305. (a)(1) Any State desiring to receive payments for any fiscal year to carry out a State plan under this title shall (A) establish within its State educational agency a State advisory council (hereinafter referred to as the "State advisory council") which meets the requirements set forth in paragraph (2), (B) set dates before which local educational agencies must have submitted applications for grants to the State educational agency, and (C) submit to the Commissioner, through its State educational agency, a State plan at such time and in such detail as the Commissioner may deem necessary. The Commissioner may, by regulation, set uniform dates for the submission of State plans and applications.

(2) The State advisory council, established pursuant to paragraph (1), shall—

(A) be broadly representative of the cultural and educational resources of the State (as defined in section 304(a)) and of the public, including persons representative of—

(i) elementary and secondary schools,

(ii) institutions of higher education,

(iii) professional organizations of teachers and school administrators,

(iv) organizations promoting the improvement of education, and

(v) areas of professional competence in dealing with children needing special education because of physical or mental handicaps,

but nothing in this subparagraph shall be construed to preclude the appointment of nonresidents of a State to the State advisory council of that State;

(B) advise the State educational agency on the preparation of, and policy matters arising in the administration of, the State plan, including the development of criteria

for approval of applications under such State plan;

(C) review, and make recommendations to the State educational agency on the action to be taken with respect to, each application for a grant under the State plan;

(D) evaluate programs and projects assisted under this title;

(E) prepare and submit a report of its activities, recommendations, and evaluations to the National Advisory Council, established pursuant to this title, at such times, in such form, and in such detail as the National Advisory Council may prescribe; and

(F) obtain such professional, technical, and clerical assistance as may be necessary to carry out its functions under this title.

(b) The Commissioner shall approve a State plan, or modification thereof, if he determines that the plan submitted for that fiscal year—

(1) sets forth a program (including educational needs, and their basis, and the manner in which the funds paid to the State under this title shall be used in meeting such educational needs) under which funds paid to the State under section 307(a) will be expended solely for the improvement of education in the State through grants to local educational agencies for programs or projects in accordance with sections 303 and 304: Provided, That, in the case of a State educational agency that also is a local educational agency, its approval of a program or project to be carried out by it in the latter capacity shall, for the purposes of this title, be deemed an award of a grant by it upon application of a local educational agency if the State plan contains, in addition to the provisions otherwise required by this section, provisions and assurances (applicable to such program or project) that are fully equivalent to those otherwise required of a local educational agency;

(2) sets forth the administrative organization and procedures in such detail as the Commissioner may prescribe by regulation to be used in carrying out the State plan, including the qualifications for personnel having responsibilities in the administration of the plan;

(3) sets forth criteria for achieving an equitable distribution of assistance under this title, which criteria shall be based on consideration of (A) the size and population of the State, (B) the geographic distribution and density of the population within the State, and (C) the relative need of persons in different geographic areas and in different population groups within the State for the kinds of services and activities described in section 303, and the financial ability of the local educational agencies serving such persons to provide such services and activities;

(4) provides for giving special consideration to the application of any local educational agency which is making a reasonable tax effort but which is nevertheless unable to meet critical educational needs, including preschool education for four- and five-year-olds and including where appropriate bilingual education, because some or all of its schools are seriously overcrowded (as a result of growth or shifts in enrollment or otherwise), obsolete, or unsafe;

(5) provides that, in approving applications for grants for programs or projects, applications proposing to carry out programs or projects planned under this title will receive special consideration;

(6) provides for adoption of effective procedures (A) for the evaluation, at least annually, of the effectiveness of the programs and projects, by the State advisory council, supported under the State plan in meeting the purposes of this title, (B) for appropriate dissemination of the results of such evaluations and other information pertaining to such programs or projects, and (C) for adopting, where appropriate, promising educational practices developed through such programs or projects;

(7) provides that not less than 50 per centum of the amount which such State receives to carry out the plan in such fiscal year shall be used for purposes of paragraphs (1) and (2) of section 303(a);

(8) provides that not less than 15 per centum of the amount which such State receives to carry out the plan in such fiscal year shall be used for special programs or projects for the education of handicapped children;

(9) sets forth policies and procedures which give satisfactory assurance that Federal funds made available under this title for any fiscal year (A) will not be commingled with State funds, and (B) will be so used as to supplement and, to the extent practical, increase the fiscal effort (determined in accordance with criteria prescribed by the Commissioner, by regulation) that would, in the absence of such Federal funds, be made by the applicant for educational purposes;

(10) provides for such fiscal control and fund accounting procedures as may be necessary to assure proper disbursement of and accounting for Federal funds paid to the State under this title;

(11) provides for making an annual report and such other reports, in such form and containing such information, as the Commissioner may reasonably require to carry out his functions under this title and to determine the extent to which funds provided under this title have been effective in improving the educational opportunities of persons in the areas served by programs or projects supported under the State plan and in the State as a whole, including reports of evaluations made in accordance with objective measurements under the State plan pursuant to paragraph (6), and for keeping such records and for affording such access thereto as the Commissioner may find necessary to assure the correctness and verification of such reports;

(12) provides that final action with respect to any application (or amendment thereof) regarding the proposed final disposition thereof shall not be taken without first affording the local educational agency or agencies submitting such application reasonable notice and opportunity for a hearing; and

(13) contains satisfactory assurance that, in determining the eligibility of any local educational agency for State aid or the amount of such aid, grants to that agency under this title shall not be taken into consideration.

(c) The Commissioner may, if he finds that a State plan for any fiscal year is in substantial compliance with the requirements set forth in subsection (b), approve that part of the plan which is in compliance with such requirements and make available (pursuant to section 307) to that State that part of the State's allotment which he determines to be necessary to carry out that part of the plan so approved. The remainder of the amount which such State is eligible to receive under this section may be made available to such State only if the unapproved portion of that State plan has been so modified as to bring the plan into compliance with such requirements: Provided, That the amount made available to a State pursuant to this subsection shall not be less than 50 per centum of the maximum amount which the State is eligible to receive under this section.

(d) A State which has had a State plan approved for any fiscal year may receive for the purpose of carrying out such plan an amount not in excess of 33⅓ per centum of its allotment pursuant to section 302 for the fiscal year ending June 30, 1969, 50 per centum thereof for the fiscal year ending June 30, 1970, and 66⅔ per centum thereof for the fiscal year ending June 30, 1971.

(e)(1) The Commissioner shall not finally disapprove any plan submitted under subsection (a), or any modification thereof, without first affording the State educational agency submitting the plan reasonable notice and opportunity for a hearing.

(2) Whenever the Commissioner, after reasonable notice and opportunity for hearings to any State educational agency, finds that there has been a failure to comply substantially with any requirement set forth in the plan of that State approved under section 305 or with any requirement set forth in the application of a local educational agency approved pursuant to section 304, the Commissioner shall notify the agency that further payments will not be made to the State under this title (or, in his discretion, that the State educational agency shall not make further payments under this title to specified local educational agencies affected by the failure) until he is satisfied that there is no longer any such failure to comply. Until he is so satisfied, no further payments shall be made to the State under this title, or payments by the State educational agency under this title shall be limited to local educational agencies not affected by the failure, as the case may be.

(3) (A) If any State is dissatisfied with the Commissioner's final action with respect to the approval of a plan submitted under subsection (a) or with his final action under paragraph (2), such State may, within 60 days after notice of such action, file with the United States court of appeals for the circuit in which such State is located a petition for review of that action. A copy of the petition shall be forthwith transmitted by the clerk of the court to the Commissioner. The Commissioner thereupon shall file in the court the record of the proceedings on which he based his action as provided in section 2112 of title 28, United States Code.

(B) The findings of fact by the Commissioner, if supported by substantial evidence, shall be conclusive; but the court, for good cause shown, may remand the case to the Commissioner to take further evidence, and the Commissioner may thereupon make new or modified findings of fact and may modify his previous action, and shall certify to the court the record of the further proceedings.

(C) The court shall have jurisdiction to affirm the action of the Commissioner or to set it aside, in whole or in part. The judgment of the court shall be subject to review by the Supreme Court of the United States upon certiorari or certification as provided in section 1254 of title 28, United States Code.

(f)(1) If any local educational agency is dissatisfied with the final action of the State educational agency with respect to approval of an application by such local agency for a grant pursuant to this title, such local agency may, within sixty days after such final action or notice thereof, whichever is later, file with the United States court of appeals for the circuit in which the State is located a petition for review of that action. A copy of the petition shall be forthwith transmitted by the clerk of the court to the State educational agency. The State educational agency thereupon shall file in the court the record of the proceedings on which the State educational agency based its action as provided in section 2112 of title 28, United States Code.

(2) The findings of fact by the State educational agency, if supported by substantial evidence shall be conclusive; but the court, for good cause shown, may remand the case to the State educational agency to take further evidence, and the State educational agency may thereupon make new or modified findings of fact and may modify its previous action, and shall certify to the court the record of the further proceedings.

(3) The court shall have jurisdiction to affirm the action of the State educational agency or to set it aside, in whole or in part. The judgment of the court shall be subject to review by the Supreme Court of the United States upon certiorari or certification

as provided in section 1254 of title 28, United States Code.

Special programs and projects

Sec. 306. (a) From the amount allotted to any State, pursuant to section 302, which is not available for grants under a State plan approved pursuant to section 305, the Commissioner is authorized, subject to the provisions of section 304, to make grants to local educational agencies in such State for programs or projects which meet the purposes of section 303 and which, in the case of a local educational agency in a State which has a State plan approved, hold promise of making a substantial contribution to the solution of critical educational problems common to all or several States. The Commissioner may not approve an application under this section unless the application has been submitted to the appropriate State educational agency for comment and recommendation with respect to the action to be taken by the Commissioner regarding the disposition of the application.

(b) Not less than 15 per centum of the funds granted pursuant to this section in any fiscal year shall be used for programs or projects designed to meet the special educational needs of handicapped children.

PAYMENTS

[Sec. 305. (a) From the amounts apportioned to each State under section 302 the Commissioner shall pay to each applicant in that State which has an application approved under this title an amount equal to the total sums expended by the applicant under the application for the purposes set forth therein.]

Sec. 307. (a) from the allotment of each State pursuant to section 302 for any fiscal year, the Commissioner shall pay to each State, which has had a plan approved pursuant to section 305 for that fiscal year, the amount necessary to carry out its State plan as approved.

(b) The Commissioner is authorized to pay to each State amounts necessary for the activities described in section 303(b), during any fiscal year, except that (1) the total of such payments shall not be in excess of an amount equal to 7½ per centum of its allotment for that fiscal year or $150,000 ($50,000 in the case of the Commonwealth of Puerto Rico, Guam, American Samoa, the Virgin Islands, and the Trust Territory of the Pacific Islands), whichever is greater, and (2) in such payment, the amount paid for the administration of the State plan during such year shall not exceed an amount equal to 5 per centum of its allotment for that fiscal year or $100,000 ($35,000 in the case of the Commonwealth of Puerto Rico, Guam, American Samoa, the Virgin Islands, and the Trust Territory of the Pacific Islands), whichever is greater.

(c) The Commissioner shall pay to each applicant which has an application approved pursuant to section 306 the amount necessary to carry out the program or project pursuant to such application.

[(b)] *(d)* Payments under this [title] *section* may be made in installments and in advance or by way of reimbursement, with necessary adjustments on account of overpayments or underpayments.

(e) payments shall be made under this title to any local educational agency or to any State unless the Commissioner finds, in the case of a local educational agency, that the combined fiscal effort of that agency and the State with respect to the provision of free public education by that agency for the preceding fiscal year was not less than such combined fiscal effort for that purpose for the second preceding fiscal year or, in the case of a State, that the fiscal effort of that State for State aid (as defined by regulation) with respect to the provision of free public education in the State for the preceding fiscal year was not less than such fiscal effort for State aid for the second preceding fiscal year.

[ADVISORY COMMITTEE

[Sec. 306. (a) The Commissioner shall establish in the Office of Education an Advisory Committee on Supplementary Educational Centers and Services, consisting of the Commissioner, who shall be Chairman, and eight members appointed, without regard to the civil service laws, by the Commissioner with the approval of the Secretary.

[(b) The Advisory Committee shall advise the Commissioner (1) on the action to be taken with regard to each application for a grant under this title, and (2) in the preparation of general regulations and with respect to policy matters arising in the administration of this title, including the development of criteria for approval of applications thereunder. The Commissioner may appoint such special advisory and technical experts and consultants as may be useful in carrying out the functions of the Advisory Committee.

[(c) Members of the Advisory Committee shall, while serving on the business of the Advisory Committee, be entitled to receive compensation at rates fixed by the Secretary, but not exceeding $100 per day, including travel time; and, while so serving away from their homes or regular places of business, they may be allowed travel expenses, including per diem in lieu of subsistence, as authorized by section 5 of the Administrative Expenses Act of 1946 (5 U.S.C. 73b–2) for persons in the Government service employed intermittently.]

RECOVERY OF PAYMENTS

Sec. [307] *308.* If within twenty years after completion of any construction for which Federal funds have been paid under this title—

(a) the owner of the facility shall cease to be a State or local educational agency, or

(b) the facility shall cease to be used for the educational and related purposes for which it was constructed, unless the Commissioner determines in accordance with regulations that there is good cause for releasing the applicant or other owner from the obligation to do so.

the United States shall be entitled to recover from the applicant or other owner of the facility an amount which bears to the then value of the facility (or so much thereof as constituted an approved project or projects) the same ratio as the amount of such Federal funds bore to the cost of the facility financed with the aid of such funds. Such value shall be determined by agreement of the parties or by action brought in the United States district court for the district in which the facility is situated.

National Advisory Council

Sec. 309. (a) The President shall, by January 31, 1968, appoint a National Advisory Council on Supplementary Centers and Services which shall—

(1) advise the Commissioner in the preparation of general regulations;

(2) review the administration and operation of this title, including its effectiveness in meeting the purposes set forth in section 303;

(3) review each State plan and application submitted to the Commissioner pursuant to sections 305 and 306, and make recommendations to the Commissioner with respect to the action to be taken on such plan or application;

(4) set forth procedures for the submission of reports by State advisory councils to the National Advisory Council;

(5) review, evaluate, and transmit the reports of State advisory councils to the Congress, the President, and the Secretary;

(6) evaluate programs and projects carried out under this title and disseminate the results thereof; and

(7) make recommendations for the improvement of this title, and its administration and operation.

(b) The Council shall be appointed by the President without regard to the civil service laws and shall consist of twelve members, a majority of whom shall be broadly representative of the educational and cultural resources of the United States including at least one person who has professional competence in the area of education of handicapped children. Such members shall be appointed for terms of three years except that (1) in the case of the initial members, four shall be appointed for terms of one year each and four shall be appointed for terms of two years each, and (2) appointments to fill the unexpired portion of any term shall be for such portion only. The Secretary shall make available to the Council such technical, professional, secretarial, clerical, and other assistance and such pertinent data prepared by the Department of Health, Education, and Welfare as it may require to carry out its functions.

(c) The Council shall make an annual report of its findings and recommendations (including recommendations for changes in the provisions of this title) to the President and the Congress not later than January 20 of each year. The President is requested to transmit to the Congress such comments and recommendations as he may have with respect to such report.

(d) Members of the Council who are not regular full-time employees of the United States shall, while serving on business of the Council, be entitled to receive compensation at rates fixed by the President, but not exceeding $100 per day, including traveltime; and while so serving away from their homes or regular places of business, they may be allowed travel expenses, including per diem in lieu of subsistence, as authorized by section 5703 of title 5, United States Code, for persons in Government service employed intermittently.

(e) The Council is authorized to appoint without regard to the provisions of title 5, United States Code, covering appointment in the competitive service, and fix the compensation of, without regard to chapter 51 and subchapter III of chapter 53 of such title, such professional and technical personnel as may be necessary to enable it to carry out its duties.

LABOR STANDARDS

Sec. [308] *310.* All laborers and mechanics employed by contractors or subcontractors on all construction projects assisted under this title shall be paid wages at rates not less than those prevailing on similar construction in the locality as determined by the Secretary of Labor in accordance with the Davis-Bacon Act, as amended (40 U.S.C. 276a—276a–5). The Secretary of Labor shall have with respect to the labor standards specified in this section the authority and functions set forth in the Reorganization Plan Numbered 14 of 1950 (15 F.R. 3176); and section 2 of the Act of June 13, 1934, as amended (40 U.S.C. 276c).

* * * * *

Title V—Grants to Strengthen State Departments of Education *and for Statewide Educational Planning*

Part A—Grants for Strengthening Leadership Resources of State Educational Agencies

APPROPRIATIONS AUTHORIZED

Sec. 501. (a) The Commissioner shall carry out [during the fiscal year ending June 30, 1966, and each of the four succeeding fiscal years,] a program for making grants to stimulate and assist States in strengthening the leadership resources of their State educational agencies, and to assist those agencies in the establishment and improvement of programs to identify and meet the educational needs of States.

(b) For the purpose of making grants under this [title] *part*, there is hereby authorized to be appropriated the sum of $25,000,000 for the fiscal year ending June 30, 1966, $30,000,000 for the fiscal year ending June 30, 1967, [and $50,000,000 for the fiscal year ending June 30, 1968] *$65,000,000 for the fiscal year ending June 30, 1968, and $80,000,000 each for the fiscal years ending June 30, 1969, and June 30, 1970; and $85,000,000 for the fiscal year ending June 30, 1971,*.

APPORTIONMENT AMONG STATES

SEC. 502. (a) (1) From [85] *95* per centum of the sums appropriated for carrying out this [title] *part* for each fiscal year, the Commissioner shall reserve such amount, but not in excess of 2 per centum of such [85] *95* per centum of such sums, as he may determine and shall apportion such amount among the Commonwealth of Puerto Rico, Guam, American Samoa [and] the Virgin Islands *and the Trust Territory of the Pacific Islands* according to their respective needs for assistance under this title. [From the remainder of such 85 per centum of such sums the Commissioner shall apportion $100,000 to each State, and shall apportion to each State such part of the remainder of such 85 per centum of such sums as the number of public school pupils in the State bears to the number of public school pupils in all the States, as determined by the Commissioner on the basis of the most recent satisfactory data available to him.] *The remainder of such per centum of such sums shall be apportioned by the Commissioner as follows;*

(A) He shall apportion 40 per centum of such remainder among the States in equal amounts.

(B) He shall apportion to each State an amount that bears the same ratio to 60 per centum of such remainder as the number of public school pupils in the State bears to the number of public school pupils in all the States, as determined by the Commissioner on the basis of the most recent satisfactory data available to him.

For purposes of this paragraph, the term "State" does not include the Commonwealth of Puerto Rico, Guam, American Samoa, [and] the Virgin Islands, *and the Trust Territory of the Pacific Islands*.

(2) [Fifteen] *Five* per centum of the sums appropriated pursuant to section 501 for each fiscal year shall be reserved by the Commissioner for grants for special projects pursuant to section 505.

(b)(1) The amount apportioned to any State under paragraph (1) of subsection (a) for any fiscal year which the Commissioner determines will not be required for that year shall be available for reapportionment from time to time, on such dates during that year as the Commissioner may fix, to other States in proportion to the amounts originally apportioned among those States under subsection (a)(1) for that year, but with the proportionate amount for any of the other States being reduced to the extent it exceeds the sum the Commissioner estimates that State needs and will be able to use for that year; and the total of these reductions shall be similarly reapportioned among the States whose proportionate amounts were not so reduced. Any amount reapportioned to a State under this subsection from funds appropriated pursuant to section 501 for any fiscal year shall be deemed part of the amount apportioned to it under subsection (a)(1) for that year.

(2) In accordance with regulations of the Commissioner any State may file with him a request that a specified portion of the amount apportioned to it under subsection (a)(1) be added to the amount apportioned to another State under that subsection for the purpose of meeting a portion of the cost of carrying out one or more programs or activities under an approved application of that other State. If the Commissioner finds that the programs or activities with respect to which the request is made would meet needs of the State making the request and that use of the specified portion of the amount apportioned to that State, as requested by it, would assist in carrying out the purposes of this [title] *part*, that portion shall be added to the amount apportioned to the other State under subsection (a)(1) to be used for the purpose referred to above.

GRANTS FROM APPORTIONED FUNDS

SEC. 503. From the amount apportioned to any State for any fiscal year under section 502 the Commissioner may, upon approval of an application or applications therefor submitted to him by such State through the State educational agency, make a grant or grants to such agency equal to the expenditures incurred by such agency for the planning of, and for programs for, the development, improvement, or expansion of activities promoting the purposes set forth in section 501(a) and more particularly described in such application and for which such application is approved, such as—

(1) educational planning on a statewide basis, including the identification of educational problems, issues, and needs in the State and the evaluation on a periodic or continuing basis of education programs in the State;

(2) providing support or services for the comprehensive and compatible recording, collecting, processing, analyzing, interpreting, storing, retrieving, and reporting of State and local educational data, including the use of automated data systems;

(3) dissemination or support for the dissemination of information relating to the condition, progress, and needs of education in the State;

(4) programs for conducting, sponsoring, or cooperating in educational research and demonstration programs and projects such as (A) establishing and maintaining curriculum research and innovation centers to assist in locating and evaluating curriculum research findings, (B) discovering and testing new educational ideas (including new uses of printed and audio-visual media) and more effective educational practices, and putting into use those which show promise of success, and (C) studying ways to improve the legal and organizational structure for education, and the management and administration of education in the State;

(5) publication and distribution, or support for the publication and distribution, of curricular materials collected and developed at curriculum research centers and elsewhere;

(6) programs to improve the quality of teacher preparation, including student-teaching arrangements, in cooperation with institutions of higher education and local educational agencies;

(7) Programs and other activities specifically designed to encourage the full and adequate utilization and acceptance of auxiliary personnel (such as teacher aides) in elementary and secondary schools on a permanent basis;

[7] *(8)* studies or support for studies concerning the financing of public education in the State;

[8] *(9)* support for statewide programs designed to measure the educational achievement of pupils;

[9] *(10)* training and otherwise developing the competency of individuals who serve State or local educational agencies and provide leadership, administrative, or specialist services throughout the State, or throughout the area served by a local educational agency, through the initiation, improvement, and expansion of activities such as (A) sabbatical leave programs, (B) fellowships and traineeships (including educational expenses and the cost of travel) for State educational agency personnel to pursue graduate studies, and (C) conducting institutes, workshops, and conferences (including related costs of operation and payment of the expenses of participants);

[(10)] *11* providing local educational agencies and the schools of those agencies with consultative and technical assistance and services relating to academic subjects and to particular aspects of education such as the education of the handicapped, school building design and utilization, school social work, the utilization of modern instructional materials and equipment, transportation, educational administrative procedures, and school health, physical education, and recreation; [and]

[(11)] *(12)* evaluation and demonstration projects to insure that benefits obtained by children in Headstart and other pre-school programs are not lost during their early elementary school years, but are instead enhanced so as to provide continuity in and accelerated development of the child's learning, academic and other social achievements[.];

(13) programs for providing grants to local educational agencies in metropolitan areas to enable them to engage in comprehensive planning to meet their particular needs, either alone or in cooperation with other such agencies; and

(14) a program, which shall be included in each such overall program for each fiscal year pursuant to this section, for distributing in the State in an equitable manner on the basis of need among local educational agencies, within the State at least 10 per centum of such amount to be used by such agencies, for any of the purposes of this part as applied to a local educational agency in lieu of a State educational agency.

APPROVAL OF APPLICATIONS FOR GRANTS FROM APPORTIONED FUNDS

SEC. 504. An application for a grant under section 503 may be approved by the Commissioner only upon his determination that—

(a) each of the proposed projects, programs, and activities for which it is approved meets the requirements of section 503 and will make a significant contribution to strengthening the leadership resources of the applicant or its ability to participate effectively in meeting the educational needs of the State;

(b) the application contains or is supported by adequate assurance that Federal funds made available under the approved application will be so used as to supplement, and to the extent practical, increase the amounts of State funds that would in the absence of such Federal funds be made available for projects and activities which meet the requirements of section 503;

(c) the application sets forth such fiscal control and fund accounting procedures as may be necessary to assure proper disbursement of, and accounting for, Federal funds paid to the State (including any such funds paid by the State to agencies, institutions, or organizations) under this [title] *part*; and

(d) the application provides for making such reports, in such form and containing such information, as the Commissioner may require to carry out his functions under this title, and for keeping such records and for affording such access thereto as the Commissioner may find necessary to assure the correctness and verification of such reports.

SPECIAL PROJECT GRANTS

SEC. 505. [Fifteen] *Five* per centum of the sums appropriated pursuant to section 501 for each fiscal year shall be used by the Commissioner to make grants to State educational agencies to pay part of the cost of experimental projects for developing State leadership or for the establishment of special services which, in the judgment of the Commissioner, hold promise of making a substantial contribution to the solution of problems common to the State educational agencies of all or several States[.] , *and for grants to public regional interstate commissions or agencies for educational planning and research.*

PAYMENTS

SEC. 506. Payments pursuant to grants under this [title] *part* may be made in installments, and in advance or by way of reimbursement, with necessary adjustments on account of overpayments or underpayments, as the Commissioner may determine.

* * * * *

ADMINISTRATION OF STATE PLANS

SEC. 508. (a) The Commissioner shall not finally disapprove any application submitted under section 504, or any modification thereof, without first affording the State educational agency submitting the application reasonable notice and opportunity for a hearing.

(b) Whenever the Commissioner, after reasonable notice and opportunity for hearing to the State educational agency administering a program under an application approved under this [title] *part,* finds—

(1) that the application has been so changed that it no longer complies with the provisions of section 504(a), or

(2) that in the administration of the plan there is a failure to comply substantially with any such provision,

the Commissioner shall notify such State educational agency that the State shall not be regarded as eligible to participate in the program under this [title] *part* until he is satisfied that there is no longer any such failure to comply.

* * * * *

PERIODIC REVIEW OF PROGRAM AND LAWS

SEC. 510. (a) The Secretary shall, within ninety days after the date of enactment of this title, appoint an Advisory Council on State Departments of Education for the purpose of reviewing the administration of the programs for which funds are appropriated pursuant to this [title] *part* and making recommendations for improvement of such administration, and reviewing the status of and making recommendations with respect to such programs and this [title] *part* and with respect to other Acts under which funds are appropriated to assist State educational agencies to administer Federal programs relating to education.

(b) The Council shall be appointed by the Secretary without regard to the civil service laws and shall consist of twelve persons who shall, to the extent possible, include persons familiar with the educational needs of the Nation, persons familiar with the administration of State and local educational programs, and persons representative of the general public.

(c) The Secretary is authorized to engage such technical assistance as may be required to carry out the functions of the Council, and the Secretary shall, in addition, make available to the Council such secretarial, clerical, and other assistance and such pertinent data prepared by the Department of Health, Education, and Welfare as it may require to carry out such functions.

(d) The Council shall make an annual report of its findings and recommendations (including recommendations for changes in the provisions of this [title] *part* and of other education Acts) to the Secretary not later than March 31 of each calendar year beginning after the enactment of this [title] *part.* The Secretary shall transmit each such report to the President and the Congress together with his comments and recommendations.

(e) Members of the Council who are not regular full-time employees of the United States shall, while serving on business of the Council, be entitled to receive compensation at rates fixed by the Secretary, but not exceeding $100 per day, including travel time; and while so serving away from their homes or regular places of business, they may be allowed travel expenses, including per diem in lieu of subsistence, as authorized by section 5 of the Administrative Expenses Act of 1946 (5 U.S.C. 73b–2) for persons in Government service employed intermittently.

Part B—Grants for Comprehensive Educational Planning and Evaluation

Authorization

Sec. 521. To the end of enhancing the capability of the several States to make effective progress, through comprehensive and continuing planning, toward the achievement of opportunities for high-quality education for all segments of the population throughout the State, the Commissioner is authorized to make, in accordance with the provisions of this part, comprehensive planning and evaluation grants to States that have submitted, and had approved by the Commissioner, an application pursuant to section 523, and special project grants, related to the purposes of this part, pursuant to section 524. For the purpose of making such grants, there are authorized to be appropriated $15,000,000 for the fiscal year ending June 30, 1968, $20,000,000 for the fiscal year ending June 30, 1969, and for each of the two succeeding fiscal years.

Apportionment among the States

Sec. 522. (a) (1) From the sums appropriated for carrying out this part for each fiscal year, 25 per centum shall be reserved for the purposes of section 524 and the remaining 75 per centum shall be available for grants to States under section 523.

(2) The Commissioner shall apportion not in excess of 2 per centum of the amount available for grants under section 523 among the Commonwealth of Puerto Rico, Guam, American Samoa, the Virgin Islands, and the Trust Territory of the Pacific Islands, according to their respective needs for carrying out the purposes of this part. The remainder of such amount shall be apportioned by the Commissioner as follows:

(A) He shall apportion 40 per centum of such remainder among the States in equal amounts.

(B) He shall apportion to each State an amount that bears the same ratio to 60 per centum of such remainder as the population of the State bears to the population of all the States, as determined by the Commissioner on the basis of the most recent satisfactory data available to him.

For purposes of the preceding sentence, the term "State" does not include the Commonwealth of Puerto Rico, Guam, American Samoa, the Virgin Islands, and the Trust Territory of the Pacific Islands.

(b) The amount apportioned under this section to any State for the fiscal year ending June 30, 1968, shall be available for obligation for grants pursuant to applications approved during that year and the succeeding fiscal year.

(c) The amount of any State's apportionment for any fiscal year under paragraph (2) of subsection (a) which the Commissioner determines will not be required for grants to that State under section 523 during the period for which such apportionment is available may from time to time be reapportioned by the Commissioner to other States, according to their respective needs, as the Commissioner may determine. Any amount so reapportioned to a State from funds appropriated for any fiscal year shall be deemed to be a part of the amount apportioned to it under subsection (a) for that year.

Comprehensive planning grants

Sec. 523. (a) (1) Any State desiring to receive a grant or grants under this section from its apportionment under section 522 for any fiscal year shall designate or establish a single State agency or office (hereafter in this part referred to as the State educational planning agency) as the sole agency for carrying out or supervising the carrying out of a comprehensive statewide program of systematic planning and evaluation relating to education at all levels (including remedial education and retraining of adults), except that—

(A) the field of higher education shall be included only if the State so elects and so provides in an application (or amended or supplemental application) under this section, and

(B) in the event of such election the State may designate or establish a separate State agency (hereafter in this part referred to as the State higher education planning agency) for carrying out or supervising the carrying out of such planning and evaluation program with respect to higher education.

(2) A grant to a State may be made under this section only upon approval of an application submitted to the Commissioner through the State educational planning agency, except that, with respect to States electing to include the field of higher education as provided in clause (A) of paragraph (1) of this subsection and designating or establishing a State higher education planning agency as provided in clause (B) of paragraph (1), the Commissioner, by or pursuant to regulation—

(A) shall authorize the submission of a combined application which includes higher education (or an amended or supplemental application filed upon the making of such election) jointly through both of the State's planning agencies involved, or the submission of a separate application (or supplement) through the State's higher education planning agency as to so much of the State's program as relates to planning and evaluation in the field of higher education, and

(B) may provide for allocating, between the State's two planning agencies, the amount of any grant or grants under this section from the State's apportionment.

(3) An application (or amendment or supplement thereto) under this section shall set forth, in such detail as the Commissioner deems necessary, the statewide program referred to in paragraph (1) (or, in the case of a separate application or amendments or supplement with respect to the field of higher education, so much of the statewide program as relates to that field), which shall include provision for—

(A) setting statewide educational goals and establishing priorities among these goals;

(B) developing through analyses alternatives means of achieving these goals, taking into account the resources available and the educational effectiveness of each of the alternatives (including, in the case of higher education, the resources and plans of private institutions in the State bearing upon the State's goals and plans for public higher education);

(C) planning new programs and improvements in existing programs based on the results of these analyses;

(D) developing and strengthening the capabilities of the State to conduct, on a continuous basis, objective evaluations of the effectiveness of educational programs; and

(E) developing and maintaining a permanent system for obtaining and collating significant information necessary to the assessment of progress toward the State's educational goals.

(b) Applications (including amendments and supplements thereto) for grants under this section may be approved by the Commissioner only if the application—

(1) has been submitted to the chief executive of the State for review and recommendations;

(2) sets forth, if the State has elected to include the field of higher education and has designated or established a separate State higher education planning agency, such arrangements for coordination, between the

State's educational planning program in that field and the remaining educational planning program submitted by the State, as will in the Commissioner's judgment be effective;

(3) contains satisfactory assurance—

(A) that the assistance provided under this section, together with other available resources, will be so used for the several purposes specified in subparagraphs (A) through (E) of paragraph (3) of subsection (a) of this section as to result in the maximum possible effective progress toward the achievement of a high level of competence with respect to each of them, and

(B) that assistance under this part will, by the State planning agency involved, be used primarily in strengthening the capabilities of its own planning and evaluation staff or, to the extent that the program is to be carried out under the supervision of that agency by other agencies, the planning and evaluation staffs of such other agencies; but consistently with this objective part of the funds received under a grant under this section may be used, in appropriate circumstances, to employ consultants, or to enter into contracts for special projects with public or private agencies, institutions, or organizations having special competence in the areas of planning or evaluation;

(4) makes adequate provision (consistent with such criteria as the Commissioner may prescribe) for using funds granted to the applicant under this section, other than funds granted for planning and evaluation in the field of higher education, (A) to make program planning and evaluation services available to local educational agencies, and (B) in the case of such agencies in areas (particularly metropolitan areas) with school populations sufficiently large to warrant their own planning or evaluation staffs, to assist such agencies (financially or through technical assistance, or both) to strengthen their planning and evaluation capabilities and to promote coordinated areawide planning for such areas;

(5) provides for such methods of administration as are necessary for the proper and efficient operation of the program;

(6) provides for such fiscal control and fund accounting procedures as may be necessary to assure proper disbursement of an accounting for Federal funds paid under this part to the State (including any such funds paid by the State to agencies, institutions, or organizations referred to in paragraph (4)(B) or paragraph (3) of this subsection); and

(7) provides for making such reports, in such form and containing such information as the Commissioner may reasonably require (copies of which shall also be sent to the chief executive of the State), and for keeping such records and for affording such access thereto as the Commissioner may find necessary to assure the correctness and verification of such reports.

(c) A grant made pursuant to an approval of an application under this section may be used to pay all or part of the cost of activities covered by the approved application and included in such grant, but excluding so much, if any, of such cost as is paid for from grants under part A.

Special projects

Sec. 524. (a) The sums reserved pursuant to section 522(a)(1) for the purposes of this section shall be used for grants for special projects in accordance with subsection (b) of this section.

(b) The Commissioner is authorized to make grants to public or private nonprofit agencies, instititituons, or organizations, or to make contracts with public or private agencies, institutions, or organizations, for special projects related to the purposes of this part, to be conducted on an interstate, regional, or metropolitan area basis, including projects for such purposes as—

(1) metropolitan planning in education in areas covering more than one State;

(2) improvement and expansion in the educational planning of large cities within a State with due regard to the complexities of adequate metropolitan planning in such places;

(3) comparative and cooperative studies agreed upon between States or metropolitan areas;

(4) conferences to promote the purposes of this part and involving different States;

(5) publications of general use to the planning of more effective and efficient educational services, and other activities for dissemination of information related to the purposes of this part.

Payments

Sec. 525. Payments under this part may be made in installments and in advance or by way of reimbursement, with necessary adjustments on account of overpayments or underpayments, as the Commissioner may determine.

TITLE VI—EDUCATION OF HANDICAPPED CHILDREN

Part A—Assistance to States for Education of Handicapped Children

[APPROPRIATIONS AUTHORIZED]

Grants to States for Education of Handicapped Children

SEC. 601. [(a)] The Commissioner is authorized to make grants pursuant to the provisions of this [title] *part* [during the fiscal year ending June 30, 1967, and the succeeding fiscal year,] for the purpose of assisting the States in the initiation, expansion, and improvement of programs and projects (including the acquisition of equipment and where necessary the construction of school facilities) for the education of handicapped children (as defined in section 602) at the preschool, elementary and secondary school levels.

Appropriations authorized

[(b)] *Sec. 602.* For the purpose of making grants under this [title] *part* there is authorized to be appropriated $50,000,000 for the fiscal year ending June 30, 1967, [and] $150,000,000 for the fiscal year ending June 30, 1968, *$175,000,000 for the fiscal year ending June 30, 1969, $200,000,000 for the fiscal year ending June 30, 1970, and $225,000,000 for the fiscal year ending June 30, 1971.*

[DEFINITION OF "HANDICAPPED CHILDREN"]

[SEC. 602. As used in this title, the term "handicapped children" includes mentally retarded, hard of hearing, deaf, speech impaired, visually handicapped, seriously emotionally disturbed, crippled, or other health impaired children who by reason thereof require special education and related services.] [2]

ALLOTMENT OF FUNDS

SEC. 603. (a)(1) There is hereby authorized to be appropriated for each fiscal year for the purposes of this paragraph an amount equal to not more than 3 per centum of the amount appropriated for such year for payments to States under section 601(b). [The Commissioner shall allot the amount appropriated pursuant to this paragraph among Puerto Rico, Guam, American Samoa, the Virgin Islands, and the Trust Territory of the Pacific Island according to their respective need for assistance under this title.] *The Commissioner shall allot the amount appropriated pursuant to this paragraph among—*

(A) Puerto Rico, Guam, American Samoa, the Virgin Islands, and the Trust Territory of the Pacific Islands according to their respective needs, and

(B) for the fiscal year ending June 30, 1968, and the succeeding fiscal year, (i) the Secretary of the Interior according to the need for such assistance for the education of handicapped children on reservations serviced by elementary and secondary schools operated for Indian children by the Department of the Interior, and (ii) the Secretary of Defense according to the need for such assistance for the education of handicapped children in the overseas dependents schools of the Department of Defense. The terms upon which payments for such purpose shall be made to the Secretary of the Interior and the Secretary of Defense shall be determined pursuant to such criteria as the Commissioner determines will best carry out the purposes of this part.

(2) From the total amount appropriated pursuant to section 601(b) for any fiscal year the Commissioner shall allot to each State an amount which bears the same ratio to such amount as the number of children aged three to twenty-one, inclusive, in the State bears to the number of such children in all the States, *except that no State shall be allotted less than $100,000 or three-tenths of 1 per centum of such amount available for allotment to the States, whichever is greater*. For purposes of this subsection, the term "State" shall not include the Commonwealth of Puerto Rico, Guam, American Samoa, the Virgin Islands, or the Trust Territory of the Pacific Islands.

(b) The number of children aged three to twenty-one, inclusive, in any State and in all the States shall be determined, for purposes of this section, by the Commissioner on the basis of the most recent satisfactory data available to him.

(c) The amount of any State's allotment under subsection (a) for any fiscal year which the Commissioner determines will not be required for that year shall be available for reallotment, from time to time and on such dates during such year as the Commissioner may fix, to other States in proportion to the original allotments to such States under subsection (a) for that year, but with such proportionate amount for any of such other States being reduced to the extent it exceeds the sum the Commissioner estimates such State needs and will be able to use for such year; and the total of such reductions shall be similarly reallotted among the States whose proportionate amounts were not so reduced. Any amount reallotted to a State under this subsection during year shall be deemed part of its allotment under subsection (a) for that year.

STATE PLANS

SEC. 604. Any State which desires to receive grants under this [title] *part* shall submit to the Commissioner through its State educational agency a State plan in such detail as the Commissioner deems necessary. The Commissioner shall not approve a State plan or a modification of a State plan under this [title] *part* unless the plan meets the following requirements:

(a) The plan must provide satisfactory assurance that funds paid to the State under this [title] *part* will be expended, either directly or through local educational agencies, solely to initiate, expand, or improve programs and projects, including preschool programs and projects, (A) which are designed to meet the special educational and related needs of handicapped children throughout the State, (B) which are of sufficient size, scope, and quality (taking into consideration the special educational needs of such children) as to give reasonable promise of substantial progress toward meeting those needs, and (C) which may include the acquisition of equipment and where necessary the construction of school facilities. Nothing in this [title] *part* shall be deemed to preclude two or more local educational agencies from entering into agreements, at their option, for carrying out jointly operated programs and projects under this [title] *part*.

---

[2] Section 602 is deleted at this point and transferred to end of title, redesignated as section 614.

The plan may provide up to 5 per centum of the amount allotted to the State for any fiscal year or $75,000 ($25,000 in the case of the Commonwealth of Puerto Rico, Guam, American Samoa, the Virgin Islands, and the Trust Territory of the Pacific Islands), whichever is greater, may be expended for the proper and efficient administration of the State plan (including State leadership activities and consultative services), and for planning on the State and local level.

(b) The plan must provide satisfactory assurance that, to the extent consistent with the number and location of handicapped children in the State who are enrolled in private elementary and secondary schools, provision will be made for participation of such children in programs assisted or carried out under this [title] *part*.

(c) The plan must provide satisfactory assurance that the control of funds provided under this [title] *part*, and title to property derived therefrom, shall be in a public agency for the uses and purposes provided in this [title] *part*, and that a public agency will administer such funds and property.

(d) The plan must set forth policies and procedures which provide satisfactory assurance that Federal funds made available under this [title] *part* will be so used as to supplement and, to the extent practical, increase the level of State, local, and private funds expended for the education of handicapped children, and in no case supplant such State, local, and private funds.

(e) The plan must provide that effective procedures, including provision for appropriate objective measurements of educational achievement, will be adopted for evaluating at least annually the effectiveness of the programs in meeting the special educational needs of, and providing related services for, handicapped children.

(f) The plan must provide that the State educational agency will be the sole agency for administering or supervising the administration of the plan.

(g) The plan must provide for making such reports, in such form and containing such information, as the Commissioner may reasonably require to carry out his functions under this [title] *part*, including reports of the objective measurements required by paragraph (e) of this subsection; and the plan must also provide for keeping such records and for affording such access thereto as the Commissioner may find necessary to assure the correctness and verification of such reports.

(h) The plan must provide satisfactory assurance that such fiscal control and fund-accounting procedures will be adopted as may be necessary to assure proper disbursement of, and accounting for, Federal funds paid under this [title] *part* to the State, including any such funds paid by the State to local educational agencies.

(i) The plan must provide satisfactory assurance that funds paid to the State under this [title] *part* shall not be made available to any school for handicapped children eligible for assistance under section [203] *103* (a)(5) of title II of Public Law 874, Eighty-first Congress.

(j) The plan must provide satisfactory assurance, in the case of any project for construction of school facilities, that the project is not inconsistent with overall State plans for the construction of school facilities and that the requirements of section 610 will be complied with on all such construction projects.

(k) The plan must provide satisfactory assurance that effective procedures will be adopted for acquiring and disseminating to teachers and administrators of handicapped children significant information derived from educational research, demonstration, and similar projects, and for adopting, where appropriate, promising educational practices developed through such projects.

PAYMENTS

SEC. 605. From the amounts allotted to each State under section 603, the Commissioner shall pay to that State an amount equal to the amount expended by the State in carrying out its State plan. These payments may be made in installments, and in advance or by way of reimbursement, with necessary adjustments on account of overpayments or underpayments.

ADMINISTRATION OF STATE PLANS

SEC. 606. (a) The Commissioner shall not finally disapprove any State plan submitted under this [title] *part*, or any modification thereof, without first affording the State agency administering the plan reasonable notice and opportunity for a hearing.

(b) Whenever the Commissioner, after reasonable notice and opportunity for hearing to such State agency, finds—

(1) that the State plan has been so changed that it no longer complies with the provisions of section 604, or

(2) that in the administration of the plan there is a failure to comply substantially with any such provisions,

the Commissioner shall notify such State agency that the State will not be regarded as eligible to participate in the program under this [title] *part* until he is satisfied that there is no longer any such failure to comply.

JUDICIAL REVIEW

SEC. 607. (a) If any State is dissatisfied with the Commissioner's final action with respect to the approval of its State plan submitted under section 604 or with his final action under section 606(b), such State may, within sixty days after notice of such action, file with the United States court of appeals for the circuit in which such State is located a petition for review of that action. A copy of the petition shall be forthwith transmitted by the clerk of the court to the Commissioner. The Commissioner thereupon shall file in the court the record of the proceedings on which he based his action, as provided in section 2112 of title 28, United States Code.

(b) The findings of fact by the Commissioner, if supported by substantial evidence, shall be conclusive; but the court, for good cause shown, may remand the case to the Commissioner to take further evidence, and the Commissioner may thereupon make new or modified findings of fact and may modify his previous action, and shall certify to the court the record of the further proceedings. Such new or modified findings of fact shall likewise be conclusive if supported by substantial evidence.

(c) The court shall have jurisdiction to affirm the action of the Commissioner or to set it aside, in whole or in part. The judgment of the court shall be subject to review by the Supreme Court of the United States upon certiorari or certification as provided in section 1254 to title 28, United States Code.

Part B—Regional Resource Centers for Improvement of the Education of Handicapped Children

Regional resource centers

Sec. 608. (a) for the purpose of aiding in the establishment and operation of regional centers which will develop and apply the best methods of appraising the special educational needs of handicapped children referred to them and will provide other services to assist in meeting such needs, there are authorized to be appropriated $7,500,000 for the fiscal year ending June 30, 1968, $8,000,000 for the fiscal year ending June 30, 1969, $10,000,000 for the fiscal year ending June 30, 1970, and $12,000,000 for the fiscal year ending June 30, 1971.

(b) *Appropriations under this section shall be available to the Commissioner for grants to or contracts with institutions of higher education, State educational agencies, local educational agencies, or combinations of such agencies or institutions, within particular regions of the United States, to pay all or part of the cost of establishment (including construction) or operation of regional resource centers for the improvement of education of the handicapped in such regions. Centers established or operated under this section shall (1) provide testing and educational evaluation to determine the special educational needs of handicapped children referred to such centers, (2) develop educational programs to meet those needs, and (3) assist schools and other appropriate agencies, organizations, and institutions in providing such educational programs through services such as consultation (including in appropriate cases, consultation with parents or teachers of handicapped children at such regional centers), periodic reexamination and reevaluation of special educational programs, and other technical services.*

(c) In determining whether to approve an application for a project under this section, the Commissioner shall consider the need for such a center in the region to be served by the applicant and the capability of the applicant to develop and apply, with the assistance of funds under this section, new methods, techniques, devices, or facilities relating to educational evaluation or education of handicapped children.

(d) Payment pursuant to grants or contracts under this section may be made (after necessary adjustments on account of previously made underpayments or overpayments) in advance or by reimbursement, and in such installments and on such conditions as the Commissioner may determine.

Part C—Centers and Services for Deaf-Blind Children

Sec. 609. (a) It is the purpose of this part to provide, through a limited number of model centers for deaf-blind children, a program designed to develop and bring to bear upon such children, beginning as early as feasible in life, those specialized, intensive professional and allied services, methods, and aids that are found to be most effective to enable them to achieve their full potential for communication with and adjustment to the world around them, for useful and meaningful participation in society, and for self-fulfillment.

(b) The Secretary is authorized, upon such terms and conditions (subject to the provisions of subsection (d)(1) of this section) as he deems appropriate to carry out the purposes of this part, to make grants to or contracts with public or nonprofit private agencies, organizations, or institutions to pay all or part of the cost of establishment (including, when necessary, construction) or operation, or both, of centers for deaf-blind children.

(c) In determining whether to make a grant or contract under subsection (b), the Secretary shall take into consideration the need for a center for deaf-blind children in the light of the general availability and quality of existing services for such children in the part of the country involved.

(d)(1) A grant or contract pursuant to subsection (b) shall be made only if the Secretary determines that there is satisfactory assurance that the center will provide such services as he has by regulation prescribed, including at least—

(A) comprehensive diagnostic and evaluative services for deaf-blind children;

(B) a program for the adjustment, orientation, and education of deaf-blind children which integrates all the professional and allied services necessary therefor; and

(C) effective consultative services for parents, teachers, and others who play a direct role in the lives of deaf-blind children to enable them to understand the special problems of such children and to assist in the special problems of such children and to

assist in the process of their adjustment, orientation, and education.

(2) Any such services may be provided to deaf-blind children (and, where applicable, other persons) regardless of whether they reside in the center, may be provided at some place other than the center, and may include the provision of transportation for any such children (including an attendant) and for parents.

(e) The Secretary is further authorized, either as part of any grant or contract under subsection (b), or by separate grant to or contract with an agency, organization, or institution operating a center meeting the requirements prescribed by or pursuant to subsection (d), to provide for the payment of all or part of the cost of such activities as—

(1) research to identify and meet the full range of special needs of deaf-blind children;

(2) development or demonstration of new, or improvements in existing, methods, approaches, or techniques which would contribute to the adjustment and education of deaf-blind children;

(3) training (either directly or otherwise) of professional and allied personnel engaged or preparing to engage in programs specifically designed for deaf-blind children, including payment of stipends for trainees and allowances for travel and other expenses for them and their dependents; and

(4) dissemination of materials and information about practices found effective in working with deaf-blind children.

(f) For purposes of this part, the term "construction" includes, in addition to those matters set forth in section 701(b), construction of residential facilities; and the cost of construction shall be deemed to include the cost of acquisition of land in connection with any of the foregoing, but not the cost of off-site improvements.

(g) If within twenty years after the completion of any construction (except minor remodeling or alteration) for which funds have been paid pursuant to a grant or contract under this part the facility constructed ceases to be used for the purposes for which it was constructed, the United States, unless the Secretary determines that there is good cause for releasing the recipient of the funds from its obligations, shall be entitled to recover from the applicant or other owner of the facility an amount which bears the same ratio to the then value of the facility as the amount of such Federal funds bore to the cost of the portion of the facility financed with such funds. Such value shall be determined by agreement of the parties or by action brought in the United States district court for the district in which the facility is situated.

(h) For purposes of this part, the determination of children who are both deaf and blind shall be made in accordance with regulations of the Secretary.

(i) Payments pursuant to grants or contracts under this part may be made (after necessary adjustment on account of previously made overpayments or underpayments) in advance or by way of reimbursements and in such installments and on such oonditions as the Secretary may determine.

(j) For the purpose of carrying out this part, there are authorized to be appropriated $1,000,000 for the fiscal year ending June 30, 1968, $3,000,000 for the fiscal year ending June 30, 1969, $7,000,000 for fiscal year ending June 30, 1970, and $9,000,000 for the fiscal year ending June 30, 1971.

Part D—Recruitment of Personnel and Information on Education of the Handicapped

Grants or contracts to improve recruiting of educational personnel, and to improve dissemination of information concerning educational opportunities for the handicapped

Sec. 610. (a) The Commissioner is authorized to make grants to public or nonprofit private agencies, organizations, or institutions, or to enter into contracts with public or private agencies, organizations, or institutions, for projects for—

(1) encouraging students and professional personnel to work in various fields of education of handicapped children and youth through, among other ways, developing and distributing imaginative or innovative materials to assist in recruiting personnel for such careers, or publicizing existing forms of financial aid which might enable students to pursue such careers, or

(2) disseminating information about the programs, services, and resources for the education of handicapped children, or providing referral services, to parents, teachers, and other persons especially interested in the handicapped.

(b) To carry out the purposes of this section, there are authorized to be appropriated $1,000,000 for the fiscal year ending June 30, 1968, and for each of the three succeeding fiscal years.

Part E—General Provisions

NATIONAL ADVISORY COMMITTEE ON HANDICAPPED CHILDREN

SEC. [608] *611*. (a) The Commissioner shall establish in the Office of Education a National Advisory Committee on Handicapped Children, consisting of the Commissioner, who shall be Chairman, and not more than twelve additional members, not less than 50 per centum of whom shall be persons affiliated with educational, training, or research programs for the handicapped, appointed by the Commissioner without regard to the civil service laws.

(b) The Advsory Committee shall review the administration and operation of this Act, title II of Public Law 874, Eighty-first Congress, and other provisions of law administered by the Commissioner, with respect to handicapped children, including their effect in improving the educational attainment of such children, and make recommendations for the improvement of such administration and operation with respect to such children. These recommendations shall take into consideration experience gained under this and other Federal programs for handicapped children and, to the extent appropriate, experience gained under other public and private programs for handicapped children. The Advisory Committee shall from time to time make such recommendations as it may deem appropriate to the Commissioner and shall make an annual report of its findings and recommendations to the Commissioner not later than January 31 of 1968 and each fiscal year thereafter. The Commissioner shall transmit each such report to the Secretary together with his comments and recommendations, and the Secretary shall transmit such report, comments, and recommendations to the Congress together with any comments or recommendations he may have with respect thereto.

(c) Members of the Advisory Committee who are not regular full-time employees of the United States shall, while serving on business of the Committee, be entitled to receive compensation at rates fixed by the Commissioner, but not exceeding $100 per day, including travel time; and while so serving away from their homes or regular places of business, they may be allowed travel expenses, including per diem in lieu of subsistence, as authorized by section 5703 of title 5 of the United States Code for persons in Government service employed intermittently.

(d) The Commissioner may, at the request of the Advisory Committee, appoint such special advisory professional or technical personnel as may be necessary to enable the Advisory Committee to carry out its duties.

BUREAU FOR EDUCATION AND TRAINING OF THE HANDICAPPED

SEC. [609] *612*. The Commissioner shall establish at the earliest practicable date not later than July 1, 1967, and maintain within the Office of Education a bureau for the education and training of the handicapped which shall be the principal agency in the Office of Education for administering and carrying out programs and projects relating to the education and training of the handicapped, including programs and projects for the training of teachers of the handicapped and for research in such education and training.

LABOR STANDARDS

SEC. [610] *613*. All laborers and mechanics employed by contractors or subcontractors on all construction projects assisted under this title shall be paid wages at rates not less than those prevailing on similar construction in the locality as determined by the Secretary of Labor in accordance with the Davis-Bacon Act, as amended (40 U.S.C. 276a–276a–5). The Secretary of Labor shall have with respect to the labor standards specified in this section the authority and functions set forth in Reorganization Plan Numbered 14 of 1950 and section 2 of the Act of June 13, 1934, as amended (40 U.S.C. 276c).

Definition of "Handicapped Children"

Sec. 614. As used in this title, the term "handicapped children" includes mentally retarded, hard of hearing, deaf, speech impaired, visually handicapped, seriously emotionally disturbed, crippled, or other health impaired children who by reason thereof require special education and related services.

Short title

Sec. 615. This title may be cited as the "Education of the Handicapped Act".

TITLE VII—BILINGUAL EDUCATION PROGRAMS

Short title

Sec. 701. This title may be cited as the "Bilingual Education Act".

Declaration of policy

Sec. 702. In recognition of the special educational needs of the large numbers of children of limited English-speaking ability in the United States, Congress hereby declares it to be the policy of the United States to provide financial assistance to local educational agencies to develop and carry out new and imaginative elementary and secondary school programs designed to meet these special educational needs. For the purposes of this title, "children of limited English-speaking ability" means children who come from environments where the dominant language is other than English.

Authorization and distribution of funds

Sec. 703. (a) For the purposes of making grants under this title, there is authorized to be appropriated the sum of $15,000,000 for the fiscal year ending June 30, 1968, $30,000,000 for the fiscal year ending June 30, 1969, and $40,000,000 for the fiscal year ending June 30, 1970, and the succeeding fiscal year.

(2) In determining distribution of funds under this title, the Commissioner shall give highest priority to States and areas within States having the greatest need for programs pursuant to this title. Such priorities shall take into consideration the number of children of limited English-speaking ability between the ages of three and eighteen in each State.

Uses of Federal funds

Sec. 704. Grants under this title may be used, in accordance with applications approved under section 705, for—

(a) planning for and taking other steps leading to the development of programs designed to meet the special educational needs

of children of limited English-speaking ability in schools having a high concentration of such children from families (A) with incomes below $3,000 per year, or (B) receiving payments under a program of aid to families with dependent children under a State plan approved under title IV of the Social Security Act, including research projects, pilot projects designed to test the effectiveness of plans so developed, and the development and dissemination of special instructional materials for use in bilingual education programs; and

(b) providing preservice training designed to prepare persons to participate in bilingual education programs as teachers, teacher-aids, or other ancillary education personnel such as counselors, and inservice training and development programs designed to enable such persons to continue to improve their qualifications while participating in such programs; and

(c) the establishment, maintenance, and operation of programs, including acquisition of necessary teaching materials and equipment, designed to meet the special educational needs of children of limited English-speaking ability in schools having a high concentration of such children from families (A) with incomes below $3,000 per year, or (B) receiving payments under a program of aid to families with dependent children under a State plan approved under title IV of the Social Security Act, through activities such as—

(1) bilingual education programs;

(2) programs designed to impart to students a knowledge of the history and culture associated with their languages;

(3) efforts to establish closer cooperation between the school and the home;

(4) early childhood educational programs related to the purpose of this title and designed to improve the potential for profitable learning activities by children;

(5) adult education programs related to the purposes of this title, particularly for parents of children participating in bilingual programs;

(6) programs designed for dropouts or potential dropouts having need of bilingual programs;

(7) programs conducted by accredited trade, vocational, or technical schools; and

(8) other activities which meet the purposes of this title.

Applications for grants and conditions for approval

Sec. 705. (a) A grant under this title may be made to a local educational agency or agencies, or to an institution of higher education applying jointly with a local educational agency, upon application to the Commissioner at such time or times, in such manner, and containing or accompanied by such information as the Commissioner deems necessary. Such application shall—

(1) provide that the activities and services for which assistance under this title is sought will be administered by or under the supervision of the applicant;

(2) set forth a program for carrying out the purpose set forth in section 704 and provide for such methods of administration as are necessary for the proper and efficient operation of the program;

(3) set forth a program of such size, scope, and design as will make a substantial step toward achieving the purpose of this title;

(4) set forth policies and procedures which assure that Federal funds made available under this title for any fiscal year will be so used as to supplement and, to the extent practical, increase the level of funds that would, in the absence of such Federal funds, be made available by the applicant for the purposes described in section 704, and in no case supplant such funds;

(5) provide for such fiscal control and fund accounting procedures as may be necessary to assure proper disbursement of and accounting for Federal funds paid to the applicant under this title;

(6) provide for making an annual report and such other reports, in such form and containing such information, as the Commissioner may reasonably require to carry out his functions under this title and to determine the extent to which funds provided under this title have been effective in improving the educational opportunities of persons in the area served, and for keeping such records and for affording such access thereto as the Commissioner may find necessary to assure the correctness and verification of such reports;

(7) provide assurance that provision has been made for the participation in the project of those children of limited English-speaking ability who are not enrolled on a full-time basis; and

(8) provide that the applicant will utilize in programs assisted pursuant to this title the assistance of persons with expertise in the educational problems of children of limited English-speaking ability and make optimum use in such programs of the cultural and educational resources of the area to be served; and for the purpose of this paragraph, the term "cultural and educational resources" includes State educational agencies, institutions of higher education, nonprofit private schools, public and nonprofit private agencies such as libraries, museums, musical and artistic organizations, educational radio and television, and other cultural and educational resources.

(b) Applications for grants under title may be approved by the Commissioner only if—

(1) the application meets the requirements set forth in subsection (a);

(2) the program set forth in the application is consistent with criteria established by the Commissioner for the purpose of achieving an equitable distribution of assistance under this title within each State, which criteria shall be developed by him on the basis of a consideration of (A) the geographic distribution of children of limited English-speaking ability, (B) the relative need of persons in different geographic areas within the State for the kinds of services and activities described in paragraph (c) of section 704, and (C) the relative ability of particular local educational agencies within the State to provide those services and activities;

(3) the Commissioner determines (A) that the program will utilize the best available talents and resources and will substantially increase the educational opportunities in the area to be served by the applicant, and (B) that, to the extent consistent with the number of children enrolled in nonprofit private schools in the area to be served whose educational needs are of the type which this program is intended to meet, provision has been made for participation of such children; and

(4) the State educational agency has been notified of the application and been given the opportunity to offer recommendations.

(c) Amendments of applications shall, except as the Commissioner may otherwise provide by or pursuant to regulations, be subject to approval in the same manner as original applications.

Payments

Sec. 706. (a) The Commissioner shall pay to each applicant which has an application approved under this title an amount equal to the total sums expended by the applicant under the application for the purposes set forth therein.

(b) Payments under this title may be made in installments and in advance or by way of reimbursement, with necessary adjustments on account of overpayments or underpayments.

Advisory Committee

Sec. 707. (a) The Commissioner shall establish in the Office of Education an Advisory Committee on the Education of Bilingual Children, consisting of nine members appointed, without regard to the civil service laws, by the Commissioner with the approval of the Secretary. The Commissioner shall appoint one such member as Chairman. At least four of the members of the Advisory Committee shall be educators experienced in dealing with the educational problems of children whose native tongue is a language other than English.

(b) The Advisory Committee shall advise the Commissioner in the preparation of general regulations and with respect to policy matters arising in the administration of this title, including the development of criteria for approval of applications thereunder. The Commissioner may appoint such special advisory and technical experts and consultants as may be useful and necessary in carrying out the functions of the Advisory Committee.

(c) Members of the Advisory Committee shall, while serving on the business of the Advisory Committee, be entitled to receive compensation at rates fixed by the Secretary, but not exceeding $100 per day, including traveltime; and while so serving away from their homes or regular places of business, they may be allowed travel expenses, including per diem in lieu of subsistence, as authorized by section 5703 of title 5 of the United States Code for persons in the Government service employed intermittently.

Labor standards

Sec. 708. All laborers and mechanics employed by contractors or subcontractors on all minor remodeling projects assisted under this title shall be paid wages at rates not less than those prevailing on similar minor remodeling in the locality as determined by the Secretary of Labor in accordance with the Davis-Bacon Act, as amended (40 U.S.C. 276a—276a-5). The Secretary of Labor shall have, with respect to the labor standards specified in this section, the authority and functions set forth in Reorganization Plan Numbered 14 of 1950 and section 2 of the Act of June 13, 1934, as amended (40 U.S.C. 276c).

TITLE [VII] *VIII*—GENERAL PROVISIONS

DEFINITIONS

SEC. [701] *801*. As used in titles II, III, [and] *V, VI, and VII*, of this Act, *except when otherwise specified*—

(a) The term "Commissioner" means the Commissioner of Education.

(b) The term "construction" means (1) erection of new or expansion of existing structures, and the acquisition and installation of equipment therefor; or (2) acquisition of existing structures not owned by any agency or institution making application for assistance under this Act; or (3) remodeling or alteration (including the acquisition, installation, modernization, or replacement of equipment) of existing structures; or (4) a combination of any two or more of the foregoing.

(c) The term "elementary school" means a day or residential school which provides elementary education, as determined under State law.

(d) The term "equipment" includes machinery, utilities, and built-in equipment and any necessary enclosures or structures to house them, and includes all other items necessary for the functioning of a particular facility as a facility for the provision of educational services, including items such as instructional equipment and necessary furniture, printed, published, and audio-visual instructional materials, and books, periodicals, documents, and other related materials.

(c) The term "institution of higher education" means an educational institution in any State which—

(1) admits as regular students only individuals having a certificate of graduation from a high school, or the recognized equivalent of such a certificate;

(2) is legally authorized within such State to provide a program of education beyond high school;

(3) provides an educational program for which it awards a bachelor's degree, or provides not less than a two-year program which is acceptable for full credit toward such a degree, or offers a two-year program in engineering, mathematics, or the physical or biological sciences which is designed to prepare the student to work as a technician and at a semiprofessional level in engineering, scientific, or other technological fields which require the understanding and application of basic engineering, scientific, or mathematical principles or knowledge;

(4) is a public or other nonprofit institution; and

(5) is accredited by a nationally recognized accrediting agency or association listed by the Commissioner pursuant to this paragraph or, if not so accredited, is an institution whose credits are accepted, on transfer, by not less than three institutions which are so accredited, for credit on the same basis as if transferred from an institution so accredited: *Provided, however,* That in the case of an institution offering a two-year program in engineering, mathematics, or the physical or biological sciences which is designed to prepare the student to work as a technician and at a semiprofessional level in engineering, scientific, or technological fields which requires the understanding and application of basic engineering, scientific, or mathematical principles or knowledge, if the Commissioner determines that there is no nationally recognized accrediting agency or association qualified to accredit such institutions, he shall appoint an advisory committee, composed of persons specially qualified to evaluate training provided by such institutions, which shall prescribe the standards of content, scope, and quality which must be met in order to qualify such institutions to participate under this Act and shall also determine whether particular institutions meet such standards. For the purposes of this paragraph the Commission shall publish a list of nationally recognized accrediting agencies or associations which he determines to be reliable authority as to the quality of education or training offered.

(f) The term "local educational agency" means a public board of education or other public authority legally constituted within a State for either administrative control or direction of, or to perform a service function for, public elementary or secondary schools in a city, county, township, school district, or other political subdivision of a State, or such combination of school districts or counties as are recognized in a State as an administrative agency for its public elementary or secondary schools. Such term also includes any other public institution or agency having administrative control and direction of a public elementary or secondary school.

(g) The term "nonprofit" as applied to a school, agency, organization, or institution means a school, agency, organization, or institution owned and operated by one or more nonprofit corporations or associations no part of the net earnings of which inures, or may lawfully inure, to the benefit of any private shareholder or individual.

(h) The term "secondary school" means a day or residential school which provides secondary education, as determined under State law, except that it does not include any education provided beyond grade 12.

(i) The term "Secretary" means the Secretary of Health, Education, and Welfare.

(j) The term "State" includes, in addition to the several States of the Union, the Commonwealth of Puerto Rico, the District of Columbia, Guam, American Samoa, and the Virgin Islands and for purposes of [title II and title III,] *titles II, III, V, VI, and VII* such term *also* includes the Trust Territory of the Pacific slands.

(k) The term "State educational agency" means the State board of educational or other agency or officer primarily responsible for the State supervision of public elementary and secondary schools, or, if there is no such officer or agency, an officer or agency designated by the Governor or by State law.

ADVISORY COUNCILS

SEC. [702] *802.* (a) The Commissioner may, without regard to the civil service laws, and subject to the Secretary's approval in such cases as the Secretary may prescribe, from time to time appoint, in addition to the advisory councils and committees authorized in preceding titles, an advisory council of ten members to advise and consult with the Commissioner with respect to his functions under this law.

(b) Members of such an advisory council who are not regular full-time employees of the United States shall, while attending meetings or conferences of such council or otherwise engaged on business of such council, be entitled to receive compensation at a rate fixed by the Secretary, but not exceeding $100 per diem, including traveltime, and, while so serving away from their homes or regular places of business, they may be allowed travel expenses, including per diem in lieu of subsistence, as authorized by section 5 of the Administrative Expenses Act of 1946 (5 U.S.C. 73b–2) for persons in the Government service employed intermittently.

FEDERAL ADMINISTRATION

SEC. [703] *803.* (a) The Commissioner may delegate any of his functions under this Act or any Act amended by this Act, except the making of regulations, to any officer or employee of the Office of Education.

(b) In administering the provisions of this Act or any Act amended by this Act, the Commissioner is authorized to utilize the services and facilities of any agency of the Federal Government and of any other public or nonprofit agency or institution in accordance with appropriate agreements, and to pay for such services either in advance or by way of reimbursement, as may be agreed upon.

(c) In administering the provisions of this Act and any Act amended by this Act, the Commissioner shall consult with other Federal departments and agencies administering programs which may be effectively coordinated with programs carried out pursuant to such Acts, and to the extent practicable for the purposes of such Acts shall (1) coordinate such programs on the Federal level with the programs being administered by such other departments and agencies, and (2) require that effective procedures be adopted by State and local authorities to coordinate the development and operation of programs and projects carried out under such Acts with other public and private programs having the same or similar purposes, including community action programs under title II of the Economic Opportunity Act of 1964.

FEDERAL CONTROL OF EDUCATION PROHIBITED

SEC. [704] *804.* Nothing contained in this Act shall be construed to authorize any department, agency, officer, or employee of the United States to exercise any direction, supervision, or control over the curriculum, program of instruction, administration, or personnel of any educational institution or school system, or over the selection of library resources, textbooks, or other printed or published instructional materials by any educational institution or school system, or to require the assignment or transportation of students or teachers in order to overcome racial imbalance.

LIMITATION ON PAYMENTS UNDER THIS ACT

SEC. [705] *805.* Nothing contained in this Act shall be construed to authorize the making of any payment under this Act, or under any Act amended by this Act, for religious worship or instruction.

DISSEMINATION OF INFORMATION

SEC. [706] *806.* (a) For the purpose of carrying out more effectively the provisions of this Act and title II of Public Law 874, Eighty-first Congress, the Commissioner—

(1) shall prepare and disseminate to State and local educational agencies and other appropriate agencies and institutions catalogs, reviews, bibliographies, abstracts, analyses of research and experimentation, and such other materials as are generally useful for such purpose;

(2) may upon request provide advice, counsel, technical assistance, and demonstrations to State or local educational agencies or institutions of higher education undertaking to initiate or expand programs under this Act or such title in order to increase the quality or depth or broaden the scope of such programs, and shall inform such agencies and institutions of the availability of assistance pursuant to this clause;

(3) shall prepare and disseminate to State and local educational agencies and other appropriate agencies and institutions an annual report setting forth developments in the utilization and adaptation of projects carried out pursuant to this Act and such title; and

(4) may enter into contracts with public or private agencies, organizations, groups, or individuals to carry out the provisions of this section.

(b) *For such purpose and also for the purpose of carrying out more effectively other provisions of Federal law, the Commissioner, upon request from a State educational agency, shall provide counseling and technical assistance to elementary and secondary schools in rural areas, as defined by the Commissioner, of such State (1) in determining benefits available to such agencies and schools under Federal laws, and* (2) *in preparing applications and meeting other requirements for such benefits. Assistance pursuant to this subsection may, in accordance with such request, be provided by personnel from the Office of Education or be provided in the form of grants in such amounts as may be necessary for such State educational agency to employ such personnel as may be necessary to provide such assistance.*

[(b)] *(c)* There are authorized to be appropriated not to exceed $1,500,000 for the fiscal year ending June 30, 1967, [and not to exceed $2,000,000 for the fiscal year ending June 30, 1968] *$3,500,000 for the fiscal year ending June 30, 1968, $3,700,000 for the fiscal year ending June 30, 1969, $4,000,000 for the fiscal year ending June 30, 1970, and $4,200,000 for the fiscal year ending June 30, 1971,* to carry out the provisions of this section.

Dropout prevention projects

Sec. 807. (a) The Commissioner is authorized to arrange by contract, grant, or otherwise, with local educational agencies for the carrying out by such agencies in schools which (1) are located in an urban area, (2) have a high percentage of children from families with an income not exceeding the low-income factor, as defined in section 103(c), and (3) have a high percentage of such children who do not complete their education in elementary or secondary school, of demonstration projects involving the use of innovative methods, systems, materials, or programs which show promise of reducing the number of such children who do not complete their education in elementary and secondary schools.

(b) The Commissioner shall approve arrangements pursuant to this section only on

application by a local educational agency and upon his finding:

(1) that the project will be carried out in one or more schools described in subsection (a);

(2) that the applicant has analyzed the reasons for such children not completing their education and has designed a program to meet this problem;

(3) that effective procedures, including objective measurements of educational achievements, will be adopted for evaluating at least annually the effectiveness of the project; and

(4) that the project has been approved by the appropriate State educational agency.

(c) There is authorized to be appropriated not to exceed $30,000,000 for the period ending June 30, 1969, and $30,000,000 each for the fiscal year ending June 30, 1970, and for the succeeding fiscal year for the purpose of this section.

ELEMENTARY AND SECONDARY EDUCATION AMENDMENTS OF 1966 (P.L. 89-750)

An act to strengthen and improve programs of assistance for elementary and secondary schools, and for other purposes

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled, That this Act may be cited as the "Elementary and Secondary Education Amendments of 1966".

Title I—Amendments to the Elementary and Secondary Education Act of 1965

* * * * *

Part H—Racial Imbalance and Compliance with Civil Rights Act of 1964

* * * * *

COMPLIANCE WITH CIVIL RIGHTS ACT OF 1964

Sec. 182. The Commissioner of Education shall not defer action or order action deferred or any application by a local educational agency for funds authorized to be appropriated by this Act, by the Elementary and Secondary Education Act of 1965, by the Act of September 30, 1950 (Public Law 874, Eighty-first Congress), by the Act of September 23, 1950 (Public Law 815, Eighty-first Congress), or by the Cooperative Research Act, on the basis of alleged noncompliance with the provisions of title VI of the Civil Rights Act of 1964 for more than sixty days after notice is given to such local agency of such deferral unless such local agency is given the opportunity for a hearing as provided in section 602 of title VI of the Civil Rights Act of 1964, such hearing to be held within sixty days of such notice, unless the time for such hearing is extended by mutual consent of such local agency and the Commissioner, and such deferral shall not continue for more than thirty days after the close of any such hearing unless there has been an express finding on the record of such hearing that such local educational agency has failed to comply with the provisions of title VI of the Civil Rights Act of 1964: *Provided, That, for the purpose of determining whether a local educational agency is in compliance with title VI of the Civil Rights Act of 1964 (Public Law 88-352), compliance by such agency with a final order or judgment of a Federal court for the desegregation of the school or school system operated by such agency shall be deemed to be compliance with such title VI, insofar as the matters covered in the order or judgment are concerned.*

* * * * *

Title III—Adult Education Act of 1966

* * * * *

GRANTS TO STATES FOR ADULT BASIC EDUCATION

Sec. 304. (a) From the sums appropriated pursuant to section 314, not less than 10 per centum nor more than 20 per centum shall be reserved for the purposes of section 309.

(b) From the remainder of such sums, the Commissioner is authorized to make grants to States, which have State plans approved by him under section 306 for the purposes of this section, to pay the Federal share of the cost of the establishment or expansion of adult basic education programs to be carried out by local educational agencies *and private nonprofit agencies.*

ALLOTMENT FOR ADULT EDUCATION

Sec. 305. (a) [From the sums available for purposes of section 304(b) for any fiscal year, the Commissioner shall allot not more than 2 per centum thereof among Puerto Rico, Guam, American Samoa, the Trust Territory of the Pacific Islands, and the Virgin Islands according to their respective needs for assistance under such section.] *From the sums available for purposes of section 304(b) for any fiscal year, the Commissioner shall allot (1) not more than 2 per centum thereof among Puerto Rico, Guam, American Samoa, the Trust Territory of the Pacific Islands, and the Virgin Islands according to their respective needs for assistance under such section, and (2) $100,000 to each State.* From the remainder of such sums he shall allot to each State an amount which bears the same ratio to such remainder as the number of adults who have completed not more than five grades of school (or have not achieved an equivalent level of education) in such State bears to the number of such adults in all States.

(b) The portion of any State's allotment under subsection (a) for a fiscal year which the Commisisoner determines will not be required, for the period such allotment is available, for carrying out the portion of the State plan relating to adult basic education approved under this title shall be available for reallotment from time to time, on such dates during such period as the Commissioner may fix, to other States in proportion to the original allotments to such States under subsection (a) for such year, but with such proportionate amount for any of such other States being reduced to the extent it exceeds the sum which the Commissioner estimates such State needs and will be able to use for such period for carrying out such portion of its State plan approved under this title, and the total of such reductions shall be similarly reallotted among the States whose proportionate amounts are not so reduced. Any amount reallotted to a State under this subsection during a year shall be deemed part of its allotment under subsection (a) for such year.

STATE PLANS

Sec. 306. (a) Any State desiring to receive its allotment of Federal funds for any grant under this title shall submit through its State educational agency a State plan. Such State plan shall be in such detail as the Commissioner deems necessary, and shall—

(1) set forth a program for the use of grants, in accordance with section 304(b), which affords assurance of substantial progress, with respect to all segments of the adult population and all areas of the State, toward carrying out the purposes of such section;

(2) provide for the administration of such plan by the State educational agency;

(3) provide for cooperative arrangements between the State educational agency and the State health authority authorizing the use of such health information and services for adults as may be available from such agencies and as may reasonably be necessary to enable them to benefit from the instruction provided pursuant to this title;

(4) provide for grants to public and private nonprofit agencies for special projects, teacher-training and research;

(5) provide for cooperation with Community Action programs, Work Experience programs, VISTA, Work Study, and other programs relating to the anti-poverty effort;

(6) provide that such agency will make such reports to the Commissioner, in such form and containing such information, as may reasonably be necessary to enable the Commissioner to perform his duties under this title and will keep such records and afford such access thereto as the Commissioner finds necessary to assure the correctness and verification of such reports;

(7) provide such fiscal control and fund accounting procedures as may be necessary to assure proper disbursement of and accounting for Federal funds paid the State under this title (including such funds paid by the State to local educational agencies *and private nonprofit agencies*); and

(8) provide such further information and assurances as the Commissioner may by regulation require.

(b) The Commissioner shall not finally disapprove any State plan submitted under this title, or any modification thereof, without first affording the State educational agency reasonable notice and opportunity for a hearing.

PAYMENTS

Sec. 307. (a) Except as provided in subsection (b), the Federal share of expenditures to carry out a State plan shall be paid from a State's allotment available for grants to such State. [For the fiscal year ending June 30, 1967, and the succeeding fiscal year, the Federal share for each State shall be 90 per centum.] *For the fiscal year ending June 30, 1967, and succeeding fiscal years, the Federal share for each State shall be 90 per per centum, except that with respect to the Trust Territory of the Pacific Islands such Federal share shall be 100 per centum.*

(b) No payments shall be made to any State from its allotment for any fiscal year unless the Commissioner finds that the amount available for expenditure by such State for adult education from non-Federal sources for such year will be not less than the amount expended for such purposes from such sources during the preceding fiscal year.

(c) Payments to a State under this title may be in installments and in advance or by way or reimbursement with necessary adjustments on account of overpayments or underpayments.

* * * * *

APPROPRIATIONS AUTHORIZED

Sec. 314. There is authorized to be appropriated $40,000,000 for the fiscal year ending June 30, 1967, [and] $60,000,000 for the fiscal year ending June 30, 1968, *$70,000,000 for the fiscal year ending June 30, 1969, $80,000,000 for the fiscal year ending June 30, 1970, and $90,000,000 for the fiscal year ending June 30, 1971,* for the purposes of this title.

PUBLIC LAW 874, 81ST CONGRESS

Title I—Financial Assistance for Local Educational Agencies in Areas Affected by Federal Activity

* * * * *

FEDERAL ACQUISITION OF REAL PROPERTY

Sec. 2. (a) Where the Commissioner, after consultation with any local educational agency and with the appropriate State educational agency, determines for any fiscal year ending prior to July 1, [1968] *1971*—

(1) that the United States owns Federal property in the school district of such local educational agency, and that such property (A) has been acquired by the United States since 1938, (B) was not acquired by exchange for other Federal property in the school district which the United States owned before 1939, and (C) had an assessed value (determined as of the time or times when so acquired) aggregating 10 per centum or more of the assessed value of all real property in the school district (similarly determined as of the time or times when such Federal property was so acquired); and

(2) that such acquisition has placed a substantial and continuing financial burden on such agency; and

(3) that such agency is not being substantially compensated for the loss in revenue resulting from such acquisition by [(A) other Federal payments with respect to the property so acquired, or (B)] increases in revenue accruing to the agency from the carrying on Federal activities with respect to the property so acquired,

then the local educational agency shall be entitled to receive for such fiscal year such amount as, in the judgment of the Commissioner, is equal to the continuing Federal responsibility for the additional financial burden with respect to current expenditures placed on such agency by such acquisition of property [, to the extent such agency is not compensated for such burden by other Federal payments with respect to the property so acquired]. Such amount shall not exceed the amount which, in the judgment of the Commissioner, such agency would have derived in such year, and would have had available for current expenditures, from the property acquired by the United States (such amount to be determined without regard to any improvements or other changes made in or on such property since such acquisition), [minus the amount which in his judgment the local educational agency derived from other Federal payments with respects to the property so acquired and had available in such year for current expenditures].

[(b) For the purposes of this section—

[(1) The term "other Federal payments" means payments in lieu of taxes, and any other payments, made with respect to Federal property pursuant to any law of the United States other than this title, and property taxes paid with respect to Federal property whether or not such taxes are paid by the United States, but shall not include payments pursuant to contract or other arrangement under section 1 of the Act of April 16, 1934, commonly referred to as the Johnson-O'Malley Act (25 U.S.C. 452).

[(2) Any real property with respect to which payments are being made under section 13 of the Tennessee Valley Authority Act of 1933, as amended, shall not be regarded as Federal property.]

(*b*) *For the purposes of this section any real property with respect to which payments are being made under section 13 of the Tennessee Valley Authority Act of 1933, as amended, shall not be regarded as Federal property.*

(c) Where the school district of any local educational agency shall have been formed at any time after 1938 by the consolidation of two or more former school districts, such agency may elect (at the time it files application under section 5) for any fiscal year to have (1) the eligibility of such local educational agency, and (2) the amount which such agency shall be entitled to receive, determined under this section only with respect to such of the former school districts comprising such consolidated school district as the agency shall designate in such election.

CHILDREN RESIDING ON, OR WHOSE PARENTS ARE EMPLOYED ON FEDERAL PROPERTY

SEC. 3. (a) For the purpose of computing the amount to which a local educational agency is entitled under this section for any fiscal year, the Commissioner shall determine the number of children who were in average daily attendance at the schools of such agency, and for whom such agency provided free public education, during such fiscal year, and who, while in attendance at such schools, resided on Federal property and (1) did so with a parent employed on Federal property situated in whole or in part in the same State as the school district of such agency or situated within reasonable commuting distance from the school district of such agency, or (2) had a parent who was on active duty in the uniformed services (as defined in section 102 of the Career Compensation Act of 1949).

CHILDREN OF PERSONS WHO RESIDE OR WORK ON FEDERAL PROPERTY

(b) For the purpose of computing the amount to which a local educational agency is entitled under this section for any fiscal year ending prior to July 1, [1968] *1971*, the Commissioner shall also determine the number of children (other than children to whom subsection (a) applies) who were in average daily attendance at the schools of a local educational agency, and for whom such agency provided free public education, during such fiscal year and who, while in attendance at such schools, either (1) resided on Federal property, or (2) resided with a parent employed on Federal property situated in whole or in part in the same State as such agency or situated within reasonable commuting distance from the school district of such agency, or (3) had a parent who was on active duty in the uniformed services (as defined in section 201 of the Career Compensation Act of 1949). For the purpose of computing the amount to which a local educational agency is entitled under this section for the fiscal year ending June 30, 1967, the Commissioner shall also determine the number of children (other than children to whom subsection (a) or any other provision of this subsection applies) who were in average daily attendance at such schools and for whom such agency provided free public education, during such fiscal year, as a result of a change in residence from land transferred to Mexico as part of a relocation of an international boundary of the United States; *but if, by reason of any other provision of law, this sentence is not considered in computing the amount to which any local educational agency is entitled for the fiscal year ending June 30, 1967, the additional amount to which such agency would have been entitled had this sentence been so considered, shall be added to such agency's entitlement for the first fiscal year for which funds appropriated to carry out this Act may be used for such purpose.*

(c)(1) The amount to which a local educational agency is entitled under this section for any fiscal year shall be an amount equal to (A) the local contribution rate (determined under subsection (d) multiplied by (B) the sum of the number of children determined under subsection (a) and one half of the number determined under subsection (b).

(2) No local educational agency shall be entitled to receive any payment for a fiscal year with respect to a number of children determined under subsection (a) or subsection (b), as the case may be, unless the number of children who were in average daily attendance during such year and to whom such subsection applies—

(A) is ten or more; and

(B) amount to, whichever is the lesser, four hundred such children, or a number of such children equal to 3 per centum or more of the total number of children who were in average daily attendance during such year and for whom such agency provided free public education, except that such 3 per centum requirement need not be met by such agency for any period of two fiscal years which follows a fiscal year during which such agency met such requirement and was entitled to payment under the provisions of this section, but the payment, under the provisions of this section to such agency for the second fiscal year of any such two-year period during which such requirement is not met, shall be reduced by 50 per centum of the amount thereof.

For the purposes of this paragraph, a local educational agency may count as children determined under subsection (b) any number of children determined under subsection (a). Notwithstanding the provisions of clause (B) of this paragraph, the Commissioner may waive the 3 per centum condition of entitlement contained in such clause whenever, in his judgment, exceptional circumstances exist which would make the application of such condition inequitable and would defeat the purposes of this title.

(4) If—

(A) the amount computed under paragraph (1) for a local educational agency for any fiscal year, together with the funds available to such agency from State, local, and other Federal sources (including funds available under section 4 of this title, but excluding funds available under title II) is, in the judgment of the Commissioner, less than the amount necessary to enable such agency to provide a level of education equivalent to that maintained in the school districts of the State which, in the judgment of the Commissioner, are generally comparable to the school district of such agency;

(B) such agency is, in the judgment of the Commissioner, making a reasonable tax effort and exercising due diligence in availing itself of State and other financial assistance;

(C) not less than 50 per centum of the total number of children who were in average daily attendance at the schools of such agency, and for whom such agency provided free public education, during such fiscal year resided on Federal property; and

(D) the eligibility of such agency under State law for State aid with respect to the free public education of children residing on Federal property, and the amount of such aid, is determined on a basis no less favorable to such agency than the basis used in determining the eligibility of local educational agencies for State aid, and the amount thereof, with respect to the free public education of other children in the State;

the Commissioner may increase the amount computed under paragraph (1) to the extent necessary to enable such agency to provide a level of education equivalent to that maintained in such comparable school districts; except that this paragraph shall in no case operate to increase the amount computed for any fiscal year under paragraph (1) for a local educational agency above the amount determined by the Commissioner to be the cost per pupil of providing a level of education equivalent to that maintained in such comparable school districts, multiplied by the number of children who were in average daily attendance at the schools of such agency, and for whom such agency provided free public education, during such year, and who resided on Federal property during such year, minus the amount of State aid which the Commissioner determines to be available with respect to such children for the year for which the computation is being made.

(5) The determinations whether a local educational agency has met the requirements for eligibility under paragraphs (2)(B) and (4)(C) of this subsection for any fiscal year shall be made on the basis of estimates by the Commissioner made prior to the close of such year, except that an underestimate made by the Commissioner pursuant to the foregoing provisions of this sentence shall not operate to deprive an agency of its entitlement to any payments under this section to which it would be entitled had the estimate been accurate.

(d) The local contribution rate for a local educational agency (other than a local educational agency in Puerto Rico, Wake Island, Guam, American Samoa, or the Virgin Islands, or in a State in which a substantial proportion of the land is in unorganized territory for which a State agency is the local educational agency, or in a State in which there is only one local educational agency) for any fiscal year shall be computed by the Commissioner of Education, after consultation with the State educational agency and *the local educational agency,* in the following manner:

[(1) he shall place each school district within the State into a group of generally comparable school districts; and

[(2) he shall then divide (A) the aggregate current expenditures, during the second fiscal year preceding the fiscal year for which he is making the computation, which all of the local educational agencies within any such group of comparable school districts made from revenues derived from local sources, by (B) the aggregate number of children in average daily attendance to whom such agencies provided free public education during such second preceding fiscal year.]

(1) he shall determine which school districts within the State are in his judgment generally comparable to the school districts of the agency for which the computation is being made; and

(2) he shall then divide (A) the aggregate current expenditures, during the second fiscal year preceding the fiscal year for which he is making the computation, which the local educational agencies of such comparable school district made from revenues derived from local sources, by (B) the aggregate number of children in average daily attendance to whom such agencies provided free public education during such second preceding fiscal year.

The local contribution rate shall be an amount equal to the quotient obtained under clause (2) of this subsection. If, in the judgment of the Commissioner, the current expenditures in [the school districts within the generally comparable group as determined] *those school districts which he has selected* under clause (1) are not reasonably comparable because of unusual geographical factors which affect the current expenditures necessary to maintain, in the school district of the local educational agency for which the computation is being made, a level of education equivalent to that maintained in such other districts, the Commissioner may increase the local contribution rate for such agency by such amount as he determines will compensate such agency for the increase in current expenditures necessitated by such unusual geographical factors. In no event shall the local contribution rate for any local educational agency in any State (other than Puerto Rico, Wake Island, Guam, American Samoa, or the Virgin Islands) for any fiscal year be less than (i) 50 per centum of the average per pupil expenditures in such State or (ii) 50 per centum of the average per pupil expenditure in the United States (which for purposes of this sentence and the next sentence means the fifty States and the District of Columbia), but not to exceed the average per pupil expenditure in the State: *Provided,* That if, for the fiscal year ending June 30, 1959, the application of clause (ii) of this sentence results in a lower local contribution rate than resulted from the application of such clause during the fiscal year ending June 30, 1958, as such clause was then in effect, then such clause, as in effect during the fiscal year ending June 30, 1958, shall be in effect during the fiscal year ending June 30, 1959. For the purposes of the preceding sentence the "average per pupil expenditure" in a State, or in the United States, shall be the aggregate current expenditures, during the second fiscal year preceding the fiscal year for which the computation is made, of all local educational agencies in the State, or in the United States, as the case may be, plus any direct current expenditures by the States for the operation of such agencies (without regard to the sources of funds from which either of such expenditures are made), divided by the aggregate number of children in average daily attendance to whom such agencies provided free public education during such preceding fiscal year. The local contribution rate for any local educational agency in Puerto Rico, Wake Island, Guam, American Samoa, or the Virgin Islands, or in any State in which a substantial proportion of the land is in unorganized territory for which a State agency is the local educational agency, or in any State in which there is only one local educational agency, shall be determined for any fiscal year by the Commissioner in accordance with policies and principles which will, in his judgment, best effectuate the purposes of this title and most nearly approximate the policies and principles provided herein for determining local contribution rates in other States.

[CERTAIN FEDERAL CONTRIBUTIONS TO BE DEDUCTED

[(e) In determining the total amount which a local educational agency is entitled to receive under this section (other than subsection (c)(4) thereof) for a fiscal year, the Commissioner shall deduct (1) such amount as he determines that agency derived from other Federal payments (as defined in section 2(b)(1)) but only to the extent such payments are not deducted under the last sentence of section 2(a), and only to the extent the payments are made with respect to property on which children, counted for purposes of this section, live or on which their parents work, and (2) such amount as he determines to be the value of transportation and of custodial and other maintenance services furnished such agency by the Federal Government during such year. The Commissioner shall make no deduction under this subsection for any fiscal year in which the sum of the amounts determined under clauses (1) and (2) of the preceding sentence is less than $1,000.]

ADJUSTMENT FOR CERTAIN DECREASES IN FEDERAL ACTIVITIES

[(f)] *(e)* Whenever the Commissioner determines that—

(1) a local educational agency has made preparations to provide during a fiscal year free public education for a certain number of children to whom subsection (a) or (b) applies;

(2) such preparations were in his judgment reasonable in the light of the information available to such agency at the time such preparations were made; and

(3) such number has been substantially reduced by reason of a decrease in or cessation of Federal activities or by reason of a failure of any of such activities to occur,

the amount to which such agency is otherwise entitled under this section for such year shall be increased to the amount to which, in the judgment of the Commissioner, such agency would have been entitled but for such decrease in or cessation of Federal activities or the failure of such activities to occur, minus any reduction in current expenditures for such year which the Commissioner determines that such agency has effected, or reasonably should have effected, by reason of such decrease in or cessation of Federal activities or the failure of such activities to occur.

SUDDEN AND SUBSTANTIAL INCREASES IN ATTENDANCE

INCREASES HEREAFTER OCCURRING

SEC. 4. (a) If the Commissioner determines for any fiscal year ending prior to July 1 [1968] *1967*—

(1) that, as a direct result of activities of the United States (carried on either directly or through a contractor), and increase in the number of children in average daily attendance at the schools of any local educational agency has occurred in such fiscal year, which increase so resulting from activities of the United States is equal to at least 5 per centum of the difference between the number of children in average daily attendance at the schools of such agency during the preceding fiscal year and the number of such children whose attendance during such year resulted from activities of the United States (including children who resided on Federal property or with a parent employed on Federal property);

(2) that such activities of the United States have placed on such agency a substantial and continuing financial burden; and

(3) that such agency is making a reasonable tax effort and is exercising due diligence in availing itself of State and other financial assistance but is unable to secure sufficient funds to meet the increased educational costs involved,

then such agency shall be entitled to receive for such fiscal year an amount equal to the product of—

(A) the number of children which the Commissioner determines to be the increase, so resulting from activities of the United States, in such year in average daily attendance; and

(B) the amount which the Commissioner determines to be the current expenditures per child necessary to provide free public education to such additional children during such year, minus the amount which the Commissioner determines to be available from State, local, and Federal sources for such purpose (not counting as available for such purpose either payments under this Act or funds from local sources necessary to provide free public education to other children).

For the next fiscal year (except where the determination under the preceding sentence has been made with respect to the fiscal year ending June 30 [1968] *1971* such agency shall be entitled to receive 50 per centum of such product reduced by the amount of such product which is attributable to children with respect to whom such agency is, or upon application would be, entitled to receive any payment under section 3 for such fiscal year, but not to exceed for such year the amount which the Commissioner determines to be necessary to enable such agency, with the State, local, and other Federal funds (exclusive of funds available under title II) available to it for such purpose, to provide a level of eduction equivalent to that maintained in the school districts in such State which in his judgment are generally comparable to the school district of such agency. The determinations whether an increase has occurred for purposes of clause (1) hereof and whether such increase meets the 5 per centum requirement contained in such clause, for any fiscal year, shall be made on the basis of estimates by the Commissioner made prior to the close of such year, except that an underestimate made by the Commissioner pursuant to the foregoing provisions of this sentence shall not operate to deprive an agency of its entitlements to any payment under this section to which it would be entitled had the estimate been accurate. The determination under clause (B) shall be made by the Commissioner after considering the current expenditures per child in providing free public education in those school districts in the State which, in the judgment of the Commissioner, are generally comparable to the school district of the local educational agency for which the computation is being made.

* * * * *

ASSISTANCE FOR CURRENT SCHOOL EXPENDITURES IN MAJOR DISASTER AREAS

CASES OF CERTAIN DISASTERS

[SEC. 7. (a) If the Director of the Office of Emergency Planning determines with respect to any local educational agency that—

[(1) (A) such agency is located in whole or in part within an area which, after August 30, 1965, and prior to July 1, 1967, has suffered a major disaster as a result of any flood, drought, fire, hurricane, earthquake, storm, or other catastrophe which, in the determination of the President, pursuant to section 2(a) of the Act of September 30, 1950 (42

U.S.C. 1855(a)), is or threatens to be of sufficient severity and magnitude to warrant disaster assistance by the Federal Government, and

[(B) the Governor of the State in which such agency is located has certified the need for disaster assistance under this section, and has given assurance of expenditure of a reasonable amount of the funds for the government of such State, or of any political subdivision thereof, for the same or similar purposes with respect to such catastrophe.

and if the Commissioner determines with respect to such local educational agency that—

[(2) such agency is making a reasonable tax effort and is exercising due diligence in availing itself of State and other financial assistance, but as a result of such major disaster it is unable to secure sufficient funds to meet the cost of providing free public education for the children attending the schools of such agency, and

[(3) to the extent that the operation of private elementary and secondary schools in the school attendance area of such local educational agency has been disrupted or impaired by such disaster, such local educational agency has made provision for the conduct of educational programs under public auspices and administration in which children enrolled in such private elementary and secondary schools may attend and participate: *Provided*, That nothing contained in this Act shall be construed to authorize the making of any payment under this Act for religious worship or instruction,

the Commissioner may provide to such agency the additional assistance necessary to provide free public education to the children attending the schools of such agency, upon such terms and in such amounts (subject to the provisions of this section) as the Commissioner may consider to be in the public interest. Such additional assistance may be provided for a period not greater than a five fiscal year period beginning with the fiscal year in which the President has determined that such area suffered a major disaster. The amount so provided for any fiscal year shall not exceed the amount which the Commissioner determines to be necessary to enable such agency, with the State, local, and other Federal funds available to it for such purpose, to provide a level of education equivalent to that maintained in the schools of such agency during the last full fiscal year prior to the occurrence of such major disaster, taking into account the additional costs reasonably necessary to carry out the provisions of subparagraph (3) of this section. The amount, if any, so provided for the second, third, and fourth fiscal years following the fiscal year in which the President determined that such area has suffered a major disaster shall not exceed 75 per centum, 50 per centum, and 25 per centum, respectively, of the amount so provided for the first fiscal year following such determination.]

Sec. 7. (a) In any case in which—

(1)(A) the Director of the Office of Emergency Planning determines with respect to any local educational agency (including for the purpose of this section any other public agency which operates schools providing technical, vocational, or other special education to children of elementary or secondary school age) that such agency is located in whole or in part within an area which after August 30, 1965, and prior to July 1, 1971, has suffered a major disaster as the result of any flood, drought, fire, hurricane, earthquake, storm, or other catastrophe which, in the determination of the President pursuant to section 2(a) of the Act of September 30, 1950 (42 U.S.C. 1855a(a)), is or threatens to be of sufficient severity or magnitude to warrant disaster assistance by the Federal Government; or

(B) the Commissioner determines with respect to any such agency that public elementary or secondary school facilities of such agency have been destroyed or seriously damaged as a result of fire, flood, hurricane, earthquake, storm, malicious action of any person known or unknown, or other catastrophe; and

(2) the Governor of the State in which such agency is located has certified the need for disaster assistance under this section, and has given assurance of expenditure of a reasonable amount of the funds of the government of such State, or of any political subdivision thereof, for the same or similar purposes with respect to such catastrophe;

and if the Commissioner determines with respect to such agency that—

(3) such agency is utilizing or will utilize all State and other financial assistance available to it for the purpose of meeting the cost of providing free public education for the children attending the schools of such agency, but as a result of such disaster it is unable to obtain sufficient funds for such purpose and requires an amount of additional assistance equal to at least $1,000 or one-half of 1 per centum of such agency's current operating expenditures during the fiscal year preceding the one in which such disaster occurred, whichever is less, and

(4) in the case of any such major disaster to the extent that the operation of private elementary and secondary schools in the school attendance area of such local educational agency has been disrupted or impaired by such disaster, such local educational agency has made provisions for the conduct of educational programs under public auspices and administration in which children enrolled in such private elementary and secondary schools may attend and participate: Provided, That nothing contained in this Act shall be construed to authorize the making of any payment under this Act for religious worship or instruction,

the Commissioner may provide to such agency the additional assistance necessary to provide free public education to the children attending the schools by such agency, upon such terms and in such amounts (subject to the provisions of this section) as the Commissioner may consider to be in the public interest. Such additional assistance may be provided for a period not greater than a five-fiscal-year period beginning with the fiscal year in which it is determined pursuant to clause (1) of this subsection that such agency suffered a disaster. The amount so provided for any fiscal year shall not exceed the amount which the Commissioner determines to be necessary to enable such agency, with the State, local, and other Federal funds available to it for such purpose, to provide a level of education equivalent to that maintained in the schools of such agency prior to the occurrence of such disaster, taking into account the additional costs reasonably necessary to carry out the provisions of clause (4) of this subsection. The amount, if any, so provided for the second, third, and fourth fiscal years following the fiscal year in which it is so determined that such agency has suffered a disaster shall not exceed 75 per centum, 50 per centum, and 25 per centum, respectively, of the amount so provided for the first fiscal year following such determination.

(b) In addition to and apart from the funds provided under subsection (a), the Commissioner is authorized to provide to such agency an amount which he determines to be necessary to replace instructional and maintenance supplies, equipment, and materials (including textbooks) destroyed or seriously damaged as a result of such [major] disaster, *to make minor repairs,* and to lease or otherwise provide (other than by acquisition of land or erection of facilities) school and cafeteria facilities needed to replace temporarily such facilities which have been made unavailable as a result of the [major] disaster.

(c) There is hereby authorized to be appropriated for each fiscal year such amounts as may be necessary to carry out the provisions of this section. Pending such appropriation, the Commissioner may expend (without regard to subsections (a) and (e) of section 3679 of the Revised Statutes (31 U.S.C. 665)) from any funds heretofore or hereafter appropriated for expenditure in accordance with other sections of this Act, such sums as may be necessary for immediately providing assistance under this section, such appropriations to be reimbursed from the appropriations authorized by this subsection when made.

(d) No payment may be made to any local educational agency under this section except upon application therefor which is submitted through the appropriate State educational agency and is filed with the Commissioner in accordance with *the* regulations prescribed by him. In determining the order in which such applications shall be approved, the Commissioner shall consider the relative educational and financial needs of the local educational agencies which have submitted approvable applications.

(e) Amounts paid by the Commissioner to local educational agencies under this section may be paid in advance or by way of reimbursement and in such installments as the Commissioner may determine. Any funds paid to a local educational agency and not expended or otherwise used for the purposes for which paid shall be repaid to the Treasury of the United States.

TITLE II—FINANCIAL ASSISTANCE TO LOCAL EDUCATIONAL AGENCIES FOR THE EDUCATION OF CHILDREN OF LOW-INCOME FAMILIES

Part A—Basic Grants

DECLARATION OF POLICY

SEC. [201] *101.* In recognition of the special educational needs of children of low-income families and the impact that concentrations of low-income families have on the ability of local educational agencies to support adequate educational programs, the Congress hereby declares it to be the policy of the United States to provide financial assistance (as set forth in this [title] *part* to local educational agencies serving areas with concentrations of children from low-income families to expand and improve their educational programs by various means (including pre-school programs) which contribute particularly to meeting the special educational needs of educationally deprived children.

DURATION OF ASSISTANCE

SEC. [202] *102.* The Commissioner shall, in accordance with the provisions of this [title] *part,* make payments to State educational agencies for the period beginning July 1, 1965, and ending June 30, [1968] *1971.*

GRANTS—AMOUNT AND ELIGIBILITY

SEC. [203] *103.* (a)(1)(A) There is hereby authorized to be appropriated for each fiscal year for the purpose of this paragraph an amount equal to not more than 3 per centum of the amount appropriated for such year for payments to States under section [207(a)] *107(a)* (other than payments under such section to jurisdictions excluded from the term 'State' by this subsection). The Commissioner shall allot the amount appropriated pursuant to this paragraph among Puerto Rico, Guam, American Samoa, the Virgin Islands, and the Trust Territory of the Pacific Islands according to their respective need for such grants. In addition he shall allot from such amount to the Secretary of the Interior the amount necessary to make payments pursuant to subparagraph (B) of this paragraph, and for the fiscal year ending June 30, [1967] *1968, and the fiscal year ending June 30, 1969,* the amount necessary to meet the special educational needs of educationally deprived children on reservations serviced by elementary and secondary schools operated for Indian children by the Department of the Interior. The maximum grant which a local educational agency in Puerto Rico, Guam, American Samoa, the Virgin Islands, and the Trust Territory of the Pacific Islands shall be eligible to receive and the terms upon which payment shall be made to the Department of the Interior shall be determined pursuant to such criteria as the Commissioner determines will best carry out the purposes of this [title] *part*.

(B) The terms on which payments shall be made to the Department of the Interior shall include provision for payments by the Secretary of the Interior to local educational agencies with respect to out-of-State Indian children in the elementary or secondary schools of such agencies under special contracts with that Department. The amount of any such payment may not exceed, for each such child, one-half the average per pupil expenditure in the State in which the agency is located.

(2) In any case in which the Commissioner determines that satisfactory data for that purpose are available, the maximum grant which a local educational agency in a State shall be eligible to receive under this [title] *part* for any fiscal year shall be (except as provided in paragraph (3)) an amount equal to the Federal percentage (established pursuant to subsection (c)) of the average per pupil expenditure in that State or, if greater, in the United States [(which for purposes of this and the last sentence of the paragraph means the fifty States and the District of Columbia)], multiplied by the number of children in the school district of such agency who are aged five to seventeen, inclusive, and are (A) in families having an annual income of less than the low-income factor (established pursuant to subsection (c)), (B) in families receiving an annual income in excess of the low-income factor (established pursuant to subsection (c)) from payments under the program of aid to families with dependent children under a State plan approved under title IV of the Social Security Act, or (C) living in institutions for neglected or delinquent children (*other than such institutions operated by the United States*) but not counted pursuant to paragraph [(5)] *(7)* of this subsection for the purpose of a grant to a State agency, or being supported in foster homes with public funds. In any other case, the maximum grant for any local educational agency in a State shall be determined on the basis of the aggregate maximum amount of such grants for all such agencies in the county or counties in which the school district of the particular agency is located, which aggregate maximum amount shall be equal to the Federal percentage of such per pupil expenditure multiplied by the number of children of such ages in such county or counties who are described in clause (A), (B), or (C), of the previous sentence, and shall be allocated among those agencies upon such equitable basis as may be determined by the State educational agency in accordance with basic criteria prescribed by the Commissioner. [For purposes of this subsection, the "average per pupil expenditure" in a State, or in the United States, shall be the aggregate current expenditures, during the second fiscal year preceding the fiscal year for which the computation is made, of all local educational agencies as defined in section 303(6)(A) in the State, or in the United States as the case may be, plus any direct current expenditures by the State for operation of such agencies (without regard to the sources of funds from which either of such expenditures are made), divided by the aggregate number of children in average daily attendance to whom such agencies provided free public education during such preceding year.]

(3)(A) If the maximum amount of the grant determined pursuant to paragraph (1) or (2) for any local educational agency for the fiscal year ending June 30, 1967, is greater than 50 per centum of the sum budgeted by that agency for current expenditures for that year (as determined pursuant to regulations of the Commissioner), such maximum amount shall be reduced to 50 per centum of such budgeted sum.

(B) In the case of local educational agencies which serve in whole or in part the same geographical area, and in the case of a local educational agency which provides free public education for a substantial number of children who reside in the school district of another local educational agency, the State educational agency may allocate the amount of the maximum grants for those agencies among them in such manner as it determines will best carry out the purposes of this [title] *part*.

(4) For purposes of this subsection, the term "State" does not include Puerto Rico, Guam, American Samoa, the Virgin Islands, and the Trust Territory of the Pacific Islands.

(5) In the case of a State agency which is directly responsible for providing free public education for handicapped children (including mentally retarded, hard of hearing, deaf, speech impaired, visually handicapped, seriously emotionally disturbed, crippled, or other health impaired children who by reason thereof require special education), the maximum grant which that agency shall be eligible to receive under this title for any fiscal year shall be an amount equal to the Federal percentage of the average per pupil expenditure in that State or, if greater, in the United States [(which for purposes of this sentence means the fifty States and the District of Columbia)] multiplied by the number of such children in average daily attendance, as determined by the Commissioner, at schools for handicapped children operated or supported by that State agency, in the most recent fiscal year for which satisfactory data are available. Such State agency shall use payments under this [title] *part* only for programs and projects (including the acquisition of equipment and where necessary the construction of school facilities) which are designed to meet the special educational needs of such children.

(6) A State educational agency which has submitted and had approved an application under section [205(c)] *105(c)* for any fiscal year shall be entitled to receive a grant for that year under this [title] *part* for establishing or improving programs for migratory children of migratory agricultural workers. The maximum total of grants which shall be available for use in any State for any fiscal year shall be an amount equal to the Federal percentage of the average per pupil expenditure *in that State, or, if greater,* in the United States multiplied by (A) the estimated number of such migratory children aged five to seventeen, inclusive, who reside in the State full time, and (B) the full-time equivalent of the estimated number of such migratory children aged five to seventeen, inclusive, who reside in the State part time, as determined by the Commissioner in accordance with regulations. [For purposes of this paragraph, the "average per pupil expenditure" in the United States shall be the aggregate current expenditures, during the second fiscal year preceding the fiscal year for which the computation is made, of all local educational agencies (as defined in section 303(6)(A)) in the United States (including only the fifty States and the District of Columbia), plus any direct current expenditures by States for operation of local educational agencies (without regard to the sources of funds from which either of such expenditures are made), divided by the aggregate number of children in average daily attendance to whom such agencies provided free public education during such preceding year.]

(7) In the case of a State agency which is directly responsible for providing free public education for children in institutions for neglected or delinquent children, the maximum grant which that agency shall be eligible to receive under this [title] *part* for any fiscal year shall be an amount equal to the Federal percentage of the average per pupil expenditure in that State *or, if greater, in the United States* multiplied by the number of such children in average daily attendance, as determined by the Commissioner, at schools for such children operated or supported by that State agency in the most recent fiscal year for which satisfactory data are available. Such State agency shall use payments under this [title] *part* only for programs and projects (including the acquisition of equipment and where necessary the construction of school facilities) which are designed to meet the special educational needs of such children.

(b) A local educational agency shall be eligible for a grant for a fiscal year under this [title] *part* only if it meets the following requirements with respect to the number of children aged five to seventeen, inclusive, described in clauses (A), (B), and (C) of the first sentence of paragraph (2) of subsection (a):

(1) In any case (except as provided in paragraph (3)) in which the Commissioner determines that satisfactory data for the purpose of this subsection as to the number of such children are available on a school district basis, the number of such children in the school district of such local educational agency shall be at least ten.

(2) In any other case, except as provided in paragraph (3), the number of children in the county which includes such local educational agency's school district shall be at least ten.

(3) In any case in which a county includes a part of the school district of the local educational agency concerned and the Commissioner has not determined that satisfactory data for the purpose of this subsection are available on a school district basis for all the local educational agencies for all the counties into which the school district of the local educational agency concerned extends, the eligibility requirement with respect to the number of children for such local educational agency shall be determined in accordance with regulations prescribed by the Commissioner for the purposes of this subsection.

(c) For the purposes of this section, the "Federal percentage" shall be 50 per centum and the "low-income factor" shall be $2,000 for the fiscal year ending June 30, 1966, and the fiscal year ending June 30, 1967. For the fiscal year ending June 30, 1968, *and for each of the three succeeding fiscal years,* they shall be 50 per centum and $3,000 respectively.

(d) For the purposes of this section, the Commissioner shall determine the number of children aged five to seventeen, inclusive, of families having an annual income of less than the low-income factor (as established pursuant to subsection (c)) on the basis of the most recent satisfactory data available from the Department of Commerce. At any time such data for a county are available in the Department of Commerce, such data shall be used in making calculations under this section. The Secretary of Health, Education, and Welfare shall determine the number of children of such ages from families receiving an annual income in excess of the low-income factor from payments under the program of aid to families with dependent children under a State plan approved under title IV of the Social Security Act, and the number of children of such ages living in institutions for neglected or delinquent children, or being supported in foster homes with public funds, on the basis of the [latest calendar or fiscal year data, whichever is later] *caseload data for the month of January of the* *preceding fiscal year*. When requested by the Commissioner, the Secretary of Commerce shall make a special estimate of the number of children of such ages from families having an annual income less than the low income factor (established pursuant to subsection (c)) in each county or school district, and the Commissioner is authorized to pay (either in advance or by way or reimbursement) the Secretary of Commerce the cost of making this special estimate. The Secretary of Commerce shall give consideration to any request of the chief executive of a State for the collection of additional census information.

(e) For purposes of this section, the "average per pupil expenditure" in a State, or in the United States, shall be the aggregate current expenditures, during the second fiscal year preceding the fiscal year for which the computation is made, of all local educational agencies as defined in section 303(6) (A) in the State, or in the United States (which for the purposes of this subsection means the fifty States and the District of Columbia), as the case may be, plus any direct current expenditures by the State for operation of such agencies (without regard to the sources of funds from which either of such expenditures are made), divided by the aggregate number of children in average daily attendance to whom such agencies provided free public education during such preceding year.

SEC. [204] *104*. * * * [Repealed by P.L. 89–750.]

APPLICATION

SEC. [205] *105*. (a) A local educational agency, may receive a grant under this [title] *part* for any fiscal year only upon application therefor approved by the appropriate State educational agency, upon its determination (consistent with such basic criteria as the Commissioner may establish)—

(1) that payments under this [title] *part* will be used for programs and projects (including the acquisition of equipment, and, where necessary, the construction of school facilities and plans made or to be made for such programs, projects, and facilities) (A) which are designed to meet the special educational needs of educationally deprived children in school attendance areas having high concentrations of children from low-income families and (B) which are of sufficient size, scope, and quality to give reasonable promise of substantial progress toward meeting those needs and to this end involve an expenditure of not less than $2,500, except that the State educational agency may with respect to any applicant reduce the $2,500 requirement if it determines that it would be impossible, for reasons such as distance or difficulty or travel, for the applicant to join effectively with other local educational agencies for the purpose of meeting the requirement; and nothing herein shall be deemed to preclude two or more local educational agencies from entering into agreements, and their option, for carrying out jointly operated programs and projects under this title: *Provided*, That the amount used for plans for any fiscal year shall not exceed 1 per centum of the maximum amount determined for that agency for that year pursuant to section [203] *103* or $2,000, whichever is greater.

(2) that, to the extent consistent with the number of educationally deprived children in the school district of the local educational agency who are enrolled in private elementary and secondary schools, such agency has made provision for including special educational services and arrangements (such as dual enrollment, educational radio and television, and mobile educational services and equipment) in which such children can participate;

(3) that the local educational agency has provided satisfactory assurance that the control of funds provided under this [title] *part*, and title to property derived therefrom shall be in a public agency for the uses and purposes provided in this [title] *part*, and that a public agency will administer such funds and property;

(4) in the case of any project for construction of school facilities, that the project is not inconsistent with overall State plans for the construction of school facilities and that the requirements of section [209] *109* will be complied with on all such construction projects;

(5) in the case of an application for payments for planning, (A) that the planning was or will be directly related to programs or projects to be carried out under this [title] *part*, and has resulted, or is reasonably likely to result, in a program or project which will be carried out under this [title] *part*, and (B) that planning funds are needed because of the innovative nature of the program or project or because the local educational agency lacks the resources necessary to plan adequately for programs and projects to be carried out under this [title] *part*.

(6) that effective procedures, including provision for appropriate objective measurements of educational achievement will be adopted for evaluating at least annually the effectiveness of the programs in meeting the special educational needs of educationally deprived children;

(7) that the local educational agency will make an annual report and such other reports to the State educational agency, in such form and containing such information, as may be reasonably necessary to enable the State educational agency to perform its duties under this [title] *part* including information relating to the educational achievement of students participating in programs carried out under this [title] *part* and will keep such records and afford such access thereto as the State educational agency may find necessary to assure the correctness and verification of such reports;

(8) in the case of a project for the construction of school facilities, that, in developing plans for such facilities due consideration has been given to compliance with such standards as the Secretary may prescribe or approve in order to insure that facilities constructed with the use of federal funds under this [title] *part* shall be, to the extent appropriate in view of the uses to be made of the facilities, accessible to and usable by handicapped persons;

(9) that effective procedures will be adopted for acquiring and disseminating to teachers and administrators significant information derived from educational research, demonstration, and similar projects, and for adopting, where appropriate, promising educational practices developed through such projects;

(10) in the case of a project for the construction of school facilities, that, in developing plans for such facilities, due consideration has been given to excellence of architecture and design, and to the inclusion of works of art (not representing more than 1 per centum of the cost of the project); *and*

(11) in the case of projects involving the use of education aides, the local educational agency sets forth well-developed plans providing for coordinated programs of training in which education aides and the professional staff whom they are assisting will participate together.

(b) The State educational agency shall not finally disapprove in whole or in part any application for funds under this [title] *part* without first affording the local educational agency submitting the application reasonable notice and opportunity for a hearing.

(c)(1) A State educational agency or a combination of such agencies may apply for a grant for any fiscal year under this [title] *part* to establish or improve, either directly or through local educational agencies, programs of education for migratory children of migratory agricultural workers. The Commissioner may approve such an application only upon his determination—

(A) that payments will be used for programs and projects (including the acquisition of equipment and where necessary the construction of school facilities) which are designed to meet the special educational needs of migratory children of migratory agricultural workers, and to coordinate these programs and projects with similar programs and projects in other States, including transmittal of pertinent information with respect to school records of such children;

(B) that in planning and carrying out programs and projects there has been and will be appropriate coordination with programs administered under part B of title III of the Economic Opportunity Act of 1964; and

(C) that such programs and projects will be administered and carried out in a manner consistent with the basic objectives of clauses (1)(B) and (2) through [(8)]*(11)* of subsection (a), and of section [206] *106*(a).

The Commissioner shall not finally disapprove an application of a State educational agency under this paragraph except after reasonable notice and opportunity for a hearing to the State educational agency.

(2) If the Commissioner determines that a State is unable or unwilling to conduct educational programs of migratory children of migratory agricultural workers, or that it would result in more efficient and economic administration, or that it would add substantially to the welfare or educational attainment of such children, he may make special arrangements with other public or nonprofit private agencies to carry out the purposes of this subsection in one or more States, and for this purpose he may set aside on an equitable basis and use all or part of the maximum total of grants available for such State or States.

(3) For purposes of this subsection, with the concurrence of his parents, a migratory child of a migratory agricultural worker shall be deemed to continue to be such a child for a period, not in excess of five years, during which he resides in the area served by the agency carrying on a program or project under this subsection.

ASSURANCES FROM STATES

SEC. [206] *106*. (a) Any State desiring to participate under this [title] *part* (except with respect to the program described in section [205] *105*(c) relating to migratory children of migratory agricultural workers) shall submit through its State educational agency to the Commissioner an application, in such detail as the Commissioner deems necessary, which provides satisfactory assurance—

(1) that, except as provided in section [207] *107*(b), payments under this [title] *part* will be used only for programs and projects which have been approved by the State educational agency pursuant to section [205] *105*(a) and which meet the applicable requirements of that section and of section [203] *103*(a)(5) and that such agency will in all other respects comply with the provisions of this [title] *part*, including the enforcement of any obligations imposed upon a local educational agency under section [205] *105*(a);

(2) that such fiscal control and fund accounting procedures will be adopted as may be necessary to assure proper disbursement of, and accounting for, Federal funds paid to the State (including such funds paid by the State to local educational agencies) under this [title] *part*; and

(3) that the State educational agency will make to the Commissioner (A) periodic reports (including the results of objective measurements required by section [205]

105(a)[(5)](*6*)) evaluating the effectiveness of payments under this title and of particular programs assisted under it in improving the educational attainment of educationally deprived children, and (B) such other reports as may be reasonably necessary to enable the Commissioner to perform his duties under this [title] *part* (including such reports as he may require to determine the amounts which the local educational agencies of that State are eligible to receive for any fiscal year), and assurance that such agency will keep such records and afford such access thereto as the Commissioner may find necessary to assure the correctness and verification of such reports.

(b) The Commissioner shall approve an application which meets the requirements specified in subsection (a), and he shall not finally disapprove an application except after reasonable notice and opportunity for a hearing to the State educational agency.

PAYMENT

Sec. [207] *107*. (a)(1) The Commission shall, subject to the provisions of section [208] *108*, from time to time pay to each State, in advance or otherwise, the amount which it and the local educational agencies of that State are eligible to receive under this [title] *part*. Such payments shall take into account the extent (if any) to which any previous payment to such State educational agency under this [title] *part* (whether or not in the same fiscal year) was greater or less than the amount which should have been paid to it.

(2) From the funds paid to it pursuant to paragraph (1) each State educational agency shall distribute to each local educational agency of the State which is not ineligible by reason of section [203] *103*(b) and which has submitted an application approved pursuant to section [205] *105*(a) the amount for which such application has been approved, except that this amount shall not exceed the maximum amount determined for that agency pursuant to section [203] *103*.

(b) The Commissioner is authorized to pay to each State amounts equal to the amounts expended by it for the proper and efficient performance of its duties under this [title] *part* (including technical assistance for the measurements and evaluations required by section [205] *105*(a)[(5)] (*6*)), except that the total of such payments in any fiscal year shall not exceed—

(1) 1 per centum of the total maximum grants for State and local educational agencies of the State as determined for that year pursuant to sections [203] *103*, and [208] *108*, or

(2) [$75,000] *$150,000*, or $25,000 in the case of Puerto Rico, Wake Island, Guam, American Samoa, the Virgin Islands, or the Trust Territory of the Pacific Islands,

whichever is greater.

(c)(1) No payments shall be made under this [title] *part* for any fiscal year to a State which has taken into consideration payments under this [title] *part* in determining the eligibility of any local educational agency in that State for State aid, or the amount of that aid, with respect to the free public education of children during that year of the proceeding fiscal year.

(2) No payments shall be made under this [title] *part* to any local educational agency for any fiscal year unless the State educational agency finds that the combined fiscal effort (as determined in accordance with regulations of the Commissioner) of that agency and the State with respect to the provision of free public education by that agency for the preceding fiscal year was not less than such combined fiscal effort for that purpose for the second preceding fiscal year.

ADJUSTMENTS WHERE NECESSITATED BY APPROPRIATIONS

Sec. [208] *108*. (*a*) [If the sums appropriated for any fiscal year for making the payments provided in this title are not sufficient to pay in full the total amount which all local and State educational agencies are eligible to receive under this title for such year, such amounts shall be reduced ratably.] *If the sums appropriated for any fiscal year for making the payments provided in this part are not sufficient to pay in full the total amounts which all local and State educational agencies are eligible to receive under this part for such year—*

(1) the amount available for each grant to a State agency eligible for a grant under paragraph (5), (6), or (7) of section 203(a) shall be equal to the maximum grant as computed under such paragraph;

(2) the minimum aggregate amount available for each county, for grants to local educational agencies having school districts in such county, shall be equal to the aggregate amount allocated for such county from appropriations for the preceding fiscal year: Provided, That, if the total of such allocations for all counties exceeds the amount remaining after allocations are made under paragraphs (1) and (3) of this sentence, the amounts of allocations pursuant to this paragraph shall be reduced ratably;

(3) the minimum amount available for payments to each State educational agency for the purposes of section 207(b) shall be equal to 1 per centum of the aggregate amounts available within that State pursuant to paragraphs (1) and (2) of this sentence (including, when applicable, the proviso to paragraph (2)), except that no State shall receive less than the minimum amount provided for in section 207(b)(2); and

(4) any amount of such appropriations remainder in accordance with section 203(a) scribed pursuant to the preceding paragraphs shall be allocated by computing such remainder in accordance with section 203(a) (2) and section 207(b)(1), as ratably reduced: Provided, That the aggregate amount allocated to any State under this paragraph and paragraph (3) for the purposes of section 207(b) shall not, except where necessary to provide the minimum amount specified in section 207(b)(2), exceed 1 per centum of the aggregate amount computed for other purposes under this paragraph and paragraphs (1) and (2) (including the proviso to paragraph (2)).

In case additional funds became available for making payments under this [title] *part* for that year, such reduced amounts shall be increased on the same basis that they were reduced.

(b) In order to permit reductions made pursuant to this section for any fiscal year to be offset at least in part, the Commissioner may set dates by which (1) State educational agencies must certify to him the amounts for which the applications of educational agencies have been or will be approved by the State, and (2) State educational agencies referred to in section [203] *103*(a)(6) must file applications. The excess of (1) the total of the amounts of the maximum grants computed for all education agencies of any State under section [2] *103*, as ratably reduced under this section over (2) the total of the amounts for which applications of agencies of that State referred to in clauses (1) and (2) of the preceding sentence are approved shall be available, in accordance with regulations, first to educational agencies in that State and then to educational agencies in other States to offset proportionately ratable reductions made under this section.

(*c*) *This section shall not apply to States to which allotments are made under section 203*(*a*)(*1*).

(*d*) *In the case of any State* (*or multicounty part thereof*) *that consists of a single school district, the term "county", as used in this section, means such State* (*or multicounty part thereof*).

Part B—Incentive Grants

Special Incentive Grants

Sec. 121. (*a*) *A special incentive grant shall be made for any fiscal year beginning after June 30, 1967, to the State educational agency of each State which has an effort index for such year that exceeds the national effort index for such year. The amount of such special incentive grant shall be determined by multiplying the amount of $1 for each 0.01 per centum by which such State's effort index for such year exceeds the national effort index for such year times the aggregate number of children counted for purposes of entitling local educational agencies within such State to basic grants in accordance with clauses (2), (5), (6), and (7) of section 203*(*a*) *of this Act. If the sum of the amounts so determined for all the States exceeds the amount appropriated pursuant to this part for any fiscal year, such amounts shall be ratably reduced. No State agency shall receive in any year a grant pursuant to this section which is in excess of 15 per centum of the total amount appropriated for such year for the purpose of this section. The State educational agency shall distribute such grant to those local educational agencies in such State which are in the greatest need of additional funds, for the purposes set forth in section 205*(*a*), *and amounts so distributed shall be used by such agencies in accordance with the provisions governing the use of grants to such agencies under this title.*

(*b*) *Grants pursuant to this section shall be made upon application containing such information as the Commissioner may require for the purpose of this section. The Commissioner shall not finally disapprove such an application except after reasonable notice and opportunity for a hearing to the State educational agency.*

(*c*) *For the purpose of this section the term "State effort index" means the per centum expressing the ratio of expenditures from all sources in a State for public elementary and secondary education to the total personal income in such State, and the term "national effort index" means the per centum expressing the ratio of such expenditures in all States to the total personal income in all States.*

(*d*) *For the purpose of making grants under this part there are authorized to be appropriated not in excess of $50,000,000 each for the fiscal year ending June 30, 1968 and the three succeeding fiscal years.*

Part C—General Provisions

LABOR STANDARDS

Sec. [209] *131*. All laborers and mechanics employed by contractors or subcontractors on all construction projects assisted under this title shall be paid wages at rates not less than those prevailing on similar construction in the locality as determined by the Secretary of Labor in accordance with the Davis-Bacon Act, as amended (40 U.S.C. 276a, 276a–5). The Secretary of Labor shall have with respect to the labor standards specified in this section the authority and functions set forth in Reorganization Plan Numbered 14 of 1950 (15 F.R. 2176; 5 U.S.C. 133z–15) and section 2 of the Act of June 13, 1934, as amended (40 U.S.C. 276c).

WITHHOLDING

Sec. [210] *132*. Whenever the Commissioner, after reasonable notice and opportunity for hearing to any State educational agency, finds that there has been a failure to comply substantially with any assurance set forth in the application of that State approved under section [205] *105*(c) [or 206] *106*(b) *or 221*(*b*), the Commissioner shall notify the agency that further payments will not be made to the State under this title (or, in his discretion, that the State educational agency shall not make further payments under this title be specified local educational agencies affected by the failure) until he is satisfied that there is no longer any such failure to comply. Until he is so satisfied, no further payments shall be made to the State under this title, or payments by the State educational agency under this title shall be limited to local educational agencies not affected by the failure as the case may be.

JUDICIAL REVIEW

SEC. [211] *133*. (a) If any State is dissatisfied with the Commissioner's final action with respect to the approval of its application submitted under section [205] *105*(c) [or 206] *106*(*b*) *or 221*(*b*) or with his final action under section [210] *110*, such State may, within sixty days after notice of such action, file with the United States court of appeals for the circuit in which such State is located a petition for review of that action. A copy of the petition shall be forthwith transmitted by the clerk of the court to the Commissioner. The Commissioner thereupon shall file in the court the record of the proceedings on which he based his action, as provided in section 2112 of title 28, United States Code.

(b) The findings of fact by the Commissioner, if supported by substantial evidence, shall be conclusive; but the court, for good cause shown, may remand the case to the Commissioner to take further evidence, and the Commissioner may thereupon make new or modified findings of fact and may modify his previous action, and shall file in the court the record of the further proceedings. Such new or modified findings of fact shall likewise be conclusive if supported by substantial evidence.

(c) Upon the filing of such petition, the court shall have jurisdiction to affirm the action of the Commissioner or set it aside, in whole or in part. The judgment of the court shall be subject to review by the Supreme Court of the United States upon certiorari or certification as provided in section 1254 of title 28, United States Code.

NATIONAL ADVISORY COUNCIL

SEC. [212] *134*. (a) The President shall, within ninety days after the enactment of this title appoint a National Advisory Council on the Education of Disadvantaged Children for the purpose of reviewing the administration and operation of this title, including its effectiveness in improving the educational attainment of educationally deprived children, and making recommendations for the improvement of this title and its administration and operation. These recommendations shall take into consideration experience gained under this and other Federal educational programs for disadvantaged children and, to the extent appropriate, experience gained under other public and private educational programs for disadvantaged children.

(b) The Council shall be appointed by the President without regard to the civil service laws and shall consist of twelve persons. When requested by the President, the Secretary of Health, Education, and Welfare shall engage such technical assistance as may be required to carry out the functions of the Council, and the Secretary shall make available to the Council such secretarial, clerical, and other assistance and such pertinent data prepared by the Department of Health, Education, and Welfare as it may require to carry out such functions.

(c) The Council shall make an annual report of its findings and recommendations (including recommendations for changes in the provisions of this title) to the President and the Congress not later than January 31 of each calendar year beginning after the enactment of this title. The President is requested to transmit to the Congress such comments and recommendations as he may have with respect to such report.

(d) Members of the Council who are not regular full-time employees of the United States shall, while serving on business of the Council, be entitled to receive compensation at rates fixed by the President, but not exceeding $100 per day, including travel time; and while so serving away from their homes or regular places of business, they may be allowed travel expenses, including per diem in lieu of subsistence, as authorized by section 5 of the Administrative Expenses Act of 1946 (5 U.S.C. 73b–2) for persons in Government service employed intermittently.

TREATMENT OF EARNINGS FOR PURPOSES OF AID TO FAMILIES WITH DEPENDENT CHILDREN

SEC. [213] *135*. (a) Notwithstanding the provisions of title IV of the Social Security Act, a State plan approved under section 402 of such Act shall provide that for a period of not less than twelve months, and may provide that for a period of not more than twenty-four months, the first $85 earned by any person in any month for services rendered to any program assisted under this title of this Act shall not be regarded (A) in determining the need of such person under such approved State plan or (B) in determining the need of any other individual under such approved State plan.

(b) Notwithstanding the provisions of subsection (a) of this section, no funds to which a State is otherwise entitled under title IV of the Social Security Act for any period before the fourth month after the adjournment of the State's first regular legislative session which adjourns more than sixty days after enactment of the Elementary and Secondary Education Amendments of 1966, shall be withheld by reason of any action taken pursuant to a State statute which prevents such State from complying with the requirements of subsection (a) of this section.

SHORT TITLE

SEC. [214] *136*. This title may be cited as "Title I of the Elementary and Secondary Education Act of 1965."

TITLE III—GENERAL

* * * * *

DEFINITIONS

SEC. 303. For the purposes of this Act—

(1) The term "Federal property" means real property which is owned by the United States or is leased by the United States, and which is not subject to taxation by any State or any political subdivision of a State or by the District of Columbia. [Such term includes real property which is owned by the United States and leased therefrom and the improvements thereon, even though the lessee's interest, or any improvement on such property, is subject to taxation by a State or a political subdivision of a State or by the District of Columbia.] Such term [also] includes (A) except for purposes of section 6, real property held in trust by the United States for individual Indians or Indian tribes, and real property held by individual Indians or Indian tribes which is subject to restrictions on alienation imposed by the United States, (B) for one year beyond the end of the fiscal year in which occurred the sale or transfer thereof by the United States, any property considered prior to such sale or transfer to be Federal property for the purposes of this Act, and (C) any school which is providing flight training to members of the Air Force under contractual arrangements with the Department of the Air Force at an airport which is owned by a State or a political subdivision of a State. *Such term also includes any interest in Federal property (as defined in the foregoing provisions of this paragraph) under an easement, lease, license, permit, or other arrangement, as well as any improvements of any nature (other than pipelines or utility lines) on such property even though such interests or improvements are subject to taxation by a State or political subdivision of a State or by the District of Columbia.* Notwithstanding the foregoing provisions of this paragraph, such term does not include, (A) any real property used for a labor supply center, labor home, or labor camp or migratory farmworkers, (B) any real property under the jurisdiction of the Post Office Department and used primarily for the provision of postal services, or (C) any low-rent housing project held under title II of the National Industrial Recovery Act, the Emergency Relief Appropriation Act of 1935, the United States Housing Act of 1937, the Act of June 28, 1940 (Public Law 671 of the Seventy-sixth Congress), or any law amendatory of or supplementary to any of such Acts.

* * * * *

SCHOOL CONSTRUCTION IN AREAS AFFECTED BY FEDERAL ACTIVITIES

(Public Law 815, 81st Cong.)

An act Relating to the construction of school facilities in areas affected by Federal activities, and for other purposes

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled,

* * * * *

ESTABLISHMENT OF PRIORITIES

SEC. 3. The Commissioner shall from time to time set dates by which applications for payments under this Act with respect to construction projects must be filed, except that the last such date with respect to applications for payments on account of children referred to in paragraphs (2) or (3) of section 5(a) shall be not later than [June 30, 1967] *June 30, 1971*. The Commissioner shall by regulation prescribe an order of priority, based on relative urgency of need, to be followed in approving applications in the event the funds appropriated under this Act and remaining available on any such date for payment to local educational agencies are less than the Federal share of the cost of the projects with respect to which applications have been filed prior to such date (and for which funds under this Act have not already been obligated). Only applications meeting the conditions for approval under this Act (other than section 6(b)(2)(C) shall be considered applications for purposes of the preceding sentence.

* * * * *

LIMITATION ON TOTAL PAYMENTS TO ANY LOCAL EDUCATIONAL AGENCY

SEC. 5. (a) Subject to the limitations in subsections (c) and (d), the total of the payments to a local educational agency under this Act may not exceed the sum of the following:

(1) the estimated increase, since the base year, in the number of children residing on Federal property, (A) who so resided with a parent employed on Federal property (situated in whole or in part in the same State as the school district of such agency or within reasonable commuting distance from such school district), or (B) who had a parent who was on active duty in the uniformed services (as defined in section 102 of the Career Compensation Act of 1949) multiplied by 95 per centum of the average per pupil cost of constructing minimum school facilities in the State in which the school district of such agency is situated; and

(2) the estimated increase, since the base year, in the number of children (A) residing on Federal property, or (B) residing with a parent employed on Federal property (situated in whole or in part in the same State as the school district of such agency or within reasonable commuting distance from such school district), or (C) who had a parent who was on active duty in the uniformed services (as defined in section 102 of the Career Compensation Act of 1949), multiplied by 50 per centum of the average per pupil cost of constructing minimum school facilities in the State in which the school district of such agency is situated; and

(3) the estimated increase, since the base year, in the number of children whose membership results directly from activities of the United States (carried on either directly or through a contractor), multiplied by 45 per centum of the average per pupil cost of constructing minimum school facilities in the State in which the school district of such agency is situated. For purposes of this paragraph, the Commissioner shall not consider as activities of the United States those activities which are carried on in connection with real property excluded from the definition of Federal property by the last sentence of paragraph (1) of section 15, but shall (if the local educational agency so elects pursuant to subsection (b)) consider as children whose membership results directly from activities of the United States children residing on Federal property or residing with a parent employed on Federal property; and

(4) for the fiscal year ending June 30, 1967, the estimated number of children, without regard to the limitation in subsection (d), whose membership in the schools of such local educational agency resulted from a change in residence from land transferred to Mexico as part of a relocation of an international boundary of the United States, multiplied by 50 per centum of the average per pupil cost of constructing minimum school facilities in the State in which the school district of such agency is situated; *but if, by reason of any other provision of law, this clause is not considered in computing the maximum payments a local educational agency may receive for the fiscal year ending June 30, 1967, the additional amount such agency would have been entitled to receive shall be added to such agency's entitlement for the first fiscal year for which funds appropriated to carry out this Act may be used for such purpose.*

In computing for any local educational agency the number of children in an increase under paragraph (1), (2), or (3), the estimated number of children described in such paragraph who will be in the membership of the schools of such agency at the close of the increase period shall be compared with the estimated number of such children in the average daily membership of the schools of such agency during the base year.

(b) If two or more of the paragraphs of subsection (a) apply to a child, the local educational agency shall elect which of such paragraphs shall apply to such child, except that, notwithstanding the election of a local educational agency to have paragraph (2) apply to a child instead of paragraph (1), the determination of the maximum amount for such agency under subsection (a) shall be made without regard to such election.

(c) A local educational agency shall not be eligible to have any amount included in its maximum by reason of paragraph (1), (2), or (3) of subsection (a) unless the increase in children referred to in such paragraph, prior to the application of the limitation in subsection (d), is at least twenty and is equal to at least 6 per centum in the case of paragraph (1) or (2), and 10 per centum in the case of paragraph (3), of the number of all children who were in the average daily membership of the schools of such agency during the base year, and unless, in the case of paragraph (3), the construction of additional minimum school facilities for the number of children in such increase will, in the judgment of the Commissioner, impose an undue financial burden on the taxing and borrowing authority of such agency: *Provided*, That children residing on any housing property which, prior to sale or transfer by the United States, was considered to be Federal property for the purposes of this Act, shall not be considered as having been federally connected in determining the eligibility of the local educational agency under this subsection.

(d) If (1) the estimated number of nonfederally connected children who will be in the membership of the schools of a local educational agency at the close of the increase period is less than (2) 106 per centum of the number of such children who were in the average daily membership of such agency during the base year, the total number of children counted for purposes of subsection (a) with respect to such agency shall be reduced by the difference between (1) and (2) hereof. For purposes of this subsection, all children in the membership of a local educational agency shall be counted as nonfederally connected children except children whose membership in the base year and increase period was compared in computing an increase which meets the requirements of subsection (c).

(e) Notwithstanding the provisions of subsections [(c) and (d)] *(c), (d), and (f)* of this section, whenever and to extent that, in his judgment, exceptional circumstances exist which make such action necessary to avoid inequity and avoid defeating the purposes of this Act, the Commissioner may do any one or more of the following: (1) he may waive or reduce the minimum number requirement or any percentage requirement or requirements in subsection (c); (2) he may waive the requirement contained in the first sentence of subsection (d) or reduce the percentage specified in clause (2) of such sentence; *or (3) he may waive or reduce the requirement contained in subsection (f).*

(f) In determining under the section the total of the payments which may be made to a local educational agency on the basis of any application, the total number of children counted for purposes of paragraph (1), (2), or (3), as the case may be, of subsection (a) may not exceed—

(1) the number of children whose membership at the close of the increase period for the application is compared with membership in the base period for purposes of that paragraph, minus

(2) the number of such children whose membership at the close of the increase period was compared with membership in the base year for purposes of such paragraph under the last previous application, if any, of the agency on the basis of which any payment has been or may be made to that agency.

* * * * *

SCHOOL CONSTRUCTION ASSISTANCE IN OTHER FEDERALLY AFFECTED AREAS

SEC. 14. (a) If the Commissioner determines with respect to any local educational agency that—

(1) such agency is providing or, upon completion of the school facilities for which provision is made herein, will provide free public education for children who resides on [Federal property], *Indian lands,* and whose membership in the schools of such agency has not formed and will not form the basis for payments under other provisions of this Act, and that the total number of such children represents a substantial percentage of the total number of children for whom such agency provides free public education, *or that such Indian lands constitute a substantial part of the school district of such local educational agency,* or that the total number of such children who reside on Indian lands located outside the school district of such agency equals or exceeds 100;

(2) the immunity of such [Federal property] *Indian lands* to taxation by such agency has created a substantial and continuing impairment of its ability to finance needed school facilities;

(3) such agency is making a reasonable tax effort and is exercising due diligence in availing itself of State and other financial assistance available for the purpose; and

(4) such agency does not have sufficient funds available to it from other Federal, State, and local sources to provide the minimum school facilities required for free public education [in its school district] *of a substantial percentage of the children in the membership of its schools,*

he may provide the additional assistance necessary to enable such agency to provide such facilities, upon such terms and in such amounts (subject to the provisions of this section) as the Commissioner may consider to be in the public interest; but such additional assistance may not exceed the portion of the cost of such facilities which the Commissioner estimates [attributable to children who reside on Federal property, and which] has not been, and is not to be, recovered by the local educational agency from other sources, including payments by the United States under any other provisions of this Act or any other law. Notwithstanding the provisions of this subsection, the Commissioner may waive the percentage requirement in paragraph (1) [in the case of any application for additional assistance on account of children who reside on Indian lands] whenever, in his judgment, exceptional circumstances exist which make such action necessary to avoid inequity and avoid defeating the purpose of this section. Assistance may be furnished under this subsection without regard to paragraph (2) (but subject to the other provisions of this subsection and [subsection (c)] *subsection (d)* to any local educational agency which provides free public education for children who reside on Indian lands located outside its school district. For purpose of this subsection "Indian lands" means Indian reservations or other real property referred to in the [third] *second* sentence of section 15(1).

(b) *If the Commissioner determines with respect to any local educational agency that—*

(1) such agency is providing or, upon completion of the school facilities for which provision is made herein, will provide free public education for children who reside on Indian lands, and whose membership in the schools of such agency has not formed and will not form the basis for payments under other provisions of this Act, and that the total number of such children represents a substantial percentage of the total number of children for whom such agency provides free public education, or that such Indian lands constitute a substantial part of the school district of such local educational agency, or that the total number of such children who reside on Indian lands located outside the school district of such agency equals or exceeds one hundred; and

(2) the immunity of such Indian lands to taxation by such agency has created a substantial and continuing impairment of its ability to finance needed school facilities;

he may, upon such terms and in such amounts (subject to the provisions of this section) as the Commissioner may consider to be in the public interest, provide the additional assistance necessary to enable such agency to provide the minimum school facilities required for free public education of children in the membership of the schools of such agency who reside on Indian lands; but such additional assistance may not exceed the portion of the cost of constructing such facilities which the Commissioner estimates has not been, and is not to be, recovered by the local educational agency from other sources, including payments by the United States under any other provisions of this Act or any other law. Notwithstanding the provisions of this subsection, the Commissioner may waive the percentage requirement in paragraph (1) whenever, in his judgment, exceptional circumstances exist which make such action necessary to avoid inequity and avoid defeating the purposes of this section. Assistance may be furnished under this subsection without regard to paragraph (2) (but subject to the other provisions of this subsection and subsection (d)) *to any local educational agency which provides free public education for children who reside on Indian lands located outside its school district. For purposes of this subsection "Indian lands" means Indian reservations or other real property referred to in the second sentence of section 15(1).*

[(b)] *(c)* There are hereby authorized to be appropriated for each fiscal year such sums as may be necessary to carry out the provisions of this section. There are also authorized to be appropriated such sums as may be necessary for administration of such provisions. Amounts so appropriated, other than amounts appropriated for administration, shall remain available until expended.

[(c)] *(d)* No payment may be made to any local educational agency under subsection (a) *or (b)* except upon application therefor which is submitted through the appropriate State educational agency and is filed with the Commissioner in accordance with regulations prescribed by him, and which meets the requirements of section 6(b)(1). In determining the order in which such applications shall be approved, the Commissioner shall consider the relative educational and financial needs of the local educational agencies which have submitted approvable applications and the nature and extent of the Federal responsibility. No payment may be made under subsection (a) unless the Commissioner finds, after consultation with the State and local educational agencies, that the project or projects with respect to which it is made are not inconsistent with over-all State plans for the construction of school facilities. All determinations made by the Commissioner under this section shall be made only after consultation with the appropriate State educational agency and the local educational agency.

[(d)] *(e)* Amounts paid by the Commissioner to local educational agencies under subsection (a) *or (b)* may be paid in advance of, or by way of reimbursement for, work performed or purchases made pursuant to the agreement with the Commissioner under this section, and may be paid in such installments as the Commissioner may determine. Any funds paid to a local educational agency and not expended or otherwise used for the purpose for which paid shall be repaid to the Treasury of the United States.

[(e)] *(f)* None of the provisions of sections 1 to 10, both inclusive, other than section 6(b)(1), shall apply with respect to determinations made under this section.

DEFINITIONS

SEC. 15. For the purposes of this Act—

(1) The term "Federal property" means real property which is owned by the United States or is leased by the United States, and which is not subject to taxation by any State or any political subdivision of a State or by the District of Columbia. [Such term includes real property which is owned by the United States and leased therefrom and the improvements thereon, even though the lessee's interest, or any improvement on such property, is subject to taxation by a State or a political subdivision of a State or by the District of Columbia.] Such term [also] includes (A) except for purposes of section 6, real property held in trust by the United States for individual Indians or Indian tribes, and real property held by individual Indians or Indian tribes which is subject to restrictions on alienation imposed by the United States, (B) for one year beyond the end of the fiscal year in which occurred the sale or transfer thereof by the United States, any property considered prior to such sale or transfer to be Federal property for the purposes of this Act, and (C) any school which is providing flight training to members of the Air Force under contractual arrangements with the Department of the Air Force at an airport which is owned by a State or a political subdivision of a State. *Such term also includes any interest in Federal property (as defined in the foregoing provisions of this paragraph) under an easement, lease, license, permit, or other arrangement, as well as any improvements of any nature (other than pipelines or utility lines) on such property even though such interests or improvements are subject to taxation by a State or political subdivision of a State or by the District of Columbia.* Notwithstanding the foregoing provisions of this paragraph, such term does not include, (A) any real property used for a labor supply center, labor home, or labor camp of migratory farmworkers, (B) any real property under the jurisdiction of the Post Office Department and used primarily for the provision of postal services, or (C) any low-rent housing project held under title II of the National Industrial Recovery Act, the Emergency Relief Appropriations Act of 1935, the United States Housing Act of 1937, the Act of June 28, 1940 (Public Law 671 of the Seventy-sixth Congress), or any law amendatory of or supplementary to any of such Acts.

* * * * *

(15) The term "base year" means the third or fourth regular school year preceding the fiscal year in which an application was filed under this Act, as may be designated in the application, except that in the case of an application based on children referred to in paragraph (2) or (3) of section 5(a), the base year shall in no event be later than the regular school year [1962–1963] *1966–1967;* and

* * * * *

SCHOOL CONSTRUCTION ASSISTANCE IN [MAJOR DISASTER AREAS]

Cases of certain disasters

[SEC. 16. (a) If the Director of the Office of Emergency Planning determines with respect to any local educational agency that—

[(1)(A) such agency is located in whole or in part within an area which, after August 30, 1965, and prior to July 1, 1967, has suffered a major disaster as a result of any flood, drought, fire, hurricane, earthquake, storm, or other catastrophe which, in the determination of the President pursuant to section 2(a) of the Act of September 30, 1950 (42 U.S.C. 1855a(a)), is or threatens to be of sufficient severity and magnitude to warrant disaster assistance by the Federal Government, and

[(B) the Governor of the State in which such agency is located has certified the need for disaster assistance under this section, and has given assurance of expenditure of a reasonable amount of the funds of the government of such State, or of any political subdivision thereof, for the same or similar purposes with respect to such catastrophe,

and if the Commissioner determines with respect to such local educational agency that—

[(2) public elementary or secondary school facilities of such agency have been destroyed or seriously damaged as a result of this major disaster;

[(3) such agency is making a reasonable tax effort and is exercising due diligence in availing itself of State and other financial assistance available for the replacement or restoration of such school facilities;

[(4) such agency does not have sufficient funds available to it from State, local, and other Federal sources (including funds) available under other provisions of this Act), and from the proceeds of insurance on such school facilities, to provide the minimum school facilities needed for the restoration or replacement of the schools facilities so destroyed or seriously damaged; and

[(5) to the extent that the operation of private elementary and secondary schools in the school attendance area of the local educational agency has been disrupted or impaired by such disaster, such local educational agency has complied with the provisions of section 7(a)(3) of the Act of September 30, 1950 (Public Law 874, Eighty-first Congress), with respect to provisions for the conduct of educational programs under public auspices and administration in which children enrolled in such private elementary and secondary schools may attend and participate, the Commissioner may provide the additional assistance necessary to enable such agency to provide such facilities, upon such terms and in such amounts (subject to the provisions of this section) as the Commissioner may consider to be in the public interest; but such additional assistance, plus the amount which he determines to be available from State, local, and other Federal sources (including funds available under the other provisions of this Act), and from the proceeds of insurance, may not exceed the cost of construction incident to the restoration or replacement of the school facilities destroyed or damaged as a result of the disaster. In any case deemed appropriate by the Commissioner such assistance may be in the form of a repayable advance subject to such terms and conditions as he considers to be in the public interest.]

Sec. 16. (a) In any case in which—

(1)(A) the Director of the Office of Emergency Planning determines with respect to any local educational agency (including for the purpose of this section any other public agency which operates schools providing technical, vocational, or other special education to children of elementary or secondary school age) that such agency is located in whole or in part within an area which, after August 30, 1965, and prior to July 1, 1971, has suffered a major disaster as the result of any flood, drought, fire, hurricane, earthquake, storm, or other catastrophe which, in the determination of the President pursuant to section 2(a) of the Act of September 30 1950 (42 U.S.C. 1855a(a)), is or threatens to be of sufficient severity or magnitude to warrant disaster assistance by the Federal Government; or

(B) the Commissioner determines with respect to any such agency that public elementary or secondary school facilities (or, in the case of a public agency other than a local educational agency, school facilities providing technical, vocational, or other special education to children of elementary or secondary school age) of such agency have been destroyed or seriously damaged as a result of fire, flood, hurricane, earthquake, storm, malicious action of any person known or unknown, or other catastrophe; and

(2) the Governor of the State in which such agency is located has certified the need for disaster assistance under this section, and has given assurance of expenditure of a reasonable amount of the funds of the government of such State, or of any political subdivision thereof, for the same or similar purposes with respect to such catastrophe;

and if the Commissioner determines with respect to such agency that—

(3) as a result of such major disaster, (A) public elementary or secondary school facilities of such agency (or, in the case of a public agency other than a local educational agency, school facilities providing technical, vocational, or other special education to children of elementary or secondary school age) have been destroyed or seriously damaged, or (B) private elementary or secondary school facilities serving children who reside in the area served by such agency have been destroyed and will not be replaced, thereby increasing the need of such agency for school facilities;

(4) such agency is utilizing or will utilize all State and other financial assistance available for the replacement or restoration of such school facilities;

(5) such agency does not have sufficient funds available to it from State, local, and other Federal sources (including funds available under other provisions of this Act), and from the proceeds of insurance on such school facilities, and requires an amount of

additional assistance equal to at least $1,000 or one-half of 1 per centum of such agency's current operating expenditures during the fiscal year preceding the one in which such disaster occurred, whichever is less, to provide the minimum school facilities needed (A) for the restoration or replacement of the school facilities of such agency so destroyed or seriously damaged or (B) to serve, in facilities of such agency, children who but for the destruction of the private facilities referred to in clause (3) (B) would be served by such private facilities; and

(6) in the case of any such major disaster, to the extent that the operation of private elementary and secondary schools in the school attendance area of the local educational agency has been disrupted or impaired by such disaster, such local educational agency has complied with the provisions of section 7(a) (4) of the Act of September 30, 1950 (Public Law 874, Eighty-first Congress), with respect to provisions for the conduct of educational programs under public auspices and administration in which children enrolled in such private elementary and secondary schools may attend and participate,

the Commissioner may provide the additional assistance necessary to enable such agency to provide such facilities, upon such terms and in such amounts (subject to the provisions of this section) as the Commissioner may consider to be in the public interest; but such additional assistance, plus the amount which he determines to be available from State, local, and other Federal sources (including funds available under other provisions of this Act), and from the proceeds of insurance, may not exceed the cost of construction incident to the restoration or replacement of the school facilities destroyed or damaged as a result of the disaster. In all cases determined pursuant to clause (1) (B) of this subsection, and in any other case deemed appropriate by the Commissioner, such assistance shall be in the form of a repayable advance subject to such terms and conditions as he considers to be in the public interest.

Captioned Film (for the Deaf) for the Handicapped

(Public Law 89–258)

An act to provide in the Department of Health, Education, and Welfare for a loan service of captioned films for the deaf

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled, That the objectives of this Act are—

(a) to promote the general welfare of deaf persons by (1) bringing to such persons understanding and appreciation of those films which play such an important part in the general and cultural advancement of hearing persons, (2) providing through these films, enriched educational and cultural experiences through which deaf persons can be brought into better touch with the realities of their environment, and (3) providing a wholesome and rewarding experience which deaf persons may share together; and

(b) [to promote the educational advancement of deaf persons by (1) carrying on research in the use of educational media for the deaf, (2) producing and distributing educational media for the deaf and for parents of deaf children and other persons who are directly involved in work for the advancement of the deaf, and (3) training persons in the use of educational media for the instruction of the deaf.] *to promote the educational advancement of handicapped persons by (1) carrying on research in the use of educational media for the handicapped, (2) producing and distributing educational media for the use of handicapped persons, their parents, their actual or potential employers, and other persons directly involved in work for the advancement of the handicapped, and (3) training persons in the use of educational media for the instruction of the handicapped.*

SEC. 2. As used in this Act—

(1) The term "Secretary" means the Secretary of Health, Education, and Welfare.

(2) The term "United States" means any State of the United States, the District of Columbia, the Commonwealth of Puerto Rico, Guam, the Virgin Islands, and American Samoa.

(3) The term "deaf person" includes a person whose hearing is severely impaired.

(4) *The term "handicapped" mean deaf, mentally retarded, speech impaired, visually handicapped, seriously emotionally disturbed, crippled, or other health impaired persons.*

SEC. 3. (a) In order to carry out the objectives of this Act, the Secretary shall establish a loan service of captioned films and educational media for the purpose of making such materials available in the United States for nonprofit purposes to [deaf] *handicapped* persons, parents of [deaf] *handicapped* persons, and other persons directly involved in activities for the advancement of the [deaf] *handicapped* in accordance with regulations promulgated by the Secretary.

(b) In carrying out the provisions of this Act, the Secretary shall have authority to—

(1) acquire films (or rights thereto) and other educational media by purchase, lease, or gift;

(2) acquire by lease or purchase equipment necessary to the administration of this Act;

(3) provide for the captioning of films;

(4) provide for the distribution of captioned films and other educational media and equipment through State schools for the [deaf] *handicapped* and such other agencies as the Secretary may deem appropriate to serve as local or regional centers for such distribution;

(5) provide for the conduct of research in the use of educational and training films and other educational media for the [deaf] *handicapped,* for the production and distribution of educational and training films and other educational media for the [deaf] *handicapped* and the training of persons in the use of such films and media, *including the payment those persons of such stipends (including allowances for travel and other expenses of such persons and their dependents) as he may determine, which shall be consistent with prevailing practices under comparable federally supported programs;*

(6) utilize the facilities and services of other governmental agencies; and

(7) accept gifts, contributions, and voluntary and uncompensated services of individuals and organizations.

SEC. 4. There are hereby authorized to be appropriated not to exceed $3,000,000 annually for each of the fiscal years 1966, 1967, [$5,000,000] *$8,000,000* annually for each of the fiscal year 1968 and 1969 and [$7,000,000] *$10,000,000* annually for fiscal year 1970 and each succeeding fiscal year thereafter.

Mental Retardation Facilities and Community Mental Health Centers Construction Act of 1963

(Public Law 88–164)

An act to provide assistance in combating mental retardation through grants for construction of research centers and grants for facilities for the mentally retarded and assistance in improving mental health through grants for construction of community mental health centers, and for other purposes

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled, That this Act may be cited as the "Mental Retardation Facilities and Community Mental Health Centers Construction Act of 1963".

* * * * *

Title III—Training of Teachers of Mentally Retarded and Other Handicapped Children

* * * * *

RESEARCH AND DEMONSTRATION PROJECTS IN EDUCATION OF HANDICAPPED CHILDREN

SEC. 302. (a) There is authorized to be appropriated $6,000,000 for the fiscal year ending June 30, 1966; $9,000,000 for the fiscal year ending June 30, 1967; $12,000,000 for fiscal year ending June 30, 1968; and $14,000,000 for fiscal year ending June 30, 1969, to enable the Commissioners of Education to make grants to States, State or local educational agencies, public and nonprofit private institutions of higher learning, and other public or nonprofit private educational or research agencies and organizations, *and to make contracts with States, State or local educational agencies, public and private institutions of higher learning, and other public or private educational or research agencies and organizations, for research and related purposes (as defined in this section) and to conduct research, surveys, or demonstrations,* [for research or demonstration projects] relating to education for mentally retarded, hard of hearing, deaf, speech impaired, visually handicapped, seriously emotionally disturbed, crippled, or other health impaired children who by reason thereof require special education (hereunder in this section referred to as "handicapped children"). [Such grants shall be made] *Payments pursuant to grants or contracts under this section may be made* in installments in advance or by way or reimbursement, and on such conditions as the Commissioner of Education may determine.

(b) The Commissioner of Education is authorized to appoint such special or technical advisory committees as he may deem necessary to advise him on matters of general policy relating to particular fields of education of handicapped children or relating to special services necessary thereto or special problems involved therein.

(c) The Commissioner of Education shall also from time to time appoint panels of experts who are competent to evaluate various types of research or demonstration projects under this section, and shall secure the advice and recommendations of such a panel before making any such grant in the field in which such experts are competent.

(d) Members of any committee or panel appointed under this section who are not regular full-time employees of the United States shall, while serving on the business of such committee or panel, be entitled to receive compensation at rates fixed by the Secretary of Health, Education, and Welfare, but not exceeding $75 per day, including travel time; and, while so serving away from their homes or regular place of business, they may be allowed travel expenses including per diem in lieu of subsistence, as authorized by section 5 of the Administrative Expenses Act of 1946 (5 U.S.C. 73b–2) for persons in the Government service employed intermittently.

(e) The Commissioner of Education is authorized to delegate any of his functions under this section, except the promulgation of regulations, to any officer or employee of the Office of Education.

(f) For the purposes of this section the Commissioner of Education may make grants to institutions of higher education for the construction, equipping, and operation of a facility for research, or for research and related puroses (as defined in this section).

(g) All laborers and mechanics employed by contractors or subcontractors in the performance of work on construction of any project under this section shall be paid wages at rates not less than those prevailing on similar construction in the locality as determined by the Secretary of Labor in accordance with the Davis-Bacon Act, as amended (40 U.S.C. 276a—276a–5). The Secretary of Labor shall have, with respect to the labor standards specified in this clause, the authority and functions set forth in Reorganization Plan Numbered 14 of 1950 (15 F.R. 3176; 5 U.S.C. 133z–15), and section 2 of the Act of June 13, 1934, as amended (40 U.S.C. 276c).

(h) As used in this section the terms construction and cost of construction include (A) the construction of new buildings and the expansion, remodeling, and alteration of existing buildings, including architects' fees, but not including the cost of acquisition of land or off-site improvements, and (B) equipping new buildings and existing buildings, whether or not expanded, remodeled, or altered.

(i) As used in this section, the term "research and related purposes" means research, research training, surveys, or demonstrations in the field of education of handicapped children, or the dissemination of information derived therefrom, or all of such activities, including (but without limitation) experimental schools.

NATIONAL DEFENSE EDUCATION ACT OF 1958

(Public Law 85–864)

TITLE XI—INSTITUTES

PART I—GENERAL

Authorization of institutes

SEC. 1101. There are authorized to be appropriated $32,750,000 for the fiscal year ending June 30, 1965, $50,000,000 for the fiscal year ending June 30, 1966, [and for each of the two succeeding fiscal years] *and for the succeeding fiscal year, and $51,000,000 for the fiscal year ending June 30, 1968* to enable the Commissioner to arrange, through grants or contracts, with institutions of higher education for the operation by them of short-term or regular session institutes for advanced study, including study in the use of new materials, to improve the qualification of individuals—

(1) who are engaged in or preparing to engage in the teaching or supervising or training of teachers, of history, geography, economics, civics, and industrial arts, modern foreign languages, reading, or English in elementary or secondary schools,

(2) who are engaged in or preparing to engage in the teaching of disadvantaged youth and are, by virtue of their service or future service in elementary or secondary schools enrolling substantial numbers of culturally, economically, socially, and educationally handicapped youth, in need of specialized training; except that no institute may be established under this title for teachers of disadvantaged youth unless such institute will offer a specialized program of instruction designed to assist such teachers in coping with the unique and peculiar problems involved in teaching of such youth.

(3) who are engaged as, or are preparing to engage as, educational media specialists, *or*

(4) who are engaged in or preparing to engage in special educational programs for bilingual students.

COOPERATIVE RESEARCH ACT (P.L. 531, 83RD. CONG.), AS AMENDED BY TITLE IV OF PUBLIC LAW 89–10

An act to authorize cooperative research in education

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled,

PURPOSE

SEC. 1. The purpose of this Act is to enable the Office of Education more effectively to accomplish the purposes and to perform the duties for which it was originally established.

EDUCATIONAL RESEARCH AND RESEARCH TRAINING

SEC. 2. (a) (1) The Commissioner of Education (hereinafter in this Act referred to as the "Commissioner") is authorized to make grants to universities and colleges and other public or private agencies, institutions, and organizations and to individuals, for research, surveys, and demonstrations in the field of education (including programs described in section 503(a) (4) *and title VII* of the Elementary and Secondary Education Act of 1965), and for the dissemination of information derived from educational research (including but not limited to information concerning promising educational practices developed under programs carried out under the Elementary and Secondary Education Act of 1965) and, without regard to sections 3648 and 3709 of the Revised Statutes (31 U.S.C. 529; 41 U.S.C. 5), to provide by contracts or jointly financed cooperative arrangements with them for the conduct of such activities; except that no such grant may be made to a private agency, organization, or institution other than a nonprofit one.

(2) No grant shall be made or contract or jointly financed cooperative arrangement entered into under this subsection until the Commissioner has obtained the advice and recommendations of a panel of specialists who are not employees of the Federal Government and who are competent to evaluate the proposals as to the soundness of their design, the possibilities of securing productive results, the adequacy of resources to conduct the proposed research, surveys, or demonstrations, and their relationship to other similar educational research or dissemination programs already completed or in progress.

(b) (1) The Commissioner is authorized to make grants to universities and colleges and other public or private agencies, institutions, and organizations to assist them in providing training in research in the field of education (including such research described in section 503(a) (4) *and title VII* of the Elementary and Secondary Education Act of 1965), including the development and strengthening of training staff and curricular capability for such training, and, without regard to sections 3648 and 3709 of the Revised Statutes (31 U.S.C. 529; 41 U.S.C. 5), to provide by contracts or jointly financed cooperative arrangements with them for the conduct of such activities; except that no such grant may be made to a private agency, organization, or institution other than a nonprofit one.

(2) Funds available to the Commissioner for grants or contracts or jointly financed cooperative arrangements under this subsection may, when so authorized by the Commissioner, also be used by the recipient (A) in establishing and maintaining research traineeships, internships, personnel exchanges, and pre- and post-doctoral fellowships, and for stipends and allowances (including traveling and subsistence expenses) for fellows and others undergoing training and their dependents not in excess of such maximum amounts as may be prescribed by the Commissioner, or (B) where the recipient is a State educational agency, in providing for such traineeships, internships, personnel exchanges, and fellowships either directly or through arrangements with public or other nonprofit institutions or organizations.

(3) No grant shall be made or contract or jointly financed cooperative arrangement entered into under this subsection for training in sectarian instruction, or for work to be done in an institution, or a department or branch of an institution, whose program is specifically for the education of students to prepare them to become ministers of religion or enter upon some other religious vocation or to prepare them to teach theological subjects.

(4) Prior to January 31, 1968, the Commissioner shall make a complete report to the Congress with respect to contracts and other arrangements made pursuant to this subsection with private organizations, including benefits received from such contracts and arrangements, and the Commissioner's recommendations with respect to the continuation of the authority to make such contracts and arrangements with private organizations.

HIGHER EDUCATION ACT OF 1965

(Public Law 89–329)

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled, That this Act may be cited as the "Higher Education Act of 1965".

* * * * *

TITLE V—TEACHER PROGRAMS

PART C—FELLOWSHIPS FOR TEACHERS

STATEMENT OF PURPOSE [3]

SEC. 521. The Congress hereby declares it to be the policy of the United States to improve the quality of education offered by the elementary and secondary schools of the Nation by improving the quality of the education of persons who are pursuing or who plan to pursue a career in elementary and secondary education. The purpose of this part is to carry out this policy by awarding fellowships for graduate study at institutions of higher education and by developing or strengthening teacher education programs in institutions of higher education. For the purpose of this part the term "career in elementary and secondary education" means a career of teaching in elementary or secondary schools, *a career of teaching children of limited English-speaking ability,* a career of teaching, guiding, or supervising such teachers or persons who plan to become such teachers, or a career in fields which are directly related to teaching in elementary or secondary schools, such as library science, school social work, guidance and counseling, educational media, and special education for handicapped children.

---

[3] The amendment to this section is effective for fiscal year 1968 (the effective date of Public Law 90–35), only; thereafter the section will read as follows:

"STATEMENT OF PURPOSE

"SEC. 521. The Congress hereby declares it to be the policy of the United States to improve the quality of education offered by the schools of the Nation by improving the quality of the education of persons who are pursuing or who plan to pursue a career in elmentary and secondary education or post-secondary vocational education. The purpose of this part is to carry out this policy by awarding fellowships for graduate study at institutions of higher education and by developing or strengthening programs for the education of teachers and related educational personnel in institutions of higher education. For the purposes of this part the term 'elementary and secondary education' includes preschool and adult and vocational education, and the term 'career in elementary and secondary education or post-secondary vocational education', means a career of teaching in elementary or secondary schools (including teaching in preschool and adult and vocational education programs, *and including teaching children of limited English-speaking ability*) or in post-secondary vocational schools, a career of teaching, guiding, or supervising such teachers or persons who plan to become such teachers, or a career in fields which are directly related to teaching in such schools, such as library science, school social work, guidance and counseling, educational media (including educational and instructional television and radio), child development and special education for handicapped children."

FELLOWSHIPS AUTHORIZED [4]

SEC. 522. (a) The Commissioner is authorized to award not to exceed four thousand five hundred fellowships for the fiscal year ending June 30, 1966, ten thousand fellowships for the fiscal year ending June 30, 1967, and [ten] *eleven* thousand fellowships for the fiscal year ending June 30, 1968. Fellowships awarded under the provisions of this part shall be for graduate study leading to an advanced degree other than a doctor of philosophy, or equivalent degree, for persons who are pursuing a plan to pursue a career in elementary and secondary education. Such fellowships shall be awarded as provided in sections 523 and 524 of this part and for such periods as the Commissioner may determine but not to exceed twenty-four months.

(b) In addition to the number of fellowships authorized to be awarded by subsection (a) of this section, the Commissioner is authorized to award fellowships equal to the number previously awarded during any fiscal year under this part but vacated prior to the end of the period for which they were awarded; except that each fellowship awarded under this subsection shall be for such period of study, not in excess of the remainder of the period for which the fellowship which it replaces was awarded, as the Commissioner may determine.

* * * * *

APPROPRIATIONS

SEC. 528. There are hereby authorized to be appropriated to carry out this part $40,000,000 for the fiscal year ending June 30, 1966, $160,000,000 for the fiscal year ending June 30, 1967, [$275,000,000] *$285,000,000* for the fiscal year ending June 30, 1968, [$195,000,000] *$205,000,000* for the fiscal year ending June 30, 1969, and [$240,000,000] *$250,000,000* for the fiscal year ending June 30, 1970, and such sums for the two suceeding fiscal years as may be necessary to enable persons who have been awarded fellowships prior to July 1, [1968] *1970*, to complete their study under the fellowships.

* * * * *

PART D—IMPROVING TRAINING OPPORTUNITIES FOR PERSONNEL SERVING IN PROGRAMS OF EDUCATION OTHER THAN HIGHER EDUCATION

ADVANCED TRAINING AND RETRAINING [5]

SEC. 531. (a) The Commisisoner is authorized to make grants to, or contracts with, institutions of higher education and State educational agencies, and to make grants to, or contracts with, local educational agencies if, after consultation with the State educational agency, such State agency is satisfied that the program or project will be coordinated with programs carried on under part B, for carrying out programs or projects to improve the qualifications of persons who are serving or preparing to serve in educational programs in elementary and secondary schools (including preschool and adult and vocational education programs) or postsecondary vocational schools or to supervise or train persons so serving.

(b) Programs or projects under this section may include, among others—

(1) programs or projects to train or retrain teachers, or supervisors or trainers of teachers, in any subject generally taught in the schools;

(2) programs or projects to train or retrain other educational personnel in such fields as guidance and counseling (including occupational counseling), school social work, child psychology, remedial speech and reading, child development, and educational media (including educational or instructional television or radio);

(3) programs or projects to train teacher aides and other nonprofessional educational personnel;

(4) programs or projects to provide training and preparation for persons participating in educational programs for children of preschool age;

(5) programs or projects to prepare teachers and other educational personnel to meet the special needs of the socially, culturally, and economically disadvantaged;

(6) programs or projects to prepare teachers and other educational personnel to meet the special needs of exceptionally gifted students;

(7) programs or projects to train or retrain persons engaging in programs of special education for the handicapped;

(8) programs or projects to train or retrain persons engaging in special educational programs for bilingual students;

[8] *(9)* programs or projects to provide inservice and other training and preparation for school administrators;

[9] *(10)* programs or projects to prepare artists, craftsmen, scientists, artisans, or persons from other professions or vocations, or homemakers to teach or otherwise assist in programs or projects of education on a long-term, short-term, or part-time basis.

(c) Grants or contracts under this section may provide for use of funds received thereunder only to pay the cost of—

(1) short-term or regular-session institutes; or

(2) other preservice and inservice training programs or projects designed to improve the qualifications of persons entering and reentering the field of elementary and secondary education or postsecondary vocational education, except that funds may not be used for seminars, symposia, workshops or conferences unless these are part of a continuing program of inservice or preservice training.

(d) The Commissioner may include in the terms of any grant or contract under this section provisions authorizing the payment to persons participating in training programs supported under this section, of such stipends (including allowances for subsistence and other expenses for such persons and their dependents) as he may determine, which shall be consistent with prevailing practices under comparable federally supported programs.

Mr. President, I have spoken about this being a nonpartisan bill. I point out that it was reported with support from both parties and without objection to reporting on the part of any Senator present at our final session.

This does not mean that we were unanimous throughout the consideration of the bill in respect to all its sections. From time to time, Democrats and Republicans alike, on both sides of the committee table, offered amendments; and in many instances those amendments were rejected, both in the subcommittee and in the full committee. However, as the manager of the bill, I made very clear that I would see that a Senator whose amendment was defeated in committee would have a full opportunity—to the extent that a manager of a bill on the floor of the Senate can guarantee such an opportunity—to present his amendment and have it voted upon on the floor of the Senate.

I said again this year—and I serve notice on my colleagues in the Senate, hoping they will cooperate with me in making good on the promise that I made in committee—that I shall always try to get a rollcall vote in the Senate for a Senator who desires to obtain it, on any amendment that he seeks to offer on the floor of the Senate; this applies also to a Senator who is not a member of the committee.

Mr. President, I believe when you deal with a bill as pregnant with public policy as this bill any Senator is entitled, as a matter of courtesy, if not parliamentary right, to have a record vote in the Senate.

The vote in the committee was not a matter of formality. It was a matter of conviction, for each Senator, even though he may have lost on an amendment that he considered to be very important, was of the opinion when we closed the record, so to speak, in our subcommittee markup and the full committee markup, that this bill is a bill that should be passed in its present form if it cannot be improved in the sights of that Senator on the floor of the Senate. What more could a chairman ask for than that kind of support?

I wish to express my thanks at the close of the action on the bill, whatever form that action may take, to a staff of the majority and minority members that I think is not surpassed by a professional staff on any committee in this body, and I have a high regard for professional staffs generally.

When one stops to consider what has come out of the Committee on Labor and Public Welfare, which has jurisdiction over education legislation, since the first year of the Kennedy administration, a record of passing quantitatively and qualitatively more education legislation through Congress than was passed during the entire combined preceding history of the Republic, then one has some understanding of what President Johnson has called the legislative miracle in the field of education legislation that has been brought about by the two committees of Congress, Senate and House of Representatives, and both bodies of the Congress.

Mr. President, we do not deserve the major credit as Senators and Representatives. The major credit goes to the professional staff of our committees, and I would not want to close this legislative history speech without making this general reference of appreciation to the staff. I shall particularize it when the debate and Senate action is completed.

Mr. President, I thank the Senate for permitting me to make this legislative history speech uninterrupted, for I think it is important to have it in continuity in the RECORD for reference during debate and for future reference by the courts, for everyone knows the speech on legislative history, unless reversed or modified in some particular by Senate or House action subsequently, becomes binding on the courts as far as expression of legislative intent is concerned in connection with any item of the bill when enacted into law dealing with congressional intent. That is why I wanted to present it in this form. I appreciate the Senate permitting me to proceed in this manner.

---

[4] After June 30, 1968 (the effective date of Public Law 90–35) this section will read as follows:

"FELLOWSHIPS AUTHORIZED

"SEC. 522. The Commissioner is authorized to award fellowships in accordance with the provisions of this part for graduate study leading to an advanced degree for persons who are pursuing or plan to pursue a career in elementary and secondary education or post-secondary vocational education."

[5] This section will become effective July 1, 1969, at which time it would be amended as shown.

Mr. President, I ask unanimous consent that remarks of the ranking minority member of our committee, my very good friend the distinguished Senator from Vermont [Mr. Prouty], be printed in the Record following my remarks, together with insertions to which he refers in his remarks. The Senator is in the hospital for some tests and these remarks are the remarks which the Senator from Vermont would have made in his opening statement and for presentation in behalf of the Elementary and Secondary Education Act Amendments of 1967. I want him to know and the Senate to know that I shall see to it that during the course of debate during his absence, attention will be focused on the comments he has made.

The PRESIDING OFFICER (Mr. Brooke in the chair). Without objection, it is so ordered.

STATEMENT BY SENATOR PROUTY

Mr. Prouty. First, may I congratulate my esteemed friend and distinguished Chairman, Senator Morse, for his discerning leadership and work on one of the most important legislative bills to come before this body.

I know that I speak for every child, for every parent, for every educator, for every Senator in thanking him for his stewardship of our Education Subcommittee and for his efforts in seeking to provide quality educational opportunities for every American child.

The bill which we are considering this afternoon is in no small measure a product of the Senior Senator from Oregon's diligence and dedication.

Also, Mr. President, as the ranking Minority member of the Subcommittee on Education, I wish to express deep appreciation to my Republican colleagues who serve with me on that Subcommittee. The distinguished Senator from New York, Mr. Javits, the distinguished Senator from Colorado, Mr. Dominick, and the distinguished Senator from California, Mr. Murphy, have rendered yeoman service in the development and refinement of programs under the Elementary and Secondary Education Act. Citizens of the Nation should be grateful to each of them as well as to the Majority members of the Subcommittee for the time, thought and inspiration which they have given in such abundance.

This legislation has immeasurably expanded the scope of educational opportunities for the children of this country, and especially those who are disadvantaged.

Two years ago for the first time major focus was turned to American education's greatest failure: the education of our disadvantaged children.

Title I has enabled the children caught in the cycle of poverty to move to the center of attention. Education systems across the country are now receiving aid to start, expand and improve programs that spell opportunity for our Nation's poor. And to their credit, the States and local districts have acted quickly in designing and implementing projects to help these deprived children. The broadening and enriching experiences which are taken for granted by their more fortunate contemporaries are now offered to underprivileged children.

Today, Mr. President, as we approach for the second time discussion of possible changes in the historic education bill, we will consider means of improving the program which has already, in its short span of operation, resulted in more beneficial changes in the schools of our Nation than any other single Congressional enactment. The bill before us is not the work of any one man or agency. It combines contributions from the Administration, from both Houses of this Congress, from both political parties, and, most important, from practicing schoolmen across the country. The bill before us is not a perfect and final response to every problem area which has developed over two years of ESEA program operation. It is, however, an honest and creditable effort toward that end, and one which, I feel, merits the support of every member of this body.

The law we adopted in 1965 has worked. It has succeeded because local school districts have been given the primary responsibility for policy determination. For the first time in the history of this nation, the resources and talents of local, State and national education officials have been combined for the greatest benefit of individual school students.

In years past we discussed the future hopes and aspirations of the Elementary and Secondary Education Act. Today, we are in a position to talk about what it has done, why it is important and point to many of the achievements under this milestone legislation. Education faces its greatest challenges in the slums of our central cities and the depressed rural areas where poverty and despair exist. Since the passage of the Elementary and Secondary Education Act in 1965, these impoverished school districts across this nation have been receiving badly needed Federal money to help youngsters who need it the most—the children of the poor.

Title I of the Act provides grants to local school systems through State Departments of Education for programs to meet the needs of educational disadvantaged children—the children of both the urban and rural slums.

It is a massive program of assistance to school districts which have concentrations of students from low income families. Last year, over 8 million deprived children benefited from these programs sponsored by more than 17,000 school districts.

The ESEA has made possible special programs of remediation, health and nutritional services and specialized instruction as specifically designed under Title I to reach the needs of the educationally disadvantaged. More than 22,000 projects have been conducted and over one-half million non-public school children are participating under this Title.

It has caused administrators and teachers to examine their practices and programs concerning the instructional opportunities for culturally deprived pupils. And, as I have repeatedly mentioned it in this body, since our Nation's greatest asset is its people—particularly its youth—the greatest service that we could render them is to provide for their proper education.

The second part of ESEA, Title II, makes $125 million available to States for the provision of textbooks, library books and other instructional materials for the use of both public and non-public school children and their teachers.

Under this provision 49 million students and 2 million teachers now have access to books and materials under this program. Thirteen states have developed instructional centers for demonstration and evaluation and State Departments of Education have assigned 285 full time personnel to administer the program.

When Title II was passed more than 2 out of 3 public elementary schools had no libraries at all. Public schools spent on an average of only $2.28 per pupil per year on books—well below the recommended professional standards of $4.00 to $6.00.

Today, more than 3800 new public school libraries were open as a result of the Title II programs; 3627 of these were located in public elementary schools and 259 in public secondary schools. It has been reported that 1,545,000 public and non-public school children are being served by these new libraries. About 89%, or 43 million school children are enrolled in the 91,000 schools participating in ESEA Title II.

Title II, while not allocated on a basis of the number of disadvantaged children, is also essentially compensatory in nature. Since it is operated on a state planning basis, 5%, or a minimum of $50,000 of each State's allotment is available to cover administrative expenses.

Title III, a very important part of this bill, provides a stimulus to educators to innovation at supplementary centers which may serve as models for regular school programs. It has reached 10 million public and non-public elementary and secondary school pupils. In addition, 93,000 pre-school children, 250,000 out-of-school youths, 255,000 classroom teachers and 131,000 parents and other adults have benefited under Title III.

Under Title III school superintendents, the teachers and the principals are encouraged to use their imaginations to change and to innovate in order to meet the pressing educational problems of the 1960s.

While Titles I and II are designed primarily to overcome quantitative educational deficiencies, Title III is designed to stimulate and encourage quality. Colleges, State agencies, cultural organizations and various non-profit institutions work with local educational agencies by providing leadership, direction and services in developing programs adopted to the requirements of individual communities.

Title IV, which we do not amend in this bill, provides support for research and for the training of researchers in the field of education.

Title V authorizes grants to strengthen the State Departments of Education. It has enabled the States to create 1,000 new positions, thereby helping the States to meet their responsibilities and provide leadership and technical assistance to local schools.

I realize that it is not possible to deal with priorities when we are speaking about the education of American children and I shall not attempt to do so. But, we do have in this country a very large group of children, estimated at 10% of the school age population, who cannot learn or function in a regular school setting.

This long neglected and lonesome legion of deprived children in American education comprise the children served by Title VI.

Last year, after extensive hearings by your Education Subcommittee this body wisely enacted a new Title to the ESEA designed especially to meet the needs of handicapped children. For the first time, we offered to provide these 6 million boys and girls who came to the classrooms with a built-in disadvantage, an opportunity to prepare for the challenges of tomorrow. We offered them a bright beacon to shine the way for their hopes and aspirations.

But, the "Credibility Gap" reached down on these most helpless of children and all but extinguished the small candle that we extended to brighten their paths of learning.

It is incredible, Mr. President, that this largest of all nations, a nation that is expending two and one-half billion dollars a month on Vietnam, had seen fit to appropriate only two and one-half million dollars for fiscal 1967 and fifteen million dollars for fiscal 1968, despite our authorization of fifty million dollars and one hundred fifty million dollars for each of these respective years.

Our continued failure to make this investment in what I believe to be the most neglected field of education can no longer be tolerated.

The clock runs slow for the handicapped children and with every passing day that his intellectual development lags, so also do his chances for a satisfying and productive youth and adulthood. Too little too late has been his lot for too long.

There are an estimated six million physically and mentally handicapped children in the United States. Of these only about two million are enrolled in the schools of local educational agencies. These children, it goes without saying require special services which make their education much more expensive than that of our more fortunate children. Yet, we were asked to fund Title VI at a level of only $15 million—less than $5 per child—in the current fiscal year.

As one staff member remarked—this is enough to take each of these unfortunate children to see "Gone With the Wind" but it is not enough to make even a valid start toward the goals we have written into Title VI.

The distinguished Chairman of the Subcommittee on Education has already gone over the provisions of H.R. 7819 in detail. Rather than retrace the steps, I would instead speak briefly on only a few provisions, most of which differ from the provisions of this bill as sent to us from the House of Representatives.

In Title I of ESEA the Committee did leave the basic factor of the distribution formula as established last year for fiscal year 1968 in effect. That is, the low income factor would increase from $2,000 in fiscal year 1967 to $3,000 in the present fiscal year and the Federal share will remain at 50%.

The original Act allotted funds for school districts under Title I on the basis of school aged children estimated by the 1960 Census to be in families with less than a $2,000 income; second, the number of such children in 1965 in families receiving welfare aid in excess of $2,000; and third, the total number of children thus counted multiplied by one half of the State's average per pupil cost.

This was a most unfair formula because, for the most part, only the wealthy States could afford to pay welfare in excess of $2,000. Last year the Congress corrected this inequity. It is expected that continuance of the formula at the level authorized by this body last year will enable an additional 3 million disadvantaged children to be counted in the computation of allotments to local school districts. Because of our action many disadvantaged children heretofore excluded will be able to benefit from special educational programs.

The bill also provides that, except in special circumstances, no county will receive less in grants for its local educational agencies than was allocated to that county from appropriations of the preceding fiscal year.

The Committee has also added to Title I a new section authorizing special incentive grants of up to $50 million in the aggregate per year. To qualify for an incentive grant, a State's effort index, based on the ratio of its total expenditure for elementary and secondary education to its total personal income, must exceed the national effort index for that year.

With respect to Title III of ESEA, this bill reflects two basic decisions of the Committee: First, that there is merit in the argument which holds that to build the State agencies up through Title V, but to ignore them in the administrative pattern of Title III, is questionable policy. And second, that to turn the program over to the State agencies completely and at once, regardless of their degree of readiness, would be equally questionable. From these two decisions has come what I feel will prove to be a viable compromise.

Under the proposal before us, one-third of the Title III moneys for fiscal year 1969 would be granted by the Commissioner of Education to State agencies with approved State plans, while two-thirds of the funds would remain with the Commissioner for use in direct funding of local applications. The money granted to the State agencies would be used in funding the same types of projects as are now funded under Title III, but the State agencies, rather than the Commissioner, would have approval authority.

In fiscal year 1970, the Title III appropriation would be split down the middle—one-half for the State agencies with approved plans, one-half for use by the Commissioner in funding local projects. In fiscal year 1971, two-thirds of the funds would be in the State plan sector of the program, while one-third would remain at the disposal of the Office of Education for direct funding of local activities.

The bill would also add two other provisions to the Title III program which are of special interest to me. The first provision would require each State to establish a State advisory council for Title III. This council would be representative of the State's cultural and educational resources, and it would include members from the various levels and areas of the educational system. The council would, among other duties, advise the State educational agency with respect to drawing up and implementing its State plan.

The final Title III provision I would mention has to do with the use of funds, both in projects funded under State plans and in special projects funded directly by the Commissioner. The Committee has learned that, in the first two years of program operation, only about six and one-half percent of all Title III grant moneys have been allocated to special educational activities for handicapped children. This is simply not sufficient when compared to the scope of the problem posed to our schools by these specially circumstanced children. Therefore, the bill under consideration would require that at least 15 percent of the money granted State agencies under State plans, and at least 15 percent of the funds retained by the Commissioner for local grants, be used for activities designed to meet the special educational needs of handicapped children.

With regard to Title V of ESEA, I would call my colleagues' attention to three proposed amendments. First, the existing division of appropriations calls for 85 percent to be apportioned among the States and leaves 15 percent in the hands of the Commissioner for making special project grants. H.R. 7819 would alter these percentages to 95 to 5, respectively. Second, the bill before us would amend Tile V so that each State agency would have to distribute 10 percent of its grant moneys among its local educational agencies, these moneys to be used by the local agencies for any of the purposes of the Title which can be applied at the local level. And finally on Title V, your Committee has reinstituted, with some changes, a new Part B, providing grants for comprehensive educational planning and evaluation.

With regard to Title VI, the education of the handicapped act, the bill before us authorizes the establishment of regional resource centers to provide testing and evaluation services to determine whether a child is physically or mentally handicapped and to develop programs to meet the child's needs.

These facilities include specialists in all the physical and mental disorders and disabilities and will thus be able to provide answers, help and services to the parents and teachers of the child who does not seem to fit into the usual and recognizable disability categories. If we are ever to provide these children with an educational bill of rights, diagnostic centers are of primary importance.

Almost of equal importance is a financial incentive for the dissemination of information, recruiting and information activities to enlist professional teachers to undertake the training of the handicapped. At present there are approximately only 70,000 in the field where it is estimated that a minimum of 300,000 is needed.

We have also provided that the smaller states will receive a minimum of $100,000 per year. This is a minimal amount and since the program is already more than 150 years late the smaller States are in dire need of the funds above and beyond those which could be expected under the present formula.

A new program also authorizes grants and contracts for the establishment and operation of model centers for the education, care and training of deaf blind children. The problem of how to prepare a child who is both deaf and blind for optimum development in our society has long been a perplexing one. Neither the group of specialists serving the visually handicapped, nor the group serving the auditory handicapped have known quite how to approach the problem.

Obviously, what is required is a special environment designed to meet the multiple needs of such a child.

The problem has been highlighted by the recent German Measles epidemic (1963–1965) which is one major cause of visual and auditory handicaps. In non-epidemic years there are annually 2,000 children born to rubella—exposed mothers—where as during an epidemic year estimates of various agencies range from 10,000 to 30,000 children were born with rubella syndrome.

In 1967 and 1968 school year, seven educational facilities in the United States are providing special services for 110 deaf blind children. The American Foundation for the Blind reports some 564 deaf blind persons under age 21.

In light of the American Foundation for the Blind's figure and the conservative estimates of the dually handicapped outgrowth of the rubella epidemic current services are grossly inadequate for the proper care of these children.

The legislation in H.R. 7810 provides for the model development of local centers to provide deaf blind children with comprehensive diagnostic educational and related services beginning as early in life as feasible. The center will also make available to parents and professionals consultive services, special training and other information that will assist them in caring for and educating deaf blind children.

Mr. President, I would respectfully call the attention of my colleagues to Title IV of the bill as added by the Committee. This new Title addresses itself to what has probably been the most troublesome aspect of ESEA program administration for local schoolmen; the problem of late funding and its concomitant insufficient planning time. I am sure that every Senator is aware through his constituent mail of the problem created by the disparity between the Federal appropriation calendar and the academic calendar. Rather than rehearse the voluminous testimony on this matter, I shall merely sketch the situation as it developed last year.

The fiscal year 1967 appropriation for Title I of ESEA was contained in PL 89–697, which was signed on October 27, 1966. It was late November before OE could inform each State of its "estimated" allocation. It was late February, 1967, before the States learned their actual allocations of funds for use in the school year which was then 6 months old. This sort of scheduling, of course, can only lead to chaos in planning. And the fiscal year 1967 instance was not a one-of-a-kind happening. For here we are in November of a new school year, without a final decision on the authorization or appropriation for ESEA programs.

To solve this problem, the Committee has drafted language to put the ESEA programs on an advanced funding basis. That is, funds would be appropriated in one fiscal year for obligation in the next fiscal year. Under this method of financing, the States and local school districts would have the necessary fiscal data in time for adequate planning. To assure this end, the new Title IV also contains language authorizing the Commissioner, in the event that no Title I appropriation has been made by May 15th of a fiscal year for use in the next fiscal year, to execute grant agreements for the next fiscal year.

Mr. President, two and one-half years ago this body decided, in what I consider to have been a laudable and final manner, that there would be broad-based Federal assistance to the Nation's elementary and secondary schools. In so deciding, however, we did not absolve ourselves of future responsibilities in that area of the public spectrum. Rather, we set for ourselves a continuing and vital assignment, an assignment of which another portion is now due. I urge that we complete this year's installment of that continuing assignment by passing the Elementary and Secondary Education Amendments of 1967, and I urge that we do it today.

Mr. President, I wish to take this opportunity to express my personal appreciation to Senator Yarborough and to the members of the Special Subcommittee on Bilingual Education for their initiative and outstanding leadership in their effort to promote the cause of bilingual education.

For all children, reading is the most academic tool and the one in which failure causes the greatest discouragement.

This is especially true for the child whose mother or family tongue is not English. There is considerable evidence that children from these backgrounds are frustrated in the schools. They learn in neither English or their family language.

I have been greatly encouraged by the correspondence I have received from the Vermont educators and administrators in support of the bilingual educational act.

Sharing in the benefits of this legislation will be American school children from a wide variety of family linguistic and cultural backgrounds, including French, Spanish, Syrian, Oriental, Portuguese, Eskimo, Greek, Italian, Polish, Hungarian and many more.

The concern under this Act is for the mother tongue and English. It will assist local school districts with special teaching programs to help overcome the serious language barriers that handicap 4 million children because English is a foreign language to them. Since it has been our public school tradition either to ignore that mother tongue or to discourage its use, non-English speaking students are forced to either fit into the mold or fall by the wayside.

Yet experience has proven that if education is to succeed, it must be designed wherever practicable to the educational needs of the students.

The inadequacy of our present educational system in this regard has produced a fruitless dissipation of our tax dollars, teacher efforts and student's potential.

The legislation before the Senate this afternoon seeks to correct this anomaly. Today, job opportunities, income levels, economic advancement, in fact all the aspects of personal and family well-being are closely linked to educational achievement and the ability to communicate effectively with one another.

I urge this body, Mr. President, to strike at the roots of poverty by providing these more than 4 million non-English speaking children an adequate opportunity for the kind of education long denied them.

Mr. President, the ringing of school bells reminds us that two years have gone by since the funding of the ESEA. Its success can be measured by the innovation of creative projects which are already underway in a number of our Nation's schools.

Its shortcomings were also measured more dramatically and more destructively than ever during our long hot summer.

Since its enactment, the ESEA has brought the beginning of hope to the poor and minorities of our Nation. Enacted substantially as a bipartisan effort, its drafting was the work of dedicated members on both sides of the aisle. It is in this spirit that we should move ahead this afternoon to assure the continuation of what we have already accomplished.

But despite all our efforts, I do not view the present form of Federal Assistance to education as UTOPIC.

The original act was far from perfect. We altered it last year to increase its effectiveness. We are in the process of doing so again this afternoon in the amendments contained in H.R. 7819.

The new amendments make requirements that have proven necessary as inadequacies in the operation of the law have made themselves apparent. But as we refine year by year it becomes more apparent that the Congress should turn to general aid rather than categorical grants for particular purposes. Let us hope and plan for the time when the chief role of the Federal partnership in education will be to supply funds to States and Colleges to use for whatever educational purpose will best serve the needs of their students.

We have long known of the inequitable distribution of funds in the original Act which resulted in the ten wealthiest counties of the U.S. receiving much more than the ten poorest counties received for theirs.

How can such a disposition of funds in a law supposedly designed to improve school programs for impoverished children be justified?

While it is true that wealthy areas have a small percentage of disadvantaged children, these youngsters are attending some of the best financed and most advanced public schools available. Since the Federal funds are limited, the money funnelled into wealthy school districts necessarily reduces the amounts available for desperately underfinanced schools in areas of very high concentration of poverty such as city slums and economically depressed rural areas.

Clemenceau once remarked that war was too important a matter to be left to the generals. In the scale of today's values and tomorrow's, the responsibilities for education are too important to be left only to the educators. We will move much more rapidly toward the solution of our educational problems when there is general recognition of the fact that they are equally the concern and the responsibility of every citizen.

This problem was underscored succinctly and well in the following editorial in the November sixth New York Times, entitled "Educational Emergency":

"The story told by the school system's 1966–67 reading scores represents alarmingly bad news. And the news is rendered worse by the manner in which the Board of Education tried to indicate progress where the stark facts permit only the conclusion that no solution to the most basic problem of the slum schools has yet been found.

"One out of three pupils is a year or more behind in reading, and the gap, instead of being closed, becomes wider in the upper grades. To say that the problem exists virtually only in the ghetto areas merely underlines the nature of the emergency: the schools' current priority mission is not to prove that they can do a creditable job with affluent middle-class youngsters but rather to find ways of halting the retardation, and attending alienation, of the underprivileged.

"To succeed, the schools admittedly need the mobilization of virtually all the other community resources, from improved housing to greater support on the part of ghetto parents themselves. But first and foremost the schools must mobilize their own resources, with the full acknowledgment that the conditions are those of a crisis and the disease is one of epidemic proportions. Attempts to cover up the extent of the emergency by jargon-ridden and soothing publicity releases can only serve to lessen the very community concern and professional commitment without which there can be no hope at all—for the future of the deprived children and of the city itself.

"The bright spot in a desperately grim situation is that the reading scores also pinpoint a few—all too few—islands of real progress and accomplishment, despite ghetto conditions. School Superintendent Bernard E. Donovan acknowledged this and attributed it to the "creative leadership" of individual principals. Thus he underscored the plea, repeatedly made by this newspaper, to reorganize the system in a fashion that identifies and recruits such leadership and subsequently gives it full freedom to forge ahead.

"Until this happens, all the grandiose slogans, from "More Effective Schools" to "Focus on Fundaments" will—as the scores show—be palliatives at best and ineffective window dressing at worst. The city's most fundamental education crisis cannot be attacked with imagination and without regard for the status quo of organization and methods."

Mr. Prouty. As we note, Mr. President, we still have a long way to go to meet the educational needs of this Nation. There is still an enormous amount of unfinished business on hand.

ESEA has responded to the educational challenges at many levels and with increasing means, but vast backwaters of educational poverty still exist in America—from the slums of our great cities to the remote areas of Vermont. Despite our immense educational efforts this Nation has more unemployable adolescents in the 16 to 19 year age group than any country in Europe.

Three out of ten young Americans this year will not finish high school. Only four out of ten will continue their education beyond the 12th grade. Several million will become our unemployables—the drop-outs from tomorrow's world.

The job of our nation's school is especially critical in view of the large number of workers under twenty-five years. By 1970 it is estimated that there may be close to twelve million of the young adult workers, representing about fourteen percent of the total labor force compared to ten percent in 1960. A large percentage of these youngsters will never have had the educational opportunities to prepare them for their life's vocation. The failure of education to meet the needs of students in high schools lessens their employment opportunities. The unemployment rate among those who fail to finish high school is fifty percent greater than among those who complete high school.

The responsibility of children is to learn and the responsibility of the schools is to make this learning possible and meaningful. It is a simple fact that some children enjoy school more than others. By the same token the schools are going to have to assume the responsibility when the child walks into the classroom to help him to get to the next step.

School systems must begin thinking in terms of assisting the poor child and his parents. Public schools must be ready to take on new partners. They must realize that new voices are clamoring to be heard. Educators must welcome and encourage a responsible interest in the schools by laymen who hold no official position except that of citizen.

The concerns many of us have about the deficiencies of the schools and their lack of adequate service are concerns which Harry Golden, the sage of North Carolina, expressed in the following article, entitled "There Are Just Too Many Experts on Education":

"THERE ARE JUST TOO MANY EXPERTS ON EDUCATION

"(By Harry Golden)

"One of the many problems afflicting American education is that it is constantly subjected to criticism and review by a whole nation of experts.

"All of us, more or less, have been educated and almost all of us have sent our children to school. These two facts alone make a man or woman an expert, fully competent to judge and direct any school anywhere.

"As the result, now all of us know there are at least 15 different programs to produce bilingual high school graduates but each of our high schools has all it can do to produce, on occasion, a student able to read and write English with some facility.

"While I have no statistics, nor will I seek any, I am willing to bet that half of the budget for all of our municipalities goes to the cause of education. This half, of course, includes plant as well as curricula, maintenance as well as faculty. Yet every municipality is eager for state or Federal aid. There is never enough money.

"Too many boards?

"Every municipality, however, is usually able to run its police, fire, sanitation and road departments at far less cost and with far less mismanagement. It may be that the assorted boards of education and boards of regents are an anomaly in a society as highly centralized as ours.

"It would seem one of the functions of such boards is to relate education to the total needs of the community. But in the long run the Board of Education serves a divisive interest.

"The board often dissolves its functions in interminable arguments about whether a merit system will jazz up the school or whether the tracking system, which divides students into smart, mediocre and dumb, ought to persevere.

"Here and there, I suppose, a board has solved the problem of integration. But I know when New York City's Board of Education tried to solve racial imbalances in the school system by busing, the outrage that greeted the plan made the annoyance that greeted President Johnson's proposed surtax look like joy over the receipt of a Federal bonus.

"The number one problem in our schools is integration. This problem is usually solved by the principal. It is the captain who saves the ship in a typhoon and rarely the shipping company's board of directors.

"What kind of man?

"The second problem besetting our educational system is that few educators, let alone parents and students, have any idea of the sort of man a school system should produce. For centuries, the faculty, say, at Oxford and Cambridge could predict exactly the graduates turned out each year. They knew what attitudes, what values, what expectations each student would need to pass into the ebb and flow of English life. Apparently these were just the sort of men England needed to win its Empire and its wars. But with the advent of the industrial revolution this graduate became passe.

"No one has yet been able to figure out exactly how and for what we should educate students. There are an inordinate number of farmers sitting on fallow land waiting for the city to grow to make them millionaires. But if an agricultural college anyway has made a determined effort to re-educate these farmers, to put the land to use, then I am unaware of it.

"We have land-poor farmers and language-poor students and between them multi-million dollar complexes able to reach neither. The farmers don't know there are granaries anxious for millet and the students don't know what a dependent clause is. It takes millions of dollars to get this far."

Mr. PROUTY. As Commissioner Harold Howe expressed it at the Harvard Summer School Conference on Educational Administration last summer:

"If we claim that laymen sometimes hamper the advance of the schools, we must also recognize that laymen built and paid for them. And they have done a remarkable job. Considering the sacrifices that citizens who are not educators have made and continue to make on behalf of education, it seems to me more accurate to think of them as amateurs—in the best sense of the word—rather than as laymen. For though both words connote a lack of professional qualification, the word "amateur," in addition, signifies a man who does what he does for the love of it, not for what he can get out of it.

"I suspect that in the surge of faith in education that has characterized the last few years, too many Americans have neglected to pay enough attention to what kinds of education we are talking about—what standards of quality we have in mind and how universal we believe quality education should be. I congratulate all of those—who have taken on the responsibility of leading the drive to give *all* our children the best education that money, talent, training, and initiative can provide."

The Elementary and Secondary Education Act has not achieved perfection, Mr. President. H.R. 7819 is the second of many steps we will have to take if we are to provide the youth of America the necessary tools and vital weapons it needs to face the complex and technical challenges of today and tomorrow. There is a demonstrated need that further action on our part is needed for financing the education programs at a greater level than now exists if we are to meet our commitments. However, the act has, on the whole justified the faith the Senate has shown it.

I support the program strongly and ask for its continuation and expansion. I expect the local education leaders who are in charge of the various projects to make every effort to assure that every dollar spent produces a dollar's worth of benefits.

And, I hope that every local resident will complain constructively when errors are made.

I strongly believe that H.R. 7819 is a step forward in educational excellence. This legislation is greatly needed if we are to insure the future development of the local educational systems. And since this body time and time again has indicated its belief in the importance of education for all citizens, I call upon my colleagues to give their close attention and support to the bipartisan amendments being proposed today.

Mr. MORSE. Mr. President, before questioning begins I wish to say that several Senators spoke to me before I began this morning. I assured them I would suggest the absence of a quorum at the conclusion of my speech because they were aware that the first part of my presentation would be this speech on legislative history. They, too, are busy men—some of them are meeting in committee at this moment—but they wanted to come to the Chamber to participate in this debate when the appropriate moment arrived.

The Senator from Ohio [Mr. LAUSCHE] has just indicated that he wishes to ask some questions. I am sure that he will permit me to take at least a few minutes for a quorum call, not a complete quorum call, before responding to questions.

Mr. President, I shall withhold my request at the suggestion of the acting majority leader. I yield the floor for such action as he wishes to take, with the understanding that when he has completed his matter he will suggest the absence of a quorum.

Mr. BYRD of West Virginia. I thank the Senator.

The PRESIDING OFFICER. The Senator from West Virginia is recognized.

EXECUTIVE SESSION

Mr. BYRD of West Virginia. Mr. President, I ask unanimous consent that the Senate go into executive session to consider nominations on the Executive Calendar.

The PRESIDING OFFICER. Is there objection?

There being no objection, the Senate proceeded to consider executive business.

The PRESIDING OFFICER. The nominations on the Executive Calendar will be stated.

AGENCY FOR INTERNATIONAL DEVELOPMENT

The legislative clerk read the nomination of Paul G. Clark, of Massachusetts, to be an Assistant Administrator for the Agency for International Development.

The PRESIDING OFFICER. Without objection, the nomination is confirmed.

NOMINATIONS PLACED ON THE SECRETARY'S DESK—IN THE DIPLOMATIC AND FOREIGN SERVICE

The legislative clerk proceeded to read sundry nominations in the diplomatic and foreign service placed on the Secretary's desk.

Mr. BYRD of West Virginia. Mr. President, I ask unanimous consent that the nominations be considered en bloc.

The PRESIDING OFFICER. Without objection, the nominations are considered and confirmed en bloc.

Mr. BYRD of West Virginia. Mr. President, I ask unanimous consent that the President be notified immediately of the confirmation of these nominations.

The PRESIDING OFFICER. Without objection, it is so ordered.

EXECUTIVE MESSAGES REFERRED

The PRESIDING OFFICER laid before the Senate messages from the President of the United States submitting sundry nominations, which were referred to the Committee on Post Office and Civil Service.

(For nominations this day received, see the end of Senate proceedings.)

LEGISLATIVE SESSION

Mr. BYRD of West Virginia. Mr. President, I ask unanimous consent that the Senate return to the consideration of legislative business.

There being no objection, the Senate resumed the consideration of legislative business.

Mr. BYRD of West Virginia. Mr. President, I suggest the absence of a quorum.

The PRESIDING OFFICER. The clerk will call the roll.

The legislative clerk proceeded to call the roll.

Mr. MORSE. Mr. President, I ask unanimous consent that the order for the quorum call be rescinded.

The PRESIDING OFFICER. Without objection, it is so ordered.

ELEMENTARY AND SECONDARY EDUCATION AMENDMENTS ACT OF 1967

The Senate resumed the consideration of the bill (H.R. 7819) to strengthen and improve programs of assistance for elementary and secondary education by extending authority for allocation of funds to be used for education of Indian children and children in overseas dependents schools of the Department of Defense, by extending and amending the National Teacher Corps program, by providing programs of education for the handicapped; to improve authority for assistance in schools in federally impacted areas and areas suffering a major disaster; and for other purposes.

Mr. MORSE obtained the floor.

Mr. LAUSCHE. Mr. President, will the Senator from Oregon yield?

Mr. MORSE. I am happy to yield to the Senator from Ohio.

Mr. LAUSCHE. I have had a number of letters from school superintendents in Ohio expressing distress on the basis of their understanding that the qualifying condition for receiving aid in elementary schools has been changed by setting the high income amount of a family at $2,000 instead of $3,000 which was contained in the 1965 act. In other words, in 1965, we declared by law that any family earning less than $3,000 was in the low-income bracket and schools were entitled to elementary school aid on that basis.

The school superintendents stated in their letters that action has been taken to reduce the $3,000 qualifying amount down to $2,000.

I understand that there is some difference between what the House has done and what the Senate has done.

I wish the Senator from Oregon would clarify the situation as it exists on the basis of the pending bill, which the Senator has already discussed.

Mr. MORSE. I appreciate the question. It is a question that is in the mind not only of the Senator from Ohio, but also in the minds of several other Senators who have already spoken to me about it. It is a very important question dealing with the legislative history of this measure. I want no doubt about it left in the Record this morning. Before I turn to the committee report, let me say by way of summary what has happened.

It is true that the House changed the low-income factor for fiscal year 1968 from $3,000 to $2,000 to be effective for that year and every year thereafter, until title I is fully funded. As far as our committee was concerned, one of the reasons for our action was the problem of funding.

We passed the bill in 1966 with a $3,000 level income factor in the formula. There developed thereafter a difference of opinion over authorizations and appropriations.

I have spoken about that in my major legislative history address this morning.

There is nothing my committee can do about the level of funding recommended by the Bureau of the Budget. I think a great mistake has been made in cutting back on the education funds. It happens to be one of the realities of our time. However, we have to move from that.

The Senate committee did not accept the House action to cure the difficulties caused by under funding, we followed what we believe to be a better course. The Senate bill retains the $3,000 figure, but adds a county savings feature. We will be in conference. All I can say is that we will be in conference with the House. I am for the Senate language. Unless the Senate reverses me in debate, I shall go to conference urging the Senate approach. I do not have to tell the Senator from Ohio that no one can guarantee what the final figure will be.

With regard to the formula factor I cannot tell the Senator whether it will be $3,000 or $2,000. My suspicion is that there will be a practical solution. But, that is fortunately one of the realities of the legislative process.

I have already had material placed in the Record earlier for the country as a whole, on title I county grants. I have here the comparative allocations for major cities under the House and Senate bills. In looking at it, my eye lights upon Cleveland. Under the House bill, Cleveland would receive $5,527,604. Under the Senate version, Cleveland would receive $5,869,644.

There is no doubt about the fact that Cleveland would do better under the Senate bill than under the House bill. But, let me say most respectfully to Senators, and to the Senator from Ohio in particular, that it will be true that some cities will be favored by the Senate bill and other cities will be favored by the House bill.

Certainly, I, as chairman of the committee, cannot be whipsawed into reaching my decisions by the fact that some cities will get less and some more. I must look at the totality of the bill and find out whether I think the interests of education will be better served by the formula of the House bill or the formula of the Senate bill.

We reached the conclusion in committee that educational interests would be better served by the Senate bill. That is why we retained the $3,000 figure. I do not know what the final result will be. I cannot give it to both groups. One or the other will lose, depending on whether they fare better or worse under one bill or the other.

Mr. LAUSCHE. Am I correct in my understanding that the formula under which a local school district can qualify is not only different with respect to the definition of a poverty-level family, which in the House bill has been set at $2,000 and in the Senate bill at $3,000, but that there are also different elements in the formula fixing the allocation?

Mr. MORSE There is a basic difference in allocating appropriated funds.

Mr. LAUSCHE. That is the basic difference; yes.

Mr. MORSE. Let me say to the Senator from Ohio that counsel has just whispered in my ear that he thinks I should make perfectly clear to the Senator—although I thought I had covered it—that the act as we brought it to the floor is unchanged with respect to the family income factor of existing law. Existing law is unchanged. The point we need to keep in mind is what we are talking about is distributing the funds appropriated equitably.

Mr. President, I know that the Senator from Ohio has read it, but for the record, I wish to insert in the Record, without taking time to read it, a more detailed clarification of what I have just said. It is on page 10 of the committee report under the heading "Adjustments Where Necessitated by Appropriations."

This is the matter that I went into earlier this morning in great detail. I am sure that the Senator from Ohio would not want me to take the time to repeat it now. I have given it to him in the printed form of the committee report, and it answers the questions that he has asked in greater detail than I have in this brief summary.

Mr. President, I ask unanimous consent to have it printed in the Record.

There being no objection, the excerpt from the report was ordered to be printed in the Record, as follows:

Adjustments where necessitated by appropriations

The committee recommends amendments to section 208 (relating to adjustments necessitated by appropriations) designed to mitigate the impact of the title I fiscal year 1968 appropriation for title I, which is only $147 million more than the appropriations for fiscal year 1967. Under existing law, the low-income factor effective for fiscal year 1968 is $3,000. In addition, beginning in fiscal year 1968 States which are below the national average in per-pupil expenditures receive title I allocations on the basis of the national average per pupil expenditure instead of the State average per-pupil expenditure.

If the maximum grants computed under the authorization formula are prorated down to the funds level appropriated, certain changes take place in the relative allocations of various school districts. In addition, the increased numbers of children counted under the $3,000 formula has produced the side effect of reducing the per-pupil amount available for the State agency programs for the handicapped, migratory children, and neglected and delinquent children in institutions. Fortunately the HEW appropriations bill for fiscal year 1968 provides that the aggregate allocations in no State will be any less in fiscal year 1968 than allocations for the preceding fiscal year. This reduces to a minimum interstate transfers of funds for fiscal year 1968 which would otherwise have occurred.

The committee recommends langauge providing that when the sums appropriated are insufficient to fund fully all maximum grants—

1. The State agency programs for the handicapped, migratory children, and neglected and delinquent children in institutions will be allocated their maximum grants without any ratable reduction.

2. Every county in each State will be allocated an amount equal to its allocation in the preceeding fiscal year for grants to local educational agencies within each county.

3. Every State educational agency will re-

ceive for administrative expenses 1 percent of the amounts allocated to State agencies and counties as provided in paragraphs 1 and 2, above, with the minimum specified in section 207(b) ($150,000 to every State).

4. Amounts remaining after allocations are made as described in paragraphs 1, 2, and 3: shall be allocated to local educational agencies and to State educational agencies for administrative expenses in accordance with computations under the formula in section 203(a)(2).

The $3,000 low-income factor and the option to the State to choose either one-half the State per pupil expenditure or one-half the national average per pupil expenditure in existing law are retained even though the budgeted sums for title I fall below the maximum grant authorization approximately $2.4 billion is authorized compared with $1.2 billion appropriated for fiscal year 1968.

The amounts generated by the formula under existing law, which is not modified by the proposed amendment, bear no 1-to-1 relationship to the number of children to be served by local educational agencies. The latter is, and remains, the number of children participating in programs carried on in schools serving high concentrations of educationally deprived children.

The committee therefore does not expect there will be any dilution in the quality of programs funded. It hopes that the impact upon children participating in them will be strengthened. A program designed to provide more individualized attention for educationally deprived children (for example, a higher ratio of aides and other educational personnel per pupil) should not be expanded to cover more children merely because of the changed low-income factor if this would defeat the purposes of intensive educational effort when the sums available for the program are but slightly greater than for the preceding year.

The numbers of children participating in a local program should be based on the need to be served with the funds available rather than on the hypothetical numbers of children counted under the formula for computing maximum grants.

A mere proration of funds defeats the ends of the act. In providing to each county greater certainty by assuring that it will first receive allocations equal to the amounts allocated to local educational agencies within such county during the preceding year, the committee desires to provide some flexibility to the county, not only because school district boundaries may change but also to take into account shifting low-income population patterns. Beyond such considerations, however, the committee expects that a school district will be allocated first an amount equal to its allocation for the preceding year, and then its pro rata share of that county's allocations over and above the previous year's allocation. Among the reasons the committee did not specify in the amendment to section 208 that the adjustments would go down to school districts is that it desired to avoid rigidity and to fit the formula to the availability of census data, which is not always available at the school district level. Further, in the committee view, the role of the State education agency under the act ought not to be circumscribed. Under the reported bill no change is made in the important responsibilities exercised by the State educational agencies in selecting criteria governing title I participation of school districts within the county.

Where more recent satisfactory data is available on the various components which comprise educational deprivation which is appropriately applicable to school districts within counties, the State educational agency under the statutes can use such data in making subcounty allocations in order to assure that funds go to school districts in proportion to their current need. Thus, there may be some shifts of allocations among school districts within counties under these conditions.

Mr. LAUSCHE. Mr. President, I have a tabulation of what will be the impact upon the principal cities of the country in the House version and in the Senate version of the bill. May I assume that the increase in the amounts, as reflected by this tabulation dealing with Cleveland, will generally be applicable to all the school districts in Ohio on the basis of the formula adopted by the Senate committee?

Mr. MORSE. The formula will be applicable, but I cannot tell the Senator what the effect of the formula will be on all the other cities in Ohio, because I do not know.

Mr. LAUSCHE. It may vary. That is, in some instances they will get more?

Mr. MORSE. That is correct.

Mr. LAUSCHE. And in some instances, less?

Mr. MORSE. That is right.

Mr. LAUSCHE. Is that so?

Mr. MORSE. Yes. I have inserted in the RECORD a tabulation, county by county, of what would flow to the counties under one formula or the other. I have already done that, but I want counsel to get the tabulation and hand it to the Senator from Ohio, because that will give him the basic data.

Let us take the exhibit to which the Senator from Ohio is referring. I have already placed it in the RECORD. I point out that Cleveland will get more under the Senate version. Now, drop down to Oakland, Calif., which will get less.

I have not yet heard from the two Senators from California, but I will before the day is over, in that they are going to be concerned about the fact that they will get less for some cities in their State. They undoubtedly will say, "I prefer the House formula." But I go back to the committee's point: We took a look at the whole picture and we decided the educational interests of the country would be best served by the Senate formula.

Let me finish with this thought, and then I will be glad to listen to the Senator from Ohio again.

It is true—and it is the point I made in the beginning—that what is really controlling in this matter, and the whole problem is created by it, is the shortage of funding. If the authorized funds had been made available, then we would not have had the House version. It is because the House ran into the fund shrinkage that caused them, on the basis of representations that were made from areas in their constituencies, other than areas like Cleveland, to make the change. So they came out with the $2,000 figure, which in those areas would be more helpful. That is the only explanation I can give for the House version.

Well, we tried to be responsive to the needs of their constituents, just as the Senator from Ohio is, and rightly so. We took a look at that, and we said, as this particular exhibit shows, if it is examined, that, taking the country as a whole, in spite of the funds, we think the present law, with its $3,000 figure, serves education best.

Mr. LAUSCHE. Is it fair to say that, under the Senate formula, the greater the number of people in the poverty class in a county, the greater the help that comes from the Federal Government?

Mr. MORSE. That is true of the formula operation, plus the fact that the formula also contains factors relating to States per pupil expenditure and the national average per pupil expenditure. Do not forget that we have the State per pupil expenditure factor that is involved in the formula. Of course, if we are dealing with a State that is below the national average level of pupil support, that could change the amounts received.

Mr. LAUSCHE. I understand that, but, basically, the Senate version did have in mind helping especially the poverty stricken areas?

Mr. MORSE. That is correct.

Mr. LAUSCHE. But the help that was to be accorded to the poverty-stricken areas would vary, because the contribution made by the State in some instances was high and in some instances was low. Is that correct?

Mr. MORSE. That is true. Let us get it out on top of the table: That created in our committee a considerable amount of discussion among the Senators who represent States with high State contributions, like New York. I see my good friend from Texas here [Mr. YARBOROUGH]. He will smile when I call attention to this discussion in the committee, because he was on one side of the argument and the Senators from New York and the Senator from Pennsylvania and the Senator from Massachusetts were on the other side. I thought the Senator from Texas did a magnificent job in presenting his point of view. We worked out those adjustments which we thought were the most equitable adjustments we could make.

Mr. YARBOROUGH. Mr. President, will the Senator yield?

Mr. MORSE. If the Senator will permit, the Senator from Ohio wants to put a final question.

Mr. LAUSCHE. It is my understanding that under this $3,000 low-income qualification, the school superintendent computes the number of children in school coming from families with incomes of less than $3,000, and then takes that number and multiplies the figure by one-half of what the State contributes, and that product——

Mr. MORSE. This is a technical matter, the allocations to the State are computed in the Office of Education. The State educational agency sets the criteria for within county distribution.

I am talking now about money appropriated, not about the money authorized by the formula.

I ought to point out to the Senator that school districts get a prorated amount based upon the amount that is authorized.

If the Senator from North Carolina will yield, I wish now to yield to the Senator from Texas [Mr. YARBOROUGH], since I mentioned him.

Mr. YARBOROUGH. Mr. President, the Senator from Oregon was generous enough to answer an inquiry by the Senator from Ohio about some discussion in the committee on the title I formula.

It developed in the committee hearings that this past year, under the Elementary and Secondary Education Act, with the formula originally in it, for Westchester County, one of the richest counties in the United States, allocations were made on the basis of some $416 per child; but in the mountain counties in Appalachia, with some of the poorest counties, allocations were made on the basis of approximately $119 per child. So the richest county was getting almost four times per child as much as the poorest counties in the United States. I thought then that it was a gross injustice. So we have this modified formula whereby no county will receive less than the national average. I still think it is not just. I voted for the first Elementary and Secondary Education bill, it is true, because for so long we had been trying to get an education bill passed, despite an inequitable formula. We have a more just formula, in my opinion, although it is not sufficiently just.

Why should a child in one State have an allocation of $121, while a child in Westchester County, N.Y., gets an allocation of $416? To have the children in one of the richest counties in the country receive four times as much as is allocated to the children in a poor county is unfair.

We have a formula in this bill, which the Senator from Oregon has described, in which no State will get less than the national average, which is around $255. So no State and no county or school district will be authorized to receive an allocation of less than $255 per child. Is that correct?

Mr. MORSE. Also, the reason we have put in a county savings formula in this bill is to see to it that they get no less than they received in the last fiscal year, to try to lessen the impact of possible curtailments which otherwise could have occurred.

Mr. YARBOROUGH. The Senator has pointed out that under the House formula some counties would get less; so the Senate committee added the provision to make sure no county would get less money than received the preceding year. In the many poverty-stricken areas, that is an important provision. In summary, I feel we have improved the formula although it still is not perfectly fair. I favor the bill, although I am reluctant about the formula.

Mr. LAUSCHE. Mr. President, will the Senator yield?

Mr. YARBOROUGH. I yield.

Mr. LAUSCHE. The Senator mentioned Westchester County, N.Y. I am quite certain in my recollection that that was one of the subjects of discussion back in 1965, when it was pointed out that the richest county in the Nation was getting the highest amount under the formula, while the poorest counties were getting substantially less.

Mr. YARBOROUGH. Getting very little in relation to the need.

Mr. LAUSCHE. Getting very little. And it is the position of the Senator from Texas that the bill as now written is intended to give some assurance that the greater the poverty, the greater the help will be that comes from the Federal Government.

Mr. YARBOROUGH. Yes. I think that this should be like the formula under the Hill-Burton law. I see that the distinguished senior Senator from Alabama is present. Under such formulas used in the past, the amount of money received was on the basis of the impoverished condition of the area. In other words, the poorer the area, the more money was received. The formula followed an inverse ratio: The richer the area, the less money it received because there was not as great a need.

As this Elementary and Secondary School Act was originally passed, it followed a formula which was the opposite of that. The richer you were, the more you got. That has been one great inequity in the law as it heretofore existed. We have come a considerable way along the road toward correction of that inequity. We have not come all the way, but we have come part way.

Under this compromise formula subject to appropriations, no county will receive less than $255 per child; and no county will receive less than they got under the bill last year. I am sure the Senator from Ohio will agree that this is a great step toward correcting the injustice which previously existed.

Mr. LAUSCHE. Yes.

Mr. YARBOROUGH. I am correct, am I not, that that is the minimum amount which will now go to any child?

Mr. MORSE. Two hundred and fifty-five dollars and thirty-four cents is one-half the national average per pupil expenditure. The option to use that figure or one-half the State per pupil expenditure remains unchanged from existing law.

Mr. YARBOROUGH. So that, in the very impoverished counties, where a county school district was receiving, under the old formula $119 per child this will represent a substantial increase.

Mr. MORSE. The minimum figure of $255.34, I point out to the Senator from Ohio, was a part of a compromise made in conference last year. As the Senator from Texas and the chairman of the committee, the Senator from Alabama [Mr. HILL] can tell the Senator, we thus reconciled what would otherwise have been irreconcilable differences. Unfortunately, that is, in plain terms, what was involved.

Mr. YARBOROUGH. Unfortunately for my State, we are 34th in the Nation in per capita income. In a State of about 10½ million we have about 2½ million people in the poverty bracket, with family incomes of less than $3,000 a year. That represents more people within the poverty bracket than in any other State in the Union. As I say, it is unfortunate; and I have devoted my political life to attempting to remedy that situation.

One cause of it is that we are one of only 13 States in the Union without a minimum wage law. The Federal minimum wage law, passed by this body, affects more people in my State than in any other State, because it has no minimum wage law of its own. It has been backward in that, as in many other areas of State legislation.

Against the background of that situation, needing this school money, I thought it was grossly unjust that poor counties receive so little money, and told the distinguished Senator from Oregon that I thought it was time for a showdown fight for justice. He agreed; and under his leadership, the compromise was reached.

Though one book referred to the Senator from Oregon as "The Tiger in the Senate," I have never seen a Senator work more diligently to achieve harmony than he has on this matter. He is devoted to the interests of the schools. Certainly, in the work of this committee, he was Mr. Conciliation; and due to his masterful efforts, I believe the pending bill represents a vast improvement over previous bills, and I take my hat off to the Senator from Oregon, not only for his patience in sitting through the committee hearings and his devotion to education, but for his spirit of conciliation in dealing with vast differences of point of view between Senators.

I thank the Senator from Oregon for what I think is a great addition to the achievement of justice for the poor children of our poorer school districts, when compared with the old bill.

Mr. MORSE. Mr. President, as always the Senator from Texas is very kind, but I tell him again, as I have told him heretofore, that he did as much toward that end as any member of the committee. Every member of the committee deserves credit for whatever good we have been able to accomplish.

Mr. LAUSCHE. Mr. President, will the Senator yield?

Mr. MORSE. I am about to yield the floor so that the Senator from North Carolina may proceed in his own right, and shall do so as soon as I answer the question of the Senator from Ohio. I yield to the Senator.

Mr. LAUSCHE. According to the chart dealing with large cities, the city of Cleveland, in my State, will receive $300,000 more, under the Senate version, than it would receive under the House verison; but Cincinnati, which is also in Ohio, will receive $100,000 less under the Senate version that it would receive under that of the House of Representatives.

What is the Senator's answer or explanation for that apparent disparity of treatment?

Mr. MORSE. That is just the way the statistics add up with respect to the number of poverty-stricken children under one formula in comparison to the other. It is just a matter of a mathematical calculation.

Mr. LAUSCHE. That is, the answer would be that there are more poverty-stricken children in the Cleveland area than in the Cincinnati area?

Mr. MORSE. That is right. The Senator is correct.

Mr. President, I yield the floor.

AMENDMENT NO. 483

Mr. ERVIN. Mr. President, I rise for the purpose of calling up Amendment No. 483. Before doing so, however, I ask unanimous consent that the name of the distinguished Senator from Florida [Mr. SMATHERS] may be added as a cosponsor of this amendment.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. ERVIN. Mr. President, on behalf of myself and Senators Cooper, Yarborough, Holland, and Smathers, I call up an amendment to H.R. 7819 to permit the Supreme Court to enforce the constitutional guarantees of freedom of religion and separation of church and state.

The PRESIDING OFFICER. The amendment will be stated.

Mr. ERVIN. I ask unanimous consent that the reading of the amendment be dispensed with, and that the amendment be printed in the Record at this point.

Mr. Ervin's amendment (No. 483), ordered to be printed in the Record, is on page 151, following line 6, insert the following:

TITLE VIII—ENFORCEMENT OF THE ESTABLISHMENT AND FREE EXERCISE CLAUSES OF THE FIRST AMENDMENT TO THE CONSTITUTION

Sec. 801. The approval or disapproval of an application of any public or other nonprofit agency or institution for a loan or grant under—

(1) the Higher Education Facilities Act of 1963,

(2) title VII of the Public Health Service Act,

(3) the National Defense Education Act of 1958,

(4) the Mental Retardation Facilities and Community Mental Health Centers Construction Act of 1963,

(5) title II of the Act of September 30, 1950 (Public Law 874, Eighty-first Congress),

(6) the Elementary and Secondary Education Act of 1965,

(7) the Cooperative Research Act,

(8) the Higher Education Act of 1965, or

(9) the Economic Opportunity Act of 1964,

shall be effected by an order of the Federal officer making such grant or loan which shall be conclusive except as otherwise provided in this title. Notice of such order shall be published in the Federal Register and shall contain such information as the Federal officer issuing the order deems necessary to effectuate the purposes of this title.

Sec. 802. Any public or other nonprofit agency or institution which is or may be prejudiced by the order of the Federal officer making a loan or grant under the authority of any of the Acts enumerated in section 801, in a particular year to another such agency or institution, by virtue of the fact that the making of such loan or grant serves to reduce the amount of funds available for loans or grants in such year to the agency or institution which is or may be prejudiced, and which deems a loan or grant to be inconsistent with the provisions relating to religion in the first amendment to the Constitution, may bring a civil action in the nature of an action for a declaratory judgment. Defendants in such action shall be the Federal officer and the agency or institution whose application has been approved. Such an action may be brought no later than sixty days after the publication of the order of the Federal officer in the Federal Register.

Sec. 803. (a) Any citizen of the United States upon whose taxable income there was imposed an income tax under section 1 of the Internal Revenue Code of 1954 for the last preceding calendar or taxable year and who has paid any part of such income tax and who deems a loan or grant made under any of the Acts enumerated in section 801 to be inconsistent with the provisions relating to religion in the first amendment to the Constitution, may bring a civil action in the nature of an action for a declaratory judgment against the Federal officer making such a loan or grant. No additional showing of direct or indirect financial or other injury, actual or prospective, on the part of the plaintiff shall be required for the maintenance of any such action. Such an action may be brought no later than sixty days after the publication of the order of the Federal officer in the Federal Register with respect to such loan or grant. In suing under this subsection, the plaintiff may sue either on behalf of himself or on behalf of all other taxpayers similarly situated.

(b) Any citizen of the United States who deems a loan or grant made under any of the Acts enumerated in section 801 to be inconsistent with the provisions relating to religion in the first amendment to the Constitution, may bring a civil action in the nature of an action for a declaratory judgment against the Federal officer making such a loan or grant. Such an action may be brought no later than sixty days after the publication of the order of the Federal officer in the Federal Register with respect to such loan or grant. In suing under this subsection, the plaintiff sues not only for himself but also in behalf of all other citizens to vindicate the public interest in the observance of the provisions of the first amendment relating to religion.

(c) For the purpose of this section the term "citizen" shall include a corporation.

Sec. 804. Any public or other nonprofit institution or agency whose application for a loan or grant under any of the Acts enumerated in section 801 has been denied by the Federal officer having appropriate authority on the ground that such loan or grant would be inconsistent with the provisions relating to religion in the first amendment to the Constitution may bring an action to review the final decision of such Federal officer within sixty days after such loan or grant has been denied.

Sec. 805. (a) Any action under this title shall be brought in the District Court of the United States for the District of Columbia, and such court shall have jurisdiction without regard to the amount in controversy. In the event two or more civil actions are brought under the provisions of this title challenging the constitutional validity of the same loan or grant, such court may consolidate such civil actions for the purpose of trial and judgment. Any action under this title pending before the district court or court of appeals for hearing, determination, or review shall be heard, determined, or reviewed at the earliest practicable time and shall be expedited in every practicable manner. All process, including subpenas, issued by the district court of the United States for any such district may be served in any other district. In any action under this title the court shall have authority to determine all matters of fact or law appropriate to a decision of the case. No costs shall be assessed against the United States in any proceeding under this title. In all litigation under this title, the Federal officer shall be represented by the Attorney General.

(b) The judgment of the district court shall be subject to review as provided in sections 1252, 1253, 1254, and 1291 of title 28 of the United States Code.

Sec. 806. (a) An interlocutory injunction enjoining the payment of a grant or loan, or any portion thereof, made pursuant to the order which is claimed to be invalid in an action under this title may be granted by the court at any stage of the proceedings authorized by this title.

(b) When and if any judgment becomes final that declares invalid an order of the Federal officer under this title, the agency or institution receiving the grant made by the Federal officer pursuant to such order shall refund the unexpended portion of the same, and if a loan has been made pursuant to such order it shall be refunded with accrued interest at the rate fixed therefor, for credit to the appropriation from which it was paid. The Federal officer may in his discretion permit deferment for a reasonable time of repayment of the grant or loan including interest thereon.

Sec. 807. If any provision of any Act referred to in section 801, or the application of such provision to any person or circumstance, shall be held invalid under this title, the remainder of such Act, or the application of such provision to persons or circumstances other than those as to which it is held invalid, shall not be affected thereby.

Mr. MORSE. Mr. President, will the Senator yield for a moment?

Mr. ERVIN. I yield.

Mr. MORSE. I shall make a statement on the amendment when the Senator finishes, but at this point, may I say I should like to join the Senator also as a cosponsor of the amendment. I ask that my name be added, together with that of the Senator from Florida [Mr. Smathers], as a cosponsor of the amendment.

Mr. ERVIN. Mr. President, in accordance with the Senator's request, I ask unanimous consent that the name of the Senator from Oregon [Mr. Morse] be added as a cosponsor of the amendment.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. ERVIN. The amendment would remove a technical obstacle for those citizens and institutions who wish to challenge Federal aid to church-related institutions on the grounds that it violates the first amendment.

This amendment is not strange to the Senate. It is identical to S. 3 which the Senate passed without objection earlier this year, and S. 2097 which the Senate passed, also overwhelmingly, in the 89th Congress. This legislation was cosponsored by Senators Morse, Cooper, Clark, Yarborough, Smathers, Holland, Fong, and myself.

The Senate will recall the origin of the legislation in the debate that occurred when the Higher Education Facilities Act was passed in 1963. Because of the importance and complexity of the constitutional implications of sectarian participation in that program, the Senate adopted an amendment providing for judicial determination of first amendment questions arising under the act. In conference, the Senate receded from the amendment at the insistence of the House.

In 1965, the distinguished floor manager of the Elementary and Secondary Education Act, then as now, the senior Senator from Oregon [Mr. Morse], stated that he would introduce and support a judicial review measure if it were considered as separate legislation. He was true to his promise, and his efforts have been instrumental in developing a bill which the Senate enacted on two occasions, the measure we offer today. The Senator's bill was a joint project of himself, the then Attorney General of the United States, and the then Solicitor General of the United States. The amendment has that distinguished a paternity.

The bill S. 2097 of the 89th Congress, was the subject of hearings before the Constitutional Rights Subcommittee of the Senate Judiciary Committee in early 1966. Distinguished legal and constitutional scholars testified in support of the bill. They were joined by religious leaders, civil liberties groups, and representatives of major educational organizations. With the close assistance of these participants, the bill was revised and perfected. I do not believe that this body has ever considered a measure more carefully drafted than this one. On July 29, 1966, the Senate approved the bill and it was sent to the House. There it died.

On the first day of the 90th Congress, the bill was again introduced, this time as S. 3. Once again the Senate adopted it without dissenting vote. It was sent to the House on April 11, and referred to Committee. There it languishes still and will apparently continue to languish.

It is no secret that I and other supporters of judicial review were skeptical of the chances that a separate bill would ever be enacted by Congress. I made my opinion quite clear in 1963. I said:

> In my considered judgment, it is necessary to have the Cooper-Ervin amendment, providing for judicial review, inserted in the higher education bill before it is enacted into law. I say this because I have no hope that we shall be able to obtain enactment, within any reasonable period of time, of a separate bill providing for judicial review of the constitutionality of the loans or grants authorized by the bill.
>
> * * * * *
>
> If we wish to make certain that we shall obtain a judicial review of the question, we must get it by this [amendment] process; this is so because the House has rejected a proposal for a judicial review every time it has had an opportunity to do so.
>
> When the bill was originally introduced in the House, it provided for a judicial review—a provision which the House Committee eliminated.
>
> The House itself refused to agree to a provision for judicial review. Moreover, the conference committee removed the Cooper-Ervin amendment from the bill at the insistence of House conferees.

Despite my pessimism, I reluctantly agreed with the distinguished Senator from Oregon that the Senate should try to have a separate bill enacted. After all this time, I regret to say that my prediction in 1963 has been vindicated. We have gotten no action from the House—none in the 89th Congress on S. 2097, and none in the 90th Congress on S. 3.

We have now decided to offer this bill as an amendment to the Elementary and Secondary Education Act for a number of reasons. First, the number and the size of Federal aid programs involving sectarian participation have mushroomed in recent years. As important as the first amendment issue was in 1963 and 1965, it has become even more so since then because of the way in which the programs have been implemented. Some measure of the sophistry and administrative inconsistency connected with these programs can be gathered from an article in the Washington Post of Sunday, November 26, 1967. The situation portrayed in this article is a direct result of our failure to provide judicial review. I ask unanimous consent that the Post article be inserted in the RECORD at the conclusion of my remarks.

The PRESIDING OFFICER. Without objection, it is so ordered.

(See exhibit 1.)

Mr. ERVIN. Mr. President, second, recent judicial decisions, both State and Federal, have clouded the constitutional lines to such an extent that a definite ruling by the Supreme Court as to the proper constitutional limits is even more important than ever before in our history. At the same time, the growing confusion over the proper relationship between church and state has caused increased divisions within our country. One has only to look at a daily newspaper to see evidence of the emotion-laden controversy which has developed.

Third, despite the importance of providing for judicial resolution of the church-state question, for 4 long years the Senate has waited in vain for House action on enabling legislation. I now despair of any other means by which the legislation can be enacted.

Finally, events of the past few weeks make quick congressional action imperative. The Supreme Court on October 16 accepted certiorari in the case of Flast against Gardner which involves a general constitutional attack on the Elementary and Secondary Education Act. If the Congress does not act immediately, it is altogether possible that the decision in this case will create chaos in the program and in the many others in which the church-state issue is intimately entwined.

The Flast case involves more than merely the Elementary and Secondary Education Act and the $1.677 billion which Congress appropriated for it in 1967. No one seems to know how much money has been distributed to church-related institutions under the Elementary and Secondary Education Act or under the Economic Opportunity Act; but in fiscal 1966, $60 million was allocated to these groups under the Higher Education Facilities Act of 1963.

The implementation of these and other Federal programs has increased the concern of many that the constitutional prohibitions against establishment of religion have been violated. A similar situation exists with respect to title VII of the Public Health Services Act, the National Defense Education Act of 1958, the Mental Retardation Facilities Act of 1963, the Cooperative Research Act of 1954, the Higher Education Act of 1965, and Title II of the Act of September 30, 1950—Public Law 874, 81st Congress. The total appropriations for these nine programs—all of them involving aspects of the church-state issue—amounted to some $4½ billion in fiscal 1967.

Ever since the judicial review legislation was first presented, the argument has been made that cases were in the courts which would eventually enable the Supreme Court to rule on the church-state question without the need for Congress to expressly permit review. But each time the argument has been presented that the Court would decide the issue without Congress help, it has refused to do so. The most recent time was last year. A case indirectly challenging the constitutionality of the Higher Education Facilities Act arose in the Maryland courts. The excuse given at that time for not proceeding with the judicial review bill was that the Court could decide the constitutional issues in this case and the bill was unnecessary.

The Court, however, refused to accept the case and felt standing the Maryland Supreme Court decision. So at present we have the peculiar result that in Maryland certain State grants are ruled unconstitutional under the first amendment according to interpretation of the State supreme court. But at the same time, these same colleges continue to receive Federal funds.

As I said earlier this year:

> These same three colleges which cannot constitutionally receive funds from the State of Maryland have each been recipients of Federal grants during the last 2 years. The effect, then, is that while the establishment clause was originally intended to apply only to Congress, today it is only enforced against State legislatures. On religion and the first amendment, the law of the land is less majestic than ironic.

Or, as Judge Frankel of the second circuit has said:

> It seems perfectly obvious that those who wrote the First Amendment would have been astonished by the suggestion that it might come to be enforceable *only* against the States and not against the Federal Government. The familiar words are that "*Congress* shall make no law respecting an establishment of religion. . . ." When they were written, they were applicable only to the Federal Government, and they remained so confined until just a generation ago. It was the national power that the Founders feared and undertook to curb.
>
> There is no question now, of course, that the First Amendment applies with full force to the States. But it is a ludicrous anomoly to close the circle . . . by making at least the Establishment Clause a substantial nullity with respect to the Federal Government.

Contrary to the expectations of those who have counseled delay by the Congress in the hopes that the church-state issue would be resolved by the courts, the result of congressional inaction has been more uncertainty, not less. The Maryland case is only one of a number of recent instances in which the lack of Supreme Court guidance has resulted in increased constitutional confusion and the political and religious turmoil that we see today.

The House has had Senate-approved judicial review legislation pending before it for almost 2 years, as well as similar legislation which originated there. Since 1963, the Senate sponsors have written letters to members of the House Judiciary Committee asking for early consideration of the measure. Private organizations representing nationwide religious and educational groups have personally called upon the committee for action. I am informed by members of the House committee staff that hundreds of letters have been received from private citizens urging favorable action on the bill.

Within the past year, enactment of S. 3 has been endorsed by the New York Times, the Chicago Tribune, the Washington Post, the Charlotte Observer, the Wichita Beacon, the Winston-Salem Journal, the Denver Post, the Pittsburgh Post-Gazette, the Washington Star, and countless other newspapers. When such unanimity comes from such diversity, I know we must be on the right track.

Among the educational, religious and civil liberties organizations supporting the bill are the following: Baptist Joint Committee on Public Affairs, American Civil Liberties Union, Americans for Public Schools, National Education Association, the American Federation of Teachers, National Congress of Parents and Teachers, Council of Chief State School Officers, Americans United for Separation of Church and State, American Jewish Committee, the Unitarian Universalist Association, Seventh-day Adventists, Union of American Hebrew Congregations, National School Boards Association, National Association of Evangelicals, American Association of School Administrators, American Association of University Professors, Antidefamation League, Association of State Colleges and Universities, and the Association of Land-Grant Colleges.

Despite this overwhelming public support, and despite the fact that the Senate has approved this legislation on three separate occasions in the past 4 years, no action—not even hearings at the subcommittee level—has been taken. It is now evident that the only chance for enactment of judicial review legislation is by amendment to the Elementary and Secondary Education Act. The Senate has tried the other route, and that has failed.

There should be no doubt about the purpose of this amendment. It takes no stand on the substantive issue itself; it does not involve a congressional judgment on the limits of Federal cooperation with sectarian institutions, nor does it decree that one or another Federal aid program is valid or invalid under the first amendment. The bill concerns something even more fundamental than that. The issue raised by the amendment is whether the Supreme Court can hear and adjudicate legal issues raised under the first clause of the first amendment to the Constitution.

The great questions of church and state have been fought in this country since before our independence. The leaders of our country at its birth had had experience with the problem, and they recognized the danger to both church and state from too close an association with each other. Indeed, it was because of this experience that the drafters of the Bill of Rights placed the establishment clause in the first article and in its first provision. In the list of basic freedoms, the establishment clause is most preferred.

All other constitutional rights which are susceptible of judicial resolution may be placed before the Federal courts for protection. Yet, despite the priority which is given this constitutional principle, it is the only personal liberty which, because of a legal technicality, cannot adequately be resolved by the Supreme Court.

Congress has a responsibility to remove this technical disability and permit the controversy to be resolved in the courts. A Court decision delineating the boundaries of church-state cooperation in the Federal sphere would free our country from much of the religious politics that is dividing the Nation.

The whole of the problem which stands in the way of a judicial solution is a case decided in 1923. That was Frothingham against Mellon. Mrs. Frothingham sued for an injunction against the grant of Federal funds for maternal benefits. Mrs. Frothingham did not sue under the first amendment, nor could she have pointed to a legislative authorization to sue, as plaintiffs proceeding under the judicial review bill might. She did not sue on behalf of all taxpayers, or even a class of taxpayers, but only for her own individual benefit. She asked for an injunction and could not show that clear and irreparable injury which is traditionally required before a court will exercise its equity powers.

Despite obvious distinctions, Mrs. Frothingham's suit has thus far prevented the Federal courts from accepting taxpayer suits based upon alleged first amendment violations of Federal assistance programs.

Each year we allow the problem to go uncorrected, the church-state issue becomes more important and emotions more intense. There can be no question but that we have reached a constitutional crisis in church-state relationship upon which the Supreme Court must speak. All other voices, except that of the House of Representatives, have said their piece.

This amendment could not be more critical today. Earlier this year, a group of plaintiffs in New York, representing a number of highly respected citizens' groups, filed a challenge to the Elementary and Secondary Education Act. The issue in the Flast against Gardner case is the same as the one in this amendment—whether Federal courts may consider suits by citizens challenging the validity of Federal programs under the first amendment. The court has accepted the case, and argument is set for early in 1968.

Whatever happens in that case, this bill will be necessary. If the court rules against the plaintiffs, then only by the passage of this measure can a test ever be had in the Supreme Court on the validity under the first amendment of the Elementary and Secondary Education Act programs and other Federal programs. If the court rules in favor of the plaintiffs, then this measure will be needed to insure orderly judicial procedure and to prevent havoc in the administration of programs which are challenged.

In suits brought pursuant to this amendment, plaintiffs will have to commence their case within 60 days of the official notice approving a questionable grant. This notice is published in the Federal Register. Without this legislation, grants could be attacked at any time, even long after the money has been expended.

All cases would have to be brought in the District Court for the District of Columbia. This eliminates the danger of suits arising all across the country and the confusion that would result when different courts ruled differently on similar grants. Without such a limitation, it is possible that a grant could be held unconstitutional in one Federal court and permitted in another. Indeed, grants to schools in the same State could be both proper and improper at the same time, even when they were made to the same institution.

The amendment also reduces the likelihood of frivolous and harassing suits which could bedevil and paralyze all Federal programs touched by the church-state controversy. Because of the considerable resources needed to pursue a challenge, the joinder provision, and the exclusive venue in the District of Columbia, I anticipate that few cases will arise under the bill and that they will all be on substantial issues.

A suit under the act will be heard in a special three-judge Federal court. All decisions of the court will be reviewable directly and speedily by the Supreme Court. Further, the measure provides that only grants or loans made after the approval of the amendment can be the subject of a challenge. I might add that this is a very important provision against the eventuality that the Supreme Court, in Flast against Gardner, will hold that the courts have inherent jurisdiction to review these cases. In the absence of this provision, the courts would necessarily hold that one may go back into the past and recover grants unconstitutionally made which have already been expended. This would create havoc in the educational field and in many other fields.

The amendment prevents the issuance of a court order requiring the repayment of funds already expended by a recipient before the grant was declared unconstitutional. That schools, colleges, hospitals, and scholarship holders might suddenly be faced with the prospect of having to repay millions of dollars already granted them would be unthinkable. Provision is also made for repayment over a delayed period of grants received but not actually expended.

From this description of the amendment, it should be clear that its supporters are not out to scuttle the Elementary and Secondary Education Act or the other affected programs, nor to bring financial ruin to the schools, colleges, hospitals, and citizens who have received funds under them. In fact, each of the cosponsors of S. 3 has consistently supported Federal aid to education. What we want is to end once and for all the doubt, controversy, and the divisiveness created by the church-state issue. Supporters include those who are convinced that there has been no violation of the Constitution in the enactment or administration of these programs as well as those who have constitutional doubts. But on this we are agreed: the Court should have the opportunity to decide. And, in any case, none of us wish to see either the first amendment unvindicated because of technical rules of law or vindicated in such a way that the important programs are paralyzed by litigation.

Congress should adopt this measure with its limitations and controls on litigation before the Court acts in the Flast case.

Mr. President, I ask unanimous consent that a Washington Post editorial, calling for enactment of the judicial review bill, be printed in the Record at the conclusion of my remarks.

The PRESIDING OFFICER. Without objection, it is so ordered.

(See exhibit 2.)

Mr. ERVIN. In addition to the Washington Post article I referred to earlier, I also ask unanimous consent to have printed as part of my remarks, the text of the amendment, and an excerpt from the committee Report No. 85 on S. 3, which explains in greater detail the history of the bill, its need, its provisions, and the legal and constitutional issues involved in it.

The PRESIDING OFFICER. Without objection, it is so ordered.

(See exhibits 3 and 4.)

EXHIBIT 1

[From the Washington (D.C.) Post, Nov. 26, 1967]

CHURCH-STATE AGREEMENT ON SCHOOL AID ATTACKED

(By J. W. Anderson)

CHICAGO, November 25.—Federal school aid paid for new closed-circuit line that runs from a studio at Hinton School here to the boundary of the nearby St. Brendan School.

St. Brendan is a Catholic parochial school, and the Archdiocese of Chicago provided the money to carry the line across the school boundary, into the building, to a wall socket.

And then Federal aid paid for the plug, cord and television receiver in a St. Brendan classroom.

That television line illustrates the intricacy of the compromise between public and Catholic schools that underlies the historic Elementary and Secondary Education Act of 1965.

Federal officials hope that the 1965 compromise settled the issue of relations between church and state. But six suits have already been filed to attack it.

If any of these suits succeed, benefits to parochial school children will be reduced. And that, in turn, will jeopardize the uneasy alliance in Congress that passes the annual school aid appropriations.

Under the compromise, Federal funds must not be used to benefit private schools.

But the same law requires each community receiving Federal aid to provide some benefits to the children in private schools.

A television set, for example, is considered portable equipment. And, under Federal rules, portable equipment can be loaned to parochial schools.

Congress adopted the theory that equipment does not benefit parochial schools as long as it is merely loaned to them. But, as a loan, it benefits the parochial school children who use it, the theory holds.

The Supreme Court has now agreed to hear an appeal by a group of New York City plaintiffs who are claiming the right to sue over the loan of textbooks to private schools.

Similar suits have been filed in Ohio and Pennsylvania, charging that these loans violate the constitutional separation of church and state.

If the Court gives these plaintiffs the right to sue, litigation throughout the country will begin systematically to test the constitutionality of the whole operation of the Education Act.

A survey by The Washington Post of Chicago, Detroit and Philadelphia—three big cities with heavy Federal programs and large, politically influential Catholic school systems—suggests this conclusion:

Federal school aid is unquestionably raising the quality of education in the Catholic schools that serve deprived neighborhoods in these cities.

But the Federal aid does not necessarily save money for these parochial schools. To the contrary, it usually costs the schools still more money.

BOOKS ON LOAN

St. Brendan, for example, has received several stacks of Federally-purchased library books on loan from the Chicago School Board.

Now St. Brendan needs a trained librarian. But there is no Federal money for that.

Incidentally, the term "on loan" needs an explanation. The loaned books and equipment remain the property of the public schools. But they are physically in the nonpublic schools. And no one really expects the loans to be recalled.

The church-state compromise gets even more complicated where it involves teachers.

For one hour a week, Sister Madonna Marie is a Detroit public school teacher.

A Catholic nun, she is on the faculty of St. Martin de Porres High School, in a neighborhood badly hurt during Detroit's riots last summer.

DePorres High is running part of Detroit's federally-supported afternoon program for school children, and Sister Madonna Marie is organizing a choral group.

But Federal funds cannot be used to pay a non-public school teacher.

The solution: From 3:30 to 4:30 every Tuesday afternoon, Sister Madonna Marie becomes a public school teacher.

She remains in her customary classroom at DePorres. But any neighborhood child may enroll in her singing group, regardless of the school he regularly attends.

"PUBLIC" FOR HOUR

And, for that hour, she is certified as a public school teacher, under the supervision and control of Detroit's city School Board.

Karen Wessel, on the other hand, is a full-time public school teacher in Philadelphia who spends two hours a day at Cathedral School, a small Catholic parochial school. It serves a crowded Puerto Rican slum just north of Philadelphia's stately Parkway.

Two-thirds of Cathedral School's children speak Spanish as a first language, and some of them hear no other except in school.

Miss Wessel's job is to teach them English. Her salary is paid out of Philadelphia's share of Federal school aid. Like Sister Madonna Marie's choral group, Miss Wessel's language lessons are provided by the Education Act.

Miss Wessel can go into a parochial school because she represents a "supplementary" service. She is not a regular classroom teacher.

Most of the nuns in the afternoon programs teach many more hours than the Federal money pays them for.

"They never see the money anyway," observed DePorres's principal, Joseph Dulin. "They take the vow of poverty."

The nuns are carried on the public payroll under their maiden names, as a mild concession to the proprieties of the church-state relationship.

But here again, the long-run effect of participation in the Federal programs can be costly to the parochial schools. When nuns go to work teaching neighborhood afternoon classes, the strain on the schools' limited classroom teaching staff is further increased.

In Washington, where the parochial system is small, its relationship to the Federal programs is relatively simple.

Federal aid buys books, some of which go on loan into the libraries of parochial schools. The public schools hire remedial reading teachers, counsellors and speech therapists with Federal funds, and send some of them part time into the Catholic schools to work with children there.

Among the big cities, the local variations in policy are wide.

In Detroit, some of the federally-financed after-school programs are located in parochial schools. In a Detroit slum known as Corktown, the nuns at Most Holy Trinity School call the afternoon program "fun school." The fun currently includes an imaginative science course for a group of bright second-graders.

But in Chicago, all of the afternoon programs are in the public schools.

DIFFICULTIES PRESENT

This practice makes real difficulties for the parochial school children in tough neighborhoods, according to St. Brendan's Rev. Gerald Millin.

St. Brendan's children are supposed to go to the city's Bass School, only three blocks away, for afternoon activities.

Last year, about 300 St. Brendan children enrolled. This year, there are exactly eight who go to Bass in the afternoon, Father Millin said.

"Our children are molested," he explained. "There's always rivalry between schools. Our children are in uniform. I'd say we should drop the uniform."

The St. Brendan case is interesting because the friction is not, as an outsider might suppose, racial.

St. Brendan's children are all Negro. The public school children who harass them are also all Negro.

Neither is the friction religious. Three-fourths of St. Brendan's children are Protestant. (Throughout central Chicago, the Catholic schools' enrollments average about one-third Protestant.)

The trouble in the streets seems merely to be a matter of turf. But it very effectively discourages St. Brendan's children from going to Bass school for programs that end after dark.

Where children are older, exchanges are easier.

In Detroit, DePorres is now beginning joint after-school activities with Central High, the nearest public high school. Youngsters go from DePorres for modern dance at Central, they go from Central to bowl in DePorres's big recreation center.

Central is now almost entirely Negro in enrollment. But DePorres continues to attract children whose families have moved to the suburbs. It is now about 60 per cent Negro, although the proportion is higher in the lower grades.

DePorres' principal Dulin candidly explains that he is turning away Negro applicants to hold the racial balance.

SIGN OF CHANGE

Dulin himself, incidentally, is a sign of change in Catholic education. He is a Negro, a layman and, until this year, a teacher in Detroit's public schools.

Local differences in policy are particularly sharp in the crucial issue of Federal support for teacher training.

Chicago declines to spend public money to train parochial school teachers.

"This is a gray area," said Mrs. Evelyn Carlson, assistant superintendent of Chicago's schools.

"They are told what we are having, and when. And they are welcome to come. We cannot pay them."

But in Detroit, Catholic school administrators carried the issue to Washington and got a ruling from the U.S. Office of Education that parochial school teachers were entitled to the same training as public school teachers.

Detroit's public school system does not pay salary to parochial school teachers for attending training sessions. But it gives them a stipend of $15 a day, plus reimbursement for meals and travel.

Detroit uses Federal funds to run special training programs for parochial school teachers alone, where they have special requirements not found in public schools.

In Philadelphia, policy lies somewhere between Chicago's caution and Detroit's boldness. Philadelphia pays nuns stipends for attending training sessions, but it will not organize special sessions for them as Detroit does.

Not all parochial schools are Roman Catholic. Detroit, for example, has 22 Lutheran schools, as well as a long list of schools run by other denominations including the Black Muslim's University of Islam.

At least one of the Lutheran schools is currently getting Federal benefits for its pupils.

POLITICAL PULL

But only the Catholics have the political influence to make a public issue of school aid.

One very sharp point of contention between public and Catholic school administrators is the use of Federal aid to reduce the size of classes.

Reducing class size is one benefit in which Catholic school children cannot participate at all, because Federal funds cannot be used to pay classroom teachers in parochial schools.

Chicago uses Federal aid to reduce classes to 25 children in the slum schools' primary grades. Detroit's school board has recently begun the same program, and relations between the School Board and the Archdiocese are not quite so warm as they were a year ago.

The two greatest financial needs of the parochial schools are funds for classroom teachers and for construction.

Since private schools cannot get this kind of help from the Federal Government, they are increasingly turning to the state legislatures to rescue them.

In Pennsylvania the legislature has been embroiled over a bill to provide $26 million a year in subsidies for classroom teaching in the parochial schools.

Philadelphia Republicans blame the bill for their defeat in this month's mayoral election. Their candidate, Arlen Specter, had refused to endorse the bill and the Catholic wards voted heavily against him.

In Michigan, the legislature three years ago enacted a law requiring all public schools to share their auxiliary services—like remedial reading instruction and speech therapy—equally with parochial schools.

Unlike the Federal programs, this Auxiliary Services Act has had the effect of reducing services in the public schools.

When the Auxiliary Services Act first went into effect the Detroit School Board's lawyer said that it was unconstitutional.

But the School Board never challenged it.

All school tax increases in Michigan have to be passed in referendum elections. Detroit's School Board did not want to antagonize Catholic voters.

Private litigants filed a suit two years ago, but it has not come to a resolution.

But the new Federal aid is giving a national breadth to the church-state issues arising locally over schools.

The Elementary and Secondary Education Act is currently putting $1.6 billion a year into the country's school systems.

Two and a half years ago, when the Act was passed, the separation of church and state was being debated in principle. Now judges, politicians and school administrations are beginning to see what that $1.6 billion is doing in actual practice.

Exhibit 2

[From the Washington (D.C.) Post, Apr. 7, 1967]

Weighing the Law

From the moment it was introduced at President Johnson's behest, there was vehement disagreement and debate regarding the constitutionality of the Elementary and Secondary Education Act of 1965. The disagreement was not resolved by the debate over the bill in Congress; many members, it is fair to say, voted to enact the bill into law, despite uncertainty as to whether application of some of its clauses would be constitutionally valid, because they were convinced of the urgent need for Federal aid to education and because they believed that the constitutional questions would, in time, be settled by the courts.

But there is a serious impediment to judicial determination of these questions. In 1923, in a case known as *Frothingham* v. *Mellon*, the Supreme Court held that an ordinary taxpayer seeking to prevent the appropriation of Federal funds to the States for maternal benefits had no standing to sue because "the effect upon future taxpayers is so remote that no basis is afforded for an appeal to the preventive powers of the court." Relying on this rule, a Federal District Court the other day dismissed a suit challenging the Education Act, brought in Dayton, Ohio, by Protestants and Other Americans United for Separation of Church and State.

But POU did not come to court as a mere taxpayer. It came as a plaintiff asserting a deprivation of religious liberty and of the right to be free of any "establishment of religion." In Dayton, it asserted, Federal funds were used by the State of Ohio to put books into a parochial school library where they were made available to children attending that school; the effect of this, POU contended, was to give Federal aid to religion in contravention of the First Amendment. Had the books been loaned directly by some public authority to children who attended the parochial school, or made available to them through a public school or a public library, no question of constitutionality would have arisen.

The question of standing to sue is a difficult and delicate one. Whether the District Court in Ohio was right in dismissing the POU suit will have to be determined by a Court of Appeals and perhaps ultimately by the Supreme Court. Senator Sam Ervin reintroduced last January his bill designed to remove any doubt as to the power of taxpayers, citizens and institutions to obtain judicial review of the validity of Federal grants and loans under the First Amendment provisions relating to religion. In reporting this bill favorably last year, the Senate Judiciary Committee concluded that the *Forthingham* decision of 1923 was not based on constitutional grounds but was rather an exercise of judicial restraint and could therefore be changed by legislation.

If this is so, the Ervin bill would be most useful. For it can hardly be doubted that the Federal courts would not be indifferent to a direct congressional request that they decide a clouded constitutional issue. It seems to us, moreover, that there is much merit to the POU argument that a great deal more than a taxpayer's suit is involved in a challenge to specific ways of administering Federal aid to education. Commenting a year or more ago on the Ervin bill, Prof. Paul Freund of the Harvard Law School said that litigation under it would be brought "to vindicate rights secured by the First Amendment, a right to be free of a Federal religious establishment, a right closely allied to the right of free exercise of religion and one that traditionally took the form of freedom from enforced contribution to support religious activities. In this view, the quantum of the financial stake is not central to the right; any such use of a citizen's tax payments would constitute the heart of the offense to his autonomy in the religious sphere."

When one recognizes that a Federal program of grants-in-aid to the States necessarily entails diversity of application and when one acknowledges that differing opinions will be conscientiously held as to the constitutional validity of these applications, judicial review seems to be the only way to get an authoritative determination. The controversy can best be concluded by the patient judicial process of inclusion and exclusion.

Exhibit 3

Amendment No. 483

TITLE VIII—ENFORCEMENT OF THE ESTABLISHMENT AND FREE EXERCISE CLAUSES OF THE FIRST AMENDMENT TO THE CONSTITUTION

Sec. 801. The approval or disapproval of an application of any public or other nonprofit agency or institution for a loan or grant under—

(1) the Higher Education Facilities Act of 1963,

(2) title VII of the Public Health Service Act,

(3) the National Defense Education Act of 1958,

(4) the Mental Retardation Facilities and Community Mental Health Centers Construction Act of 1963,

(5) title II of the Act of September 30, 1950 (Public Law 874, Eighty-first Congress),

(6) the Elementary and Secondary Education Act of 1965,

(7) the Cooperative Research Act,

(8) the Higher Education Act of 1965, or

(9) the Economic Opportunity Act of 1964,

shall be effected by an order of the Federal officer making such grant or loan which shall be conclusive except as otherwise provided in this title. Notice of such order shall be published in the Federal Register and shall contain such information as the Federal officer issuing the order deems necessary to effectuate the purposes of this title.

Sec. 802. Any public or other nonprofit agency or institution which is or may be prejudiced by the order of the Federal officer making a loan or grant under the authority of any of the Acts enumerated in section 801, in a particular year to another such agency or institution, by virtue of the fact that the making of such loan or grant serves to reduce the amount of funds available for loans or grants in such year to the agency or institution which is or may be prejudiced, and which deems a loan or grant to be inconsistent with the provisions relating to religion in the first amendment to the Constitution, may bring a civil action in the nature of an action for a declaratory judgment. Defendants in such action shall be the Federal officer and the agency or institution whose application has been approved. Such an action may be brought no later than sixty days after the publication of the order of the Federal officer in the Federal Register.

Sec. 803. (a) Any citizen of the United States upon whose taxable income there was imposed an income tax under section 1 of the Internal Revenue Code of 1954 for the last preceding calendar or taxable year and who has paid any part of such income tax and who deems a loan or grant made under any of the Act enumerated in section 801 to be inconsistent with the provisions relating to religion in the first amendment of the Constitution, may bring a civil action in the nature of an action for a declaratory judgment against the Federal officer making such a loan or grant. No additional showing of direct or indirect financial or other injury, actual or prospective, on the part of the plaintiff shall be required for the maintenance of any such action. Such an action may be brought no later than sixty days after the publication of the order of the Federal officer in the Federal Register with respect to such loan or grant. In suing under this subsection, the plaintiff may sue either on behalf of himself or on behalf of all other taxpayers similarly situated.

(b) Any citizen of the United States who deems a loan or grant made under any of the Acts enumerated in section 801 to be inconsistent with the provisions relating to religion in the first amendment to the Constitution, may bring a civil action in the nature of an action for a declaratory judgment against the Federal officer making such a loan or grant. Such an action may be brought no later than sixty days after the publication of the order of the Federal officer in the Federal Register with respect to such loan or grant. In suing under this subsection, the plaintiff sues not only for himself but also in behalf of all other citizens to vindicate the public interest in the observance of provisions of the first amendment relating to religion.

(c) For the purpose of this section the term "citizen" shall include a corporation.

Sec. 804. Any public or other nonprofit institution or agency whose application for a loan or grant under any of the Acts enumerated in section 801 has been denied by the

Federal officer having appropriate authority on the ground that such loan or grant would be inconsistent with the provisions relating to religion in the first amendment to the Constitution may bring an action to review the final decision of such Federal officer within sixty days after such loan or grant has been denied.

SEC. 805. (a) Any action under this title shall be brought in the District Court of the United States for the District of Columbia, and such court shall have jurisdiction without regard to the amount in controversy. In the event two or more civil actions are brought under the provisions of this title challenging the constitutional validity of the same loan or grant, such court may consolidate such civil actions for the purpose of trial and judgment. Any action under this title pending before the district court or court of appeals for hearing, determination, or review shall be heard, determined, or reviewed at the earliest practicable time and shall be expedited in every practicable manner. All process, including subpenas, issued by the district court of the United States for any such district may be served in any other district. In any action under this title the court shall have authority to determine all matters of fact or law appropriate to a decision of the case. No costs shall be assessed against the United States in any proceeding under this title. In all litigation under this title, the Federal officer shall be represented by the Attorney General.

(b) The judgment of the district court shall be subject to review as provided in sections 1252, 1253, 1254, and 1291 of title 28 of the United States Code.

SEC. 806. (a) An interlocutory injunction enjoining the payment of a grant or loan, or any portion thereof, made pursuant to the order which is claimed to be invalid in an action under this title may be granted by the court at any stage of the proceedings authorized by this title.

(b) When and if any judgment becomes final that declares invalid an order of the Federal officer under this title, the agency or institution receiving the grant made by the Federal officer pursuant to such order shall refund the unexpended portion of the same, and if a loan has been made pursuant to such order it shall be refunded with accrued interest at the rate fixed therefor, for credit to the appropriation from which it was paid. The Federal officer may in his discretion permit deferment for a reasonable time of repayment of the grant or loan including interest thereon.

SEC. 807. If any provisions of any Act referred to in section 801, or the application of such provision to any person or circumstance, shall be held invalid under this title, the remainder of such Act, or the application of such provision to persons or circumstances other than those as to which it is held invalid, shall not be affected thereby.

EXHIBIT 4

EXCERPTS FROM SENATE REPORT NO. 85

PURPOSE OF S. 3

The purpose of S. 3 is to provide effective procedures for the enforcement of the establishment and free exercise clauses of the first amendment to the Constitution of the United States. The bill achieves this ambition by affording the judicial machinery necessary for instituting an equitable action for declaratory judgment to obtain judicial review of the constitutionality of grants or loans made under certain enumerated acts of Congress.

It is envisaged that the classes of plaintiffs participating in litigation under this act shall include the following: (1) individual and corporate Federal taxpayers, or groups thereof; (2) any public or other nonprofit institution or agency which has made application for a Federal grant or loan; and (3) citizens of the United States.

It is intended that the classes of plaintiffs identified in sections 2, 3, and 4, be given the requisite "standing to sue" in litigation which qualifies as a "case or controversy" within the meaning of article III of the Constitution of the United States. Furthermore, this bill in no way defines a case or controversy but merely grants standing to the parties involved in any case or controversy which may arise under the establishment and free exercise clauses of the first amendment to the Constitution. Since an interpretation of the provisions of the first amendment relating to religion is indispensable to the decision in the actions to be brought under the bill, a case or controversy within the meaning of article III necessarily exists.

The acts enumerated in section 1 are not intended to be inclusive although review is expressly limited to those acts. Instead, they are representative of legislation which affords substantial and direct financial aid to denominationally controlled and denominationally "related" institutions. Such aid, it has been asserted, is of doubtful constitutionality.

The bill is not intended to deal directly with the problem of the principle of separation of church and state nor with the constitutionality of any of the enumerated acts. It is designed, however, to remove any of the existing doubt as to the power of taxpayers, citizens, and institutions to obtain judicial review of the validity of Federal grants or loans under the provisions relating to religion in the first amendment.

LEGISLATIVE HISTORY

During the course of the 88th Congress, the Subcommittee on Constitutional Rights received numerous requests for an investigation of the expenditure of Federal funds to aid sectarian institutions. It began preliminary research in this area of constitutional law at that time. As the subcommittee continued its background study, there was increased interest and concern by taxpayers and nonprofit organizations because of the passage of the Elementary and Secondary Education Act of 1965 and the Higher Education Act of 1965, both of which authorize extensive allocations of Federal funds to nonsecular schools.

When the Senate deliberated the Elementary and Secondary Education Act, Senators Ervin and Cooper offered an amendment to provide for judicial review to determine whether disbursement under that act would be consistent with the first amendment to the Constitution. Discussion on this amendment elicited concern, expressed by Senator Morse and others, that such an amendment might jeopardize the passage of the Education Act. A similar amendment, which Senators Ervin and Cooper proposed to the Higher Education Facilities Act, was passed by the Senate in 1963, although later deleted in conference. The more recent amendment, however, failed to pass the Senate in 1965. At that time, Senator Morse showed his willingness to support an independent judicial review bill and subsequently introduced S. 2097. In introducing S. 2097, Senator Morse said that he, the Attorney General of the United States, and the Solicitor General of the United States, drafted the measure. Senator Morse pointed out that the bill, drafted in 1961, was reworked in 1963. On April 8, 1965, CONGRESSIONAL RECORD, volume 111, part 6, page 7595, he also said:

"I took the same position then which I take tonight, that if we are going to have a judicial review provision in our law, we should have it as a separate and independent bill. It should cover not only education legislation, but also all other Federal programs involving Federal grants and loans. I am satisfied that the bill would meet all the constitutional tests. I am satisfied that the bill, if enacted into law, would bring the first amendment under a review by the U.S. Supreme Court. It would end up by giving us, as we lawyers say, 'a decision on the nose.'"

In a memorandum originally submitted in 1961 by the Secretary of Health, Education, and Welfare to Senator Morse as chairman of the Senate Subcommittee on Education and endorsed again in 1965, the Department stated, with regard to judicial review of Federal aid to sectarian institutions:

"If Congress wishes to make possible a constitutional test of Federal aid to sectarian schools, it might authorize judicial review in the context of an actual case or controversy between the Federal Government and an institution seeking some form of assistance * * *. In the absence of some statutory provisions, there appears to be no realistic likelihood that Federal legislation raising the constitutional issues discussed in this memorandum will be resolved by judicial decision." [1]

On July 29, 1966, the Senate approved S. 2097 as amended by the committee. It was referred to the House Committee on the Judiciary on August 1 but no action was taken on the bill before Congress adjourned. S. 3, identical to that which passed in 1966, was introduced in the 90th Congress on January 11 by Senator Ervin and other Senators. Because extensive hearings were conducted on S. 2097 in 1966, no further hearings were had on S. 3.

NEED FOR LEGISLATION TO ENFORCE THE FIRST AMENDMENT TO THE CONSTITUTION

The principle of separation of church and state as emanating from the proscriptions of the first amendment is not under examination in this report. Suffice it to say, that in reaching the approximately 50 decisions handed down by the Supreme Court relating to the establishment and free exercise clauses of the first amendment, and more particularly in the five or six most recent and significant cases, the Court has agreed to this conclusion: *neither a State nor the Federal Government may pass laws nor levy taxes which support religious activities either directly or indirectly*. [Emphasis added.]

The reason this legislation was introduced was well stated by Prof. Louis L. Jaffe, Byrne professor of administrative law, Harvard Law School:

"* * * many of the States, and perhaps even the Federal Government, are or soon will be undertaking expenditures for education which allegedly violate constitutional prohibitions against aid to religious establishments. The law appears to be that a taxpayer suit to test the constitutionality of such expenditures by State and locality can be brought in some jurisdictions and not in others, and—somewhat of a crowning paradox—that the constitutionality of State and local expenditures can be adjudicated by the Supreme Court but not the constitutionality of Federal expenditure." [2]

Senator Ervin, in his opening statement, noted that:

"Many Americans share the conviction that the making of grants and loans of tax-raised moneys to religious institutions violates the first amendment to the Constitution. Unfortunately, there is grave doubt whether these Americans can obtain a judicial determination of this question. The doubt exists because of the decision of an old case, *Frothingham* v. *Mellon*, 262 U.S. 447 (1923) * * *. The point in this case most relevant to our inquiry is that portion of the decision which involves the claim set forth by Mrs. Frothingham, an individual plaintiff. She sued to enjoin the execution of an appropriation of Federal funds for grants to the States for maternal benefits. The Court held that under existing laws, applicable to a plaintiff seeking equitable relief in the form of an injunction she failed to make a case in her complaint.

[2] Jaffe, Louis L., "Judicial Control of Administrative Action," pp. 459–460 (1965).

"In the only portion of the opinion which is not obiter dicta, the Court said, at page 487, that a taxpayer's interest in the moneys of the Treasury 'is shared with millions of others; is comparatively minute and indeterminable; the effect upon future taxation * * * is so remote * * * that no basis is afforded for an appeal to the preventive powers of the Court.' "[3]

The question was posed by Prof. Paul A. Freund of Harvard Law School, in a statement submitted to the subcommittee, "[I]s the defect in a Federal taxpayer's suit, under the *Frothingham* rule, one of lack of standing in the lesser sense, or is it so fundamental that article III prevents any change in the prevailing Federal rule?"[4] A major purpose of the recent hearings conducted on S. 2097 was to answer that question; for if it were determined that the *Frothingham* decision was grounded on constitutional considerations, this legislation would be legally impermissible. Testimony at the hearings and the statements submitted to the subcommittee point out that the *Frothingham* decision was founded on grounds other than purely constitutional ones. Indeed, Professor Freund answered his own question.

"The defect in Federal taxpayers' suits does not rise to the level of an article III infringement * * * the present situation is not beyond repair through provision by Congress for a straightforward Federal taxpayer's suit * * *."[5]

Accordingly, Mr. William J. Butler of the New York Bar and counsel for the petitioner in *Engel* v. *Vitale*, 370 U.S. 421 (1962), stated:

"Of all the interpretations of *Frothingham* v. *Mellon* that have been offered, it would seem to me that the only one that is still viable is that the Constitution itself does not authorize a taxpayer suit to review the constitutionality of Federal expenditures. However, I suggest that it is certain that Congress has the right, by appropriate legislation, to grant a remedy for violations of the first amendment * * *."[6]

Addressing himself to the question of whether citizens should be allowed to sue to challenge the constitutionality of Federal expenditures under the first amendment, Prof. Leo Pfeffer said, "I think the initial question should be 'why not?' The burden of proof, it seems to me, would be upon those who assert that there should be no such right."[7] Professor Pfeffer went further. In reference to the *Frothingham* case, he said:

"It was decided in 1923 at the time when judicial attacks upon social welfare legislation, child labor laws, maximum hour laws, minimum wage laws, and so on, were frequent. The Court, while it invalidated a number of these laws, sought to exercise some degree of judicial restraint. And one of the means it applied for the exercise of this judicial restraint was to assert that a taxpayer, suing to invalidate such a law, must show that he has suffered some special damage or injury not shared by the common public or by all taxpayers. This was a decision based upon judicial discretion, upon the Court's interpretation of judicial policy. It was not based upon any constitutional limitation on the Court's power to act * * *."[8]

It has been suggested by various constitutional authorities, particularly Professor Jaffe and Kenneth Culp Davis, that the Supreme Court would even now hear a taxpayer's suit challenging a Federal appropriation which, in the words of the *Frothingham* case, is a "matter which admits of the exercise of the judicial power." And, in his statement submitted to the subcommittee, Professor Jaffe added, "But we know from *Everson*[9] that the questions which would be adjudicated under the proposed statute, are matters which admit of the exercise of the judicial power."[10] In such cases, the Court may still refuse to take jurisdiction of such a suit not for constitutional reasons but on grounds of public policy. In his testimony before the subcommittee, Professor Jaffe stated, however, that if "Congress mandates jurisdiction the Court may well be prepared to accept the congregational action as a definitive expression of a policy favoring the assumption of jurisdiction."[11]

It is important to remember that the constitutionality of none of the acts enumerated in section 1 has been ascertained by the Supreme Court of the United States. Furthermore, Prof. Leo Pfeffer pointed out in his testimony before the subcommittee that judicial review is available for every aspect of the Bill of Rights except the establishment clause of the first amendment. He stated. "* * * ironically, even though the first amendment says 'Congress shall make no law respecting the establishment of religion,' and does not say 'no State shall make a law respecting the establishment, the Court accepted jurisdiction of a suit against a State law alleged to violate that provision of the first amendment."[12]

In reference to the desirability of filling the procedural gap between the first amendment's guarantees regarding the freedom of religion and the enjoyment of that freedom, Professor Pfeffer noted that—

"* * * James Madison, when defending the Bill of Rights specifically stated that he expected that the courts would make themselves the special guardian of the Bill of Rights, which in fact they have done. They have done it except for this technical obstacle in establishment cases involving Federal expenditures. * * * and James Madison * * * did have that foresight and that intelligence to realize that the Bill of Rights without judicial enforcement would be what he called a parchment barrier."[13]

Interpretation of the religion clauses of the first amendment has remained fairly constant throughout its existence. This is apparent, at least, from an observation of the decisions of the Supreme Court and more particularly of the Court's repeated references to history as they are called upon to interpret and apply the first amendment. In spite of the precautionary adhered to by the Court, that no act of legislation will be declared void unless the act is unconstitutional beyond all reasonable doubt, recently, presumptions of invalidity have appeared to prevail against statutes alleged to interfere with the freedom of religion. This freedom has been said to occupy a preferred position in the Constitution.[14]

In this regard, Professor Pfeffer explained:

"* * * Of all the guarantees of the Bill of Rights none is more important, according to the thinking and decisions of the U.S. Supreme Court, than the first amendment. It was no accident that the Bill of Rights started with the first amendment, nor that the first amendment started with the words 'Congress shall make no law respecting an establishment of religion.' This, as the Supreme Court pointed out recently, was put first in the Bill of Rights because it was first in the minds of the Constitutional Fathers."[15]

There have been times in the history of the United States that the Supreme Court has declared that certain issues brought before it were of a political nature and that it would not enter this "political thicket." The Department of Health, Education, and Welfare, through its representative spokesman, suggested that since the President and the Congress have decided that the legislation to be subjected to review by this bill is constitutional, there was no need nor desirability of having the judicial branch of the Government lend its approval or disapproval to the question. The subcommittee submits, however, that the case of *Marbury* v. *Madison*, 1 Cr. 137 (1803), is still good law and applicable to the problem now confronting the Congress. In S. 3 Congress has not abdicated its responsibility for determining the constitutionality of its actions to the Supreme Court. To the contrary, it carefully deliberated upon the constitutional issues posed by the acts enumerated in section 1 of the bill. But, "the controversy over them is not stilled."[16] As Professor Freund submitted:

"The authority of government to aid religious groups is an area of dispute that does not lend itself to political settlement. In fact, it was precisely to keep religious differences out of the arena of politics that the first amendment was adopted.[17]

One of the initial sponsors of this legislation, Senator Wayne Morse, declared in his testimony before the subcommittee: "I think we will greatly strengthen our whole system of three coordinate and coequal branches of government if we provide in a broad bill a jurisdictional basis for judicial review."[18] The bill recognizes that the final power to adjudicate controversies arising under the Constitution rests in the courts rather than the Congress.

The case of *Horace Mann League* v. *Board of Public Works*, 242 Md. 645, 220 A. 51 (1966); certiorari denied, appeal denied, 385 U.S. 97 (1966), had been cited by opponents of judicial review as potentially productive of judicial guidelines in this area of constitutional law. On November 14, 1966, however, the Supreme Court refused to review the Maryland court of appeals decision declaring three construction grants to three church-controlled colleges unconstitutional under the first amendment to the U.S. Constitution. Commenting on the case when S. 3 was introduced, Senator Ervin said:

"These same three colleges which cannot constitutionally receive funds from the State of Maryland have each been recipients of Federal grants during the last 2 years. The effect, then, is that while the establishment clause was originally intended to apply only to Congress, today it is only enforced against State legislatures. On religion and the first amendment, the law of the land is less majestic than ironic."

Several cases are now pending which challenge the constitutionality of the Elementary and Secondary Education Act of 1965. The pendency of these cases may be cited by opponents of judicial review as a substitute for legislation. The committee feels, however, that if the question of standing is raised by the defendants in these cases, they will undoubtedly be successful under the present state of the law. Moreover, the failure of the Maryland case to produce new insight in our understanding of the first amendment should serve as an example to the Senate.

The U.S. Office of Education now indicates that it would welcome court rulings on the constitutionality of its programs. Commissioner Howe has stated that without such rulings, Federal and State educational agencies will continue to have problems.

ACTS SUBJECT TO REVIEW UNDER S. 3

The following is an outline of the existing laws which may be affected by this act:

These nine acts include, by application, church-related institutions among their beneficiaries. The extent of this inclusion is not, according to Department officials, accurately definable. In some cases the acts have not been in operation long enough to make a determination but the legislative history portends broad utilization of such institutions in these new Federal education programs.

Higher Education Facilities Act of 1963 (Public Law 88-204, as amended)

The Higher Education Facilities Act of 1963 authorizes the following programs:

Title I.—Federal matching grants for construction of undergraduate academic facilities at public 2-year institutions of higher education and at public and private 4-year institutions of higher education.

Title II.—Federal matching construction grants to public and private institutions of higher education and cooperative graduate center boards for the improvement of existing graduate schools and cooperative graduate centers and for assistance in the establishment of new graduate schools and cooperative graduate centers.

Title III.—Loans to public and private institutions of higher education for the construction of academic facilities. [As a result of amendments to Public Law 88-204 contained in Public Law 89-429, Participation Sales Act of 1966, construction loans are to be made from a separate revolving loan fund created in the Treasury.]

Fiscal year 1967 appropriations

Title I	$453,000,000
Title II	60,000,000
Title III	200,000,000
State administrative expenses and technical services	9,744,000

Title VII of the Public Health Service Act

The provisions of this title authorize Federal assistance to health research and teaching facilities and to various health professional personnel.

Part A provides for matching grants-in-aid to public and nonprofit institutions for the construction of facilities for research in the health sciences. Administration of this part is aided by the creation of the National Advisory Council on Health Research Facilities. The appropriation for fiscal year 1967 is $50,000,000.

Part B provides for grants for the construction of teaching facilities for medical, dental, and other related personnel. For this purpose $135 million has been appropriated for fiscal year 1967.

Part C authorizes the establishment of a student loan fund to assist schools in providing loans to students of medicine, dentistry, osteopathy, optometry, and veterinary medicine. The fiscal year 1967 appropriation is $25,325,000.

Part D is discussed in another section of this outline, under the Mental Retardation Facilities and Community Mental Health Act of 1963.

Part E authorizes a program of improvement grants to assist schools of medicine, dentistry, osteopathy, optometry, and podiatry in improving the quality of their educational instruction. For fiscal year 1967 the appropriation is $30 million.

Part F provides for a scholarship program for students of medicine, osteopathy, dentistry, optometry, podiatry, or pharmacy, allowing them assistance of up to $2,500 annually. The appropriation for fiscal year 1967 is $4,030,000.

Part G authorizes grants to be awarded to training centers of the allied health professions in junior colleges, colleges, and universities for construction, basic and special curriculum improvements, traineeships for students, and development of new methods of training. The appropriation for fiscal year 1967 is $3,735,000, none of which will be available for construction grants.

National Defense Education Act of 1958 (Public Law 85-864, as amended)

This act, as currently in effect, authorizes the following programs:

1. Federal contributions to public and private institutions of higher education for use in establishing funds for making low-interest loans to students. Fiscal year 1967 appropriation: $192 million.

2. Federal matching grants to State educational agencies for the acquisition of laboratory and other special equipment and for improvements in State services necessary for strengthening instruction in science, mathematics, history, civics, geography, economics, industrial arts, modern foreign language, English, and reading in public elementary and secondary schools: Federal loans to nonprofit private elementary and secondary schools for same purposes. Fiscal year 1967 appropriation: $88,200,000.

3. Graduate fellowships for persons interested in college teaching. Fiscal year 1967 appropriation: $81,957,000.

4. Federal matching grants to State educational agencies to assist them in carrying out programs of testing, guidance, and counseling in the public schools. [Private schools may also participate in the testing program, either under the State plan or under special arrangement with the Commissioner of Education.] Fiscal year 1967 appropriation: $24,500,000.

Federal grants to or contracts with public and private institutions of higher education for the operation by them of guidance and counseling institutes. Fiscal year 1967 appropriation: $7,250,000.

5. Federal grants to or contracts with public and private institutions of higher education for the operation by them of modern foreign language and area studies centers. Fellowships for individuals engaged in advanced training in modern foreign languages and area studies. Fiscal year 1967 appropriation: $15,800,000.

6. Federal grants to or contracts with public or nonprofit private agencies, organizations, or individuals for research and experimentation projects in the more effective use of educational media, and for dissemination of the results of such projects. Fiscal year 1967 appropriation: $4,400,000.

7. Federal matching grants to State educational agencies for the improvement of State statistical services. Fiscal year 1967 appropriation: $2,250,000.

8. Federal grants to or contracts with public and private institutions of higher education for the operation by them of advanced training institutes for teachers of history, geography, economics, civics, industrial arts, modern foreign languages, reading, international affairs, or English; for teachers of disadvantaged youth; and for school library personnel and educational media specialists. Fiscal year 1967 appropriation: $30 million.

Fiscal year 1967 appropriations.—$446,357,000 in the aggregate.

Mental Retardation Facilities and Community Mental Health Centers Construction Act of 1963 (Public Law 88-164)

Title I of this act authorizes (1) project grants for the construction of mental retardation research centers; (2) project grants for the construction of clinical facilities for the mentally retarded to be associated with a college or university; and (3) formula grants for the construction of public and other nonprofit facilities to provide comprehensive services to the mentally retarded.

Title II authorizes formula grants for the construction of public and private nonprofit community mental health centers.

Title III provides for grants for training, research, and demonstrations with respect to the education of handicapped children.

Public Law 89-105 authorizes grants to pay part of the cost of professional and technical personnel staffing the community mental health centers.

The total appropriation for this act for fiscal year 1967 is $113,600,000.

Title II of the act of September 30, 1950 (Public Law 874, 81st Cong.)

Title II of Public 874 was enacted as title I of the Elementary and Secondary Education Act of 1965 and is treated under that act below.

Elementary and Secondary Education Act of 1965 (Public Law 89-10, as amended)

The Elementary and Secondary Education Act of 1965 authorizes the following programs:

Title I.—Federal grants [through fiscal year 1968] to local educational agencies serving areas with concentrations of children from low-income families. Agencies may use grants for any of a wide range of programs designed to meet the special needs of educationally deprived children.

Local agency may qualify for grants on behalf of: (1) children from families with annual income of less than low-income factor [$2,000 fiscal year 1967; $3,000 fiscal year 1968]; (2) children from families with income in excess of low-income factor due to AFDC payments; and (3) children in local institutions for neglected or delinquent children, or in foster homes at public expense.

Additionally, State educational agencies may receive grants for use in educational programs for migratory children of migratory farm laborers and for handicapped children and children in institutions for the neglected and delinquent. Finally, grants may be made to the Department of the Interior for use in schools for Indian children [fiscal year 1967 only].

Pupils in private elementary and secondary schools are eligible to participate in certain title I programs administered by local educational agencies.

Title II.—Federal grants [through fiscal year 1970] to State educational agencies for the acquisition of school library resources, textbooks, and other instructional materials for use of the pupils and teachers in public and private elementary and secondary schools in the State.

Grants to Department of the Interior for acquisition of library resources, texts, and other materials for Indian schools [fiscal year 1967 only].

Grants to Department of Defense for acquisition of library resources, texts, and other materials for DOD overseas dependents schools [fiscal year 1967 only].

Title III.—Federal grants [through fiscal year 1970] to local educational agencies for establishment and operation of supplementary educational centers and services for the teachers and pupils of public and private elementary and secondary schools.

Grants [fiscal year 1967 only] to Secretary of Defense and Secretary of the Interior for use in providing special services in overseas dependents schools and Indian schools, respectively.

[*Title IV.*—Amends Cooperative Research Act; discussed below.]

Title V.—Grants [through fiscal year 1970] to State educational agencies for use in broad range of projects designed to strengthen and improve their educational leadership resources.

Arrangements for interchange of personnel between State educational agencies and U.S. Office of Education.

Title VI [added by Public Law 89-750, November 3, 1966].—Grants [through fiscal year 1968] to State educational agencies to assist them in programs for the improvement of education of handicapped children at preschool, elementary, and secondary levels. Handicapped children enrolled in private elementary and secondary schools are eligible to participate in programs assisted under this title.

Fiscal year 1967 appropriations

$1,342,410,000[1] in the aggregate—

Title I	$1,070,410,000
Title II	105,000,000
Title III	145,000,000
Title V	22,000,000

[1] Up to $30,000,000 of this sum to be available for use under the Adult Basic Education Act of 1966, enacted as title IV of Public Law 89-750, Nov. 3, 1966.

Cooperative Research Act of 1954 (Public Law 531, 83d Cong., as amended)

The Cooperative Research Act, as amended by Public Law 89-10 and by Public Law 89-750, authorizes the following programs:

1. Grants to colleges and universities; other public and nonprofit private agencies, institutions, and organizations; and to individuals for research in education, and for disseminating information derived therefrom.

2. Contracts or jointly financed cooperative arrangements with colleges and universities; other public and nonprofit or profitmaking private agencies, institutions, and organizations; and with individuals for purposes described in 1, above.

3. Grants to colleges and universities and other public or nonprofit private agencies, institutions, and organizations to assist them in providing training programs in educational research.

4. Contracts or jointly financed cooperative arrangements with colleges and universities and other public or private (nonprofit or profitmaking) agencies, institutions, and organizations for purposes described in 3, above.

5. Grants to or contracts with universities, colleges or other appropriate public or nonprofit private agencies or institutions, or combinations of such agencies and institutions, for part or all of the cost of constructing regional facilities for educational research and related purposes. (Funds for construction authorized through fiscal year 1970 only.)

Fiscal year 1967 appropriations.—$70,000,000 in the aggregate, of which sum up to $12,400,000 will remain available until expended for construction of regional facilities for research and related purposes.

Higher Education Act of 1965 (Public Law 89-329, as amended)

This act, as amended by Public Law 89-698 (October 29, 1966) and by Public Law 89-752 (November 3, 1966), authorizes the following programs:

Title I.—Grants to public and private institutions of higher education for strengthening their community service programs and increasing their effectiveness as agents for the solution of community problems such as housing, poverty, government, land use, health, and transportation. Fiscal year 1967 appropriation: $10 million.

Title II.—

Part A: Grants to public and private IHE for assistance in acquiring needed library resources such as books, periodicals, documents, and tapes. Fiscal year 1967 appropriation: $25 million.

Part B: Grants to public and private IHE for assistance in training persons in librarianship. Grants to or contracts with public and private IHE and other appropriate public or private agencies for research in the improvement of libraries and librarianship. Fiscal year 1967 appropriation: $7,300,000.

Part C: Transfer of funds to the Library of Congress for acquisition of library materials from around the world which are of value to scholarship and for distribution of bibliographic information on such materials. Fiscal year 1967 appropriation: $3 million.

Title III.—Grants for assisting developing institutions of higher education—public and private—in improving their academic quality by entering into cooperative arrangements with other, better developed institutions and agencies. Teaching fellowships for qualified graduate students and junior faculty members to encourage them to teach in developing institutions. Fiscal year 1967 appropriation: $30 million.

Title IV.—Part A: Grants to public and private IHE for use in making educational opportunity awards to needy students.

Contracts with State and local educational agencies and other public or nonprofit private organizations and institutions for identifying qualified but needy youth and encouraging them to continue their educations. Fiscal year 1967 appropriation: $114,500,000.

Part B: Advances to assist in establishing or strengthening reserve funds of State and nonprofit private student loan programs. Interim program of Federal insurance of student loans, to remain in effect until State and nonprofit private insurance programs are accessible to all students. Federally subsidized interest on federally insured student loans and loans insured under approved State and nonprofit private programs. Fiscal year 1967 appropriation: $46 million.

Part C: Grants to public and private IHE to assist them in operating student work-study programs. (Pt. C amended and expanded the college work-study program originally enacted as part of the Economic Opportunity Act of 1964, and transferred authority over the program from the Office of Economic Opportunity to the Office of Education.) Fiscal year 1967 appropriation: $134,100,000.

(Part D: Amendments to the National Defense Education Act, treated above.)

Title V.—(Part A: Establishment of an Advisory Committee on Quality Teacher Preparation.)

Part B: Establishment of a National Teachers Corps to attract and train qualified teachers and inexperienced teacher-interns who will be available, upon request of local educational agencies, for teaching in economically depressed areas. The local educational agency may use Teachers Corps members in providing certain educational services in which pupils of private schools can participate. Fiscal year 1967 appropriation: $7,500,000.

Part C: Graduate fellowships to enable teachers or prospective teachers to study at public and private IHE. Grants to and contracts with public and private IHE to assist them developing or strengthening graduate programs for teachers and prospective teachers. Fiscal year 1967 appropriation: $30 million.

Title VI.—Part A: Federal matching grants to public and private IHE for acquisition of laboratory, television, and other special equipment and materials needed for improving undergraduate instruction in science, mathematics, foreign languages, history, geography, government, English, other humanities, the arts, or education. Fiscal year 1967 appropriation: $14,500,000.

Part B: Grants to or contracts with public and private IHE for the operation by them of training institutes for individuals engaged in (or preparing to engage in) the use of educational media equipment in institution of higher education. Fiscal year 1967 appropriation: $2,500,000.

(*Title VII.*—Amendments to the Higher Education Facilities Act of 1963, treated above.)

Fiscal year 1967 appropriation.—$424,400,000 in the aggregate.

Economic Opportunity Act of 1964 (Public Law 88-452 as amended by Public Laws 89-253 and 89-794)

The following is a summary of the relevant portions of this act:

Title I establishes the Job Corps, which provides work experience and training for disadvantaged young men and women aged 16 through 21. This training takes place in residential rural conservation camps and urban training centers. The Neighborhood Youth Corps was also established to provide programs which will give employment and training in their own communities to young men and women aged 15 through 21 who live at home. The 1966 amendments authorized a new special impact program to employ and train unemployed and low-income residents of high-concentration poverty areas in activities designed to improve life in their neighborhood: $412.5 million was appropriated for fiscal year ending June 30, 1965; 1966 and 1967 appropriations were not earmarked by title: however, 1966 authorizations were $700 million and 1967 authorizations were $696 million; $211 million for the Job Corps, $410 million for the Neighborhood Youth Corps, and $75 million for the special impact program.

Title II authorizes general community action programs. Both public and private resources are to be mobilized to combat poverty within the community. Grants may be made to meet the costs of developing programs for technical assistance, research training and demonstration, and for special programs aimed at the chronically unemployed poor. The 1966 amendments add a new provision for grants to finance adult work training and employment programs for poor persons involved in community improvement activities. The Headstart and legal services programs which were not specified in the 1964 act are included in the 1966 amendments. Headstart includes the furnishing of health, nutritional, social, educational, and mental health services to young children: $340 million was appropriated for fiscal year ending June 30, 1965; 1966 and 1967 appropriations were not earmarked by title; however, 1966 authorizations were $850 million and 1967 authorizations were $846 million.

Adult basic education was transferred to the Office of Education under Public Law 89-750. Under this program grants may be made to States to initiate basic education programs for those 18 years of age and over whose inability to read and write seriously impairs their ability to get or retain employment.

Title III established special programs to combat poverty in rural areas, including assistance for migrants and seasonally employed agricultural workers, and authorizes loans with 15 years maximum maturity in amounts not exceeding $3,500 to low-income families, $35 million was appropriated for fiscal year ending June 30, 1965, 1966 authorizations were $55 million, and 1967 authorizations $57 million.

The Office of Economic Opportunity has stated that in respect to title II, it has often found that church related institutions are the most viable resource in a community for perfecting the purposes of this title. In this regard Mr. Sargent Shriver stated:

"Three or four years ago it was practically impossible for a Federal agency to give a direct grant to a religious group. Today we have given hundreds without violating the principle of separation of church and state."

Testimony elicited from agency representatives indicates that approximately 6 percent of the community action programs are operated or coordinated by church-affiliated organizations.

ANALYSIS OF PROVISIONS OF S. 3

In general

All the acts described above pose the problem of the extent to which the first amendment proscribes church-state interaction. Recent Supreme Court cases have engendered serious doubts as to the constitutionality of the type of public assistance which is offered by these acts to denominational institutions.

Furthermore, witnesses asserted that any distinction between limited and general aid would be specious. Likewise, to achieve direct aid, which is undoubtedly unconstitutional, by categorizing the funds or justifying such allocations in the interest of national defense or public welfare may also be fallacious.

In reference to the constitutionality of certain acts affected by this legislation and of his efforts to have them enacted by the Senate, Senator Wayne Morse made the following statement in his testimony before the subcommittee:

"* * * I could not speak with finality, no one could, until the court rules. I do not think that as Senators we ought to be put in a position where we have to move in legislatively by the back door. That is the way I described it.

"I said to the Senate, 'I am asking for this through the back door because I cannot walk through the front door for a general Federal aid-to-education bill, because I feel existing court decisions bar my entrance there.'

"So what did we do? Let us be frank about it. It is not a very nice term, it is a frank and accurate description of some of our legislation, to say we used what amounts to a subterfuge approach on this constitutional question. We had no other choice. We used the national defense education approach, we used the contract approach, we used the categorical approach. Why did we use those approaches? Because we were afraid, let us be frank about it, that we could have been beaten on the constitutional argument on a general aid bill."[19]

The basic purpose for this legislation can be seen in section 1. It is a twofold purpose. Primarily, the bill is designed to provide a feasible and practical test of the constitutionality of acts of Congress. As noted later in this report, all sections of the Constitution may be and generally have been, tested or enforced by the courts with one exception—the establishment clause of the first amendment. Thus, we see a second reason for S. 3 the enumerated acts in section 1 of the bill.

This bill is couched in terms of "the provisions relating to religion" although it is the establishment clause of the first amendment which is the particular right to be enforced. It is understood, however, that both the establishment clause and the free exercise clause can be read together. In fact, it is the free exercise of religion that is ultimately sought to be protected by a proscription against establishment. This interpretation of the first amendment has been endorsed on numerous occasions by the Supreme Court. Mr. Justice Goldberg, concurring in *Abington School District* v. *Schempp*, 374 U.S. 203, 305 (1963), said:

"These two proscriptions are to be read together, and in light of the single end which they are designed to serve. The basic purpose of the religion clause of the first amendment is to promote and assure the fullest possible scope of religious liberty and tolerance for all and to nurture the conditions which secure the best hope of attainment of that end."

The distinction is recognized here because the infringement on religious liberty in general occurs, if at all, by virtue of the fact that the Federal Government may be approaching through various acts the "establishment of religion" which is proscribed in the establishment clause of the first amendment.

The establishment clause is not confined to the protection of particular religious exercises. As Mr. Justice Douglas stated in the *Abington* case, at page 229:

"[I]t also forbids the State to employ its facilities or funds in a way that gives any church, or all churches, greater strength in our society than it would have by relying on its members alone."

The scope of this bill is focused more readily on the establishment clause for two additional reasons. All of the legislation enumerated in this section involves education in some way and *"the most effective way to establish any institution is to finance it; and this truth is reflected in the appeals by church groups for public funds to finance their religious schools."*[20] [Emphasis added.]

Mr. Justice Douglas continued—

"But the institution is an inseparable whole, a living organism, which is strengthened in proselytizing when it is strengthened in any department by contributions from other than its own members.

"Such contributions may not be made by the State even in a minor degree without violating the establishment clause * * *. What may not be done directly may not be done indirectly lest the establishment clause become a mockery."

The *Abington* case is particularly helpful in an understanding of the constitutional significance of S. 3. It explains another reason for placing this legislation in the framework of the establishment clause. In footnote 9 in the opinion of the court, Mr. Justice Clark explains "[*B*]*ut the requirements for standing to challenge State action under the establishment clause, unlike those relating to the free exercise clause do not include proof that particular religious freedoms are infringed.*" [Emphasis added.]

Section by section

Publication of the order of the Federal officer approving or disapproving a grant or loan under any of the acts enumerated in section 1 is a condition precedent to the effectuation of such order. Furthermore, this publication will constitute official notice to any party or parties wishing to challenge such order as violative of the establishment clause of the first amendment to the Constitution and the limitation on the bringing of an action shall commence on the date of such publication.

Section 2 of the bill is an authorization granting standing to "any public or other nonprofit agency or institution which is or may be prejudiced by the order of the Federal officer making a loan or grant under the authority of any of the Acts enumerated in section 1." Prejudice occurs to the complaining party when the making of such grant or loan serves to reduce the amount of funds available in a given year for a grant or loan under any of these acts to such complaining agency or institution and when such grant or loan is deemed inconsistent with the establishment clause of the first amendment. The complaining party may bring an action for declaratory judgment within 60 days after the publication of the order of the Federal officer in the Federal Register. The defendants will be the Federal officer and the agency or institution whose application has been approved.

It is understood that no potential beneficiary of Federal appropriations has a constitutional right to receive financial benefits from the Federal Government. Nevertheless, a potential nondenominational beneficiary has an interest in these appropriations because but for the allegedly unconstitutional aid to church-related institutions the plaintiff institution would have received Federal aid for its own needs. It would, therefore, be prejudiced to such an extent that equitable relief should be made available. Additionally, the injury is "direct" enough to support standing.

Section 3(a) authorizes corporate and individual taxpayers to bring an action for declaratory judgment against the Federal officer making a grant or loan under any of the acts enumerated in section 1. The action shall be based on allegations that such grant or loan is inconsistent with the establishment clause of the first amendment of the Constitution. In order to maintain an action under this section a plaintiff need only show that it has paid any part of such income tax imposed upon its taxable income under section 1 of the Internal Revenue Code of 1954 for the last preceding calendar or taxable year. A 60-day limitation on the bringing of an action is also provided in this section. This subsection also provides that "[N]o additional showing of direct or indirect financial or other injury, actual or prospective, on the part of the plaintiff shall be required for the maintenance of any such action."

The type of action contemplated here is, of course, couched in term of the first amendment and is essentially different from that in the *Frothingham* case. Professor Freund, in a statement submitted to the subcommittee, states that this action—

"* * * does not rest on a quantitative comparison of the financial stake of various classes of taxpayers. The object of the challenge in that case (*Frothingham* v. *Mellon*) was on expenditure asserted not to fall within the national power to tax and spend for the general welfare but to fall within the realm of State authority."[21]

The following additional statement by Professor Freund is of critical importance to an understanding of this legislation:

"Under this bill, however, the litigation would be brought to vindicate rights secured by the first amendment, a right to be free of a Federal religious establishment, a right closely allied to the right of free exercise of religion, and one that traditionally took the form of freedom from enforced contribution to support religious activities. In this view, the quantum of the financial stake is not central to the right; any such use of a citizen's tax payments would constitute the heart of the offense to his autonomy in the religious sphere."[22]

Under subsection (b) all citizens are afforded identical relief to that of the taxpayer in subsection (a). The right which is sought to be protected is not one of monetary concern at all but is one of citizenship under the first amendment. The challenge is to an expenditure which allegedly constitutes a forbidden law respecting the establishment of religion. The plaintiff sues not only for himself but also in behalf of all other citizens to vindicate the public interest in the observance of the provisions relating to religion in the first amendment.

William J. Butler, testifying before the subcommittee, asserted that "Congress has the right, duty, and power to provide a procedure whereby citizens of the United States may control the unlawful acts of public officials through the courts * * *. It is his interest as a citizen of the United States that would motivate him to initiate a lawsuit under this act."[23] The actions of the public officials which are challenged as being unlawful under this bill are those which are unlawful only because the acts authorizing their action may be unconstitutional.

Mr. Butler also noted—

"Moreover, over a period of a substantial number of years and in a number of leading cases, apparently because of the importance of the first clause of the first amendment, the U.S. Supreme Court has recognized standing to sue where there is no financial basis at all. Thus, in *Everson, McCollum, Zorach, Engel, Murray,* and *Schempp,* the Court has recognized parenthood of a child in the school affected as sufficient basis for standing to sue. *Everson* v. *Board of Education*, 330 U.S. 1 (1947); *McCollum* v. *Board of Education*, 333 U.S. 203 (1948); *Zorach* v. *Clauson*, 343 U.S. 306 (1952); *Engel* v. *Vitale*, *supra; School District of Abington Township, Pa.*, v. *Schempp*, 374 U.S. 203 (1963)." Finally, Prof. Louis Jaffe concluded that—

"It seems to me clear that the procedural conditions relevant to case or controversy do not differ in the slightest as between a State and a Federal taxpayer suit. In both cases there is a plaintiff prepared to carry the burden of persuasion and a defendant ready to defend. There is little risk that the Court will not be adequately briefed.

"A citizen or taxpayer sufficiently concerned to bring a lawsuit in which he does not have a monetary concern is for that very reason likely to take seriously the presentation of the lawsuit. The judgment will be definitive; it will determine either that the defendant does or does not have a duty to enforce the law in question. There need be nothing contingent or speculative about the question to be decided and if there is, jurisdiction can be refused on that ground." [25]

Finally, it should be noted that Congress has in the past authorized defined classes of persons to seek review of administrative orders where they qualify as "aggrieved persons." The most common form of relief has been obtained through an injunction or action for declaratory judgment. Typically, Federal courts have recognized standing in consumers, licensees, and television viewers. In *Associated Industries* v. *Ickes*, 134 F. 2d 694 (1943), the Court of Appeals, Second Circuit, held that an association of industrial firms, including consumers, had standing to review an order by the Secretary of the Interior purporting to increase the minimum price of coal. After reviewing a series of cases dealing with standing to challenge official action, Judge Frank declared:

"While Congress can constitutionally authorize no one, in the absence of an actual justifiable controversy, to bring a suit for the judicial determination either of the constitutionality of a statute or the scope of powers conferred by a statute upon Government officers, it can constitutionally authorize one of its own officials, such as the Attorney General to bring a proceeding to prevent another official from acting in violation of his statutory powers; for then an actual controversy exists, and the Attorney General can properly be vested with authority, in such a controversy, to vindicate the interest of the public or the Government. Instead of designating the Attorney General, or some other public officer, to bring such proceedings, Congress can constitutionally enact a statute conferring on any nonofficial person, or on a designated group of nonofficial persons, authority to bring a suit to prevent action by an officer in violation of his statutory powers; for then, in like manner, there is an actual controversy, and there is nothing constitutionally prohibiting Congress from empowering any person, official or not, to institute a proceeding involving such a controversy, even if the sole purpose is to vindicate the public interest. Such persons, so authorized, are, so to speak private attorney generals." 134 F. 2d at 704.

Prof. Kenneth Culp Davis in his "Administrative Law Treatise," volume 3, section 22.05, points out that "the basic idea of the private attorney general who can sue to vindicate the public interest is a very old one." The action by citizens under subsection (b) may be brought in behalf of the individual plaintiff and all others in similar circumstances. This principle has never been repudiated by any Federal court and thus affords an additional ground on which a plaintiff may base his claim.

Section 4 authorizes any public or other nonprofit institution or agency to bring a civil action to review the final decision of a Federal officer which denies a loan or grant applied for under any act enumerated in section 1. The denial must have been on the ground that such grant or loan would be inconsistent with the establishment clause of the first amendment to the Constitution. The challenge to such denial must be instituted within 60 days after the order of disapproval appears in the Federal Register.

Section 5 contains the procedural and jurisdictional provisions for the operation of this proposed act. All actions would be brought in the District Court of the United States for the District of Columbia which would have jurisdiction without regard to the amount in controversy. The District of Columbia is the obvious jurisdiction since the defendant in all three types of actions under this act includes the Federal officer issuing the order which is to be challenged, and, with the exception of section 2 actions, the Federal officer is the only defendant.

This section also provides that "in the event two or more civil actions are brought under the provisions of this Act challenging the constitutional validity of the same loan or grant, such court may consolidate such civil actions for the purpose of trial and judgment." This provision will reduce any possible increase in the case load of the Federal courts. Furthermore, since jurisdiction is limited to the District of Columbia, there is a geographical barrier to the prosecution of frivolous suits. It should be noted also that litigation such as that contemplated by this act will be a substantial financial undertaking and must be undertaken within 60 days after publication of the order approving or disapproving the grant or loan.

The provision in section 5 which calls for expediting review and appeal should guarantee speedy and orderly processing of cases under this act.

The remaining portions of subsection (a) of section 5 include the following:

"All process, including subpenas, issued by the district court of the United States for any such district may be served in any other district. In any action under this Act the court shall have authority to determine all matters of fact or law appropriate to a decision of the case. No costs shall be assessed against the United States in any proceeding under this Act. In all litigation under this Act, the Federal officer shall be represented by the Attorney General."

Subsection (b) of section 5 provides "the judgment of the district court shall be subject to review as provided in sections 1252, 1253, 1254, and 1291 of title 28 of the United States Code" which read as follows:

"§ 1252. Direct appeals from decisions invalidating Act of Congress.

"Any party may appeal to the Supreme Court from an interlocutory or final judgment, decree or order of any court of the United States, the United States District Court for the District of the Canal Zone, the District Court of Guam and the District Court of the Virgin Islands and any court of record of Puerto Rico, holding an Act of Congress unconstitutional in any civil action, suit, or proceeding to which the United States or any of its agencies, or any officer or employee thereof, as such officer or employee, is a party.

"A party who has received notice of appeal under this section shall take any subsequent appeal or cross appeal to the Supreme Court. All appeals or cross appeals taken to other courts prior to such notice shall be treated as taken directly to the Supreme Court.

"§ 1253. Direct appeals from decisions of three-judge courts.

"Except as otherwise provided by law, any party may appeal to the Supreme Court from an order granting or denying, after notice and hearing, an interlocutory or permanent injunction in any civil action, suit or proceeding required by any Act of Congress to be heard and determined by a district court of three judges.

"§ 1254. Courts of appeals; certiorari; appeal; certified questions.

"Cases in the courts of appeals may be reviewed by the Supreme Court by the following methods:

"(1) By writ of certiorari granted upon the petition of any party to any civil or criminal case, before or after rendition of judgment or decree;

"(2) By appeal by a party relying on a State statute held by a court of appeals to be invalid as repugnant to the Constitution, treaties or laws of the United States, but such appeal shall preclude review by writ of certiorari at the instance of such appellant, and the review on appeal shall be restricted to the Federal questions presented;

"(3) By certification at any time by a court of appeals of any question of law in any civil or criminal case as to which instructions are desired, and upon such certification the Supreme Court may give binding instructions or require the entire record to be sent up for decision of the entire matter in controversy.

"§ 1291. Final decisions of district courts.

"The courts of appeals shall have jurisdiction of appeals from all final decisions of the district courts of the United States, District Court for the District of the Canal Zone, the District Court of Guam, and the District Court of the Virgin Islands, except where a direct review may be had in the Supreme Court."

Section 6(a) provides: An interlocutory injunction enjoining the payment of a grant or loan, or any portion thereof, made pursuant to the order which is claimed to be invalid in an action under this act may be granted by the court at any stage of the proceedings authorized by this act. To avoid interrupting important education and welfare programs already in operation, none of these programs will be subject to attack through the procedures provided by this legislation. Furthermore, a grant or loan once perfected may not be refunded under the provisions of this bill. The intent is to bring under review those orders authorizing a grant or loan under any of the acts enumerated in section 1 which occur after enactment of this bill. To provide otherwise would be to create grave and obvious hardships. Thus, it is anticipated that refunding shall only occur in those instances wherein a specific order, effected by this act, is successfully challenged as being inconsistent with the establishment clause of the first amendment.

An objection to the bill particularly aimed at section 6(a) concerns the possibility of a multitude of lawsuits which may impede the administration's program for health, education, and welfare. This objection is not, however, supported by the evidence. In the recent case of *Office of Communication of the United Church of Christ* v. *F.C.C.*, 359 F. 2d 994 (C.A. D.C. Cir. 1966), the court met these fears in the following manner:
